MAR - 8 2001

IN RE: Petitioner:
Beneficiary:

Petition: Petition for a Nonimmigrant Worker Pursuant to Section 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act, 8 U.S.C. 1101(a)(15)(H)(i)(b)

IN BEHALF OF PETITIONER:

Identification data deleted to prevent clearly unwarranted invasion of personal privacy.

INSTRUCTIONS:

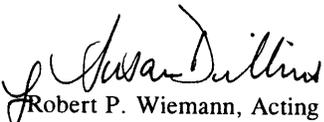

This is the decision in your case. All documents have been returned to the office which originally decided your case. Any further inquiry must be made to that office.

If you believe the law was inappropriately applied or the analysis used in reaching the decision was inconsistent with the information provided or with precedent decisions, you may file a motion to reconsider. Such a motion must state the reasons for reconsideration and be supported by any pertinent precedent decisions. Any motion to reconsider must be filed within 30 days of the decision that the motion seeks to reconsider, as required under 8 C.F.R. 103.5(a)(1)(i).

If you have new or additional information which you wish to have considered, you may file a motion to reopen. Such a motion must state the new facts to be proved at the reopened proceeding and be supported by affidavits or other documentary evidence. Any motion to reopen must be filed within 30 days of the decision that the motion seeks to reopen, except that failure to file before this period expires may be excused in the discretion of the Service where it is demonstrated that the delay was reasonable and beyond the control of the applicant or petitioner. Id.

Any motion must be filed with the office which originally decided your case along with a fee of \$110 as required under 8 C.F.R. 103.7.

FOR THE ASSOCIATE COMMISSIONER,
EXAMINATIONS

Robert P. Wiemann, Acting Director
Administrative Appeals Office

DISCUSSION: The nonimmigrant visa petition was denied by the director and is now before the Associate Commissioner, Examinations, on appeal. The appeal will be dismissed.

The petitioner is a firm which imports and exports oriental seafood. It has four employees and a gross annual income of \$1.5 million. It seeks to employ the beneficiary as a fish inspector for a period of three years. The director determined the petitioner had not established that the offered position is a specialty occupation.

On appeal, counsel argues that the offered position is a specialty occupation and the beneficiary is qualified to perform the duties of a specialty occupation.

Section 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act (the Act), 8 U.S.C. 1101(a)(15)(H)(i)(b), provides in part for nonimmigrant classification to qualified aliens who are coming temporarily to the United States to perform services in a specialty occupation. Section 214(i)(1) of the Act, 8 U.S.C. 1184(i)(1), defines a "specialty occupation" as an occupation that requires theoretical and practical application of a body of highly specialized knowledge, and attainment of a bachelor's or higher degree in the specific specialty (or its equivalent) as a minimum for entry into the occupation in the United States.

Pursuant to section 214(i)(2) of the Act, 8 U.S.C. 1184(i)(2), to qualify as an alien coming to perform services in a specialty occupation the beneficiary must hold full state licensure to practice in the occupation, if such licensure is required to practice in the occupation. In addition, the beneficiary must have completed the degree required for the occupation, or have experience in the specialty equivalent to the completion of such degree and recognition of expertise in the specialty through progressively responsible positions relating to the specialty.

Pursuant to 8 C.F.R. 214.2(h)(4)(iii)(B), the petitioner shall submit the following with an H-1B petition involving a specialty occupation:

1. A certification from the Secretary of Labor that the petitioner has filed a labor condition application with the Secretary,
2. A statement that it will comply with the terms of the labor condition application for the duration of the alien's authorized period of stay, and
3. Evidence that the alien qualifies to perform services in the specialty occupation.

The petitioner has provided a certified labor condition application and a statement that it will comply with the terms of the labor condition application.

Pursuant to 8 C.F.R. 214.2(h)(4)(iii)(C), to qualify to perform services in a specialty occupation, the alien must meet one of the following criteria:

1. Hold a United States baccalaureate or higher degree required by the specialty occupation from an accredited college or university;
2. Hold a foreign degree determined to be equivalent to a United States baccalaureate or higher degree required by the specialty occupation from an accredited college or university;
3. Hold an unrestricted State license, registration, or certification which authorizes him or her to fully practice the specialty occupation and be immediately engaged in that specialty in the state of intended employment; or
4. Have education, specialized training, and/or progressively responsible experience that is equivalent to completion of a United States baccalaureate or higher degree in the specialty occupation and have recognition of expertise in the specialty through progressively responsible positions directly related to the specialty.

