IN RE: Petitioner: [Redacted]  
Beneficiary: [Redacted]

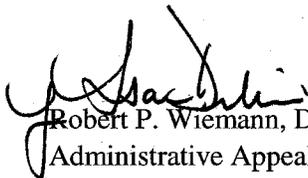

PETITION: Petition for a Nonimmigrant Worker Pursuant to Section 101(a)(15)(H)(i)(b) of the  
Immigration and Nationality Act, 8 U.S.C. § 1101(a)(15)(H)(i)(b)

ON BEHALF OF PETITIONER:

INSTRUCTIONS:

This is the decision of the Administrative Appeals Office in your case. All documents have been returned to the office that originally decided your case. Any further inquiry must be made to that office.

  
Robert P. Wiemann, Director  
Administrative Appeals Office

**DISCUSSION:** The service center director denied the nonimmigrant visa petition and the matter is now before the Administrative Appeals Office (AAO) on appeal. The appeal will be dismissed. The petition will be denied.

The petitioner is a laser cutting and drilling company that seeks to employ the beneficiary as an engineer physicist. The petitioner endeavors to classify the beneficiary as a nonimmigrant worker in a specialty occupation pursuant to section 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act (the Act), 8 U.S.C. § 1101 (a)(15)(H)(i)(b).

The director denied the petition because the proffered position is not a specialty occupation. On appeal, counsel submits a brief.

Section 214(i)(1) of the Immigration and Nationality Act (the Act), 8 U.S.C. § 1184 (i)(1), defines the term "specialty occupation" as an occupation that requires:

- (A) theoretical and practical application of a body of highly specialized knowledge, and
- (B) attainment of a bachelor's or higher degree in the specific specialty (or its equivalent) as a minimum for entry into the occupation in the United States.

Pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(A), to qualify as a specialty occupation, the position must meet one of the following criteria:

- (1) A baccalaureate or higher degree or its equivalent is normally the minimum requirement for entry into the particular position;
- (2) The degree requirement is common to the industry in parallel positions among similar organizations or, in the alternative, an employer may show that its particular position is so complex or unique that it can be performed only by an individual with a degree;
- (3) The employer normally requires a degree or its equivalent for the position; or
- (4) The nature of the specific duties is so specialized and complex that knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

Citizenship and Immigration Services (CIS) interprets the term "degree" in the criteria at 8 C.F.R. § 214.2(h)(4)(iii)(A) to mean not just any baccalaureate or higher degree, but one in a specific specialty that is directly related to the proffered position.

The record of proceeding before the AAO contains: (1) Form I-129 and supporting documentation; (2) the director's request for additional evidence; (3) the petitioner's response to the director's request; (4) the director's denial letter; and (5) Form I-290B and supporting documentation. The AAO reviewed the record in its entirety before issuing its decision.

The petitioner is seeking the beneficiary's services as an engineer physicist. Evidence of the beneficiary's duties includes: the I-129 petition; the petitioner's January 15, 2002 letter in support of the petition; and the

petitioner's response to the director's request for evidence. According to the letter of support, the beneficiary would perform duties that entail: Cad-Cam programming and drafting; laser machine alignment, maintenance repair and testing, which includes optical, mechanical and electrical troubleshooting; conducting application feasibility studies; and setting up all the jobs on laser machines. In the response to the director's request for evidence, the petitioner stated that the beneficiary's duties would include: reviewing the customer's design and prototype or production quality plans; reviewing design input specifications; conducting design reviews with the customer's representative; assisting in developing pre-launch and production quality plans; production control; scheduling production; establishing production work orders; planning production facilities, equipment and processes; developing production processes; developing prototype and production quality plans; developing process operator and set-up instructions; controlling and monitoring processes; conducting in-process inspections; applying and maintaining in-process product identification; providing training for all production personnel; receiving purchased products; performing first-stage receiving inspection; applying or verifying product identification for purchased products; operating the material stockroom; packaging products; shipping products to the customers; operating the finished product stockroom; performing servicing of all laser, waterjet and other auxiliary production machines; maintaining all laser, waterjet and auxiliary production equipment; collecting performance and reliability data for all equipment in use; providing training to other personnel; generating CNC programs by using Autocad or other similar CAD-CAM software; performing first article inspection prior to production of parts; and maintaining and updating all production CNC program files.

There is a significant change in duties between the initial petition and the response to the director's request for evidence. Citizenship and Immigration Services (CIS) regulations affirmatively require a petitioner to establish eligibility for the benefit it is seeking at the time the petition is filed. See 8 C.F.R. § 103.2(b)(12). Any evidence that adds duties not described at the time of filing the petition will not be considered. Eligibility must be established at the time of filing; a visa petition may not be approved at a future date after the petitioner or beneficiary becomes eligible under a new set of facts. *Matter of Michelin Tire Corp.*, 17 I&N Dec. 248 (Reg. Comm. 1978).

