IN RE: Petitioner:
Beneficiary:

PETITION: Petition for a Nonimmigrant Worker Pursuant to Section 101(a)(15)(H)(i)(b) of the
Immigration and Nationality Act, 8 U.S.C. § 1101(a)(15)(H)(i)(b)

ON BEHALF OF PETITIONER:

INSTRUCTIONS:

This is the decision of the Administrative Appeals Office in your case. All documents have been returned to the office that originally decided your case. Any further inquiry must be made to that office.

for Robert P. Wiemann, Director
Administrative Appeals Office

DISCUSSION: The service center director denied the nonimmigrant visa petition and the matter is now before the Administrative Appeals Office (AAO) on appeal. The appeal will be dismissed. The petition will be denied.

The petitioner is a medical clinic that seeks to employ the beneficiary as a dialysis nurse. The petitioner endeavors to classify the beneficiary as a nonimmigrant worker in a specialty occupation pursuant to § 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act (the Act), 8 U.S.C. § 1101(a)(15)(H)(i)(b).

The director denied the petition because the proffered position is not a specialty occupation. On appeal, counsel submits a brief.

Section 214(i)(1) of the Act, 8 U.S.C. § 1184(i)(1), defines the term "specialty occupation" as an occupation that requires:

- (A) theoretical and practical application of a body of highly specialized knowledge, and
- (B) attainment of a bachelor's or higher degree in the specific specialty (or its equivalent) as a minimum for entry into the occupation in the United States.

Pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(A), to qualify as a specialty occupation, the position must meet one of the following criteria:

- (1) A baccalaureate or higher degree or its equivalent is normally the minimum requirement for entry into the particular position;
- (2) The degree requirement is common to the industry in parallel positions among similar organizations or, in the alternative, an employer may show that its particular position is so complex or unique that it can be performed only by an individual with a degree;
- (3) The employer normally requires a degree or its equivalent for the position; or
- (4) The nature of the specific duties is so specialized and complex that knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

Citizenship and Immigration Services (CIS) interprets the term "degree" in the criteria at 8 C.F.R. § 214.2(h)(4)(iii)(A) to mean not just any baccalaureate or higher degree, but one in a specific specialty that is directly related to the proffered position.

The record of proceeding before the AAO contains: (1) Form I-129 and supporting documentation; (2) the director's request for additional evidence; (3) the petitioner's response to the director's request; (4) the director's denial letter; and (5) Form I-290B and supporting documentation. The AAO reviewed the record in its entirety before issuing its decision.

The petitioner is seeking the beneficiary's services as a dialysis nurse. Evidence of the beneficiary's duties includes the I-129 petition and the petitioner's response to the director's request for evidence. According to this evidence, the beneficiary would perform duties that entail: evaluating and assisting nursing needs of the

dialysis unit; performing hemodialysis treatments and providing direct patient care; evaluating the quality of nursing care; planning and implementing training programs; and participating in quality assurance studies. The petitioner indicated that a qualified candidate for the job would possess a bachelor's degree in nursing.

The director found that the proffered position, which is that of a registered nurse, was not a specialty occupation. The director noted that the minimum requirement for entry into the position was not a baccalaureate degree or its equivalent in a specific specialty. The director found further that the petitioner failed to establish any of the criteria found at 8 C.F.R. § 214.2(h)(4)(iii)(A).

On appeal, counsel states, in part, that the proffered position, which is that of a dialysis charge nurse, requires a bachelor's degree in nursing. Counsel further states that the proposed duties, which require critical thinking, decision making, professional and written expression, and management skills, are usually associated with the attainment of a baccalaureate or higher degree.

Upon review of the record, the petitioner has established none of the four criteria outlined in 8 C.F.R. § 214.2(h)(4)(iii)(A). Therefore, the proffered position is not a specialty occupation.

The AAO turns first to the criteria at 8 C.F.R. § 214.2(h)(4)(iii)(A)(1) and (2): a baccalaureate or higher degree or its equivalent is the normal minimum requirement for entry into the particular position; a degree requirement is common to the industry in parallel positions among similar organizations; or a particular position is so complex or unique that it can be performed only by an individual with a degree.

