IN RE: Petitioner: [Redacted]
Beneficiary: [Redacted]

PETITION: Petition for a Nonimmigrant Worker Pursuant to Section 101(a)(15)(H)(i)(b) of the
Immigration and Nationality Act, 8 U.S.C. § 1101(a)(15)(H)(i)(b)

ON BEHALF OF PETITIONER:

INSTRUCTIONS:

This is the decision of the Administrative Appeals Office in your case. All documents have been returned to the office that originally decided your case. Any further inquiry must be made to that office.

Mari Plurson

RP Robert P. Wiemann, Director
Administrative Appeals Office

DISCUSSION: The service center director denied the nonimmigrant visa petition and the matter is now before the Administrative Appeals Office (AAO) on appeal. The appeal will be dismissed. The petition will be denied.

The petitioner is a dental clinic that seeks to employ the beneficiary as a dental laboratory technologist. The petitioner endeavors to classify the beneficiary as a nonimmigrant worker in a specialty occupation pursuant to § 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act (the Act), 8 U.S.C. § 1101(a)(15)(H)(i)(b).

The director denied the petition because the proffered position is not a specialty occupation and the beneficiary is not qualified to perform a specialty occupation. On appeal, counsel submits a brief. It is also noted that counsel recently submitted evidence that the beneficiary was licensed by the State of California on January 1, 2004, as a Clinical Laboratory Scientist.

The AAO will first address the director's conclusion that the position is not a specialty occupation.

Section 214(i)(1) of the Act, 8 U.S.C. § 1184(i)(1), defines the term "specialty occupation" as an occupation that requires:

- (A) theoretical and practical application of a body of highly specialized knowledge, and
- (B) attainment of a bachelor's or higher degree in the specific specialty (or its equivalent) as a minimum for entry into the occupation in the United States.

Pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(A), to qualify as a specialty occupation, the position must meet one of the following criteria:

- (1) A baccalaureate or higher degree or its equivalent is normally the minimum requirement for entry into the particular position;
- (2) The degree requirement is common to the industry in parallel positions among similar organizations or, in the alternative, an employer may show that its particular position is so complex or unique that it can be performed only by an individual with a degree;
- (3) The employer normally requires a degree or its equivalent for the position; or
- (4) The nature of the specific duties is so specialized and complex that knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

Citizenship and Immigration Services (CIS) interprets the term "degree" in the criteria at 8 C.F.R. § 214.2(h)(4)(iii)(A) to mean not just any baccalaureate or higher degree, but one in a specific specialty that is directly related to the proffered position.

The record of proceeding before the AAO contains: (1) Form I-129 and supporting documentation; (2) the director's request for additional evidence; (3) the petitioner's response to the director's request; (4) the director's denial letter; and (5) Form I-290B and supporting documentation. The AAO reviewed the record in its entirety before issuing its decision.

The petitioner is seeking the beneficiary's services as a dental laboratory technologist. Evidence of the beneficiary's duties includes: the I-129 petition; the petitioner's May 8, 2002 letter in support of the petition; and the petitioner's response to the director's request for evidence. According to this evidence, the beneficiary would perform duties *under direct supervision* that entail: performing complex dental laboratory tests for diagnosis, treatment, and prevention of diseases; analyzing test results and entering the findings in the computer; charting the conditions of the decay and diseases for diagnosis and treatment by the dentist; and exposing and developing dental x-ray films. The petitioner indicated that a qualified candidate for the job would possess a bachelor's degree in dental medicine.

The director found that the proffered position was not a specialty occupation because the proposed duties, which include stocking supplies, can be performed by any office employee. Citing to the Department of Labor's (DOL) *Occupational Outlook Handbook (Handbook)*, the director noted that, although the petitioner does not require a license for the proffered position, the State of California requires that its medical laboratory technologists hold a state license. The director found further that the petitioner failed to establish any of the criteria found at 8 C.F.R. § 214.2(h)(4)(iii)(A).

On appeal, counsel states, in part, that the proposed duties, which include performing complex dental tests for the diagnosis, treatment, and prevention of diseases, are so complex that a bachelor's degree in dental medicine is required. Counsel further states that CIS has approved a similar petition.

Upon review of the record, the petitioner has established none of the four criteria outlined in 8 C.F.R. § 214.2(h)(4)(iii)(A). Therefore, the proffered position is not a specialty occupation.

The AAO turns first to the criteria at 8 C.F.R. § 214.2(h)(4)(iii)(A)(1) and (2): a baccalaureate or higher degree or its equivalent is the normal minimum requirement for entry into the particular position; a degree requirement is common to the industry in parallel positions among similar organizations; or a particular position is so complex or unique that it can be performed only by an individual with a degree.

Factors often considered by CIS when determining these criteria include: whether the *Handbook* reports that the industry requires a degree; whether the industry's professional association has made a degree a minimum entry requirement; and whether letters or affidavits from firms or individuals in the industry attest that such firms "routinely employ and recruit only degreed individuals." *See Shanti, Inc. v. Reno*, 36 F. Supp. 2d 1151, 1165 (D.Min. 1999)(quoting *Hird/Blaker Corp. v. Slattery*, 764 F. Supp. 872, 1102 (S.D.N.Y. 1991)).

