IN RE: Petitioner:
Beneficiary:

PETITION: Petition for a Nonimmigrant Worker Pursuant to Section 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act, 8 U.S.C. § 1101(a)(15)(H)(i)(b)

ON BEHALF OF PETITIONER:

INSTRUCTIONS:

This is the decision of the Administrative Appeals Office in your case. All documents have been returned to the office that originally decided your case. Any further inquiry must be made to that office.

Robert P. Wiemann, Director
Administrative Appeals Office

DISCUSSION: The service center director denied the nonimmigrant visa petition and certified her decision to the Administrative Appeals Office (AAO). The director's decision will be affirmed. The petition will be denied.

The petitioner is a staffing and recruitment business that seeks to employ the beneficiary as a patient advocate. The petitioner endeavors to classify the beneficiary as a nonimmigrant worker in a specialty occupation pursuant to § 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act (the Act), 8 U.S.C. § 1101(a)(15)(H)(i)(b).

The director denied the petition because the proffered position is not a specialty occupation. Neither counsel nor the petitioner submits a brief or other written statement for consideration in response the director's notice of certification.

Section 214(i)(1) of the Act, 8 U.S.C. § 1184(i)(1), defines the term "specialty occupation" as an occupation that requires:

- (A) theoretical and practical application of a body of highly specialized knowledge, and
- (B) attainment of a bachelor's or higher degree in the specific specialty (or its equivalent) as a minimum for entry into the occupation in the United States.

Pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(A), to qualify as a specialty occupation, the position must meet one of the following criteria:

- (1) A baccalaureate or higher degree or its equivalent is normally the minimum requirement for entry into the particular position;
- (2) The degree requirement is common to the industry in parallel positions among similar organizations or, in the alternative, an employer may show that its particular position is so complex or unique that it can be performed only by an individual with a degree;
- (3) The employer normally requires a degree or its equivalent for the position; or
- (4) The nature of the specific duties is so specialized and complex that knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

Citizenship and Immigration Services (CIS) interprets the term "degree" in the criteria at 8 C.F.R. § 214.2(h)(4)(iii)(A) to mean not just any baccalaureate or higher degree, but one in a specific specialty that is directly related to the proffered position.

The record of proceeding before the AAO contains: (1) Form I-129 and supporting documentation; (2) the director's request for additional evidence; (3) the petitioner's response to the director's request; (4) the director's denial letter; and (5) the director's Notice of Certification. The AAO reviewed the record in its entirety before issuing its decision.

The petitioner is seeking the beneficiary's services as a patient advocate. Evidence of the beneficiary's duties includes: the I-129 petition; the petitioner's July 18, 2003 letter in support of the petition; and the petitioner's response to the director's request for evidence. According to this evidence, the beneficiary would perform duties under the general supervision of the "quality manager" that entail: serving as liaison between the patient, family, physicians, and the health care facility to promote mutual understanding of needs and responsibilities of all parties involved in the care process; developing and implementing activities to promote consistency in approaches to patient questions, problems, and concerns; developing goals and objectives for the Customer Satisfaction Program; assisting patients and families in understanding the philosophy, policies, and procedures of the health care facility through direct contact and discussion of problems and concerns; serving as an intermediary to the administration on behalf of patients and families; and collecting and presenting data regarding patient and family satisfaction. Although not explicitly stated, it appears that the petitioner requires a baccalaureate degree or its equivalent in a field related to the health professions for the proffered position.

The director found that the proffered position, which is similar to that of a registered nurse, was not a specialty occupation. Citing to the Department of Labor's *Occupational Outlook Handbook (Handbook)*, 2002-2003 edition, the director noted that the minimum requirement for entry into the position was not a baccalaureate degree or its equivalent in a specific specialty. The director found further that the petitioner failed to establish any of the criteria found at 8 C.F.R. § 214.2(h)(4)(iii)(A).

In support of the petition, counsel submitted a copy of the petitioner's job opening notice and copies of approval notices for patient advocate positions for two other petitioners.

Upon review of the record, the petitioner has established none of the four criteria outlined in 8 C.F.R. § 214.2(h)(4)(iii)(A). Therefore, the proffered position is not a specialty occupation.