Factors often considered by CIS when determining these criteria include: whether the Department of Labor's (DOL) *Occupational Outlook Handbook (Handbook)* reports that the industry requires a degree; whether the industry's professional association has made a degree a minimum entry requirement; and whether letters or affidavits from firms or individuals in the industry attest that such firms "routinely employ and recruit only degreed individuals." See *Shanti, Inc. v. Reno*, 36 F. Supp. 2d 1151, 1165 (D.Min. 1999)(quoting *Hird/Blaker Corp. v. Slattery*, 764 F. Supp. 872, 1102 (S.D.N.Y. 1991)).

The AAO routinely consults the *Handbook* for its information about the duties and educational requirements of particular occupations. The AAO does not agree with counsel's assertion that the proffered position would normally require a bachelor's degree in nursing or a related field. The proffered position is that of a dialysis charge nurse. In its *Handbook*, 2004-2005 edition, the DOL states the following about the training and educational requirements for registered nurse positions:

There are three major educational paths to registered nursing: a bachelor's of science degree in nursing (BSN), an associate degree in Nursing (A.D.N.), and a diploma. . . . Generally, licensed graduates of any of the three types of educational programs qualify for entry-level positions as staff nurses.

[S]ome career paths are open only to nurses with bachelor's or advanced degrees. A bachelor's degree is often necessary for administrative positions, and it is a prerequisite for admission to graduate nursing programs in research, consulting, teaching, or a clinical specialization.

The *Handbook* does not elaborate on administrative nursing positions within this classification, although reference is made to two nursing positions within the classification of registered nurse that appear analogous to the proffered position. The *Handbook* states the following about head nurses or nurse supervisors:

Head nurses or nurse supervisors direct nursing activities, primarily in hospitals. They plan work schedules and assign duties to nurses and aides, provide or arrange for training, and visit patients to observe nurses and to ensure that the patients receive proper care. They also may ensure that records are maintained and equipment and supplies are ordered.

The proffered position appears to resemble a nursing position beyond the entry-level registered nurse, but it does not appear to be analogous to an administrative nursing position. A recent CIS policy memo provides the following commentary on administrative nursing positions: "Nursing Services Administrators are generally supervisory level nurses who hold an RN, and a graduate degree in nursing or health administration. (See Bureau of Labor Statistics, U.S. Dep't of Labor, Occupational Outlook Handbook at 75.)" The *Handbook* reference is to the classification of medical and health services managers. The *Handbook* states:

The occupation, medical and health services manager, encompasses all individuals who plan, direct, coordinate and supervise the delivery of healthcare. Medical and health services managers include specialists and generalists. Specialists are in charge of specific clinical departments or services, while generalists manage or help to manage an entire facility or system.

In this case, the petitioner has not demonstrated that the proffered position is an administrative position, which would require a registered nurse with a master's degree in nursing or health administration. Rather, the proposed duties are similar to those of a head nurse or nurse supervisor, as described herein. As such, it is concluded that the petitioner has not demonstrated that the proffered position is a specialty occupation within the meaning of the regulations. Thus, the petitioner has not shown that a bachelor's degree or its equivalent is required for the position being offered to the beneficiary.

The record does not include any evidence regarding parallel positions in the petitioner's industry or from professional associations regarding an industry standard. In addition, no documentation to support the complexity or uniqueness of the proffered position was submitted. The petitioner has, thus, not established the criteria set forth at 8 C.F.R. § 214.2(h)(4)(iii)(A)(1) or (2).

The AAO now turns to the criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A)(3) – the employer normally requires a degree or its equivalent for the position. As counsel does not address this issue on appeal, it will not be discussed further.

Finally, the AAO turns to the criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A)(4) – the nature of the specific duties is so specialized and complex that knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

To the extent that they are depicted in the record, the duties do not appear so specialized and complex as to require the highly specialized knowledge associated with a baccalaureate or higher degree, or its equivalent, in a specific specialty. Therefore, the evidence does not establish that the proffered position is a specialty occupation under 8 C.F.R. § 214.2(h)(4)(iii)(A)(4).

As related in the discussion above, the petitioner has failed to establish that the proffered position is a specialty occupation. Accordingly, the director's decision will not be disturbed.

The burden of proof in these proceedings rests solely with the petitioner. Section 291 of the Act, 8 U.S.C. § 1361. The petitioner has not sustained that burden.

ORDER: The appeal is dismissed.
