OFFICE OF ADMINISTRATIVE APPEALS
425 Eye Street N.W.
ULLB, 3rd Floor
Washington, D.C. 20536

File: WAC 00 080 51901 Office: California Service Center

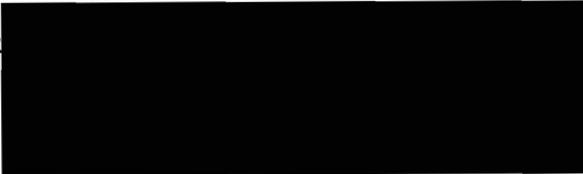

Date: 31 JAN 2002

IN RE: Petitioner:
Beneficiary:

Petition: Petition for a Nonimmigrant Worker Pursuant to Section 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act, 8 U.S.C. 1101(a)(15)(H)(i)(b)

IN BEHALF OF PETITIONER

PUBLIC COPY

INSTRUCTIONS:

This is the decision in your case. All documents have been returned to the office which originally decided your case. Any further inquiry must be made to that office.

If you believe the law was inappropriately applied or the analysis used in reaching the decision was inconsistent with the information provided or with precedent decisions, you may file a motion to reconsider. Such a motion must state the reasons for reconsideration and be supported by any pertinent precedent decisions. Any motion to reconsider must be filed within 30 days of the decision that the motion seeks to reconsider, as required under 8 C.F.R. 103.5(a)(1)(i).

If you have new or additional information which you wish to have considered, you may file a motion to reopen. Such a motion must state the new facts to be proved at the reopened proceeding and be supported by affidavits or other documentary evidence. Any motion to reopen must be filed within 30 days of the decision that the motion seeks to reopen, except that failure to file before this period expires may be excused in the discretion of the Service where it is demonstrated that the delay was reasonable and beyond the control of the applicant or petitioner. Id.

Any motion must be filed with the office which originally decided your case along with a fee of \$110 as required under 8 C.F.R. 103.7.

FOR THE ASSOCIATE COMMISSIONER,
EXAMINATIONS

Robert P. Wiemann, Director
Administrative Appeals Office

DISCUSSION: The nonimmigrant visa petition was denied by the Director, California Service Center, and is now before the Associate Commissioner for Examinations on appeal. The appeal will be dismissed.

The petitioner is a dental clinic with three employees which seeks to employ the beneficiary as a dental laboratory specialist for a period of three years. The director determined the petitioner had not established that the offered position is a specialty occupation.

On appeal, counsel argues that the offered position is a specialty occupation and the beneficiary is qualified to perform the duties of a specialty occupation.

Section 101(a) (15) (H) (i) (b) of the Immigration and Nationality Act (the Act), 8 U.S.C. 1101(a) (15) (H) (i) (b), provides in part for nonimmigrant classification to qualified aliens who are coming temporarily to the United States to perform services in a specialty occupation. Section 214(i) (1) of the Act, 8 U.S.C. 1184(i) (1), defines a "specialty occupation" as an occupation that requires theoretical and practical application of a body of highly specialized knowledge, and attainment of a bachelor's or higher degree in the specific specialty (or its equivalent) as a minimum for entry into the occupation in the United States.

Pursuant to section 214(i) (2) of the Act, 8 U.S.C. 1184(i) (2), to qualify as an alien coming to perform services in a specialty occupation the beneficiary must hold full state licensure to practice in the occupation, if such licensure is required to practice in the occupation. In addition, the beneficiary must have completed the degree required for the occupation, or have experience in the specialty equivalent to the completion of such degree and recognition of expertise in the specialty through progressively responsible positions relating to the specialty.