The beneficiary completed the "colonization and exploitation" course of study provided by the Department of Agriculture and Veterinary Medicine in 1979 at Nippon University in Tokyo, Japan. An educational evaluation provided for the record indicates that this degree is the equivalent of a bachelor's degree in animal sciences from an accredited college or university in the United States. The petitioner has shown that the beneficiary qualifies to perform the duties of the offered position.

The term "specialty occupation" is defined at 8 C.F.R. 214.2(h)(4)(ii) as:

an occupation which requires theoretical and practical application of a body of highly specialized knowledge in fields of human endeavor including, but not limited to, architecture, engineering, mathematics, physical sciences, social sciences, medicine and health, education, business specialties, accounting, law, theology, and the arts, and which requires the attainment of a bachelor's degree or higher in a specific specialty,

or its equivalent, as a minimum for entry into the occupation in the United States.

Pursuant to 8 C.F.R. 214.2(h)(4)(iii)(A), to qualify as a specialty occupation, the position must meet one of the following criteria:

1. A baccalaureate or higher degree or its equivalent is normally the minimum requirement for entry into the particular position;
2. The degree requirement is common to the industry in parallel positions among similar organizations or, in the alternative, an employer may show that its particular position is so complex or unique that it can be performed only by an individual with a degree;
3. The employer normally requires a degree or its equivalent for the position; or
4. The nature of the specific duties is so specialized and complex that knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

The duties of the offered position are described as follows:

The fish inspector is responsible for visually inspecting all fish and fish products. The individual visually inspects the processing equipment and company facilities. The individual defines fish sources and equipment that are not in compliance with governmental agricultural regulations, laws and other compliance requirements. The individual must inspect the meat items to detect disease, unsanitary conditions, contaminations or other agricultural problems that are identifiable by inspection of the product, the equipment and transportation facilities. The individual will examine weight and measure the products, both live and harvested items. The individual will attest and certify wholesomeness, grade, weight and compliance with all food and drug regulatory provisions and standards. The individual examines unusual spots or growth for problems, collects samples of problems or suspected problems and routes them to the laboratory for inspection and determination by in-depth analysis. The individual prepares reports of various findings for the employer, including improper procedures or practices and recommends corrective actions. The individual participates in the government inspections on site and handles all government compliance requests to ensure corrective actions have been taken. The individual often conducts research into problems that may be

associated with fish products in particular and conduct testing to determine the results of particular problems or suspected problems associated with particular vendors, types of fish or product being imported or exported. In this connection the individual works closely with the company to make recommendations for corrective actions that should be taken and may work with government officials to clarify or make known existing problems with foods being imported nationally.

The petitioner has failed to establish that any of the four factors enumerated above are present in this proceeding. The petitioner has not shown that it has, in the past, required the services of individuals with baccalaureate or higher degrees in a specialized area for the offered position. In addition, the petitioner has not shown that similar firms require the services of such individuals in parallel positions. The petitioner's minimum requirement appears to be a baccalaureate degree rather than a bachelor's degree in a specialized and related area.

In these proceedings, the duties of the position are dispositive and not the job title. The offered position appears to combine the duties of a compliance officer with those of an engineering technician. The Department of Labor's Occupational Outlook Handbook, 2000-2001 edition, at pages 63-65 finds the usual requirement for employment as an inspector or compliance officer is a combination of education, experience, and often a passing grade on a written examination.

The Handbook at pages 96-98 also finds no requirement of a baccalaureate degree in a specialized area for employment as an engineering technician. Some engineering technicians hold baccalaureate degrees while others do not. Training is available at technical institutes, junior and community colleges, extension divisions of colleges and universities, public and private vocational-technical schools, and through the armed forces. It is concluded that the petitioner has not demonstrated that the offered position is a specialty occupation within the meaning of regulations.

The burden of proof in these proceedings rests solely with the petitioner. Section 291 of the Act. 8 U.S.C. 1361. The petitioner has not sustained that burden.

ORDER: The appeal is dismissed.