A petitioner may not make material changes to a petition in an effort to make a deficient petition conform to CIS requirements. See *Matter of Izummi*, 22 I&N Dec. 169, 176 (Assoc. Comm. 1998). Therefore, the duties listed in the initial petition will be those on which this matter will be adjudicated.

The director found that the proffered position was not a specialty occupation because the job is not an engineer-physicist position, but a combination of a machine operator and an industrial machinery installation, repair and maintenance worker. Citing to the Department of Labor's *Occupational Outlook Handbook (Handbook)*, the director noted that the minimum requirement for entry into the position was not a baccalaureate degree or its equivalent in a specific specialty. The director found further that the petitioner failed to establish any of the criteria found at 8 C.F.R. § 214.2(h)(4)(iii)(A).

On appeal, counsel states that the petitioner established that the proffered position includes in-depth, complex and specialized responsibilities, including computer programming and drafting, feasibility studies application and engineering production.

Upon review of the record, the petitioner has established none of the four criteria outlined in 8 C.F.R. § 214.2(h)(4)(iii)(A). Therefore, the proffered position is not a specialty occupation.

The AAO turns first to the criteria at 8 C.F.R. § 214.2 (h)(4)(iii)(A)(1) and (2): a baccalaureate or higher degree or its equivalent is the normal minimum requirement for entry into the particular position; a degree requirement is common to the industry in parallel positions among similar organizations; or a particular position is so complex or unique that it can be performed only by an individual with a degree.

Factors often considered by CIS when determining these criteria include: whether the *Handbook* reports that the industry requires a degree; whether the industry's professional association has made a degree a minimum entry requirement; and whether letters or affidavits from firms or individuals in the industry attest that such firms "routinely employ and recruit only degreed individuals." See *Shanti, Inc. v. Reno*, 36 F. Supp. 2d 1151, 1165 (D.Min. 1999)(quoting *Hird/Blaker Corp. v. Slattery*, 764 F. Supp. 872, 1102 (S.D.N.Y. 1991)).

The AAO routinely consults the *Handbook* for its information about the duties and educational requirements of particular occupations. The AAO does not concur with the director that the position fits wholly within the position descriptions of a machine operator and an industrial machinery installation, repair and maintenance worker. The position does include elements of those positions, but also includes higher-level duties, as well. Since there is no entry in the *Handbook* that adequately describes the proffered position, the AAO will have to rely on other elements to determine whether the position is a specialty occupation.

Counsel states, "The proposed duties and level of responsibility implicit in such duties establish complexity and specialized knowledge whereby the attainment of a degree in the required field(s) is essential." The assertions of counsel do not constitute evidence. *Matter of Obaigbena*, 19 I&N Dec. 533, 534 (BIA 1988); *Matter of Ramirez-Sanchez*, 17 I&N Dec. 503, 506 (BIA 1980). In addition, simply going on record without supporting documentary evidence is not sufficient for the purpose of meeting the burden of proof in these proceedings. *Matter of Treasure Craft of California*, 14 I&N Dec. 190 (Reg. Comm. 1972).

The petitioner did not submit any information regarding parallel positions in the petitioner's industry. The record also does not include any evidence from professional associations regarding an industry standard, or documentation to support the complexity or uniqueness of the proffered position. The petitioner has, thus, not established the criteria set forth at 8 C.F.R. § 214.2(h)(4)(iii)(A)(1) or (2).

The AAO now turns to the criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A)(3) – the employer normally requires a degree or its equivalent for the position. The record does not contain any evidence of the petitioner's past hiring practices and therefore, the petitioner has not met its burden of proof in this regard.

Finally, the AAO turns to the criterion at 8 C.F.R. § 214.2(h)(iii)(A)(4) – the nature of the specific duties is so specialized and complex that knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

To the extent that they are depicted in the record, the duties do not appear so specialized and complex as to require the highly specialized knowledge associated with a baccalaureate or higher degree, or its equivalent, in a specific specialty. Therefore, the evidence does not establish that the proffered position is a specialty occupation under 8 C.F.R. § 214.2(h)(4)(iii)(A)(4).

As related in the discussion above, the petitioner has failed to establish that the proffered position is a specialty occupation. Accordingly, the AAO shall not disturb the director's denial of the petition.

The burden of proof in these proceedings rests solely with the petitioner. Section 291 of the Act, 8 U.S.C. § 1361. The petitioner has not sustained that burden.

**ORDER:** The appeal is dismissed. The petition is denied.
