IN RE: Petitioner: [Redacted]
Beneficiary: [Redacted]

PETITION: Petition for a Nonimmigrant Worker Pursuant to Section 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act, 8 U.S.C. § 1101(a)(15)(H)(i)(b)

ON BEHALF OF PETITIONER:

INSTRUCTIONS:

This is the decision of the Administrative Appeals Office in your case. All documents have been returned to the office that originally decided your case. Any further inquiry must be made to that office.

for Michael T. Kelley
Robert P. Wiemann, Director
Administrative Appeals Office

DISCUSSION: The director of the service center denied the nonimmigrant visa petition and the matter is now before the Administrative Appeals Office (AAO) on appeal. The appeal will be dismissed. The petition will be denied.

The petitioner is a jewelry retailer that seeks to employ the beneficiary as a market research analyst. The petitioner, therefore, endeavors to classify the beneficiary as a nonimmigrant worker in a specialty occupation pursuant to section 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act (the Act), 8 U.S.C. § 1101(a)(15)(H)(i)(b).

The director denied the petition on the basis of his finding that the petitioner had failed to establish that the proposed position qualifies for classification as a specialty occupation.

The record of proceeding before the AAO contains (1) the Form I-129 and supporting documentation; (2) the director's denial letter; and (3) the Form I-290B and supporting documentation. The AAO reviewed the record in its entirety before issuing its decision.

Section 214(i)(1) of the Immigration and Nationality Act (the Act), 8 U.S.C. § 1184(i)(1), defines the term "specialty occupation" as an occupation that requires:

- (A) theoretical and practical application of a body of highly specialized knowledge, and
- (B) attainment of a bachelor's or higher degree in the specific specialty (or its equivalent) as a minimum for entry into the occupation in the United States.

The term "specialty occupation" is further defined at 8 C.F.R. § 214.2(h)(4)(ii) as:

[A]n occupation which requires theoretical and practical application of a body of highly specialized knowledge in fields of human endeavor including, but not limited to, architecture, engineering, mathematics, physical sciences, social sciences, medicine and health, education, business specialties, accounting, law, theology, and the arts, and which requires the attainment of a bachelor's degree or higher in a specific specialty, or its equivalent, as a minimum for entry into the occupation in the United States.

Pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(A), to qualify as a specialty occupation, the position must meet one of the following criteria:

- (1) A baccalaureate or higher degree or its equivalent is normally the minimum requirement for entry into the particular position;
- (2) The degree requirement is common to the industry in parallel positions among similar organizations or, in the alternative, an employer may show that its particular position is so complex or unique that it can be performed only by an individual with a degree;
- (3) The employer normally requires a degree or its equivalent for the position; or
- (4) The nature of the specific duties is so specialized and complex that knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

Citizenship and Immigration Services (CIS) interprets the term “degree” in the criteria at 8 C.F.R. § 214.2(h)(4)(iii)(A) to mean not just any baccalaureate or higher degree, but one in a specific specialty that is directly related to the proposed position.

In its July 13, 2004 letter of support, the petitioner states that the duties of the proposed position would include planning and conducting market research in order to seek effective ways to promote, price, and expand the petitioner’s domestic and international markets; researching market conditions to determine potential sales of quality jewelry products; designing formats for gathering data; examining and analyzing statistical data to forecast future marketing trends; gathering data on competitors; analyzing prices, sales, and methods of marketing and distribution; collecting data on customer preferences and buying habits; preparing reports and graphic illustrations of findings; providing consumer research data relative to various customer groups’ needs; coordinating with the president and other marketing staff to develop and implement the company’s advertising campaigns; conferring with media specialists to select media and estimate costs; submitting proposed programs and estimated budget to the vice present for conduit marketing approval; and coordinating printing and production requirements in order to carry out approved campaigns.

The director denied the petition, finding that the petitioner had satisfied none of the criteria set forth at 8 C.F.R. § 214.2(h)(4)(iii)(A), and therefore had not established that the proposed position qualifies for classification as a specialty occupation.

In determining whether a proposed position qualifies as a specialty occupation, CIS looks beyond the title of the position and determines, from a review of the duties of the position and any supporting evidence, whether the position actually requires the theoretical and practical application of a body of highly specialized knowledge, and the attainment of a baccalaureate degree in a specific specialty, as the minimum for entry into the occupation as required by the Act. The AAO routinely consults the Department of Labor’s *Occupational Outlook Handbook* (the *Handbook*) for its information about the duties and educational requirements of particular occupations.

In his denial, the director, relying on the 2004-2005 edition of the *Handbook*, found that many of the duties of the proposed position reflect the employment of a market research analyst, but concluded that the record failed to establish that the petitioner’s business was of the type or complexity to require a market research analyst. He ultimately determined the proposed position to be that of a marketing manager, employment that does not impose a degree requirement on the beneficiary. While, as discussed below, the AAO concurs in the director’s finding that the proposed position is not a specialty occupation, it does not agree with the reasoning that led him to his conclusion.

The AAO finds the director to have erred in concluding that the petitioner does not have the organizational complexity or operate the type of business that would require a marketing research analyst. The *Handbook* indicates that the work of market research analysts is applicable to many industries and that they are employed throughout the economy. In that market researchers are concerned with the potential sales of products or services and provide a company’s management with the information needed to make decisions on the promotion, distribution, design and pricing of products or services, the petitioner’s need for marketing research may not be discounted based on a lack of organizational complexity or its type of business. The fact that the petitioner is a jewelry retailer does not preclude it from engaging in the type of market research activities described by the *Handbook* as a means of identifying business opportunities. Therefore, the AAO withdraws the director’s findings in this regard.

