IN RE: Petitioner:
Beneficiary:

PETITION: Petition for a Nonimmigrant Worker Pursuant to Section 101(a)(15)(H)(i)(b) of the
Immigration and Nationality Act, 8 U.S.C. § 1101(a)(15)(H)(i)(b)

ON BEHALF OF PETITIONER:

INSTRUCTIONS:

This is the decision in your case. All documents have been returned to the office that originally decided your case. Any further inquiry must be made to that office.

A handwritten signature in black ink that reads "Robert P. Wiemann".

Robert P. Wiemann, Chief
Administrative Appeals Office

DISCUSSION: The director of the California Service Center denied the nonimmigrant visa petition and the matter is now before the Administrative Appeals Office (AAO) on appeal. The appeal will be dismissed. The petition will be denied.

The petitioner is a convenience store and gas station with four employees and a reported gross annual income of \$250,000 at the time of filing¹. It seeks to employ the beneficiary as an accountant pursuant to section 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act (the Act), 8 U.S.C. § 1101(a)(15)(H)(i)(b).

The record of proceeding before the AAO contains: (1) Form I-129 and supporting documentation; (2) the director's request for additional evidence; (3) counsel's response to the director's request; (4) the director's denial letter; and (5) Form I-290B, with counsel's brief. The AAO reviewed the record in its entirety before issuing its decision.

The issues before the AAO are whether the proffered position qualifies as a specialty occupation, and whether the beneficiary is qualified to perform the duties of a specialty occupation. To meet its burden of proof, in regard to whether the proffered position qualifies as a specialty occupation, the petitioner must establish that the job it is offering to the beneficiary meets the following statutory and regulatory requirements.

Section 214(i)(1) of the Act, 8 U.S.C. § 1184(i)(1), defines the term "specialty occupation" as an occupation that requires:

- (A) theoretical and practical application of a body of highly specialized knowledge, and
- (B) attainment of a bachelor's or higher degree in the specific specialty (or its equivalent) as a minimum for entry into the occupation in the United States.

The term "specialty occupation" is further defined at 8 C.F.R. § 214.2(h)(4)(ii) as:

An occupation which requires theoretical and practical application of a body of highly specialized knowledge in fields of human endeavor including, but not limited to, architecture, engineering, mathematics, physical sciences, social sciences, medicine and health, education, business specialties, accounting, law, theology, and the arts, and which requires the attainment of a bachelor's degree or higher in a specific specialty, or its equivalent, as a minimum for entry into the occupation in the United States.

Pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(A), to qualify as a specialty occupation, the position must meet one of the following criteria:

- (1) A baccalaureate or higher degree or its equivalent is normally the minimum requirement for entry into the particular position;
- (2) The degree requirement is common to the industry in parallel positions among similar organizations or, in the alternative, an employer may show that its particular position is so complex or unique that it can be performed only by an individual with a degree;

¹ This information was provided on the Form I-129 petition. The petitioner did not submit financial documentation in support of its stated gross annual income.

- (3) The employer normally requires a degree or its equivalent for the position; or
- (4) The nature of the specific duties is so specialized and complex that knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

Citizenship and Immigration Services (CIS) interprets the term "degree" in the above criteria to mean not just any baccalaureate or higher degree, but one in a specific specialty that is directly related to the proffered position.

To determine whether a particular job qualifies as a specialty occupation, CIS does not simply rely on a position's title. The specific duties of the proffered position, combined with the nature of the petitioning entity's business operations, are factors to be considered. CIS must examine the ultimate employment of the alien, and determine whether the position qualifies as a specialty occupation. *Cf. Defensor v. Meissner*, 201 F. 3d 384 (5th Cir. 2000). The critical element is not the title of the position nor an employer's self-imposed standards, but whether the position actually requires the theoretical and practical application of a body of highly specialized knowledge, and the attainment of a baccalaureate or higher degree in the specific specialty as the minimum for entry into the occupation, as required by the Act.

