IN RE: Petitioner: [REDACTED]  
Beneficiary: [REDACTED]

PETITION: Petition for a Nonimmigrant Worker Pursuant to Section 101(a)(15)(H)(i)(b) of the  
Immigration and Nationality Act, 8 U.S.C. § 1101(a)(15)(H)(i)(b)

ON BEHALF OF PETITIONER:

SELF-REPRESENTED

INSTRUCTIONS:

This is the decision of the Administrative Appeals Office in your case. All documents have been returned to the office that originally decided your case. Any further inquiry must be made to that office.

*Robert P. Wiemann*

Robert P. Wiemann, Director  
Administrative Appeals Office

**DISCUSSION:** The service center director denied the nonimmigrant visa petition and the matter is now before the Administrative Appeals Office (AAO) on appeal. The appeal will be dismissed. The petition will be denied.

The petitioner is a staffing company that seeks to employ the beneficiary as an electrical test engineer. The petitioner endeavors to classify the beneficiary as a nonimmigrant worker in a specialty occupation pursuant to section 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act (the Act), 8 U.S.C. § 1101(a)(15)(H)(i)(b).

The director denied the petition because the proffered position is not a specialty occupation and the beneficiary is not qualified to perform a specialty occupation. On appeal, counsel submits a brief.

The AAO will first address the director's conclusion that the position is not a specialty occupation.

Section 214(i)(1) of the Act, 8 U.S.C. § 1184 (i)(1), defines the term "specialty occupation" as an occupation that requires:

- (A) theoretical and practical application of a body of highly specialized knowledge, and
- (B) attainment of a bachelor's or higher degree in the specific specialty (or its equivalent) as a minimum for entry into the occupation in the United States.

Pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(A), to qualify as a specialty occupation, the position must meet one of the following criteria:

- (1) A baccalaureate or higher degree or its equivalent is normally the minimum requirement for entry into the particular position;
- (2) The degree requirement is common to the industry in parallel positions among similar organizations or, in the alternative, an employer may show that its particular position is so complex or unique that it can be performed only by an individual with a degree;
- (3) The employer normally requires a degree or its equivalent for the position; or
- (4) The nature of the specific duties is so specialized and complex that knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

Citizenship and Immigration Services (CIS) interprets the term "degree" in the criteria at 8 C.F.R. § 214.2(h)(4)(iii)(A) to mean not just any baccalaureate or higher degree, but one in a specific specialty that is directly related to the proffered position.

The record of proceeding before the AAO contains: (1) Form I-129 and supporting documentation; (2) the director's requests for additional evidence; (3) the petitioner's responses to the director's requests; (4) the

director's denial letter; and (5) Form I-290B and supporting documentation. The AAO reviewed the record in its entirety before issuing its decision.

The petitioner is seeking the beneficiary's services as an electrical test engineer. Evidence of the beneficiary's duties includes: the I-129 petition; the petitioner's April 11, 2002 letter in support of the petition; and the petitioner's response to the director's request for evidence. According to this evidence, the beneficiary would perform duties that entail: directing activities to ensure that installation and operational testing conform to functional specification and customer service requirements; directing and coordinating operation, maintenance and repair of equipment in field of installation; and performing related mechanical and electrical testing regarding transmission and distribution system of equipment, generators, transformers and other engineering devices. The petitioner indicated that a qualified candidate for the job would possess a "college degree" in electrical engineering or technology.

The director found that the proffered position was not a specialty occupation because the job is not an electrical engineering position; it is an electrical technician or electrician. The director noted that the minimum requirement for entry into the position was not a baccalaureate degree or its equivalent in a specific specialty. The director found further that the petitioner failed to establish any of the criteria found at 8 C.F.R. § 214.2(h)(4)(iii)(A).

On appeal, the petitioner states that this petition is for an extension of a previously approved position, and that many other petitions for the same position were approved. The petitioner also states that it provided evidence in response to the director's request for evidence that it always requires a bachelor's degree for this position.

Upon review of the record, the petitioner has established none of the four criteria outlined in 8 C.F.R. § 214.2(h)(4)(iii)(A). Therefore, the proffered position is not a specialty occupation.

The AAO turns first to the criteria at 8 C.F.R. § 214.2 (h)(4)(iii)(A)(1) and (2): a baccalaureate or higher degree or its equivalent is the normal minimum requirement for entry into the particular position; a degree requirement is common to the industry in parallel positions among similar organizations; or a particular position is so complex or unique that it can be performed only by an individual with a degree.

Factors often considered by CIS when determining these criteria include: whether the Department of Labor's *Occupational Outlook Handbook (Handbook)* reports that the industry requires a degree; whether the industry's professional association has made a degree a minimum entry requirement; and whether letters or affidavits from firms or individuals in the industry attest that such firms "routinely employ and recruit only degreed individuals." See *Shanti, Inc. v. Reno*, 36 F. Supp. 2d 1151, 1165 (D.Minn. 1999)(quoting *Hird/Blaker Corp. v. Sava*, 764 F. Supp. 1095, 1102 (S.D.N.Y. 1989)).

