OFFICE OF ADMINISTRATIVE APPEALS  
425 Eye Street N.W.  
ULLB, 3rd Floor  
Washington, D.C. 20536

File: LIN-01-186-50500

Office: Nebraska Service Center

Date:

FEB 10 2003

IN RE: Petitioner:  
Beneficiary:

Petition: Petition for a Nonimmigrant Worker Pursuant to Section 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act, 8 U.S.C. 1101(a)(15)(H)(i)(b)

IN BEHALF OF PETITIONER:

PUBLIC COPY

INSTRUCTIONS:

This is the decision in your case. All documents have been returned to the office that originally decided your case. Any further inquiry must be made to that office.

If you believe the law was inappropriately applied or the analysis used in reaching the decision was inconsistent with the information provided or with precedent decisions, you may file a motion to reconsider. Such a motion must state the reasons for reconsideration and be supported by any pertinent precedent decisions. Any motion to reconsider must be filed within 30 days of the decision that the motion seeks to reconsider, as required under 8 C.F.R. 103.5(a)(1)(i).

If you have new or additional information that you wish to have considered, you may file a motion to reopen. Such a motion must state the new facts to be proved at the reopened proceeding and be supported by affidavits or other documentary evidence. Any motion to reopen must be filed within 30 days of the decision that the motion seeks to reopen, except that failure to file before this period expires may be excused in the discretion of the Service where it is demonstrated that the delay was reasonable and beyond the control of the applicant or petitioner. Id.

Any motion must be filed with the office that originally decided your case along with a fee of \$110 as required under 8 C.F.R. 103.7.

FOR THE ASSOCIATE COMMISSIONER,  
EXAMINATIONS

*Robert P. Wiemann*  
Robert P. Wiemann, Director  
Administrative Appeals Office

**DISCUSSION:** The nonimmigrant visa petition was denied by the director and is now before the Associate Commissioner for Examinations on appeal. The appeal will be dismissed.

The petitioner is a computer consulting business with four employees and a gross annual income of \$500,000. It seeks to employ the beneficiary as a computer network engineer for a period of three years. The director determined the petitioner had not established that the proffered position is a specialty occupation.

On appeal, counsel submits a brief.

8 C.F.R. 214.2(h)(4)(ii) defines the term "specialty occupation" as:

an occupation which requires theoretical and practical application of a body of highly specialized knowledge in fields of human endeavor including, but not limited to, architecture, engineering, mathematics, physical sciences, social sciences, medicine and health, education, business specialties, accounting, law, theology, and the arts, and which requires the attainment of a bachelor's degree or higher in a specific specialty, or its equivalent, as a minimum for entry into the occupation in the United States.

The director denied the petition because the duties described by the petitioner did not appear to be so complex as to require a baccalaureate degree in a specific specialty. On appeal, counsel states, in part, that the record contains job advertisements to demonstrate that the degree requirement is industry wide. Counsel also states that the proposed duties are so specialized and complex that a baccalaureate degree is required, and that all of the petitioner's engineers possess at least a bachelor's degree.

Counsel's statement on appeal is not persuasive. The Service does not use a title, by itself, when determining whether a particular job qualifies as a specialty occupation. The specific duties of the offered position combined with the nature of the petitioning entity's business operations are factors that the Service considers. In the initial I-129 petition, the petitioner described the duties of the offered position as follows:

Designs, configures, installs, and troubleshoots LANS (local area network) and WANs (wide area network) for mid-sized business clients. This includes installation of servers and workstation hardware, as well as knowledge of wiring infrastructure. It will require installation, configuration, and complete knowledge of Windows 2000 server/workstation, Windows NT server/workstation,

Windows 98, and Novell operating systems. It will require knowledge of protocols, including TCP/IP, Netbios, and IPX/SPX. Additionally, router configuration and internet connectivity knowledge will be required. Typical business software, such as Microsoft Office, Wordperfect Office, Microsoft Exchange, Microsoft Outlook, Proxy server, and anti-virus software knowledge is required.