The petitioner seeks the beneficiary's services as an accountant. Evidence of the beneficiary's duties includes: the Form I-129; the petitioner's October 20, 2005 letter in support of the petition; and a list of duties provided by counsel in his response to the director's request for evidence. As stated by the petitioner, the duties of the proffered position would require the beneficiary to:

- Analyze financial information and prepare financial reports;
- Analyze financial information by detailing assets, liabilities, and capital and prepare balance sheets, profit and loss statements and other reports to place before management the current and projected financial position of the petitioner;
- Analyze past and present financial operations and estimate future revenues and expenditures in order to prepare budgets;
- Analyze records of present and past operation trends and costs, estimated and realized revenues, administrative commitments and obligations incurred to project future revenues and expenses;
- Maintain budgeting systems, which provide control of expenditures made to carry out activities, such as advertising and marketing, and production control with manufacturers with whom orders will be placed for goods;
- Interpret the budget to management and advise them on the effective use of resources and assumptions underlying budget forecasts;
- Analyze data obtained and apply principles of accounting to provide detailed cost information not supplied by general accounting systems;

- Analyze data obtained and determine the actual purchase costs, and prepare periodic reports comparing standard costs to actual purchase costs and provide management with reports specifying and comparing factors affecting prices and profitability;
- Establish and coordinate implementation of accounting and accounting control procedures and provide efficient and cost effective accounting support to operations;
- Compute taxes owed according to prescribed rates and ensure that the establishment complies with periodic tax payments, information reporting and other taxing authority requirements; and
- Monitor daily sales transactions, payroll, receivables, purchase and sales contracts, and personnel records, and see that bank statements are properly reconciled and reported for audit.

The petitioner requires a minimum of a bachelor's degree in business administration, or its equivalent, for entry into the proffered position.

To make its determination whether the employment just described qualifies as a specialty occupation, the AAO turns to the criteria at 8 C.F.R. § 214.2(h)(4)(iii)(A)(1) and (2): a baccalaureate or higher degree or its equivalent is the normal minimum requirement for entry into the particular position; and a degree requirement is common to the industry in parallel positions among similar organizations or a particular position is so complex or unique that it can be performed only by an individual with a degree. Factors considered by the AAO when determining these criteria include: whether the Department of Labor's *Occupational Outlook Handbook (Handbook)*, on which the AAO routinely relies for the educational requirements of particular occupations, reports the industry requires a degree; whether the industry's professional association has made a degree a minimum entry requirement; and whether letters or affidavits from firms or individuals in the industry attest that such firms "routinely employ and recruit only degreed individuals." See *Shanti, Inc. v. Reno*, 36 F. Supp. 2d 1151, 1165 (D. Minn. 1999) (quoting *Hird/Blaker Corp. v. Sava*, 712 F. Supp. 1095, 1102 (S.D.N.Y. 1989)).

The petitioner has stated that the proffered position is that of an accountant. To determine whether the duties of the proffered position support the petitioner's characterization of its employment, the AAO turns to the 2006-2007 edition of the *Handbook* for its discussion of management accountants, the category of accounting most closely aligned to the duties described by the petitioner. As stated by the *Handbook*, management accountants:

[r]ecord and analyze the financial information of the companies for which they work. Among their other responsibilities are budgeting, performance evaluation, cost management, and asset management They analyze and interpret the financial information that corporate executives need in order to make sound business decisions. They also prepare financial reports for other groups, including stockholders, creditors, regulatory agencies, and tax authorities. Within accounting departments, management accountants may work in various areas, including financial analysis, planning and budgeting, and cost accounting.

The AAO finds the above discussion to be generally reflected in the petitioner's description of the duties of the proffered position and agrees that the petitioner's employment would require the beneficiary to have an understanding of accounting principles. However, not all accounting employment is performed by degreed

accountants. Therefore, the performance of duties requiring accounting knowledge does not establish the proffered position would impose a degree requirement on the beneficiary. The question is not whether the petitioner's position requires knowledge of accounting principles, which it does, but rather whether it is one that normally requires the level of accounting knowledge that is signified by at least a bachelor's degree, or its equivalent, in accounting.

The *Handbook's* discussion of the occupation of accountants clearly indicates that accounting positions may be filled by individuals holding associate degrees or certificates, or who have acquired their accounting expertise through experience:

Capable accountants and auditors may advance rapidly; those having inadequate academic preparation may be assigned routine jobs and find promotion difficult. Many graduates of junior colleges or business or correspondence schools, as well as bookkeepers and accounting clerks who meet the education and experience requirements set by their employers, can obtain junior accounting positions and advance to positions with more responsibilities by demonstrating their accounting skills on the job.

