IN RE: Petitioner:   
Beneficiary:

PETITION: Petition for a Nonimmigrant Worker Pursuant to Section 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act, 8 U.S.C. § 1101(a)(15)(H)(i)(b)

ON BEHALF OF PETITIONER:

SELF-REPRESENTED

**INSTRUCTIONS:**

This is the decision of the Administrative Appeals Office in your case. All documents have been returned to the office that originally decided your case. Any further inquiry must be made to that office.

Robert P. Wiemann, Director  
Administrative Appeals Office

**DISCUSSION:** The director denied the nonimmigrant visa petition and the matter is now before the Administrative Appeals Office (AAO) on appeal. The appeal will be dismissed. The petition will be denied.

The petitioner is a wholesale distributor of imported lumber and semi-finished and finished wood products that seeks to employ the beneficiary as an accountant. The petitioner, therefore, endeavors to classify the beneficiary as a nonimmigrant worker in a specialty occupation pursuant to section 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act (the Act), 8 U.S.C. § 1101(a)(15)(H)(i)(b).

The director denied the petition on the basis that the petitioner had failed to establish that the proposed position meets the definition of a specialty occupation as set forth at 8 C.F.R. § 214.2(h)(4)(iii)(A).

Section 214(i)(1) of the Immigration and Nationality Act (the Act), 8 U.S.C. § 1184(i)(1), defines the term “specialty occupation” as an occupation that requires:

- (A) theoretical and practical application of a body of highly specialized knowledge, and
- (B) attainment of a bachelor’s or higher degree in the specific specialty (or its equivalent) as a minimum for entry into the occupation in the United States.

Pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(A), to qualify as a specialty occupation, the position must meet one of the following criteria:

- (1) A baccalaureate or higher degree or its equivalent is normally the minimum requirement for entry into the particular position;
- (2) The degree requirement is common to the industry in parallel positions among similar organizations or, in the alternative, an employer may show that its particular position is so complex or unique that it can be performed only by an individual with a degree;
- (3) The employer normally requires a degree or its equivalent for the position; or
- (4) The nature of the specific duties is so specialized and complex that knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

Citizenship and Immigration Services (CIS) interprets the term “degree” in the criteria at 8 C.F.R. § 214.2(h)(4)(iii)(A) to mean not just any baccalaureate or higher degree, but one in a specific specialty that is directly related to the proposed position.

The record of proceeding before the AAO contains (1) the Form I-129 and supporting documentation; (2) the director’s request for evidence (RFE); (3) the petitioner’s RFE response and supporting documentation; (4) the director’s denial letter; and (5) the Form I-290B and appellate brief. The AAO reviewed the record in its entirety before issuing its decision.

The petitioner, a distributor of imported lumber and wood products with two employees, was established in 1996 and has a gross annual income of \$936,000. It proposes to hire the beneficiary as an accountant. In the petitioner's letter of support, the duties of the proposed position were set forth as follows:

- Coordinate [a]ccounting [c]ontrol [p]rocedures.
- Conduct audits of contracts, orders, and vouchers.
- Prepare federal, state, and municipal tax reports.
- Perform and [a]nalyze financial information.
- Apply principles of accounting to prepare calculations of weekly, monthly, and quarterly budget variances.
- Prepare audit & accounting reports.
- Prepare balance sheet for profit and loss statement.
- Perform general ledger adjusting entries.
- Analyze & prepare financial information on assets, liabilities, and capital.
- Provide the company's management with information based on cost data needed to make decisions on promotion, distribution, pricing[,] and inventory.

The director denied the petition, finding that the petitioner had satisfied none of the four criteria set forth at § 214.2(h)(4)(iii)(A), and therefore had not established the proposed position as a specialty occupation.

On appeal, the petitioner contends that the director erred in denying the petition, and that the proposed position is in fact a specialty occupation. The petitioner contends that the director acted in an arbitrary and contradictory manner in denying the petition.

