IN RE: Petitioner:  
Beneficiary:

[Redacted]

PETITION: Petition for a Nonimmigrant Worker Pursuant to Section 101(a)(15)(H)(i)(b) of the  
Immigration and Nationality Act, 8 U.S.C. § 1101(a)(15)(H)(i)(b)

ON BEHALF OF PETITIONER:

[Redacted]

INSTRUCTIONS:

This is the decision of the Administrative Appeals Office in your case. All documents have been returned to the office that originally decided your case. Any further inquiry must be made to that office.

**DISCUSSION:** The service center director denied the nonimmigrant visa petition and the matter is now before the Administrative Appeals Office (AAO) on appeal. The appeal will be dismissed. The petition will be denied.

The petitioner is a distributor of thermal insulation products. It seeks to employ the beneficiary as a strategic management analyst and endeavors to classify him as a nonimmigrant worker in a specialty occupation pursuant to section 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act (the Act), 8 U.S.C. § 1101(a)(15)(H)(i)(b).

The director denied the petition on the basis that the offered position was not a specialty occupation. On appeal, counsel submits a brief stating that the proffered position qualifies as a specialty occupation.

The issue to be discussed in this proceeding is whether the position offered to the beneficiary qualifies as a specialty occupation.

Section 101(a)(15)(H)(i)(b) of the Act, 8 U.S.C. § 1101(a)(15)(H)(i)(b), provides, in part, for the classification of qualified nonimmigrant aliens who are coming temporarily to the United States to perform services in a specialty occupation.

Section 214(i)(1) of the Act, 8 U.S.C. § 1184(i)(1), defines the term "specialty occupation" as an occupation that requires:

- (A) theoretical and practical application of a body of highly specialized knowledge, and
- (B) attainment of a bachelor's or higher degree in the specific specialty (or its equivalent) as a minimum for entry into the occupation in the United States.

The term "specialty occupation" is further defined at 8 C.F.R. § 214.2(h)(4)(ii) as:

[A]n occupation which requires theoretical and practical application of a body of highly specialized knowledge in field of human endeavor including, but not limited to, architecture, engineering, mathematics, physical sciences, social sciences, medicine and health, education, business specialties, accounting, law, theology, and the arts, and which requires the attainment of a bachelor's degree or higher in a specific specialty, or its equivalent, as a minimum for entry into the occupation in the United States.

Pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(A), to qualify as a specialty occupation, the position must meet one of the following criteria:

- (1) A baccalaureate or higher degree or its equivalent is normally the minimum requirement for entry into the particular position;
- (2) The degree requirement is common to the industry in parallel positions among similar organizations or, in the alternative, an employer may show that its particular position is so complex or unique that it can be performed only by an individual with a degree;
- (3) The employer normally requires a degree or its equivalent for the position; or

- (4) The nature of the specific duties are so specialized and complex that knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

Citizenship and Immigration Services (CIS) interprets the term “degree” in the criteria at 8 C.F.R. § 214.2(h)(4)(iii)(A) to mean not just any baccalaureate or higher degree, but one in a specific specialty that is directly related to the proffered position.

The record of proceedings before the AAO contains: (1) Form I-129 and supporting documentation; (2) the director’s request for additional evidence; (3) the petitioner’s response to the director’s request; (4) the director’s denial letter; and (5) the Form I-290B with supporting documentation. The AAO reviewed the record in its entirety before issuing its decision.

The petitioner is seeking the beneficiary’s services as a strategic management analyst. Evidence of the beneficiary’s duties was included with the I-129 petition and in response to the director’s request for evidence. According to this evidence the beneficiary would: review, analyze, and suggest improvements to the petitioner’s organizational system; review forms and reports and confer with management and staff about the format, distribution, and purpose of such documents to identify problems and recommend improvements, and with this information solve problems and create efficiency; develop and implement a records management program for the filing, protection, and retrieval of records; recommend the purchase of storage equipment and design an area for storage to ensure the effective inventory of products; and plan the study of work problems and procedures such as organizational change, communications, information flow, inventory control and cost analysis, then make recommendations for new systems, procedures, or organizational changes. The petitioner states that a bachelor’s degree is the minimum requirement for entry into the proffered position, but does not state that a degree in any particular specialty is required. On appeal, counsel for the first time stated that a bachelor’s degree in management or its equivalent is the minimum requirement for entry into the proffered position.

