IN RE: Petitioner:
Beneficiary:

PETITION: Petition for a Nonimmigrant Worker Pursuant to Section 101(a)(15)(H)(i)(b) of the
Immigration and Nationality Act, 8 U.S.C. § 1101(a)(15)(H)(i)(b)

ON BEHALF OF PETITIONER:

INSTRUCTIONS:

This is the decision of the Administrative Appeals Office in your case. All documents have been returned to the office that originally decided your case. Any further inquiry must be made to that office.

Mai Pluss

Robert P. Wiemann, Director
Administrative Appeals Office

DISCUSSION: The service center director denied the nonimmigrant visa petition and the matter is now before the Administrative Appeals Office (AAO) on appeal. The appeal will be dismissed. The petition will be denied.

The petitioner is an automobile dealership and repair shop that seeks to employ the beneficiary as a mechanical engineer. The petitioner endeavors to classify the beneficiary as a nonimmigrant worker in a specialty occupation pursuant to § 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act (the Act), 8 U.S.C. § 1101(a)(15)(H)(i)(b).

The director denied the petition because the proffered position is not a specialty occupation. On appeal, counsel submits a brief.

Section 214(i)(1) of the Act, 8 U.S.C. § 1184(i)(1), defines the term "specialty occupation" as an occupation that requires:

- (A) theoretical and practical application of a body of highly specialized knowledge, and
- (B) attainment of a bachelor's or higher degree in the specific specialty (or its equivalent) as a minimum for entry into the occupation in the United States.

Pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(A), to qualify as a specialty occupation, the position must meet one of the following criteria:

- (1) A baccalaureate or higher degree or its equivalent is normally the minimum requirement for entry into the particular position;
- (2) The degree requirement is common to the industry in parallel positions among similar organizations or, in the alternative, an employer may show that its particular position is so complex or unique that it can be performed only by an individual with a degree;
- (3) The employer normally requires a degree or its equivalent for the position; or
- (4) The nature of the specific duties is so specialized and complex that knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

Citizenship and Immigration Services (CIS) interprets the term "degree" in the criteria at 8 C.F.R. § 214.2(h)(4)(iii)(A) to mean not just any baccalaureate or higher degree, but one in a specific specialty that is directly related to the proffered position.

The record of proceeding before the AAO contains: (1) Form I-129 and supporting documentation; (2) the director's request for additional evidence; (3) the petitioner's response to the director's request; (4) the director's denial letter; and (5) Form I-290B and supporting documentation. The AAO reviewed the record in its entirety before issuing its decision.

The petitioner is seeking the beneficiary's services as a mechanical engineer. Evidence of the beneficiary's duties includes: the I-129 petition; the petitioner's February 19, 2002 letter in support of the petition; and the

petitioner's response to the director's request for evidence. According to this evidence, the beneficiary would perform duties that entail: setting standards for the inspection, maintenance, and repair of equipment and developing methods and procedures for testing products and systems; repairing, servicing, and testing equipment, such as pumps, air compressors, and dynamometers; and serving as liaison between the technicians and management. The petitioner indicated that a qualified candidate for the job would possess a bachelor's degree in mechanical engineering or a closely related field.

The director found that the proffered position was not a specialty occupation because the job is not a mechanical engineering position; it is an automotive service technician and mechanic position. Citing to the Department of Labor's *Occupational Outlook Handbook (Handbook)*, 2002-2003 edition, the director noted that the minimum requirement for entry into the position was not a baccalaureate degree or its equivalent in a specific specialty. The director found further that the petitioner failed to establish any of the criteria found at 8 C.F.R. § 214.2(h)(4)(iii)(A).

On appeal, counsel states, in part, that the proffered position requires the highest levels of experience and knowledge of mechanical or electromechanical products and systems, design specifications and manuals, which can be acquired only through coursework leading to a baccalaureate degree in mechanical engineering. Counsel states further that the *Dictionary of Occupational Titles (DOT)* assigns the position an SVP rating of 8, which according to counsel, requires a degree to enter into the position.

