IN RE: Petitioner: [Redacted]
Beneficiary: [Redacted]

PETITION: Petition for a Nonimmigrant Worker Pursuant to Section 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act, 8 U.S.C. § 1101(a)(15)(H)(i)(b)

ON BEHALF OF PETITIONER:
[Redacted]

INSTRUCTIONS:

This is the decision of the Administrative Appeals Office in your case. All documents have been returned to the office that originally decided your case. Any further inquiry must be made to that office.

Robert P. Wiemann, Chief
Administrative Appeals Office

DISCUSSION: The service center director denied the nonimmigrant visa petition and the matter is now before the Administrative Appeals Office (AAO) on appeal. The appeal will be dismissed. The petition will be denied.

The petitioner is an employee staffing business that seeks to employ the beneficiary at its corporate office as a computer engineer. The petitioner endeavors to classify the beneficiary as a nonimmigrant worker in a specialty occupation pursuant to § 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act (the Act), 8 U.S.C. § 1101(a)(15)(H)(i)(b).

The director denied the petition because the petitioner has not demonstrated that the proffered position is a specialty occupation or that it has a bona fide position for the beneficiary. On appeal, the petitioner's president submits a letter.

Section 214(i)(1) of the Act, 8 U.S.C. § 1184(i)(1), defines the term "specialty occupation" as an occupation that requires:

- (A) theoretical and practical application of a body of highly specialized knowledge, and
- (B) attainment of a bachelor's or higher degree in the specific specialty (or its equivalent) as a minimum for entry into the occupation in the United States.

Pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(A), to qualify as a specialty occupation, the position must meet one of the following criteria:

- (1) A baccalaureate or higher degree or its equivalent is normally the minimum requirement for entry into the particular position;
- (2) The degree requirement is common to the industry in parallel positions among similar organizations or, in the alternative, an employer may show that its particular position is so complex or unique that it can be performed only by an individual with a degree;
- (3) The employer normally requires a degree or its equivalent for the position; or
- (4) The nature of the specific duties is so specialized and complex that knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

Citizenship and Immigration Services (CIS) interprets the term "degree" in the criteria at 8 C.F.R. § 214.2(h)(4)(iii)(A) to mean not just any baccalaureate or higher degree, but one in a specific specialty that is directly related to the proffered position.

The record of proceeding before the AAO contains: (1) Form I-129 and supporting documentation; (2) the director's request for additional evidence; (3) the petitioner's response to the director's request; (4) the director's denial letter; and (5) Form I-290B and supporting documentation. The AAO reviewed the record in its entirety before issuing its decision.

The petitioner is seeking the beneficiary's services as a computer engineer. Evidence of the beneficiary's duties includes: the I-129 petition; the petitioner's September 27, 2003 letter in support of the petition; and the petitioner's response to the director's request for evidence. According to this evidence, the beneficiary would perform duties that entail: determining compatibility between computer terminals; evaluating hardware configuration, software application, and recommending hardware upgrades; troubleshooting and providing solutions; recommending referral to outside services when necessary; evaluating new technology; acting as liaison between vendors and administration; and providing hardware maintenance. The petitioner indicated that a qualified candidate for the job would possess a bachelor's degree in computer engineering.

The director found that the proffered position was not a specialty occupation because the job is not a computer engineering position; it is a systems analyst position. Citing to the Department of Labor's *Occupational Outlook Handbook (Handbook)*, 2004-2005 edition, the director noted that the minimum requirement for entry into the position was not a baccalaureate degree or its equivalent in a specific specialty. The director found further that the petitioner failed to establish any of the criteria found at 8 C.F.R. § 214.2(h)(4)(iii)(A).

On appeal, the petitioner's president states, in part, that the proffered position is that of a computer engineer. He states further that the director has previously approved similar petitions.

Upon review of the record, the petitioner has established none of the four criteria outlined in 8 C.F.R. § 214.2(h)(4)(iii)(A). Therefore, the proffered position is not a specialty occupation.

The AAO turns first to the criteria at 8 C.F.R. § 214.2(h)(4)(iii)(A)(1) and (2): a baccalaureate or higher degree or its equivalent is the normal minimum requirement for entry into the particular position; a degree requirement is common to the industry in parallel positions among similar organizations; or a particular position is so complex or unique that it can be performed only by an individual with a degree.

Factors often considered by CIS when determining these criteria include: whether the *Handbook* reports that the industry requires a degree; whether the industry's professional association has made a degree a minimum entry requirement; and whether letters or affidavits from firms or individuals in the industry attest that such firms "routinely employ and recruit only degreed individuals." See *Shanti, Inc. v. Reno*, 36 F. Supp. 2d 1151, 1165 (D. Minn. 1999)(quoting *Hird/Blaker Corp. v. Sava*, 712 F. Supp. 1095, 1102 (S.D.N.Y. 1989)).

The AAO routinely consults the *Handbook* for its information about the duties and educational requirements of particular occupations. A review of the proposed duties finds that the proffered position has some similarities to a computer systems analyst position. While a review of the *Handbook*, 2006-2007 edition, finds that a computer systems analyst job may qualify as a specialty occupation, the AAO does not concur with the petitioner that the proffered position is a specialty occupation, or that the petitioner will employ the beneficiary in a specialty occupation. In this case, information on the petitioner that was signed by the petitioner's president on September 27, 2003, reflects that the petitioner has four employees, ten contractors, and a gross annual income of \$378,000. The petitioner's federal income tax return for 2003 reflects only \$186,642 in gross receipts or sales, no compensation of officers paid, and only \$19,485 paid in salaries and wages. Simply going on record without supporting documentary evidence is not sufficient for the purpose of meeting the burden of proof in these proceedings. *Matter of Soffici*, 22 I&N Dec. 158, 165 (Comm. 1998) (citing *Matter of Treasure Craft of California*, 14 I&N Dec. 190 (Reg. Comm. 1972)). No evidence in the *Handbook* indicates that a baccalaureate or higher degree, or its equivalent, is required for a systems analyst of the nature described in the instant petition.