The AAO turns first to the criteria at 8 C.F.R. § 214.2(h)(4)(iii)(A)(1) and (2): a baccalaureate or higher degree or its equivalent is the normal minimum requirement for entry into the particular position; a degree requirement is common to the industry in parallel positions among similar organizations; or a particular position is so complex or unique that it can be performed only by an individual with a degree.

Factors often considered by CIS when determining these criteria include: whether the *Handbook* reports that the industry requires a degree; whether the industry's professional association has made a degree a minimum entry requirement; and whether letters or affidavits from firms or individuals in the industry attest that such firms "routinely employ and recruit only degreed individuals." See *Shanti, Inc. v. Reno*, 36 F. Supp. 2d 1151, 1165 (D.Min. 1999)(quoting *Hird/Blaker Corp. v. Slattery*, 764 F. Supp. 872, 1102 (S.D.N.Y. 1991)).

First, the AAO does not agree with the assertion by counsel and the petitioner that the proffered position would normally require a bachelor's degree or its equivalent in a health-related field. It is noted that, in this case, the beneficiary holds certificates in "General Nursing" and "Midwifery" conferred by an Indian institution. Professor [REDACTED] of the University of Houston – Downtown concludes that the beneficiary's educational background and related employment experience are the equivalent of a Bachelor of Science degree in the Health Professions. Upon review of the record, the proffered position is similar to that of a nurse supervisor. In its *Handbook*, 2004-2005 edition, the DOL states the following about the training and educational requirements for registered nurse positions:

There are three major educational paths to registered nursing: a bachelor's of science degree in nursing (BSN), an associate degree in Nursing (A.D.N.), and a diploma. . . . Generally, licensed graduates of any of the three types of educational programs qualify for entry-level positions as staff nurses.

[S]ome career paths are open only to nurses with bachelor's or advanced degrees. A bachelor's degree is often necessary for administrative positions, and it is a prerequisite for admission to graduate nursing programs in research, consulting, teaching, or a clinical specialization.

The *Handbook* does not elaborate on administrative nursing positions within this classification, although reference is made to two nursing positions within the classification of registered nurse that appear analogous to the proffered position. The *Handbook* states the following about head nurses or nurse supervisors:

Head nurses or nurse supervisors direct nursing activities, primarily in hospitals. They plan work schedules and assign duties to nurses and aides, provide or arrange for training, and visit patients to observe nurses and to ensure that the patients receive proper care. They also may ensure that records are maintained and equipment and supplies are ordered.

The proffered position appears to resemble a nursing position beyond the entry-level registered nurse, but it does not appear to be analogous to an administrative nursing position. A recent CIS policy memo provides the following commentary on administrative nursing positions: "Nursing Services Administrators are generally supervisory level nurses who hold an RN, and a graduate degree in nursing or health administration. (See Bureau of Labor Statistics, U.S. Dep't of Labor, Occupational Outlook Handbook at 75.)" The *Handbook* reference is to the classification of medical and health services managers. The *Handbook* states:

The occupation, medical and health services manager, encompasses all individuals who plan, direct, coordinate and supervise the delivery of healthcare. Medical and health services managers include specialists and generalists. Specialists are in charge of specific clinical departments or services, while generalists manage or help to manage an entire facility or system.

In this case, the petitioner has not demonstrated that the proffered position is an administrative position, which would require a registered nurse with a master's degree in nursing or health administration. Rather, the proposed duties are similar to those of a head nurse or nurse supervisor, as described herein. As such, it is concluded that the petitioner has not demonstrated that the proffered position is a specialty occupation within the meaning of the regulations. Thus, the petitioner has not shown that a bachelor's degree or its equivalent is required for the position being offered to the beneficiary.

Regarding parallel positions in the petitioner's industry, the petitioner submitted a job posting for a senior patient affairs specialist at The University of Texas M.D. Anderson Cancer Center. The job posting, however, does not contain a description of the proposed duties. Therefore, it cannot be determined that the advertised position is similar to the proffered position. The record also contains approval notices that the petitioner states are for other petitions that had been previously filed on behalf of patient advocates. The director's decision does not indicate whether she reviewed the prior approvals of the other nonimmigrant petitions. If the previous nonimmigrant petitions were approved based on the same unsupported and contradictory assertions

that are contained in the current record, the approval would constitute material and gross error on the part of the director. The AAO is not required to approve applications or petitions where eligibility has not been demonstrated, merely because of prior approvals that may have been erroneous. *See, e.g. Matter of Church Scientology International*, 19 I&N Dec. 593, 597 (Comm. 1988). It would be absurd to suggest that CIS or any agency must treat acknowledged errors as binding precedent. *Sussex Engg. Ltd. v. Montgomery*, 825 F.2d 1084, 1090 (6th Cir. 1987), *cert. denied*, 485 U.S. 1008 (1988).