It also notes in its description of the work performed by bookkeeping, accounting and auditing clerks that:

Demand for full-charge bookkeepers is expected to increase, because they are called upon to do much of the work of accountants, as well as perform a wider variety of financial transactions, from payroll to billing. Those with several years of accounting or bookkeeper certification will have the best job prospects.²

Further proof of the range of academic backgrounds that may prepare an individual for accounting employment is provided by the credentialing practices of the Accreditation Council for Accountancy and Taxation (ACAT), an independent accrediting and monitoring organization affiliated with the National Society of Accountants. The ACAT does not require a degree in accounting or a related specialty to issue a credential as an Accredited Business Accountant® /Accredited Business Advisor® (ABA). Eligibility for the eight-hour comprehensive examination for the ABA credential requires only three years of "verifiable experience in accounting, taxation, financial services, or other fields requiring a practical and theoretical knowledge of the subject matter covered on the ACAT Comprehensive Examination." Up to two of the required years of work experience may be satisfied through college credit.³

To determine whether the accounting knowledge required by the proffered position rises above that which may be acquired through experience or an associate's degree in accounting,⁴ the AAO turns to the record for

² *Occupational Outlook Handbook*, 2006-2007 Edition, at www.bls.gov/oco/ocos144.htm.

³ Information provided by the ACAT website [REDACTED] The *Handbook* identifies the ACAT website as one of several "Sources of Additional Information" at the end of its discussion of the occupation of accountants.

⁴ According to the website for Skyline College, a community college located in San Mateo, CA [REDACTED] an associate's degree in business or accounting would involve learning the fundamentals about financial accounting principles and concepts, balance sheets, income statements, cash flow statements, the GAAP, forecasting, budgeting, cost accounting, break even analysis, developing and operating a computerized accounting system. Thus, an associate's degree would provide knowledge about the GAAP and accounting techniques that serve the needs of management and facilitate decision-making.

information regarding the nature of the petitioner's business operations. While the size of a petitioner's business is normally not a factor in determining the nature of a proffered position, both its level of income and the extent of its business operations are appropriately reviewed when a petitioner seeks to employ an H-1B worker as an accountant. In cases where a petitioner's business is relatively small, like that in the instant case, the AAO reviews the record for evidence that its operations, are, nevertheless, of sufficient scope and/or complexity to indicate that it would employ the beneficiary in an accounting position requiring a level of financial knowledge that may be obtained only through a baccalaureate degree in accounting or its equivalent.

At the time of filing, the petitioner indicated on the Form I-129 that it had four employees and a gross annual income of \$250,000. In response to the director's request for evidence, the petitioner stated for the first time, that it operates one store, and has two affiliates, resulting in a consolidated annual income exceeding \$1,000,000. The petitioner did not, however, provide proof of the existence of these affiliates or its association with them. Nor did the petitioner provide evidence of the nature and scope of any affiliate's business operations. The petitioner also failed to provide evidence of the nature and scope of its own financial operations, and thus did not establish the financial operations within which the beneficiary would be employed. Simply going on the record without supporting documentary evidence is not sufficient for purposes of meeting the burden of proof in these proceedings. *Matter of Soffici*, 22 I&N Dec. 158, 165 (Comm. 1998) (citing *Matter of Treasure Craft of California*, 14 I&N 190 (Reg. Comm. 1972)).

As the record fails to establish the type of financial structure within which the beneficiary would work, the duties of the proffered position may not be established as sufficiently complex to indicate that the petitioner would employ the beneficiary as a management accountant. Instead, as listed, they appear more closely aligned to accounting responsibilities that may be performed by junior accountants, employment that does not impose a baccalaureate degree requirement on those seeking entry-level employment. Therefore, the petitioner has not established the proffered position as a specialty occupation under the first criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A) – a baccalaureate or higher degree or its equivalent is normally the minimum requirement for entry into the particular position.

To establish the proffered position as a specialty occupation under the second criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A), a petitioner must prove that a specific degree requirement is common to its industry in parallel positions among similar organizations or that the proffered position is so complex or unique that it can be performed only by an individual with a degree. In the instant case, counsel, in response to the director's request for evidence, asserted that the *Handbook's* discussion of the degree requirement for the occupation of accountants established the proffered position as a specialty occupation under the criterion's first prong. The AAO does not agree.

The proffered position is not that of a management accountant, but could be more closely aligned with the position of junior accountant, employment that the *Handbook* indicates may be performed by individuals who have associate's degrees in accounting or who have an appropriate level of experience. Accordingly, the proffered position may not be established as a specialty occupation under the first prong of the second criterion based on the *Handbook's* discussion of the standard degree requirement for management, public and government accountants. As the petitioner has submitted no evidence to prove that its degree requirement for

the proffered position is common in parallel positions among similar organizations, it has failed to establish the proffered position as a specialty occupation based on the practices in its industry.

