IN RE: Petitioner: [Redacted]
Beneficiary: [Redacted]

PETITION: Petition for a Nonimmigrant Worker Pursuant to Section 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act, 8 U.S.C. § 1101(a)(15)(H)(i)(b)

ON BEHALF OF PETITIONER:

INSTRUCTIONS:

This is the decision of the Administrative Appeals Office in your case. All documents have been returned to the office that originally decided your case. Any further inquiry must be made to that office.

Mari Johnson

Robert P. Wiemann, Director
Administrative Appeals Office

DISCUSSION: The service center director denied the nonimmigrant visa petition and the matter is now before the Administrative Appeals Office (AAO) on appeal. The appeal will be dismissed. The petition will be denied.

The petitioner is a jewelry design and manufacturing firm that seeks to employ the beneficiary as a jewelry designer. The petitioner endeavors to classify the beneficiary as a nonimmigrant worker in a specialty occupation pursuant to section 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act (the Act), 8 U.S.C. § 1101(a)(15)(H)(i)(b).

The director denied the petition because the proffered position is not a specialty occupation, and because the beneficiary is not qualified to perform the duties of a specialty occupation. On appeal, counsel submits a brief.

Section 214(i)(1) of the Immigration and Nationality Act (the Act), 8 U.S.C. § 1184(i)(1), defines the term "specialty occupation" as an occupation that requires:

- (A) theoretical and practical application of a body of highly specialized knowledge, and
- (B) attainment of a bachelor's or higher degree in the specific specialty (or its equivalent) as a minimum for entry into the occupation in the United States.

Pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(A), to qualify as a specialty occupation, the position must meet one of the following criteria:

- (1) A baccalaureate or higher degree or its equivalent is normally the minimum requirement for entry into the particular position;
- (2) The degree requirement is common to the industry in parallel positions among similar organizations or, in the alternative, an employer may show that its particular position is so complex or unique that it can be performed only by an individual with a degree;
- (3) The employer normally requires a degree or its equivalent for the position; or
- (4) The nature of the specific duties is so specialized and complex that knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

Citizenship and Immigration Services (CIS) interprets the term "degree" in the criteria at 8 C.F.R. § 214.2(h)(4)(iii)(A) to mean not just any baccalaureate or higher degree, but one in a specific specialty that is directly related to the proffered position.

The record of proceeding before the AAO contains: (1) Form I-129 and supporting documentation; (2) the director's request for additional evidence; (3) the petitioner's response to the director's request; (4) the

director's denial letter; and (5) Form I-290B and supporting documentation. The AAO reviewed the record in its entirety before issuing its decision.

The petitioner is seeking the beneficiary's services as a jewelry designer. Evidence of the beneficiary's duties includes: the I-129 petition; the petitioner's letter in support of the petition; and the petitioner's response to the director's request for evidence. According to this evidence, the beneficiary would perform duties that entail creating original jewelry designs using both pencil sketches and computer aided design and manufacturing (CAD/CAM) software. The petitioner indicated that a qualified candidate for the job would possess a bachelor's degree in industrial design.

The director found that the proffered position was not a specialty occupation because the job is not an industrial designer position; it is a jewelry designer position. Citing to the Department of Labor's *Occupational Outlook Handbook (Handbook)*, 2000-2001 edition, the director noted that the minimum requirement for entry into the position of jewelry designer, including those involving the use of CAD/CAM software, was not a baccalaureate degree or its equivalent in a specific specialty. The director found further that the petitioner failed to establish any of the criteria found at 8 C.F.R. § 214.2(h)(4)(iii)(A).

On appeal, counsel states that because the proffered position requires the use of computer software, it is an industrial designer position. Counsel also notes that according to the *Dictionary of Occupational Titles (DOT)*, jewelry may be one of the products designed by an industrial designer. Counsel asserts that the petitioner meets the criterion outlined at 8 C.F.R. § 214.2 (h)(4)(iii)(A)(2), in that this particular position is so complex or unique that it can be performed only by an individual with a degree.

Upon review of the record, however, the petitioner has not established the criterion set forth at 8 C.F.R. § 214.2(h)(4)(iii)(A)(2). Moreover, the record contains no evidence to support any of the other three criteria discussed above; therefore, the proffered position is not a specialty occupation.

The AAO routinely consults the *Handbook* for its information about the duties and educational requirements of particular occupations. The *Handbook* clarifies that the focus of the work of industrial designers, as opposed to other types of designers, is on designing manufactured products and equipment, including airplanes, cars, computers, home appliances, and numerous other commercial items. The *Handbook* does not include jewelry among the goods designed by industrial designers; rather, jewelry design is part of the work of jewelers. As the director noted, the *Handbook* points out that CAD/CAM software training may be obtained in technical and vocational schools. Although some universities offer degree programs in jewelry design, no evidence in the *Handbook* indicates that a baccalaureate or higher degree, or its equivalent, is required for a jewelry designer job.

The record does not include documentation to support the complexity or uniqueness of the proffered position. Counsel's statements to this effect do not constitute evidence. Simply going on record without supporting documentary evidence is not sufficient for the purpose of meeting the burden of proof in these proceedings. *Matter of Treasure Craft of California*, 14 I&N Dec. 190 (Reg. Comm. 1972). As the record also does not contain evidence regarding parallel positions in the petitioner's industry, or any evidence from professional associations regarding an industry standard, the petitioner has not established the criteria set forth at 8 C.F.R. § 214.2(h)(4)(iii)(A)(2).

The documentation on the record does not establish that the proffered position meets any of the other criteria cited above. Thus, the petitioner has failed to establish that the proffered position is a specialty occupation. Accordingly, the AAO shall not disturb the director's denial of the petition.