Furthermore, the AAO's authority over the service centers is comparable to the relationship between a court of appeals and a district court. Even if a service center director had approved the nonimmigrant petitions on behalf of the beneficiary, the AAO would not be bound to follow the contradictory decision of a service center. *Louisiana Philharmonic Orchestra v. INS*, 2000 WL 282785 (E.D. La.), *aff'd*, 248 F.3d 1139 (5th Cir. 2001), *cert. denied*, 122 S.Ct. 51 (2001).

The record also does not include any evidence from professional associations regarding an industry standard, or documentation to support the complexity or uniqueness of the proffered position. The petitioner has, thus, not established the criteria set forth at 8 C.F.R. § 214.2(h)(4)(iii)(A)(1) or (2).

The AAO now turns to the criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A)(3) – the employer normally requires a degree or its equivalent for the position. The petitioner submits an approval notice for a patient advocate position to demonstrate that it normally requires a baccalaureate degree for the proffered position. As with the approval notices for the other petitioners, the director's decision does not indicate whether she reviewed the prior approval of the other nonimmigrant petition. As stated previously, if the previous nonimmigrant petition was approved based on the same unsupported and contradictory assertions that are contained in the current record, the approval would constitute material and gross error on the part of the director. The AAO is not required to approve applications or petitions where eligibility has not been demonstrated, merely because of prior approvals that may have been erroneous. *See, e.g. Matter of Church Scientology International*, 19 I&N Dec. 593, 597 (Comm. 1988). It would be absurd to suggest that CIS or any agency must treat acknowledged errors as binding precedent. *Sussex Engg. Ltd. v. Montgomery*, 825 F.2d 1084, 1090 (6th Cir. 1987), *cert. denied*, 485 U.S. 1008 (1988).

Furthermore, the record does not indicate the location where the beneficiary would perform the proposed duties nor does the record contain a comprehensive description of the proposed duties from an authorized representative of the location where the beneficiary would perform the proposed duties. CIS must examine the ultimate employment of the alien, and determine whether the position qualifies as a specialty occupation, regardless of the petitioner's past hiring practices. *Cf. Defensor v. Meissner*, 201 F. 3d 384 (5th Cir. 2000). The critical element is not the title of the position or an employer's self-imposed standards, but whether the position actually requires the theoretical and practical application of a body of highly specialized knowledge, and the attainment of a baccalaureate or higher degree in the specific specialty as the minimum for entry into the occupation as required by the Act.¹ In this regard, the petitioner fails to establish that the patient advocate position it is offering to the beneficiary entails the theoretical and practical application of a body of highly specialized knowledge.

¹ The court in *Defensor v. Meissner* observed that the four criteria at 8 C.F.R. § 214.2(h)(4)(iii)(A) present certain ambiguities when compared to the statutory definition, and "might also be read as merely an additional requirement that a position must meet, in addition to the statutory and regulatory definition." *See id.* at 387.

Finally, the AAO turns to the criterion at 8 C.F.R. § 214.2(h)(iii)(A)(4) – the nature of the specific duties is so specialized and complex that knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

To the extent that they are depicted in the record, the duties do not appear so specialized and complex as to require the highly specialized knowledge associated with a baccalaureate or higher degree, or its equivalent, in a specific specialty. Therefore, the evidence does not establish that the proffered position is a specialty occupation under 8 C.F.R. § 214.2(h)(4)(iii)(A)(4).

As related in the discussion above, the petitioner has failed to establish that the proffered position is a specialty occupation. Accordingly, the AAO shall not disturb the director's denial of the petition.

The burden of proof in these proceedings rests solely with the petitioner. Section 291 of the Act, 8 U.S.C. § 1361. The petitioner has not sustained that burden.

ORDER: The director's decision, dated November 13, 2003, is affirmed. The petition is denied.