The AAO agrees with the petitioner that, as a general matter, accountant positions normally qualify for classification as specialty occupations. However, the AAO disagrees with the petitioner's assertion that the proposed position is actually that of an accountant.

In determining whether a proposed position qualifies as a specialty occupation, CIS looks beyond the title of the position and determines, from a review of the duties of the position and any supporting evidence, whether the position actually requires the theoretical and practical application of a body of highly specialized knowledge, and the attainment of a baccalaureate degree in a specific specialty, as the minimum for entry into the occupation as required by the Act. The AAO routinely consults the *Occupational Outlook Handbook* (the *Handbook*) for its information about the duties and educational requirements of particular occupations.

According to the *Handbook* there are four major fields of accounting – public, management, government, and internal auditors – of which management accountant appears closest to the proposed position. The *Handbook* sets forth the following description of the duties of a management accountant:

*Management accountants* – also called cost, managerial, industrial, corporate, or private accountants – record and analyze the financial information of the companies for which they work. Other responsibilities include budgeting, performance evaluation, cost management, and asset management. Usually, management accountants are part of executive teams involved in strategic planning or new-product development. They analyze and interpret the financial information that corporate executives need to make sound business decisions. They also prepare financial reports for nonmanagement groups, including stockholders,

creditors, regulatory agencies, and tax authorities. Within accounting departments, they may work in various areas, including financial analysis, planning and budgeting, and cost accounting.

The *Handbook* also states that, increasingly, accountants “not only provide clients with accounting and tax help, but also help them develop personal budgets, manage assets and investments, plan for retirement, and recognize and reduce exposure to risks.”

By comparison, the *Handbook* describes the occupation of bookkeeping, accounting, and auditing clerks as follows:

Bookkeeping, accounting, and auditing clerks are an organization’s financial recordkeepers. They update and maintain one or more accounting records, including those which tabulate expenditures, receipts, accounts payable and receivable, and profit and loss. They have a wide range of skills and knowledge from full-charge bookkeepers who can maintain an entire company’s books to accounting clerks who handle specific accounts. All of these clerks make numerous computations each day and increasingly must be comfortable using computers to calculate and record data.

In small establishments, *bookkeeping clerks* handle all financial transactions and recordkeeping. They record all transactions, post debits and credits, produce financial statements, and prepare reports and summaries for supervisors and managers. Bookkeepers also prepare bank deposits by compiling data from cashiers, verifying and balancing receipts, and sending cash, checks, or other forms of payment to the bank. They also may handle payroll, make purchases, prepare invoices, and keep track of overdue accounts.

In large offices and accounting departments, *accounting clerks* have more specialized tasks . . . such as accounts payable . . . or accounts receivable . . . Entry-level accounting clerks post details of transactions, total accounts, and compute interest charges. They also may monitor loans and accounts, to ensure that payments are up to date.

More advanced accounting clerks may total, balance, and reconcile billing vouchers; ensure completeness and accuracy of data on accounts; and code documents, according to company procedures. These workers post transactions in journals and on computer files and update the files when needed . . . .

*Auditing clerks* verify records of transactions posted by other workers. They check figures, postings, and documents to ensure that they are correct, mathematically accurate, and properly coded . . . .

As organizations continue to computerize their financial records, many bookkeeping, accounting, and auditing clerks are using specialized accounting software on personal computers. With manual posting to general ledgers becoming obsolete, these clerks increasingly are posting charges to accounts on computer spreadsheets and databases . . . . The widespread use of computers . . . has enabled bookkeeping, accounting, and auditing clerks to take on additional responsibilities, such as payroll, procurement, and billing.

According to the *Handbook*, a two-year associate's degree in business or accounting is often required for bookkeeping and accounting clerk positions. A four-year bachelor's degree is not required for entry-level positions. The *Handbook* does indicate that many individuals with four-year degrees accept bookkeeping and accounting clerk positions in order to enter the field or a particular company with the goal of being promoted to professional or managerial positions.

The *Handbook* describes the occupation of a tax preparer as follows:

Prepare tax returns for individuals or small businesses but do not have the background or responsibilities of an accredited or certified public accountant.

