Come work with an innovative community of IT professionals!

U.S. Citizenship and Immigration Services (USCIS) secures America's promise as a nation of immigrants by granting immigration benefits and citizenship, providing information to our customers, promoting an awareness and understanding of citizenship, and ensuring the integrity of our immigration system.

Who are we?
The Office of Information Technology (OIT) provides USCIS with the information technology, expertise, and strategic vision necessary to deliver effective, efficient, and secure immigration services and products such as online filing systems, interactive customer service products, online appointment systems, case tracking systems and other IT products.

Why work for USCIS OIT?
We are building a community of IT professionals who will innovate and transform government processes. Led by our Chief Information Officer (CIO), a proactive leader focused on Agile methodology and DevOps, we have a vision for what the future of IT looks like in the federal government.

What do our employees say about working at OIT?
"The work we do is personally rewarding."
"I like the ever-changing technology and the opportunity to be at the leading edge of transformation."
"Everyone is tremendously talented and driven to protect the immigration system and the data of our applicants and beneficiaries."
"I love the mission of the agency and relished the opportunity to make a difference."

We are seeking IT professionals in the following areas:

- Cloud computing
- Customer service liaison
- Data analysis & data management
- DevOps analysts
- DevOps architects
- DevOps engineers
- Enterprise architecture
- Information security
- Network engineers
- Software engineers
- Systems analysts
- Systems development