The AAO also concludes that the record before it does not establish that petitioner's position qualifies as a specialty occupation under the second prong at 8 C.F.R. § 214.2(h)(4)(iii)(A)(2) -- the position is so complex or unique that it can be performed only by an individual with a degree. It finds no evidence that would support such a finding. The duties detailed for the position by the petitioner are presented only in general terms without discussing the specific tasks to be performed by the beneficiary on a daily basis in the petitioner's specific business environment. There is nothing in the record to establish that the duties of this specific position are any more complex or unique than those normally performed in the industry by junior accountants or other accounting personnel who have gained their expertise by appropriate experience or education falling below a baccalaureate level. Accordingly, the petitioner has not established its position as a specialty occupation under either prong of the second criterion.

To determine whether a proffered position may be established as a specialty occupation under the third criterion -- the employer normally requires a degree or its equivalent for the position -- the AAO usually reviews the petitioner's past employment practices, as well as the histories, including names and dates of employment, of those employees with degrees who previously held the position, and copies of those employees' diplomas. In the instant case, the petitioner has submitted no evidence regarding its hiring practices. Accordingly, the record does not establish the proffered position as a specialty occupation under the third criterion.

The fourth criterion requires a petitioner to establish that the nature of the specific duties of its position is so specialized and complex that the knowledge required to perform these duties is usually associated with the attainment of a baccalaureate or higher degree. The AAO, however, finds no evidence to indicate that the beneficiary's duties would require greater knowledge or skill than that normally possessed by junior accountants or other accounting personnel who have gained their expertise by appropriate experience or education falling below a baccalaureate level. As stated above, the duties detailed for the position by the petitioner are presented only in general terms without discussing the specific tasks to be performed by the beneficiary on a daily basis in the petitioner's specific business environment. Further, the position, as described, does not appear to represent a combination of jobs that would require the beneficiary to have a unique set of skills other than those of a junior accountant. As a result, the record fails to establish that the proffered position meets the specialized and complex threshold of the fourth criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A).

The final issue to be determined is whether the petitioner is qualified to perform the duties of a specialty occupation.

Section 101(a)(15)(H)(i)(b) of the Act, 8 U.S.C. § 1101(a)(15)(H)(i)(b), provides, in part, for the classification of qualified nonimmigrant aliens who are coming temporarily to the United States to perform services in a specialty occupation.

Section 214(i)(2) of the Act, 8 U.S.C. § 1184(i)(2), states that an alien applying for classification as an H-1B nonimmigrant worker must possess:

- (A) full state licensure to practice in the occupation, if such licensure is required to practice in the occupation,
- (B) completion of the degree described in paragraph (1)(B) for the occupation, or
- (C) (i) experience in the specialty equivalent to the completion of such degree, and
 - (ii) recognition of expertise in the specialty through progressively responsible positions relating to the specialty.

Pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(C), to qualify to perform services in a specialty occupation, the alien must meet one of the following criteria:

- (1) Hold a United States baccalaureate or higher degree required by the specialty occupation from an accredited college or university;
- (2) Hold a foreign degree determined to be equivalent to a United States baccalaureate or higher degree required by the specialty occupation from an accredited college or university;
- (3) Hold an unrestricted State license, registration or certification which authorizes him or her to fully practice the specialty occupation and be immediately engaged in that specialty in the state of intended employment; or
- (4) Have education, specialized training, and/or progressively responsible experience that is equivalent to completion of a United States baccalaureate or higher degree in the specialty occupation, and have recognition of expertise in the specialty through progressively responsible positions directly related to the specialty.

Pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(D), for purposes of paragraph (h)(4)(iii)(C)(4) of this section, equivalence to completion of a United States baccalaureate or higher degree shall mean achievement of a level of knowledge, competence, and practice in the specialty occupation that has been determined to be equal to that of an individual who has a baccalaureate or higher degree in the specialty and shall be determined by one or more of the following:

- (1) An evaluation from an official who has authority to grant college-level credit for training and/or experience in the specialty at an accredited college or university which has a program for granting such credit based on an individual's training and/or work experience;
- (2) The results of recognized college-level equivalency examinations or special credit programs, such as the College Level Examination Program (CLEP), or Program on Noncollegiate Sponsored Instruction (PONSI);
- (3) An evaluation of education by a reliable credentials evaluation service which specializes in evaluating foreign educational credentials;
- (4) Evidence of certification or registration from a nationally-recognized professional association or society for the specialty that is known to grant certification or

registration to persons in the occupational specialty who have achieved a certain level of competence in the specialty;

- (5) A determination by the Service that the equivalent of the degree required by the specialty occupation has been acquired through a combination of education, specialized training, and/or work experience in areas related to the specialty and that the alien has achieved recognition of expertise in the specialty occupation as a result of such training and experience.