The *Handbook* indicates that the normal educational requirement for a tax preparer is "moderate-term on-the-job training."

A petitioner's creation of a position with a perfunctory bachelor's degree requirement will not mask the fact that the position is not a specialty occupation. CIS must examine the ultimate employment of the alien, and determine whether the position qualifies as a specialty occupation. *Cf. Defensor v. Meissner*, 201 F.3d 384 (5th Cir. 2000). The critical element is not the title of the position or an employer's self-imposed standards, but whether the position actually requires the theoretical and practical application of a body of highly specialized knowledge, and the attainment of a baccalaureate or higher degree in the specific specialty as the minimum for entry into the occupation as required by the Act.<sup>1</sup> To interpret the regulations any other way would lead to absurd results: if CIS were limited to reviewing a petitioner's self-imposed employment requirements, then any alien with a bachelor's degree could be brought into the United States to perform a menial, non-professional, or an otherwise non-specialty occupation, so long as the employer required all such employees to have baccalaureate or higher degrees. *See id.* at 388.

The record in this case does not support the assertion that the duties of the proposed position require a bachelor's degree in accounting or a related specialty. While this position may include some duties that involve accounting functions, the AAO is not persuaded that they are at a level of specialization or complexity that they require the theoretical and practical application of a body of highly specialized knowledge and a baccalaureate degree or its equivalent. The proposed position lacks crucial characteristics of a management accounting position, as described in the *Handbook*. For example, the *Handbook* indicates that management accountants are involved in strategic planning or new-product development, usually as part of an executive team, and prepare financial reports for nonmanagement groups like stockholders, creditors, regulatory agencies, and tax authorities. Such functions are not reflected in the petitioner's description of the proposed position's duties. The scope of the proposed position lacks both the breadth and the depth of a management accounting position.

As noted previously, the petitioner is a wholesale distributor of imported lumber and wood products with two employees and a gross annual income of \$936,000. Though the size of the company does not, in and of itself, determine a company's need for an accountant, its income level and scale of operations do have a direct and substantial bearing on the scope of the duties the beneficiary would perform in the proposed position. The responsibilities associated with an annual income of \$936,000 differ considerably from the

---

<sup>1</sup> The court in *Defensor v. Meissner* observed that the four criteria at 8 C.F.R. 214.2(h)(4)(iii)(A) present certain ambiguities when compared to the statutory definition, and "might also be read as merely an additional requirement that a position must meet, in addition to the statutory and regulatory definition." *See id.* at 387.

responsibilities associated with an annual income in the millions, or tens of millions, as well as from the responsibilities of performing accounting work for multiple clients. The AAO notes further that no financial documentation of record corroborates the petitioner's statement on the Form I-129 that it earns an annual income of \$936,000. Simply going on record without supporting documentary evidence is not sufficient for purposes of meeting the burden of proof in these proceedings. *Matter of Soffici*, 22 I&N Dec. 158, 165 (Comm. 1998) (citing *Matter of Treasure Craft of California*, 14 I&N Dec. 190 (Reg. Comm. 1972)). The record does not support a finding that the petitioner will employ the beneficiary in an accounting position.

Rather, the AAO concludes that the proposed position will actually be that of an experienced bookkeeping, accounting, or auditing clerk. Many of the duties – including preparing balance sheets and profit and loss statements, performing general ledger and adjusting entries, and auditing orders and inventories – accord with the *Handbook's* description of bookkeeping, accounting, and auditing clerks. As discussed in the *Handbook*, a baccalaureate or higher degree is not the normal minimum requirement for entry into bookkeeping, accounting, or auditing clerk positions, though employers often require a two-year associate's degree in business or accounting. Considering the nature of the petitioner's business, the scale of its operations, and the duties of the proposed position, the AAO concludes that the position is actually that of a bookkeeping, accounting, or auditing clerk. Since these positions do not require a baccalaureate degree in accounting or a related specialty, the proposed position does not meet the first criterion required for classification as a specialty occupation under 8 C.F.R. § 214.2(h)(4)(iii)(A)(1).