Pursuant to 8 C.F.R. 214.2(h)(4)(iii)(A), to qualify as a specialty occupation, the position must meet one of the following criteria:

1. A baccalaureate or higher degree or its equivalent is normally the minimum requirement for entry into the particular position;
2. The degree requirement is common to the industry in parallel positions among similar organizations or, in the alternative, an employer may show that its particular position is so complex or unique that it can be performed only by an individual with a degree;
3. The employer normally requires a degree or its equivalent for the position; or
4. The nature of the specific duties is so specialized and complex that knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

The petitioner has not met any of the above requirements to classify the offered position as a specialty occupation.

First, the Service does not agree with counsel's argument that the proffered position would normally require a bachelor's degree in engineering or a related field. The proffered position is that of a network or computer systems administrator. A review of the Department of Labor's Occupational Outlook Handbook, 2002-2003 edition, at page 173, finds that there are a multitude of ways workers can become a computer support specialist or a systems administrator. For systems administrators, many employers seek applicants with bachelor's degrees, though not necessarily in a computer-related field. Many companies are becoming more flexible about requiring a college degree for support positions because of the explosive demand for specialists. Certification and practical experience demonstrating these skills, however, will be essential for applicants without a degree. Completion of a certification training program, offered by a variety of vendors and product makers, may help some people qualify for entry-level positions. Relevant computer experience may substitute for formal education. Thus, the petitioner has not shown that a bachelor's degree or its

equivalent is required for the position being offered to the beneficiary.

Second, although the petitioner's past hiring practices indicate that it normally requires a baccalaureate degree in engineering/computer science or an equivalent thereof for the proffered position, the petitioner's reasoning is problematic when viewed in light of the statutory definition of specialty occupation. The petitioner's creation of a position with a perfunctory bachelor's degree requirement will not mask the fact that the position is not a specialty occupation. As with employment agencies as petitioners, the Service must examine the ultimate employment of the alien, and determine whether the position qualifies as a specialty occupation. Cf. Defensor v. Meissner, 201 F.3d 384 (5th Cir. 2000). The critical element is not the title of the position or an employer's self-imposed standards, but whether the position actually requires the theoretical and practical application of a body of highly specialized knowledge, and the attainment of a bachelor's degree in the specific specialty as the minimum for entry into the occupation as required by the Act.<sup>1</sup> To interpret the regulations any other way would lead to absurd results: if the Service was limited to reviewing a petitioner's self-imposed employment requirements, then any alien with a bachelor's degree could be brought into the United States to perform a menial, non-professional, or an otherwise non-specialty occupation, so long as the employer required all such employees to have bachelor's degrees. See id. at 388.

In this case, although the petitioner claimed to have hired only individuals with a bachelor's degree in engineering/computer science for its support positions, the position, nevertheless, does not meet the statutory definition of specialty occupation. The position, itself, does not require the theoretical and practical application of a body of highly specialized knowledge. Therefore, even though the petitioner has required a bachelor's degree in the past, the position still does not require a bachelor's degree in a specific specialty.

Third, the petitioner did not present any documentary evidence that a baccalaureate degree in a specific specialty or its equivalent is common to the industry in parallel positions among organizations similar to the petitioner. The five job advertisements submitted by the petitioner have been reviewed. It is noted that two of the job

---

<sup>1</sup> The court in Defensor v. Meissner observed that the four criteria at 8 C.F.R. 214.2(h)(4)(iii)(A) present certain ambiguities when compared to the statutory definition, and "might also be read as merely an additional requirement that a position must meet, in addition to the statutory and regulatory definition." Supra at 387.

advertisements indicate that a bachelor's degree is desired rather than required. Another one indicates that a technical degree/MCSE or similar background is acceptable. Such requirements support the DOL's finding that there are a multitude of ways workers can become a computer support specialist or a systems administrator. Finally, the petitioner did not demonstrate that the nature of the beneficiary's proposed duties is so specialized and complex that the knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

The petitioner has failed to establish that any of the four factors enumerated above are present in this proceeding. Accordingly, it is concluded that the petitioner has not demonstrated that the offered position is a specialty occupation within the meaning of the regulations.

The burden of proof in these proceedings rests solely with the petitioner. Section 291 of the Act, 8 U.S.C. 1361. The petitioner has not sustained that burden.

**ORDER:** The appeal is dismissed.
