IN RE: Petitioner: [Redacted]
Beneficiary: [Redacted]

PETITION: Petition for a Nonimmigrant Worker Pursuant to Section 101(a)(15)(H)(i)(b) of the
Immigration and Nationality Act, 8 U.S.C. § 1101(a)(15)(H)(i)(b)

ON BEHALF OF PETITIONER:

INSTRUCTIONS:

This is the decision of the Administrative Appeals Office in your case. All documents have been returned to the office that originally decided your case. Any further inquiry must be made to that office.

Mari Johnson

 Robert P. Wiemann, Director
Administrative Appeals Office

DISCUSSION: The service center director denied the nonimmigrant visa petition and the matter is now before the Administrative Appeals Office (AAO) on appeal. The appeal will be dismissed. The petition will be denied.

The petitioner is a healthcare management and technology company. It seeks to employ the beneficiary as a technical consultant, and endeavors to classify her as a nonimmigrant worker in a specialty occupation pursuant to section 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act (the Act), 8 U.S.C. § 1101(a)(15)(H)(i)(b).

The director denied the petition because the proffered position is not a specialty occupation and because the beneficiary is not qualified to perform the duties of a specialty occupation. On appeal, counsel submits a brief and additional information stating that the proffered position qualifies as a specialty occupation and that the beneficiary is qualified to perform the duties of a specialty occupation.

The first issue to be discussed in this proceeding is whether the position offered to the beneficiary qualifies as a specialty occupation.

Section 101(a)(15)(H)(i)(b) of the Act, 8 U.S.C. § 1101(a)(15)(H)(i)(b), provides, in part, for the classification of qualified nonimmigrant aliens who are coming temporarily to the United States to perform services in a specialty occupation.

Section 214(i)(1) of the Act, 8 U.S.C. § 1184(i)(1), defines the term "specialty occupation" as an occupation that requires:

- (A) theoretical and practical application of a body of highly specialized knowledge, and
- (B) attainment of a bachelor's or higher degree in the specific specialty (or its equivalent) as a minimum for entry into the occupation in the United States.

The term "specialty occupation" is further defined at 8 C.F.R. § 214.2(h)(4)(ii) as:

[A]n occupation which requires theoretical and practical application of a body of highly specialized knowledge in field of human endeavor including, but not limited to, architecture, engineering, mathematics, physical sciences, social sciences, medicine and health, education, business specialties, accounting, law, theology, and the arts, and which requires the attainment of a bachelor's degree or higher in a specific specialty, or its equivalent, as a minimum for entry into the occupation in the United States.

Pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(A), to qualify as a specialty occupation, the position must meet one of the following criteria:

- (1) A baccalaureate or higher degree or its equivalent is normally the minimum requirement for entry into the particular position;

- (2) The degree requirement is common to the industry in parallel positions among similar organizations or, in the alternative, an employer may show that its particular position is so complex or unique that it can be performed only by an individual with a degree;
- (3) The employer normally requires a degree or its equivalent for the position; or
- (4) The nature of the specific duties are so specialized and complex that knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

Citizenship and Immigration Services (CIS) interprets the term “degree” in the criteria at 8 C.F.R. § 214.2(h)(4)(iii)(A) to mean not just any baccalaureate or higher degree, but one in a specific specialty that is directly related to the proffered position.

The record of proceedings before the AAO contains: (1) Form I-129 and supporting documentation; (2) the director’s request for additional evidence; (3) the petitioner’s response to the director’s request; (4) the director’s denial letter; and (5) Form I-290B with supporting documentation. The AAO reviewed the record in its entirety before issuing its decision.

The petitioner is seeking the beneficiary’s services as a technical consultant. Evidence of the beneficiary’s duties includes the I-129 petition with attachment, and the petitioner’s response to the director’s request for evidence. According to evidence, the beneficiary would: work as a network engineer – solve problems with the computer network as they arise; design web solutions for clients; manage current information systems; troubleshoot problems as reported by computer users and automated network monitoring systems; and make recommendations for enhancements in the construction of future servers and networks. The petitioner requires a bachelor’s degree for entry into the proffered position, but does not state that it requires a degree in any particular discipline.

Upon review of the record, the petitioner has failed to establish that the proffered position qualifies as a specialty occupation. The AAO routinely consults the U.S. Department of Labor’s *Occupational Outlook Handbook (Handbook)* for information about the duties and educational requirements of particular occupations. The duties of the proffered position are presented in such vague and generic terms, however, that it is impossible to determine precisely what tasks the beneficiary would perform on a daily basis, or the complexity of the tasks to be performed. For example, the petitioner indicates that the beneficiary would: solve problems in case something goes wrong with the computer network; manage information systems; troubleshoot problems; and make recommendations for network enhancements. It is impossible to determine from this generic description of the tasks to be performed whether performance of these duties requires the theoretical and practical application of a body of highly specialized knowledge, or whether the tasks are those normally performed by computer support specialists having less than a baccalaureate education. It is incumbent upon the petitioner to describe the duties of the proffered position in such detail as to permit an analysis of the day-to-day activities to be performed by the beneficiary. This, the petitioner has failed to do. As such, it is impossible to determine whether: a baccalaureate or higher degree is normally the minimum requirement for entry into the offered position; a degree requirement is common to the industry in parallel

position among similar organizations; the duties of the offered position are so complex or unique that they can be performed by an individual with a degree; or knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree. The petitioner has failed to establish that the offered position meets the requirements of 8 C.F.R. § 214.2(h)(4)(iii)(A)(1),(2), or (4). The petitioner does not assert that it normally requires a degree in a specific specialty for the offered position, and offers no evidence in this regard. 8 C.F.R. § 214.2(h)(4)(iii)(A)(3).