Pursuant to 8 C.F.R. 214.2(h) (4) (iii) (C), to qualify to perform services in a specialty occupation, the alien must meet one of the following criteria:

1. Hold a United States baccalaureate or higher degree required by the specialty occupation from an accredited college or university;
2. Hold a foreign degree determined to be equivalent to a United States baccalaureate or higher degree required by the specialty occupation from an accredited college or university;
3. Hold an unrestricted State license, registration, or certification which authorizes him or her to fully

practice the specialty occupation and be immediately engaged in that specialty in the state of intended employment; or

4. Have education, specialized training, and/or progressively responsible experience that is equivalent to completion of a United States baccalaureate or higher degree in the specialty occupation and have recognition of expertise in the specialty through progressively responsible positions directly related to the specialty.

The beneficiary was awarded a Doctor of Dental Medicine degree in 1998 from the University of The East in Manila, Philippines. It is determined that the beneficiary qualifies for the offered position.

The term "specialty occupation" is defined at 8 C.F.R. 214.2(h)(4)(ii) as:

an occupation which requires theoretical and practical application of a body of highly specialized knowledge in fields of human endeavor including, but not limited to, architecture, engineering, mathematics, physical sciences, social sciences, medicine and health, education, business specialties, accounting, law, theology, and the arts, and which requires the attainment of a bachelor's degree or higher in a specific specialty, or its equivalent, as a minimum for entry into the occupation in the United States.

Pursuant to 8 C.F.R. 214.2(h)(4)(iii)(A), to qualify as a specialty occupation, the position must meet one of the following criteria:

1. A baccalaureate or higher degree or its equivalent is normally the minimum requirement for entry into the particular position;
2. The degree requirement is common to the industry in parallel positions among similar organizations or, in the alternative, an employer may show that its particular position is so complex or unique that it can be performed only by an individual with a degree;
3. The employer normally requires a degree or its equivalent for the position; or
4. The nature of the specific duties is so specialized and complex that knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

The duties of the offered position are listed as:

She will provide appliance/crown design, cast and do other specialized non-patient care services. She will perform intra and extra oral appliance design, including framework for removable full and partial dentures, and set-up of artificial teeth for full and partial denture. She will shape orthodontic wires for ortho appliances such as space maintainers, temporary partials (stayplates). She will inspect all finished dentures for final installation. She will design and fabricate mouthguard and snoreguard.

Counsel states that the offered position is for a dental laboratory specialist, not a dental laboratory technician. Counsel indicates that similarities of the described job duties can be found with the Department of Labor's (DOL) Dictionary of Occupational Titles (DOT), Fourth Edition, 1977, under the DOT title "supervisor, dental laboratory" and "manager, dental laboratory." However a reference to DOL's DOT standing alone, is not enough to establish that an occupation is a specialty occupation. The DOT classification system and its categorization of an occupation as "professional and kindred" are not directly related to membership in a profession or specialty occupation as defined in immigration law. In the DOT listing of occupations, any given subject area within the professions contains nonprofessional work, as well as work within the professions.

The latest edition of the DOT does not give information about the educational and other requirements for the different occupations. This type of information is currently furnished by the Department of Labor in the various editions of the Occupational Outlook Handbook (Handbook). The latter publication is given considerable weight (certainly much more than the DOT) in determining whether an occupation is within the professions. This is because it provides specific and detailed information regarding the educational and other requirements for occupations.

The petitioner has failed to establish that any of the four factors enumerated above are present in this proceeding. The petitioner has not shown that it has, in the past, required the services of individuals with baccalaureate or higher degrees in a specialized area for the proffered position. In addition, the petitioner has not shown that similar firms require the services of such individuals in parallel positions.

The duties described are those of a dental laboratory technician. In its Occupational Outlook Handbook, 2000-2001 edition at page 487, the DOL does not state that a baccalaureate or higher degree in a specialized area is required for employment as a dental laboratory technician. Some dental technicians learn their trade on the job. Others learn at junior and community colleges, vocational-technical institutes, or through the armed forces. Training usually

takes two years. It is concluded that the petitioner has not demonstrated that the offered position is a specialty occupation within the meaning of the regulations.

The burden of proof in these proceedings rests solely with the petitioner. Section 291 of the Act, 8 U.S.C. 1361. The petitioner has not sustained that burden.

ORDER: The appeal is dismissed.