Upon review of the record, the petitioner has established none of the four criteria outlined in 8 C.F.R. § 214.2(h)(4)(iii)(A). Therefore, the proffered position is not a specialty occupation.

The AAO turns first to the criteria at 8 C.F.R. § 214.2(h)(4)(iii)(A)(1) and (2): a baccalaureate or higher degree or its equivalent is the normal minimum requirement for entry into the particular position; a degree requirement is common to the industry in parallel positions among similar organizations; or a particular position is so complex or unique that it can be performed only by an individual with a degree.

Factors often considered by CIS when determining these criteria include: whether the *Handbook* reports that the industry requires a degree; whether the industry's professional association has made a degree a minimum entry requirement; and whether letters or affidavits from firms or individuals in the industry attest that such firms "routinely employ and recruit only degreed individuals." See *Shanti, Inc. v. Reno*, 36 F. Supp. 2d 1151, 1165 (D.Min. 1999)(quoting *Hird/Blaker Corp. v. Slattery*, 764 F. Supp. 872, 1102 (S.D.N.Y. 1991)).

The AAO routinely consults the *Handbook* for its information about the duties and educational requirements of particular occupations. The AAO does not concur with counsel that the proffered position is that of a mechanical engineer. None of the beneficiary's job duties entails the level of responsibility of that occupation. A review of the Automotive Service Technician and Mechanics job descriptions in the *Handbook*, 2004-2005 edition, confirms the accuracy of the director's assessment to the effect that, the job duties parallel those responsibilities of an automotive service technician and mechanic, with some added supervisory duties. No evidence in the *Handbook* indicates that a baccalaureate or higher degree, or its equivalent, is required for this position.

Counsel's reference to and assertions about the relevance of information from the *DOT* are not persuasive. The *DOT's* SVP rating does not indicate that a particular occupation requires the attainment of a baccalaureate or higher degree, or its equivalent, in a specific specialty as a minimum for entry into the occupation. An SVP rating is meant to indicate only the total number of years of vocational preparation

required for a particular position. The classification does not describe how those years are to be divided among training, formal education, and experience, nor specifies the particular type of degree, if any, that a position would require.

Counsel's comments regarding the type of credentials required for the proffered position in the petitioner's industry are without merit. Counsel's personal observations do not constitute evidence in these proceedings. *Matter of Obaigbena*, 19 I&N Dec. 533, 534 (BIA 1988); *Matter of Ramirez-Sanchez*, 17 I&N Dec. 503, 506 (BIA 1980). Furthermore, the director did not state that the job of mechanical engineer is not a specialty occupation. The director concluded correctly that the proffered position is not one of a mechanical engineer and, therefore, it does not require a baccalaureate degree, or its equivalent, in a specific specialty.

The record does not include any evidence regarding parallel positions in the petitioner's industry. The record also does not include any evidence from professional associations regarding an industry standard, or documentation to support the complexity or uniqueness of the proffered position. The petitioner has, thus, not established the criteria set forth at 8 C.F.R. § 214.2(h)(4)(iii)(A)(1) or (2).

The AAO now turns to the criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A)(3) – the employer normally requires a degree or its equivalent for the position. In his December 6, 2002 letter, counsel states that the petitioner has never previously hired a mechanical engineer. The petitioner, therefore, has not established the criterion set forth at 8 C.F.R. § 214.2(h)(4)(iii)(A)(3).

Finally, the AAO turns to the criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A)(4) – the nature of the specific duties is so specialized and complex that knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

To the extent that they are depicted in the record, the duties do not appear so specialized and complex as to require the highly specialized knowledge associated with a baccalaureate or higher degree, or its equivalent, in a specific specialty. Therefore, the evidence does not establish that the proffered position is a specialty occupation under 8 C.F.R. § 214.2(h)(4)(iii)(A)(4).

As related in the discussion above, the petitioner has failed to establish that the proffered position is a specialty occupation. Accordingly, the AAO shall not disturb the director's denial of the petition.

The burden of proof in these proceedings rests solely with the petitioner. Section 291 of the Act, 8 U.S.C. § 1361. The petitioner has not sustained that burden.

ORDER: The appeal is dismissed. The petition is denied.