The 2006-2007 edition of the *Handbook* states the following with regard to the employment of market research analysts:

Market, or marketing, research analysts are concerned with the potential sales of a product or service. Gathering statistical data on competitors and examining prices, sales, and methods of marketing and distribution, they analyze statistical data on past sales to predict future sales. Market research analysts devise methods and procedures for obtaining the data they need. Often, they design telephone, mail, or Internet surveys to assess consumer preferences. They conduct some surveys as personal interviews, going door-to-door, leading focus group discussions, or setting up booths in public places such as shopping malls. Trained interviewers, under the market research analyst's direction, usually conduct the surveys.

After compiling and evaluating the data, market research analysts make recommendations to their client or employer based upon their findings. They provide a company's management with information needed to make decisions on the promotion, distribution, design, and pricing of products or services. The information also may be used to determine the advisability of adding new lines of merchandise, opening new branches, or otherwise diversifying the company's operations. Market research analysts might also develop advertising brochures and commercials, sales plans, and product promotions such as rebates and giveaways.

The *Handbook* states the following with regard to the educational qualifications necessary for entry into this field:

A bachelor's degree is the minimum educational requirement for many market and survey research jobs. However, a master's degree may be required, especially for technical positions, and increases opportunities for advancement to more responsible positions. Also, continuing education is important in order to keep current with the latest methods of developing, conducting, and analyzing surveys and other data. Market and survey researchers may earn advanced degrees in business administration, marketing, statistics, communications, or some closely related discipline.

As the *Handbook* finds that market research analyst positions impose no specific degree requirement on individuals seeking employment in the field, the petitioner cannot establish that its proposed market research analyst position of a type that normally requires the beneficiary to hold a baccalaureate or higher degree, or its equivalent, in a specific specialty. When a range of degrees, e.g., the liberal arts, or a degree of generalized title without further specification, e.g., business administration, can perform a job, the position does not qualify as a specialty occupation. *Matter of Michael Hertz Associates*, 19 I&N Dec. 558 (Comm. 1988). To prove that a job requires the theoretical and practical application of a body of specialized knowledge as required by Section 214(i)(1) of the Act, a petitioner must establish that the position requires the attainment of a bachelor's or higher degree in a specialized field of study. As noted previously, CIS interprets the degree requirement at 8 C.F.R. § 214.2(h)(4)(iii)(A) to require a degree in a specific specialty that is directly related to the proposed position. Accordingly, the petitioner cannot establish its proposed position as a specialty occupation under 8 C.F.R. § 214.2(h)(4)(iii)(A)(1).

Nor does the proposed position qualify as a specialty occupation under either alternative prong of 8 C.F.R. § 214.2(h)(4)(iii)(A)(2). The first prong of this regulation requires a showing that a specific degree requirement is common to the industry in positions that are both (1) parallel to the proposed position and (2) located in organizations similar to the petitioner.

No evidence has been submitted to demonstrate that a specific degree requirement is common to the jewelry retailing industry in parallel positions among similar organizations. Accordingly, the proposed position does not qualify as a specialty occupation under the first prong of 8 C.F.R. § 214.2(h)(4)(iii)(A)(2).

The AAO also concludes that the record does not establish that the proposed position is a specialty occupation under the second prong of 8 C.F.R. § 214.2(h)(4)(iii)(A)(2), which requires a showing that the position is so complex or unique that it can only be performed by an individual with a degree. It finds no evidence that would support such a finding, as the position proposed in the petition is very similar to the generally described market research analyst occupation described in the *Handbook*, which includes persons without a bachelor's degree or its equivalent in a specific specialty.

Accordingly, the petitioner has not established its proposed position as a specialty occupation under either prong of 8 C.F.R. § 214.2(h)(4)(iii)(A)(2).

Nor does the proposed position qualify as a specialty occupation under 8 C.F.R. § 214.2(h)(4)(iii)(A)(3), which requires a showing that the petitioner normally requires a degree or its equivalent for the proposed position. To determine a petitioner's ability to meet this criterion, the AAO normally reviews the petitioner's past employment practices, as well as the histories, including names and dates of employment, of those employees with degrees who previously held the position, and copies of those employees' diplomas. No evidence has been submitted to verify that the proposed position qualifies as a specialty occupation under this criterion.

Finally, the AAO turns to the criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A)(4), which requires a demonstration that the nature of the specific duties is so specialized and complex that knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

To the extent they are depicted in the record, the duties of the proposed position do not establish that their performance would usually be associated with attainment of at least a bachelor's degree in a specific specialty. The descriptions of the duties in the record do not convey such specialization or complexity or that they would be beyond the competency of market research analysts without such a degree. There is no information in the record to support a finding that the duties are more specialized and complex than the market research analyst positions for which the *Handbook* indicates no requirement for the highly specialized knowledge associated with at least a bachelor's degree in a specific specialty. Therefore, the evidence does not establish that the proposed position is a specialty occupation under 8 C.F.R. § 214.2(h)(4)(iii)(A)(4).

The petitioner has failed to establish that the position qualifies for classification as a specialty occupation under any of the criteria set forth at 8 C.F.R. §§ 214.2(h)(4)(iii)(A)(1), (2), (3), and (4). As the proposed position is not a specialty occupation, the beneficiary's qualifications to perform its duties are immaterial. Accordingly, the AAO will not disturb the director's denial of the petition.

The burden of proof in these proceedings rests solely with the petitioner. Section 291 of the Act, 8 U.S.C. § 1361. The petitioner has not sustained that burden.

ORDER: The appeal is dismissed. The petition is denied.