The AAO routinely consults the *Handbook* for its information about the duties and educational requirements of particular occupations. The AAO does not concur with counsel that the proffered position is that of a dental medical technologist. Rather, the types of duties the petitioner ascribes to the beneficiary primarily fall primarily within the scope of a clinical laboratory technician, as described by the DOL in its *Handbook*, 2004-2005 edition. According to the DOL at page 314 of the *Handbook*, clinical laboratory technicians usually work under supervision. No evidence in the *Handbook* indicates that a baccalaureate or higher degree, or its equivalent, is required for a clinical laboratory technician job.

Counsel asserts that CIS has already determined that the proffered position is a specialty occupation since CIS has approved another, similar petition in the past. The AAO is not required to approve petitions where eligibility has not been demonstrated, merely because of prior approvals that may have been erroneous. *See, e.g., Matter of Church Scientology International*, 19 I&N Dec. 593, 597 (Comm. 1988). Neither the AAO nor

any other agency must treat acknowledged errors as binding precedent. *Sussex Engg. Ltd. v. Montgomery* 825 F.2d 1084, 1090 (6th Cir. 1987), *cert. denied*, 485 U.S. 1008 (1988).

The record does not include any evidence from professional associations regarding an industry standard, or documentation to support the complexity or uniqueness of the proffered position. The petitioner has, thus, not established the criteria set forth at 8 C.F.R. § 214.2(h)(4)(iii)(A)(1) or (2).

The AAO now turns to the criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A)(3) – the employer normally requires a degree or its equivalent for the position. As counsel does not address this issue on appeal, it will not be discussed further.

Finally, the AAO turns to the criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A)(4) – the nature of the specific duties is so specialized and complex that knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

To the extent that they are depicted in the record, the duties do not appear so specialized and complex as to require the highly specialized knowledge associated with a baccalaureate or higher degree, or its equivalent, in a specific specialty. Therefore, the evidence does not establish that the proffered position is a specialty occupation under 8 C.F.R. § 214.2(h)(4)(iii)(A)(4).

As related in the discussion above, the petitioner has failed to establish that the proffered position is a specialty occupation.

The AAO will now address the director's conclusion that the beneficiary is not qualified to perform a specialty occupation.

Section 214(i)(2) of the Act, 8 U.S.C. § 1184(i)(2), states that an alien applying for classification as an H-1B nonimmigrant worker must possess full state licensure to practice in the occupation, if such licensure is required to practice in the occupation, and completion of the degree in the specialty that the occupation requires. If the alien does not possess the required degree, the petitioner must demonstrate that the alien has experience in the specialty equivalent to the completion of such degree, and recognition of expertise in the specialty through progressively responsible positions relating to the specialty.

Pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(C), to qualify to perform services in a specialty occupation, an alien must meet one of the following criteria:

- (1) Hold a United States baccalaureate or higher degree required by the specialty occupation from an accredited college or university;
- (2) Hold a foreign degree determined to be equivalent to a United States baccalaureate or higher degree required by the specialty occupation from an accredited college or university;
- (3) Hold an unrestricted state license, registration or certification which authorizes him or her to fully practice the specialty occupation and be immediately engaged in that specialty in the state of intended employment; or

- (4) Have education, specialized training, and/or progressively responsible experience that is equivalent to completion of a United States baccalaureate or higher degree in the specialty occupation, and have recognition of expertise in the specialty through progressively responsible positions directly related to the specialty.

The director found that the beneficiary was not qualified for a dental laboratory technologist position because the beneficiary is not licensed in the State of California. In his February 6, 2004 letter, counsel states, in part:

As proof that the beneficiary is qualified for the position being offered, we submit a photocopy of the beneficiary's license as a clinical laboratory scientist, issued by the Department of Health Services of California. This evidence shows that the beneficiary is qualified for the specialty occupation and the denial of the H-1B petition must be reversed.

Counsel's new evidence is noted. CIS regulations, however, affirmatively require a petitioner to establish eligibility for the benefit it is seeking at the time the petition is filed. See 8 C.F.R. § 103.2(b)(12). Any facts that come into being subsequent to the filing of a petition cannot be considered when determining whether the beneficiary qualifies for the proffered position. See *Matter of Michelin Tire Corp.*, 17 I&N Dec. 248, 249 (Reg. Comm. 1978). Therefore, the beneficiary's Clinical Laboratory Scientist license issued by the State of California is a factor that the AAO cannot consider in determining whether the beneficiary qualifies for the proffered position. If the petitioner believes that the petitioner's new circumstances are material to the beneficiary's eligibility as an H-1B nonimmigrant worker, the petitioner should file a new petition rather than seek approval of a petition that is not supported by the facts in the record. In view of the foregoing, the petitioner has not shown that beneficiary qualifies for a dental laboratory technologist position. Accordingly, the AAO shall not disturb the director's denial of the petition.

The burden of proof in these proceedings rests solely with the petitioner. Section 291 of the Act, 8 U.S.C. § 1361. The petitioner has not sustained that burden.

ORDER: The appeal is dismissed. The petition is denied.