The *Handbook* states that most accountant positions require at least a bachelor's degree in accounting or a related field.

The petitioner seeks to qualify the beneficiary by establishing that she meets the requirements of 8 C.F.R. § 214.2(h)(4)(iii)(C)(4). In support of this assertion, the petitioner submitted an evaluation from [REDACTED] an evaluator with Multinational Education & Information Services, Inc. The petitioner possesses the following formal post-secondary education: a diploma in commerce from the Addis Ababa Commercial College in Ethiopia (per evaluation – equivalent to a one-year program of academic studies in accounting and transferable to an accredited university in the United States); and a professional certificate in management from the Nazareth College of Technical Teacher Education in Ethiopia (per evaluation – one year of training and studies in management); and a diploma in management from the Nazareth College of Technical Teacher Education in Ethiopia (per evaluation – one year of training and studies in management.) [REDACTED] states that the beneficiary needs, based on CIS regulations requiring three years of specialized training or work experience to substitute for every year an alien lacks at the university level, nine years of experience to compensate for the three years he lacks at the baccalaureate level. [REDACTED] then concludes that the beneficiary's education and work experience are equivalent to a bachelor's degree in accounting from an accredited college or university in the United States. The AAO does not agree.

An evaluation of a beneficiary's education, training, and experience may only be made by an official who has authority to grant college-level credit for training and/or experience in the specialty at an accredited college or university which has a program for granting such credit. 8 C.F.R. § 214.2(h)(4)(iii)(D)(1). The record does not establish that [REDACTED] is employed by an accredited university that has a program for granting college credit for past work experience, or that the evaluator has authority to grant college-level credit for training and/or experience in the offered specialty at any such university. The evaluation is, therefore, of little evidentiary value as it pertains to the evaluation of past work experience. Citizenship and Immigration Services (CIS) may, in its discretion, use as advisory opinions statements submitted as expert testimony. However, where an opinion is not in accord with other information or is in any way questionable, CIS is not required to accept or may give less weight to that evidence. *Matter of Caron International*, 19 I&N Dec. 791 (Comm. 1988).

Citizenship and Immigration Services (CIS), may itself determine whether the beneficiary is qualified to perform the duties of the specialty occupation. That determination may be made pursuant to 8 C.F.R. § 214.2 (h)(4)(iii)(D)(5), which provides:

For purposes of determining equivalency to a baccalaureate degree in the specialty, three years of specialized training and/or work experience must be demonstrated for each year of college-level training the alien lacks. For equivalence to an advanced (or Masters) degree, the alien must have a baccalaureate degree followed by at least five years of experience in the

specialty. . . . It must be clearly demonstrated that the alien's training and/or work experience included the theoretical and practical application of specialized knowledge required by the specialty occupation; that the alien's experience was gained while working with peers, supervisors, or subordinates who have a degree or its equivalent in the specialty occupation; and that the alien has recognition of expertise in the specialty evidenced by at least one type of documentation such as:

- (i) Recognition of expertise in the specialty occupation by at least two recognized authorities in the same specialty occupation;
- (ii) Membership in a recognized foreign or United States association or society in the specialty occupation;
- (iii) Published material by or about the alien in professional publications, trade journals, books or major newspapers;
- (iv) Licensure or registration to practice the specialty occupation in a foreign country;
or
- (v) Achievements which a recognized authority has determined to be significant contributions to the field of the specialty occupation.

The documentation recounting the beneficiary's work experience is insufficient in detail to determine that the beneficiary's past work experience included the theoretical and practical application of specialized knowledge required by the specialty occupation; the beneficiary's experience was gained while working with peers, supervisors, or subordinates who have a degree or its equivalent in the specialty occupation; or that the beneficiary has recognition of expertise in the specialty. CIS cannot, therefore, determine that the beneficiary is qualified to perform the duties of the specialty occupation.

For reasons related in the preceding discussion, the petitioner has failed to establish the proffered position as a specialty occupation, or that the beneficiary is qualified to perform the duties of a specialty occupation. Accordingly, the AAO shall not disturb the director's denial of the petition.

The burden of proof in these proceedings rests solely with the petitioner. Section 291 of the Act, 8 U.S.C. § 1361. The petitioner has failed to sustain that burden and the appeal shall accordingly be dismissed.

ORDER: The appeal is dismissed. The petition is denied.