The final issue to be addressed is whether the beneficiary is qualified to perform the duties of a specialty occupation.

Section 214(i)(2) of the Act, 8 U.S.C. § 1184(i)(2), states that an alien applying for classification as an H-1B nonimmigrant worker must possess:

- (A) full state licensure to practice in the occupation, if such licensure is required to practice in the occupation,
- (B) completion of the degree described in paragraph (1)(B) for the occupation, or
- (C) (i) experience in the specialty equivalent to the completion of such degree, and
(ii) recognition of expertise in the specialty through progressively responsible positions relating to the specialty.

Pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(C), to qualify to perform services in a specialty occupation, the alien must meet one of the following criteria:

- (1) Hold a United States baccalaureate or higher degree required by the specialty occupation from an accredited college or university;
- (2) Hold a foreign degree determined to be equivalent to a United States baccalaureate or higher degree required by the specialty occupation from an accredited college or university;
- (3) Hold an unrestricted State license, registration or certification which authorizes him or her to fully practice the specialty occupation and be immediately engaged in that specialty in the state of intended employment; or
- (4) Have education, specialized training, and/or progressively responsible experience that is equivalent to completion of a United States baccalaureate or higher degree in the specialty occupation, and have recognition of expertise in the specialty through progressively responsible positions directly related to the specialty.

Pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(D), for purposes of paragraph (h)(4)(iii)(C)(4) of this section, equivalence to completion of a United States baccalaureate or higher degree shall mean achievement of a level of knowledge, competence, and practice in the specialty occupation that has been determined to be equal

to that of an individual who has a baccalaureate or higher degree in the specialty and shall be determined by one or more of the following:

- (1) An evaluation from an official who has authority to grant college-level credit for training and/or experience in the specialty at an accredited college or university which has a program for granting such credit based on an individual's training and/or work experience;
- (2) The results of recognized college-level equivalency examinations or special credit programs, such as the College Level Examination Program (CLEP), or Program on Noncollegiate Sponsored Instruction (PONSI);
- (3) An evaluation of education by a reliable credentials evaluation service which specializes in evaluating foreign educational credentials;
- (4) Evidence of certification or registration from a nationally-recognized professional association or society for the specialty that is known to grant certification or registration to persons in the occupational specialty who have achieved a certain level of competence in the specialty;
- (5) A determination by the Service that the equivalent of the degree required by the specialty occupation has been acquired through a combination of education, specialized training, and/or work experience in areas related to the specialty and that the alien has achieved recognition of expertise in the specialty occupation as a result of such training and experience.

The petitioner seeks to qualify the beneficiary by establishing that the beneficiary meets the requirements of 8 C.F.R. § 214.2 (h)(4)(iii)(C)(4). In support of this assertion, the petitioner submitted evaluations from Alexander Kiselev, a credentials evaluator with Excel Evaluations. [REDACTED] states that the beneficiary possesses the equivalent of a bachelor's degree in civil engineering from an accredited institution of higher education in the United States based upon her prior education and work experience. The evaluation, however, was presented on behalf of a credentials evaluation service. Credentials evaluations services may evaluate a beneficiary's education for the purpose of determining degree equivalence, not past work experience. 8 C.F.R. § 214.2(h)(4)(iii)(D)(3). Work experience may only be evaluated, for the purpose of determining degree equivalence, by an official who has authority to grant college-level credit for training and/or experience in the specialty at an accredited college or university which has a program for granting such credit based on an individual's training and/or work experience. 8 C.F.R. § 214.2(h)(4)(iii)(D)(1). The record does not establish that Mr. Kiselev fulfills this requirement. The tendered evaluation is, therefore, of little evidentiary value and does not establish that the beneficiary has the equivalent of a United States baccalaureate level education.

CIS may itself determine whether the beneficiary is qualified to perform the duties of the specialty occupation. That determination may be made pursuant to 8 C.F.R. § 214.2 (h)(4)(iii)(D)(5), which provides:

For purposes of determining equivalency to a baccalaureate degree in the specialty, three years of specialized training and/or work experience must be demonstrated for each year of college-level training the alien lacks. For equivalence to an advanced (or Masters) degree, the alien must have a baccalaureate degree followed by at least five years of experience in the

specialty. . . . It must be clearly demonstrated that the alien's training and/or work experience included the theoretical and practical application of specialized knowledge required by the specialty occupation; that the alien's experience was gained while working with peers, supervisors, or subordinates who have a degree or its equivalent in the specialty occupation; and that the alien has recognition of expertise in the specialty evidenced by at least one type of documentation such as:

- (i) Recognition of expertise in the specialty occupation by at least two recognized authorities in the same specialty occupation;
- (ii) Membership in a recognized foreign or United States association or society in the specialty occupation;
- (iii) Published material by or about the alien in professional publications, trade journals, books or major newspapers;
- (iv) Licensure or registration to practice the specialty occupation in a foreign country;
or
- (v) Achievements which a recognized authority has determined to be significant contributions to the field of the specialty occupation.

The documentation recounting the beneficiary's work experience is insufficient in detail to determine that: the work experience included the theoretical and practical application of specialized knowledge required by a specialty occupation; the beneficiary's experience was gained while working with peers, supervisors, or subordinates who have a degree or its equivalent in a specialty occupation; and the beneficiary has recognition of expertise in a specialty occupation. CIS cannot, therefore, determine that the beneficiary is qualified to perform the duties of a specialty occupation.

The burden of proof in these proceedings rests solely with the petitioner. Section 291 of the Act, 8 U.S.C. § 1361. The petitioner has failed to sustain that burden and the appeal shall accordingly be dismissed.

ORDER: The appeal is dismissed. The petition is denied.