Nor does the proposed position qualify as a specialty occupation under either prong of 8 C.F.R. § 214.2(h)(4)(iii)(A)(2). The first prong of this regulation requires a showing that a specific degree requirement is common to the industry in parallel positions among similar organizations. No evidence has been submitted to establish that a specific degree requirement is common to the industry in parallel positions among similar organizations.<sup>2</sup> The second prong of this regulation requires that the petitioner prove that the duties of the proposed position are so complex or unique that only an individual with a degree can perform them. The nature of the duties of the proposed position as set forth in the petition does not support such a finding, as the duties of the proposed position are very similar to those of bookkeepers, auditing clerks, accounting clerks, or tax preparers, which do not require a four-year degree.

Therefore, the petitioner cannot establish the proposed position as a specialty occupation under either prong of 8 C.F.R. § 214.2(h)(4)(iii)(A)(2).

The proposed position does not qualify as a specialty occupation under 8 C.F.R. § 214.2(h)(4)(iii)(A)(3), which requires a showing that the petitioner normally requires a degree or its equivalent for the position. To determine a petitioner's ability to meet this criterion, the AAO normally reviews the petitioner's past employment practices, as well as the histories, including names and dates of employment, of those employees with degrees who previously held the position, and copies of those employees' diplomas. However, no evidence has been submitted to demonstrate, nor has the petitioner contended, that the proposed position qualifies under this criterion. Accordingly, the proposed position does not qualify as a specialty occupation under 8 C.F.R. § 214.2(h)(4)(iii)(A)(3).

---

<sup>2</sup> The AAO notes that, in the RFE response, counsel specifically stated "that it would be impossible for the employer to acquire from a competitor, the information regarding the types of employees that they hire and the educational qualifications required for each position."

The fourth criterion, 8 C.F.R. § 214.2(h)(4)(iii)(A)(4), requires the petitioner to establish that the nature of the proposed position's duties is so specialized and complex that the knowledge required to perform them is usually associated with the attainment of a baccalaureate or higher degree in the specialty. As previously discussed, the AAO is not persuaded by the evidence of record, including the nature and scale of the petitioner's business operations, that the duties of the position exceed the occupational scope of an experienced bookkeeper, auditing clerk, or accounting clerk, positions which do not require specialized knowledge at a baccalaureate level.

The proposed position does not qualify for classification as a specialty occupation under any of the four criteria set forth at 8 C.F.R. §§ 214.2(h)(4)(iii)(A)(1), (2), (3), and (4). Accordingly, the AAO will not disturb the director's denial of the petition.

Counsel's citation of *Young China Daily v. Chappell*, 742 F. Supp. 552 (N.D. Calif. 1989) in the appellate brief fails, as the petition was not denied due to the petitioner's size. While the size of a company does not, in and of itself, determine its need for a given position, its income level and scale of operations do have a direct and substantial bearing on the scope of the duties the beneficiary would perform in the proposed position, and therefore counsel's assertions that the director inappropriately considered the size of the petitioner are misplaced.

The petitioner's citation of *Unico American Corporation v. Watson*, 1991 WL 11002594 (C.D. Cal. 1991), an unpublished decision from a district court, is not persuasive. In contrast to the broad precedential authority of the case law of a United States circuit court, the AAO is not bound to follow the published decision of a United States district court in cases arising within the same district. *See Matter of K-S-*, 20 I&N Dec. 715 (BIA 1993). The reasoning underlying a district court judge's decision will be given due consideration when it is properly before the AAO; however, the analysis does not have to be followed as a matter of law. *Id.* at 719. In addition, as published decisions of the district courts are not binding on the AAO outside of that particular proceeding, an unpublished decision of a district court has even less persuasive value.

The burden of proof in these proceedings rests solely with the petitioner. Section 291 of the Act, 8 U.S.C. § 1361. The petitioner has not sustained that burden.

**ORDER:** The appeal is dismissed. The petition is denied.
