IN RE: Petitioner: [Redacted]
Beneficiary: [Redacted]

PETITION: Petition for a Nonimmigrant Worker Pursuant to Section 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act, 8 U.S.C. § 1101(a)(15)(H)(i)(b)

ON BEHALF OF PETITIONER:

INSTRUCTIONS:

This is the decision of the Administrative Appeals Office in your case. All documents have been returned to the office that originally decided your case. Any further inquiry must be made to that office.

Robert P. Wiemann, Director
Administrative Appeals Office

DISCUSSION: The service center director denied the nonimmigrant visa petition and the matter is now before the Administrative Appeals Office (AAO) on appeal. The appeal will be dismissed. The petition will be denied.

The petitioner is a distributor of Nextel wireless services and products and seeks to employ the beneficiary as a management analyst. The petitioner endeavors to classify the beneficiary as a nonimmigrant worker in a specialty occupation pursuant to section 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act (the Act), 8 U.S.C. § 1101(a)(15)(H)(i)(b).

The director denied the petition because the proffered position did not qualify as a specialty occupation. On appeal, counsel submits a brief stating that the offered position qualifies as a specialty occupation.

The issue to be discussed in this proceeding is whether the position offered to the beneficiary qualifies as a specialty occupation.

Section 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act (the Act), 8 U.S.C. § 1101(a)(15)(H)(i)(b), provides, in part, for the classification of qualified nonimmigrant aliens who are coming temporarily to the United States to perform services in a specialty occupation.

Section 214(i)(1) of the Immigration and Nationality Act (the Act), 8 U.S.C. § 1184 (i)(1), defines the term "specialty occupation" as an occupation that requires:

- (A) theoretical and practical application of a body of highly specialized knowledge, and
- (B) attainment of a bachelor's or higher degree in the specific specialty (or its equivalent) as a minimum for entry into the occupation in the United States.

The term "specialty occupation" is further defined at 8 C.F.R. § 214.2(h)(4)(ii) as:

[A]n occupation which requires theoretical and practical application of a body of highly specialized knowledge in field of human endeavor including, but not limited to, architecture, engineering, mathematics, physical sciences, social sciences, medicine and health, education, business specialties, accounting, law, theology, and the arts, and which requires the attainment of a bachelor's degree or higher in a specific specialty, or its equivalent, as a minimum for entry into the occupation in the United States.

Pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(A), to qualify as a specialty occupation, the position must meet one of the following criteria:

- (1) A baccalaureate or higher degree or its equivalent is normally the minimum requirement for entry into the particular position;
- (2) The degree requirement is common to the industry in parallel positions among similar organizations or, in the alternative, an employer may show that its particular position is so complex or unique that it can be performed only by an individual with a degree;

- (3) The employer normally requires a degree or its equivalent for the position; or
- (4) The nature of the specific duties are so specialized and complex that knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

Citizenship and Immigration Services (CIS) interprets the term “degree” in the criteria at 8 C.F.R. § 214.2(h)(4)(iii)(A) to mean not just any baccalaureate or higher degree, but one in a specific specialty that is directly related to the proffered position.

The record of proceedings before the AAO contains: (1) Form I-129 and supporting documentation; (2) the director’s request for additional evidence; (3) the petitioner’s response to the director’s request; (4) the director’s denial letter; and (5) the Form I-290B with supporting documentation. The AAO reviewed the record in its entirety before issuing its decision.

The petitioner is seeking the beneficiary’s services as a management analyst. Evidence of the beneficiary’s duties was included with the I-129 petition and in response to the director’s request for evidence. According to this evidence the beneficiary would: analyze operating divisions to make recommendations on improving, revising, and modifying organizational structure, work methods, systems and procedure by researching existing methods of accomplishing tasks, using appropriate data collection techniques, and designing survey methods; conduct management reviews of unit operations, information flow, integrated production methods, and inventory control to identify work problems, program deficiencies and resource waste; prepare reports on the results of investigation and analysis to provide information to management by summarizing findings, identifying problem areas, and recommending methods to improve operations; plan, develop, and recommend the implementation of new systems, methods and procedures so that anticipated benefits are realized with minimal disruption of operations, preparing bulletins or manual material needed for implementation and providing instructions to operating personnel on new procedures/methods; assist management in developing the firm’s standard operating procedures, organization/function/position charts preparatory to staffing and performance standards; prepare work simplification and classification studies, and establish operations and procedures manuals to assist management in operating more efficiently and effectively; and perform other related management systems analyses as required. The petitioner requires a minimum of a bachelor’s degree in business administration with concentration in management for entry into the proffered position.