The petitioner asserts that CIS has already determined that the proffered position is a specialty occupation since CIS has approved other, similar petitions in the past. This record of proceeding does not, however, contain all of the supporting evidence submitted to the service center in the prior cases. In the absence of all of the corroborating evidence contained in those records of proceeding, the information submitted by the petitioner is not sufficient to enable the AAO to determine whether the positions offered in the prior cases were similar to the position in the instant petition.

Each nonimmigrant petition is a separate proceeding with a separate record. *See* 8 C.F.R. § 103.8(d). In making a determination of statutory eligibility, CIS is limited to the information contained in the record of proceeding. *See* 8 C.F.R. § 103.2(b)(16)(ii). Although the AAO may attempt to hypothesize as to whether the prior cases were similar to the proffered position or were approved in error, no such determination may be made without review of the original records in their entirety. If the prior petitions were approved based on evidence that was substantially similar to the evidence contained in this record of proceeding, however, the approval of the prior petitions would have been erroneous. CIS is not required to approve petitions where eligibility has not been demonstrated, merely because of prior approvals that may have been erroneous. *See, e.g., Matter of Church Scientology International*, 19 I&N Dec. 593, 597 (Comm. 1988). Neither CIS nor any other agency must treat acknowledged errors as binding precedent. *Sussex Engg. Ltd. v. Montgomery* 825 F.2d 1084, 1090 (6th Cir. 1987), *cert denied*, 485 U.S. 1008 (1988).

Regarding parallel positions in the petitioner's industry, the petitioner submitted Internet job postings for computer systems engineers. There is no evidence, however, to show that the employers issuing those postings are similar to the petitioner, or that the advertised positions are parallel to the instant position. The advertisers include a variety of businesses, such as Exult Recruiting, which is a provider of HR business Process Outsourcing to Global 500 companies, Time Warner Communications, and Rockwell Scientific Company. The petitioner also has not demonstrated that the proposed duties of the proffered position are as complex as the duties described for the advertised positions. Thus, the advertisements are not probative.

The record also does not include any evidence from firms, individuals, or professional associations regarding an industry standard, or documentation to support the complexity or uniqueness of the proffered position.

The petitioner, therefore, has not established the criteria set forth at 8 C.F.R. § 214.2(h)(4)(iii)(A)(1) or (2).

The AAO now turns to the criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A)(3) – the employer normally requires a degree or its equivalent for the position. On appeal, the petitioner states that CIS approved its previous H-1B petitions. The record, however, does not contain any evidence of the petitioner's past hiring practices and, therefore, the petitioner has not met its burden of proof in this regard. Going on record without supporting documentary evidence is not sufficient for purposes of meeting the burden of proof in these proceedings. *Matter of Soffici*, 22 I&N Dec. 158, 165 (Comm. 1998) (citing *Matter of Treasure Craft of California*, 14 I&N Dec. 190 (Reg. Comm. 1972)). Further, the petitioner's creation of a position with a perfunctory bachelor's degree requirement will not mask the fact that the position is not a specialty occupation. CIS must examine the ultimate employment of the alien, and determine whether the position qualifies as a specialty occupation. *Cf. Defensor v. Meissner*, 201 F. 3d 384 (5th Cir. 2000). The critical element is not the title of the position or an employer's self-imposed standards, but whether the position actually requires the theoretical and practical application of a body of highly specialized knowledge, and the attainment of a baccalaureate or

higher degree in the specific specialty as the minimum for entry into the occupation as required by the Act.¹ To interpret the regulations any other way would lead to absurd results: if CIS were limited to reviewing a petitioner's self-imposed employment requirements, then any alien with a bachelor's degree could be brought into the United States to perform a menial, non-professional, or an otherwise non-specialty occupation, so long as the employer required all such employees to have baccalaureate or higher degrees. *See id.* at 388.

Finally, the AAO turns to the criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A)(4) – the nature of the specific duties is so specialized and complex that knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

To the extent that they are depicted in the record, the duties do not appear so specialized and complex as to require the highly specialized knowledge associated with a baccalaureate or higher degree, or its equivalent, in a specific specialty. Therefore, the evidence does not establish that the proffered position is a specialty occupation under 8 C.F.R. § 214.2(h)(4)(iii)(A)(4).

As related in the discussion above, the petitioner has failed to establish that the proffered position is a specialty occupation. Accordingly, the AAO shall not disturb the director's denial of the petition.

Beyond the decision of the director, the record does not contain an evaluation of the beneficiary's credentials from a service that specializes in evaluating foreign educational credentials as required by 8 C.F.R. § 214.2(h)(4)(iii)(D)(3). Thus, the record does not establish that the beneficiary is qualified to perform the services of a specialty occupation. For this additional reason, the petition may not be approved.

The burden of proof in these proceedings rests solely with the petitioner. Section 291 of the Act, 8 U.S.C. § 1361. The petitioner has not sustained that burden.

ORDER: The appeal is dismissed. The petition is denied.

¹ The court in *Defensor v. Meissner* observed that the four criteria at 8 C.F.R. 214.2(h)(4)(iii)(A) present certain ambiguities when compared to the statutory definition, and "might also be read as merely an additional requirement that a position must meet, in addition to the statutory and regulatory definition." *See id.* at 387.