The director also found that the beneficiary was not qualified to perform the duties of a specialty occupation. Section 214(i)(2) of the Act, 8 U.S.C. § 1184(i)(2), states that an alien applying for classification as an H-1B nonimmigrant worker must possess full state licensure to practice in the occupation, if such licensure is required to practice in the occupation, and completion of the degree in the specialty that the occupation requires. If the alien does not possess the required degree, the petitioner must demonstrate that the alien has experience in the specialty equivalent to the completion of such degree, and recognition of expertise in the specialty through progressively responsible positions relating to the specialty.

Pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(C), to qualify to perform services in a specialty occupation, an alien must meet one of the following criteria:

- (1) Hold a United States baccalaureate or higher degree required by the specialty occupation from an accredited college or university;
- (2) Hold a foreign degree determined to be equivalent to a United States baccalaureate or higher degree required by the specialty occupation from an accredited college or university;
- (3) Hold an unrestricted state license, registration or certification which authorizes him or her to fully practice the specialty occupation and be immediately engaged in that specialty in the state of intended employment; or
- (4) Have education, specialized training, and/or progressively responsible experience that is equivalent to completion of a United States baccalaureate or higher degree in the specialty occupation, and have recognition of expertise in the specialty through progressively responsible positions directly related to the specialty.

The record reflects that the beneficiary possesses a high school diploma and fifteen years of experience as a jewelry designer. The beneficiary does not hold a baccalaureate degree from an accredited U.S. college or university in any field of study, or a foreign degree determined to be equivalent to a baccalaureate degree from a U.S. college or university in any field of study. Therefore, the petitioner must demonstrate that the beneficiary meets the criterion at 8 C.F.R. § 214.2(h)(4)(iii)(C)(4).

Pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(D), equating the beneficiary's credentials to a United States baccalaureate or higher degree shall be determined by one or more of the following:

- (1) An evaluation from an official who has authority to grant college-level credit for training and/or experience in the specialty at an accredited college or university which has a program for granting such credit based on an individual's training and/or work experience;
- (2) The results of recognized college-level equivalency examinations or special credit programs, such as the College Level Examination Program (CLEP), or Program on Noncollegiate Sponsored Instruction (PONSI);
- (3) An evaluation of education by a reliable credentials evaluation service which specializes in evaluating foreign educational credentials;
- (4) Evidence of certification or registration from a nationally-recognized professional association or society for the specialty that is known to grant certification or registration to persons in the occupational specialty who have achieved a certain level of competence in the specialty;
- (5) A determination by the Service that the equivalent of the degree required by the specialty occupation has been acquired through a combination of education, specialized training, and/or work experience in areas related to the specialty and that the alien has achieved recognition of expertise in the specialty occupation as a result of such training and experience.

The record contains an evaluation from [REDACTED]. The evaluator concluded that the beneficiary possesses the equivalent of a bachelor of arts degree in industrial design from an accredited U.S. college or university. However, the evaluation is based upon the beneficiary's education, training and work experience. A credentials evaluation service may not evaluate an alien's work experience or training; it can only evaluate educational credentials. *See* 8 C.F.R. § 214.2(h)(4)(iii)(D)(3). Thus, the evaluation carries no weight in these proceedings. *Matter of Sea, Inc.*, 19 I&N Dec. 817 (Comm. 1988). As the evidence on record does not meet any of the first four criteria listed above, CIS must make the determination regarding the educational equivalency of the combination of the beneficiary's training and experience.

When CIS determines an alien's qualifications pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(D)(5), three years of specialized training and/or work experience must be demonstrated for each year of college-level training the alien lacks. It must be clearly demonstrated that the alien's training and/or work experience included the theoretical and practical application of specialized knowledge required by the specialty occupation; that the alien's experience was gained while working with peers, supervisors, or subordinates who have a degree or its equivalent in the specialty occupation; and that the alien has recognition of expertise in the specialty evidenced by at least one type of documentation such as:

- (i) Recognition of expertise in the specialty occupation by at least two recognized authorities in the same specialty occupation¹;

¹ *Recognized authority* means a person or organization with expertise in a particular field, special skills or knowledge in that field, and the expertise to render the type of opinion requested. A recognized authority's

- (ii) Membership in a recognized foreign or United States association or society in the specialty occupation;
- (iii) Published material by or about the alien in professional publications, trade journals, books, or major newspapers;
- (iv) Licensure or registration to practice the specialty occupation in a foreign country; or
- (v) Achievements which a recognized authority has determined to be significant contributions to the field of the specialty occupation.

The employer letter included in the record provides no information about the beneficiary's prior work experience. Thus, the AAO cannot conclude that the beneficiary's past work experience included the theoretical and practical application of a body of highly specialized knowledge, nor that the beneficiary's work experience was gained while working with peers, supervisors, or subordinates who have a degree or its equivalent in the specialty occupation. Also, there is no evidence that the beneficiary has recognition of expertise. Therefore, the petitioner has failed to establish that the beneficiary is qualified to perform the duties of the proffered position.

The burden of proof in these proceedings rests solely with the petitioner. Section 291 of the Act, 8 U.S.C. § 1361. The petitioner has not sustained that burden.

ORDER: The appeal is dismissed. The petition is denied.

opinion must state: (1) the writer's qualifications as an expert; (2) the writer's experience giving such opinions, citing specific instances where past opinions have been accepted as authoritative and by whom; (3) how the conclusions were reached; and (4) the basis for the conclusions supported by copies or citations of any research material used. 8 C.F.R. § 214.2(h)(4)(ii).
