IN RE: Petitioner:
Beneficiary:

PETITION: Petition for a Nonimmigrant Worker Pursuant to Section 101(a)(15)(H)(i)(b) of the
Immigration and Nationality Act, 8 U.S.C. § 1101(a)(15)(H)(i)(b)

ON BEHALF OF PETITIONER:

INSTRUCTIONS:

This is the decision of the Administrative Appeals Office in your case. All documents have been returned to the office that originally decided your case. Any further inquiry must be made to that office.

Robert P. Wiemann

Robert P. Wiemann, Director
Administrative Appeals Office

DISCUSSION: The service center director denied the nonimmigrant visa petition and the matter is now before the Administrative Appeals Office (AAO) on appeal. The appeal will be dismissed. The petition will be denied.

The petitioner is a wholesaler of cellular phones and accessories that seeks to employ the beneficiary as a quality control engineer. The petitioner endeavors to classify the beneficiary as a nonimmigrant worker in a specialty occupation pursuant to § 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act (the Act), 8 U.S.C. § 1101(a)(15)(H)(i)(b).

The director denied the petition because the proffered position is not a specialty occupation. On appeal, counsel submits a brief.

Section 214(i)(1) of the Act, 8 U.S.C. § 1184(i)(1), defines the term "specialty occupation" as an occupation that requires:

- (A) theoretical and practical application of a body of highly specialized knowledge, and
- (B) attainment of a bachelor's or higher degree in the specific specialty (or its equivalent) as a minimum for entry into the occupation in the United States.

Pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(A), to qualify as a specialty occupation, the position must meet one of the following criteria:

- (1) A baccalaureate or higher degree or its equivalent is normally the minimum requirement for entry into the particular position;
- (2) The degree requirement is common to the industry in parallel positions among similar organizations or, in the alternative, an employer may show that its particular position is so complex or unique that it can be performed only by an individual with a degree;
- (3) The employer normally requires a degree or its equivalent for the position; or
- (4) The nature of the specific duties is so specialized and complex that knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

Citizenship and Immigration Services (CIS) interprets the term "degree" in the criteria at 8 C.F.R. § 214.2(h)(4)(iii)(A) to mean not just any baccalaureate or higher degree, but one in a specific specialty that is directly related to the proffered position.

The record of proceeding before the AAO contains: (1) Form I-129 and supporting documentation; (2) the director's request for additional evidence; (3) the petitioner's response to the director's request; (4) the director's denial letter; and (5) Form I-290B and supporting documentation. The AAO reviewed the record in its entirety before issuing its decision.

The petitioner is seeking the beneficiary's services as a quality control engineer. Evidence of the beneficiary's duties includes: the I-129 petition; the petitioner's July 8, 2003 letter in support of the petition; and the

petitioner's response to the director's request for evidence. According to this evidence, the beneficiary would perform duties that entail: conducting internal and external quality inspection of raw materials, purchased items, operations, and processes; conducting studies to determine cause, effect, and corrective measures for deviations of quality; confers with personnel regarding product design, specifications, materials, tooling, and operations affecting quality; selecting, training, compensating, and motivating personnel; resolving quality problems at customer and supplier sites; reviewing customer specifications and monitoring quality control; providing technical assistance to purchasing unit; conducting training; maintaining records; and ensuring compliance with applicable laws and regulations. Although not explicitly stated, it appears that the petitioner requires a baccalaureate degree or its equivalent in mechanical engineering for the proffered position.

The director found that the proffered position was not a specialty occupation because, as the petitioner is not engaged in manufacturing, the job is not a quality control engineer; it is a combination of the following positions: inspectors, testers, sorters, samplers and weighers, and purchasers. Citing to the Department of Labor's *Occupational Outlook Handbook (Handbook)*, 2002-2003 edition, the director noted that the minimum requirement for entry into the position was not a baccalaureate degree or its equivalent in a specific specialty. The director found further that the petitioner failed to establish any of the criteria found at 8 C.F.R. § 214.2(h)(4)(iii)(A).

