IN RE: Petitioner: [Redacted]  
Beneficiary: [Redacted]

PETITION: Petition for a Nonimmigrant Worker Pursuant to Section 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act, 8 U.S.C. § 1101(a)(15)(H)(i)(b)

ON BEHALF OF PETITIONER:

SELF-REPRESENTED

INSTRUCTIONS:

This is the decision of the Administrative Appeals Office in your case. All documents have been returned to the office that originally decided your case. Any further inquiry must be made to that office.

Robert P. Wiemann, Chief  
Administrative Appeals Office

**DISCUSSION:** The service center director denied the nonimmigrant visa petition and the matter is now before the Administrative Appeals Office (AAO) on appeal. The appeal will be sustained. The petition will be approved.

The petitioner is a multimedia, construction, and outsourcing firm with 1,000 employees and gross annual income of \$100 million that seeks to employ the beneficiary as an information technology specialist. The petitioner, therefore, endeavors to classify the beneficiary as a nonimmigrant worker in a specialty occupation pursuant to section 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act (the Act), 8 U.S.C. § 1101(a)(15)(H)(i)(b).

The director denied the petition on the basis of his determination that the proposed position does not qualify for classification as a specialty occupation. On appeal, counsel contends that the director erred in denying the petition, and that the proposed position in fact qualifies for the requested classification.

The record of proceeding before the AAO contains: (1) the Form I-129 and supporting documentation; (2) the director's denial letter; and (3) the Form I-290B and supporting documentation. The AAO reviewed the record in its entirety before issuing its decision.

Section 214(i)(1) of the Immigration and Nationality Act (the Act), 8 U.S.C. § 1184(i)(1), defines the term "specialty occupation" as an occupation that requires:

- (A) theoretical and practical application of a body of highly specialized knowledge, and
- (B) attainment of a bachelor's or higher degree in the specific specialty (or its equivalent) as a minimum for entry into the occupation in the United States.

The term "specialty occupation" is further defined at 8 C.F.R. § 214.2(h)(4)(ii) as:

[A]n occupation which requires theoretical and practical application of a body of highly specialized knowledge in fields of human endeavor including, but not limited to, architecture, engineering, mathematics, physical sciences, social sciences, medicine and health, education, business specialties, accounting, law, theology, and the arts, and which requires the attainment of a bachelor's degree or higher in a specific specialty, or its equivalent, as a minimum for entry into the occupation in the United States.

Pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(A), to qualify as a specialty occupation, the position must meet one of the following criteria:

- (1) A baccalaureate or higher degree or its equivalent is normally the minimum requirement for entry into the particular position;
- (2) The degree requirement is common to the industry in parallel positions among similar organizations or, in the alternative, an employer may show that its particular position is so complex or unique that it can be performed only by an individual with a degree;
- (3) The employer normally requires a degree or its equivalent for the position; or

- (4) The nature of the specific duties is so specialized and complex that knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

Citizenship and Immigration Services (CIS) interprets the term “degree” in the criteria at 8 C.F.R. § 214.2(h)(4)(iii)(A) to mean not just any baccalaureate or higher degree, but one in a specific specialty that is directly related to the proposed position.

According to an attachment to the petitioner’s May 5, 2005 letter of support, the duties of the proposed position would consist of building software applications; developing and managing spatial data in a relational database using ESRI map server software and spatial data engine (SDE); building web-based applications to store and manipulate spatial and tabular data; developing user interfaces; performing spatial data analysis using GIS; developing procedures for reformatting data; spatially enabling tabular data; refining database requirements; interacting with state and federal agencies to customize their systems and applications to interface with the petitioner’s web-based application; and developing metadata to document the content, source, evolution, and quality of data. The beneficiary would work at the National Oceanic and Atmospheric Administration, National Ocean Service, Center for Coastal and Environmental Health and Biomolecular Research in Charleston, South Carolina.

In determining whether a proposed position qualifies as a specialty occupation, CIS looks beyond the title of the position and determines, from a review of the duties of the position and any supporting evidence, whether the position actually requires the theoretical and practical application of a body of highly specialized knowledge, and the attainment of a baccalaureate degree in a specific specialty, as the minimum for entry into the occupation as required by the Act. The AAO routinely consults the Department of Labor’s *Occupational Outlook Handbook* (the *Handbook*) for its information about the duties and educational requirements of particular occupations.

Many of the duties of the proposed position, particularly those relating to the building of software applications and building of web-based applications to store and manipulate data, resemble those of software engineers, as such positions are described in the Department of Labor’s *Occupational Outlook Handbook*.

The proposed position qualifies as a specialty occupation under 8 C.F.R. § 214.2(h)(4)(iii)(A)(4), which requires a showing that the nature of the specific duties of the proposed position is so specialized and complex that the knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

That description of the duties of the proposed position, in combination with this particular record’s information about the petitioner’s business, establishes that the duties of the proposed position are so specialized and complex that the knowledge required to perform them is usually associated with the attainment of a baccalaureate or higher degree.

Accordingly, the proposed position qualifies for classification as a specialty occupation.

The record establishes that the beneficiary earned a master’s degree in computer science from West Virginia University in 2004. He therefore qualifies to perform the duties of this specialty occupation.

EAC 05 159 52943

Page 4

The petitioner established that the proposed position qualifies as a specialty occupation and that the beneficiary is qualified to perform the duties of a specialty occupation. Accordingly, the appeal will be sustained and the petition approved.

The burden of proof in these proceedings rests solely with the petitioner. Section 291 of the Act, 8 U.S.C. § 1361. The petitioner has sustained that burden.

**ORDER:** The appeal is sustained. The petition is approved.