The AAO routinely consults the *Handbook* for its information about the duties and educational requirements of particular occupations. The AAO does not concur with the petitioner that the proffered position is that of an electrical engineer. None of the beneficiary's job duties entails the level of responsibility of that occupation. The director found that the proffered position was most like an engineering technician or electrician, but in reviewing the job descriptions in the *Handbook*, neither of these positions encompasses the duties of the proffered position.

The position seems to be most like an electrical or electronics installer and repairer. No evidence in the *Handbook* indicates that a baccalaureate or higher degree, or its equivalent, is required for an electrical installer and repairer job.

The petitioner did not submit any evidence regarding parallel positions in the petitioner's industry, nor does the record include any evidence from professional associations regarding an industry standard, or documentation to support the complexity or uniqueness of the proffered position. The petitioner has, thus, not established the criteria set forth at 8 C.F.R. § 214.2(h)(4)(iii)(A)(1) or (2).

The AAO now turns to the criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A)(3) – the employer normally requires a degree or its equivalent for the position. The petitioner submitted a list of its employees that it stated have worked as electrical test engineers and who have degrees. On appeal, the petitioner states that it is “re-submitting a copy of their bachelor's degree certificates.” The AAO notes that there is no evidence in the record, either prior to the appeal or submitted with the appeal, regarding degree certificates for the individuals listed. In addition, there is no evidence that the individuals listed were employed by the petitioner or, if they were, in what capacity. The AAO also notes that in its letter of support and in its response to the director's request for evidence, the petitioner stated that the requirement for the position was a “college degree,” not a bachelor's degree. These terms are not interchangeable, as a college degree would also include an associate's degree. The petitioner has not met its burden of proof in this regard.

Finally, the AAO turns to the criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A)(4) – the nature of the specific duties is so specialized and complex that knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

To the extent that they are depicted in the record, the duties do not appear so specialized and complex as to require the highly specialized knowledge associated with a baccalaureate or higher degree, or its equivalent, in a specific specialty. Therefore, the evidence does not establish that the proffered position is a specialty occupation under 8 C.F.R. § 214.2(h)(4)(iii)(A)(4).

As related in the discussion above, the petitioner has failed to establish that the proffered position is a specialty occupation. Accordingly, the AAO shall not disturb the director's denial of the petition.

The director also found that the beneficiary would not be qualified to perform the duties of the proffered position if the job had been determined to be a specialty occupation.

Section 214(i)(2) of the Act, 8 U.S.C. § 1184(i)(2), states that an alien applying for classification as an H-1B nonimmigrant worker must possess full state licensure to practice in the occupation, if such licensure is required to practice in the occupation, and completion of the degree in the specialty that the occupation requires. If the alien does not possess the required degree, the petitioner must demonstrate that the alien has experience in the specialty equivalent to the completion of such degree, and recognition of expertise in the specialty through progressively responsible positions relating to the specialty.

Pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(C), to qualify to perform services in a specialty occupation, an alien must meet one of the following criteria:

- (1) Hold a United States baccalaureate or higher degree required by the specialty occupation from an accredited college or university;
- (2) Hold a foreign degree determined to be equivalent to a United States baccalaureate or higher degree required by the specialty occupation from an accredited college or university;
- (3) Hold an unrestricted state license, registration or certification which authorizes him or her to fully practice the specialty occupation and be immediately engaged in that specialty in the state of intended employment; or
- (4) Have education, specialized training, and/or progressively responsible experience that is equivalent to completion of a United States baccalaureate or higher degree in the specialty occupation, and have recognition of expertise in the specialty through progressively responsible positions directly related to the specialty.

The petitioner stated in its letter of support that the beneficiary “graduated from Marikina Institute of Science and Technology in the Philippines on March 1999 with major Electrical Technology and had one year and a half of work experience in the field of electrical engineering prior to joining our company on May 2000.” In response to the director’s request for evidence, the petitioner stated, “[t]he combined educational accomplishment and field experience may be considered equivalent to an earned degree in Electrical Engineering.”

The director found that the beneficiary was not qualified for the proffered position because the beneficiary’s education, experience, and training were not equivalent to a baccalaureate degree in a specialty required by the occupation. On appeal, counsel states that the beneficiary is qualified for the position because he “completed a course study in Electrical Technology and earned his certificate of completion in 1999 and has work experience in Electrical Technology working for Clint Erickson and Co. Inc. in the Philippines. We are considering the beneficiary’s combined educational accomplishment and work experience equivalent to an earned degree in Electrical Engineering.”