Upon review of the record, the petitioner has failed to establish that a baccalaureate or higher degree or its equivalent is normally the minimum requirement for entry into the offered position, or that a degree requirement is common to the industry in parallel positions among similar organizations. Factors often considered by CIS when determining these criteria include: whether the Department of Labor’s *Occupational Outlook Handbook (Handbook)*, reports that the industry requires a degree; whether an industry professional association has made a degree a minimum entry requirement; and whether letters or affidavits from firms or individuals in the industry attest that such firms “routinely employ and recruit only degreed individuals.” See *Shanti, Inc. v. Reno*, 36 F. Supp. 2d 1151, 1165 (D. Minn. 1999) (quoting *Hird/Blaker Corp. v. Sava*, 712 F. Supp. 1095, 1102 (S.D.N.Y. 1989)).

The AAO routinely consults the *Handbook* for information about the duties and educational requirements of particular occupations. The duties of the proffered position are managerial in nature and normally performed by general/operations managers in the petitioner's business environment, not business analysts. The *Handbook* states that management analysts are normally employed in the private sector as consultants, not employees of companies, and that most analysts/consultants contracted possess a master's degree in business administration or a related discipline. Firms providing management analysts range in size from a single practitioner to large international organizations employing thousands of consultants. Some analysts/consultants specialize in a specific industry, such as healthcare or telecommunications, while others specialize by type of business function, such as human resources, marketing, logistics, or information systems. The work to be performed will vary with each client and project.

The *Handbook* notes that the formal education and experience of general/operations managers or related personnel varies as widely as the nature of their responsibilities. Many have a bachelor's or higher degrees in business administration or liberal arts, while others obtain their positions by promotion from lower level management positions. Thus, it is possible to obtain a position as a general or operations manager without a college degree by promotion from within the organization based upon performance alone. It is apparent from the *Handbook* that a baccalaureate or higher degree, in a specific specialty, is not the minimum requirement for entry into the offered position. Positions requiring a college degree are filled from a wide range of unrelated educational disciplines. A degree in a specific specialty, however, is not required. The petitioner has failed to establish the first criterion of 8 C.F.R. § 214.2(h)(4)(iii)(A).

The petitioner asserts that a degree requirement is common to the industry in parallel positions among similar organizations, and in support thereof refers to the *Handbook's* discussion of management analysts. As previously noted, however, the duties detailed by the petitioner are not reflective of the duties of a true management analyst in the petitioner's business, but of general/operations managers in smaller organizations who may also may perform some duties performed by management analysts/consultants. The petitioner offers no other evidence to establish that a degree requirement in a specific specialty is common to the industry in parallel positions among similar organizations and has accordingly failed to establish the referenced criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A)(2).

The petitioner has not established that it normally requires a degree in a specific specialty for the proffered position, and offers no evidence in this regard. The criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A)(3) has not been established.

Finally, the petitioner has not established that the duties of the offered position are so complex or unique that they can only be performed by an individual with a degree in a specific specialty, or that the duties are so specialized or complex that knowledge required to perform them is usually associated with the attainment of a baccalaureate or higher degree in a specific specialty. The duties described by the petitioner appear to be routine for general/operations managers. As such, the petitioner has failed to establish the referenced criteria at 8 C.F.R. § 214.2(h)(4)(iii)(A)(2) or (4).

As related in the discussion above, the petitioner has failed to establish that the proffered position is a specialty occupation. Accordingly, the AAO shall not disturb the director's denial of the petition.

The burden of proof in these proceedings rests solely with the petitioner. Section 291 of the Act, 8 U.S.C. § 1361. The petitioner has not sustained that burden and the appeal shall accordingly be dismissed.

ORDER: The appeal is dismissed. The petition is denied.