On appeal, counsel states, in part, that the proffered position is that of a quality control engineer, and is not similar to the positions cited by the director. Counsel states further that the proposed duties, which include selecting and training personnel, conducting studies to remedy deviations from quality standards, and providing technical assistance related to quality control, are the duties of a quality control engineer.

Upon review of the record, the petitioner has established none of the four criteria outlined in 8 C.F.R. § 214.2(h)(4)(iii)(A). Therefore, the proffered position is not a specialty occupation.

The AAO turns first to the criteria at 8 C.F.R. § 214.2(h)(4)(iii)(A)(1) and (2): a baccalaureate or higher degree or its equivalent is the normal minimum requirement for entry into the particular position; a degree requirement is common to the industry in parallel positions among similar organizations; or a particular position is so complex or unique that it can be performed only by an individual with a degree.

Factors often considered by CIS when determining these criteria include: whether the *Handbook* reports that the industry requires a degree; whether the industry's professional association has made a degree a minimum entry requirement; and whether letters or affidavits from firms or individuals in the industry attest that such firms "routinely employ and recruit only degreed individuals." See *Shanti, Inc. v. Reno*, 36 F. Supp. 2d 1151, 1165 (D.Min. 1999)(quoting *Hird/Blaker Corp. v. Slattery*, 764 F. Supp. 872, 1102 (S.D.N.Y. 1991)).

The AAO routinely consults the *Handbook* for its information about the duties and educational requirements of particular occupations. The AAO does not concur with counsel that the proffered position requires a baccalaureate degree in mechanical engineering. None of the beneficiary's job duties entails the level of responsibility of a position that requires such a degree. As the record indicates that the petitioner is engaged primarily in marketing telecommunication products, the proffered is primarily that of a marketing manager. No evidence in the *Handbook*, 2004-2005 edition, indicates that a baccalaureate or higher degree in a specific specialty, or its equivalent, is required for a marketing manager job. Many employers prefer individuals with related experience plus a broad liberal arts background. In highly technical industries, such as computer and electronics manufacturing, a bachelor's degree in engineering or science, combined with a master's degree in

business administration, is preferred. As the director pointed out, however, the petitioner's business is not manufacturing.

Regarding parallel positions in the petitioner's industry, the petitioner submitted Internet job postings for quality control engineers. There is no evidence, however, to show that the employers issuing those postings are similar to the petitioner, or that the advertised positions are parallel to the instant position. The majority of the advertisements are for quality control engineers in the manufacturing industry. As the petitioner's industry is not in manufacturing, the advertisements have little relevance.

The record also does not include any evidence from professional associations regarding an industry standard, or documentation to support the complexity or uniqueness of the proffered position. The petitioner, therefore, has not established the criteria set forth at 8 C.F.R. § 214.2(h)(4)(iii)(A)(1) or (2).

The AAO now turns to the criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A)(3) – the employer normally requires a degree or its equivalent for the position. As counsel does not address this issue on appeal, it will not be discussed further.

Finally, the AAO turns to the criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A)(4) – the nature of the specific duties is so specialized and complex that knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

To the extent that they are depicted in the record, the duties do not appear so specialized and complex as to require the highly specialized knowledge associated with a baccalaureate or higher degree, or its equivalent, in a specific specialty. Therefore, the evidence does not establish that the proffered position is a specialty occupation under 8 C.F.R. § 214.2(h)(4)(iii)(A)(4).

As related in the discussion above, the petitioner has failed to establish that the proffered position is a specialty occupation. Accordingly, the AAO shall not disturb the director's denial of the petition.

The burden of proof in these proceedings rests solely with the petitioner. Section 291 of the Act, 8 U.S.C. § 1361. The petitioner has not sustained that burden.

ORDER: The appeal is dismissed. The petition is denied.