Upon review of the record, the petitioner has failed to establish that the beneficiary is qualified to perform any occupation that requires a baccalaureate degree. The beneficiary does not hold a baccalaureate degree from an accredited U.S. college or university in any field of study, or a foreign degree determined to be equivalent to a baccalaureate degree from a U.S. college or university in any field of study. The credentials evaluation submitted by the petitioner stated that the beneficiary’s education is equivalent to an associate’s degree. Therefore, the petitioner must demonstrate that the beneficiary meets the criterion at 8 C.F.R. § 214.2(h)(4)(iii)(C)(4).

Pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(D), equating the beneficiary's credentials to a United States baccalaureate or higher degree shall be determined by one or more of the following:

- (1) An evaluation from an official who has authority to grant college-level credit for training and/or experience in the specialty at an accredited college or university which has a program for granting such credit based on an individual's training and/or work experience;
- (2) The results of recognized college-level equivalency examinations or special credit programs, such as the College Level Examination Program (CLEP), or Program on Noncollegiate Sponsored Instruction (PONSI);
- (3) An evaluation of education by a reliable credentials evaluation service which specializes in evaluating foreign educational credentials;
- (4) Evidence of certification or registration from a nationally-recognized professional association or society for the specialty that is known to grant certification or registration to persons in the occupational specialty who have achieved a certain level of competence in the specialty;
- (5) A determination by the Service that the equivalent of the degree required by the specialty occupation has been acquired through a combination of education, specialized training, and/or work experience in areas related to the specialty and that the alien has achieved recognition of expertise in the specialty occupation as a result of such training and experience.

The petitioner stated several times that it was considering the beneficiary's education and work experience to be equivalent to a bachelor's degree. Notwithstanding the petitioner's satisfaction with the beneficiary's qualifications, it must establish that the beneficiary has the required education and experience to meet the terms of the regulations. The petitioner provides no evidence regarding the petitioner's past work experience, beyond stating that he had 1½ years of experience in the field. Even if the record included evidence regarding his duties and responsibilities in that position, the petitioner could not establish that it was sufficient to substitute for two years of college education.

When CIS determines an alien's qualifications pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(D)(5), three years of specialized training and/or work experience must be demonstrated for each year of college-level training the alien lacks. It must be clearly demonstrated that the alien's training and/or work experience included the theoretical and practical application of specialized knowledge required by the specialty occupation; that the alien's experience was gained while working with peers, supervisors, or subordinates who have a degree or its equivalent in the specialty occupation; and that the alien has recognition of expertise in the specialty evidenced by at least one type of documentation such as:

- (i) Recognition of expertise in the specialty occupation by at least two recognized authorities in the same specialty occupation<sup>1</sup>;
- (ii) Membership in a recognized foreign or United States association or society in the specialty occupation;
- (iii) Published material by or about the alien in professional publications, trade journals, books, or major newspapers;
- (iv) Licensure or registration to practice the specialty occupation in a foreign country; or
- (v) Achievements which a recognized authority has determined to be significant contributions to the field of the specialty occupation.

The AAO now turns to the beneficiary's prior work experience, and whether it included the theoretical and practical application of specialized knowledge required by the specialty. As noted above, the record contains no evidence regarding the beneficiary's duties in his previous position. Thus, the AAO cannot conclude that the beneficiary's past work experience included the theoretical and practical application of a body of highly specialized knowledge. Finally, there is insufficient evidence that the beneficiary has recognition of expertise.

As related in the discussion above, the petitioner has failed to establish that the beneficiary is qualified to perform the duties of the proffered position.

The AAO now turns to the petitioner's assertion that this petition must be approved because it is an extension of a previously approved petition, and that other identical petitions have been approved. As stated previously, the evidence in the record does not support a finding that the beneficiary is qualified for the proffered position. The service center director's decision to approve another petition has no bearing on the AAO's decision in this matter, as service center directors' decisions are not binding on this office. *Louisiana Philharmonic Orchestra v. INS*, 2000 WL 282785 (E.D. La.), *aff'd* 248 F.3d 1139 (5th Cir. 2001), *cert. denied*, 122 S.Ct. 51 (2001). The AAO does note, however, that if the facts in the record relating to the previous petitions were similar to the facts in this record, the service center director's approval of the petitions would constitute gross error. The AAO is not required to approve a petition where eligibility has not been demonstrated, merely because of another approval that may have been erroneous. *See, e.g., Matter of Church Scientology International*, 19 I&N Dec. 593, 597 (Comm. 1988).

---

<sup>1</sup> *Recognized authority* means a person or organization with expertise in a particular field, special skills or knowledge in that field, and the expertise to render the type of opinion requested. A recognized authority's opinion must state: (1) the writer's qualifications as an expert; (2) the writer's experience giving such opinions, citing specific instances where past opinions have been accepted as authoritative and by whom; (3) how the conclusions were reached; and (4) the basis for the conclusions supported by copies or citations of any research material used. 8 C.F.R. § 214.2(h)(4)(ii).

The burden of proof in these proceedings rests solely with the petitioner. Section 291 of the Act, 8 U.S.C. § 1361. The petitioner has not sustained that burden.

**ORDER:** The appeal is dismissed. The petition is denied.