Upon review of the record, the petitioner has failed to establish that a baccalaureate or higher degree or its equivalent is normally the minimum requirement for entry into the offered position, or that a degree requirement is common to the industry in parallel positions among similar organizations. Factors often considered by CIS when determining these criteria include: whether the Department of Labor’s *Occupational Outlook Handbook (Handbook)* reports that the industry requires a degree; whether an industry professional association has made a degree a minimum entry requirement; and whether letters or affidavits from firms or individuals in the industry attest that such firms “routinely employ and recruit only degreed individuals.” See *Shanti, Inc. v. Reno*, 36 F. Supp. 2d 1151, 1165 (D. Min. 1999) (quoting *Hird/Baker Corp. v. Slattery*, 764 F. Supp. 872, 1102 (S.D.N.Y. 1991).

The AAO routinely consults the *Handbook* for information about the duties and educational requirements of particular occupations. The duties of the proffered position are set forth in such vague and generic terms that it cannot be determined precisely what tasks the beneficiary would perform on a daily basis. For example, the petitioner states that the beneficiary would: review, analyze, and suggest improvements to the petitioner’s organizational system; review forms and reports and confer with management and staff about the format,

distribution, and purpose of such documents to identify problems and recommend improvements, and with this information solve problems and create efficiency; plan the study of work problems and procedures such as organizational change, communications, information flow, inventory control and cost analysis, then make recommendations for new systems, procedures, or organizational changes. The duties as defined prohibit an analysis of precisely what tasks the beneficiary would perform in completing those duties and the complexity or sophistication of those tasks. The duties to be performed could involve highly complex tasks that involve the theoretical and practical application of specialized knowledge, or, they could simply involve day-to-day managerial/administrative/operational tasks routinely performed by those having less than a baccalaureate level education. It is impossible to make that determination based upon the record as it now exists. The other duties mentioned involved the creation of a records filing system, the purchase of storage equipment, and the design of storage areas. These duties do not involve the theoretical and practical application of a body of highly specialized knowledge. It should further be noted that management analysts are generally employed as consultants, not as employees, in businesses similar in nature and scope to that of the petitioner. As such, the petitioner has not established that: a baccalaureate or higher degree or its equivalent is normally the minimum requirement for entry into the proffered position; a degree requirement is common to the industry in parallel positions among similar organizations, or alternatively that the duties of the proffered position are so complex or unique that they can be performed only by an individual with a degree in a specific specialty; or that the duties of the proffered position are so specialized and complex that knowledge required to perform them is usually associated the attainment of a baccalaureate or higher degree in a specific specialty. The petitioner has failed to establish any of the regulatory criteria at 8 C.F.R. § 214.2(h)(4)(iii)(A)(1), (2), or (4).

The petitioner does not state that it normally requires a degree or its equivalent for the offered position, and offers no evidence in this regard. 8 C.F.R. § 214.2(h)(4)(iii)(A)(3).

Finally, counsel states on appeal that the beneficiary was previously approved for H-1B status with the identical position and title. This reference will not sustain the petitioner's burden of establishing H-1B qualification in the petition now before the AAO. This record of proceeding does not contain the entire record of proceeding in the petition referred to by counsel. Accordingly, no comparison of the positions can be made. Each nonimmigrant petition is a separate proceeding with a separate record. See 8 C.F.R. § 103.8(d). In making a determination of statutory eligibility, the AAO is limited to the information contained in the record of proceeding. See 8 C.F.R. § 103.2(b)(16)(ii). It warrants noting that Congress intended this visa classification for aliens that are to be employed in an occupation that requires the theoretical and practical application of a body of highly specialized knowledge. Congress specifically stated that such an occupation would require, as a *minimum* qualification, a baccalaureate or higher degree in the specialty. CIS regularly approves H-1B petitions for qualified aliens who are to be employed as engineers, computer scientists, certified public accountants, college professors, and other such professions. These occupations all require a baccalaureate degree in the specialty occupation as a minimum for entry into the occupation and fairly represent the types of professions that Congress contemplated when it created that visa category. In the present matter, the petitioner has offered the beneficiary a position as a strategic management analyst. For the reasons discussed above, the proffered position does not require attainment of a baccalaureate or higher degree in a specific specialty as a minimum for entry into the occupation, and approval of a prior petition for the beneficiary based on identical facts would constitute material error, gross error, and a violation of 8 C.F.R. § 214.2 paragraph (h).

As related in the discussion above, the petitioner has failed to establish that the proffered position is a specialty occupation. Accordingly, the AAO shall not disturb the director's denial of the petition.

The burden of proof in these proceedings rests solely with the petitioner. Section 291 of the Act, 8 U.S.C. § 1361. The petitioner has not sustained that burden and the appeal shall accordingly be dismissed.

**ORDER:** The appeal is dismissed. The petition is denied.
