Demographic Price Book

(b)(4)

Demographic Price Book					
SEC 1	Tenprinter; General Pricing UNIX O/S	1133SF	TENPRINTER 1133SF Fully- integrated, cabinet-enclosed fingerprint capture station. 500 dpi capture of step and roll images. Capable of printing to local and network printers, transmission of VSNX proprietary format or NIST format files to another device (requires quotation of specific hardware and/or software options). Ships with standard 100 tenprint record file storage, 17" monitor, keyboard, footswitch, retractable keyboard drawer, and line conditioner. 90 day warranty. FBI ICS Appendix F Certified. Requires purchase of M103, M52 and/or M-SD1. 1133SF supports the following hardware options: Magnetic Stripe Reader, Signature Pad, with custom Tenprint Card Format Development; Add'l Card Customer specific site data development for a standard 8 x 8 tenprint card. Card type and type of transaction to be specified. Factory installed if ordered with initial system order. If ordered after initial system is configured and shipped, requires quotation of IAT-XX.	\$33,500	Legacy
SEC 1	Tenprinter; General Pricing UNIX O/S	1133SF- ADJ	Tenprint Card Application Software Package Customer specific site data development for one standard 8 x 8 tenprint card. Card type and type of transaction to be specified. Applicable only on initial system order; factory installed.	\$34,500	Legacy
SEC 1	Tenprinter; General Pricing UNIX O/S	M103	Custom Form Development Charge for customized form (not tenprint card); requires engineering time estimate prior to quotation.	\$2,500	Legacy

NAME OF OFFEROR OR CONTRACTOR
IDENTIX INCORPORATED

ITEM NO (A)	SUPPLIES/SERVICES (B)	QUANTITY (C)	UNIT (D)	UNIT PRICE (E)	AMOUNT (F)
	<p>Citizenship and Immigration Services Contracting Office 70 Kimball Avenue S. Burlington, VT 05403</p> <p>b. Statement of Work, Attachment A, Security Requirements, is changed as follows:</p> <p>Existing Security Clause #10 is deleted and replaced with attached Security Clause #5.</p> <p>Period of Performance: 09/30/2003 to 09/29/2008</p>				

SECURITY REQUIREMENTS**GENERAL**

U.S. Citizenship & Immigration Services (USCIS) has determined that performance of this contract requires that the Contractor, subcontractor(s), vendor(s), etc. (herein known as Contractor), requires access to sensitive but unclassified information, and that the Contractor will adhere to the following.

SUITABILITY DETERMINATION

USCIS shall have and exercise full control over granting, denying, withholding or terminating unescorted government facility and/or sensitive but unclassified information access for Contractor employees, based upon the results of a background investigation. USCIS may, as it deems appropriate, authorize and make a favorable entry on duty (EOD) decision based on preliminary security checks. The favorable EOD decision would allow the employees to commence work temporarily prior to the completion of the full investigation. The granting of a favorable EOD decision shall not be considered as assurance that a full employment suitability authorization will follow as a result thereof. The granting of a favorable EOD decision or a full employment suitability determination shall in no way prevent, preclude, or bar the withdrawal or termination of any such access by USCIS, at any time during the term of the contract. No employee of the Contractor shall be allowed unescorted access to a USCIS facility without a favorable EOD decision or suitability determination by the Office of Security & Investigations (OSI). Contract employees assigned to the contract not needing access to sensitive but unclassified information or recurring access to USCIS' facilities will not be subject to security suitability screening.

BACKGROUND INVESTIGATIONS

Contract employees (to include applicants, temporaries, part-time and replacement employees) under the contract, needing access to sensitive but unclassified information, shall undergo a position sensitivity analysis based on the duties, outlined in the Position Designation Determination (PDD) for Contractor Personnel, each individual will perform on the contract. The results of the position sensitivity analysis shall identify the appropriate background investigation to be conducted. All background investigations will be processed through OSI. Prospective Contractor employees shall submit the following completed forms to OSI through the COTR no less than 30 days before the starting date of the contract or 30 days prior to entry on duty of any employees, whether a replacement, addition, subcontractor employee, or vendor:

1. Standard Form 85P, "Questionnaire for Public Trust Positions"
2. DHS Form 11000-6, "Conditional Access to Sensitive But Unclassified Information Non-Disclosure Agreement"
3. FD Form 258, "Fingerprint Card" (2 copies)

4. Form DHS-11000-9, "Disclosure and Authorization Pertaining to Consumer Reports Pursuant to the Fair Credit Reporting Act"
5. Position Designation Determination for Contract Personnel Form

Required forms will be provided by USCIS at the time of award of the contract. Only complete packages will be accepted by OSI. Specific instructions on submission of packages will be provided upon award of the contract.

National Security Clearances (NSC) granted by DSS will be accepted by USCIS for access to sensitive but unclassified information. In lieu of security paperwork OSI will accept a Visit Authorization Request (VAR) for a contract employee with an active NSC granted within the last five years and an adequate background investigation completed within the last five years. In addition to the VAR a Personal Data Form (PDF) and cover sheet must be submitted to the COTR.

Be advised that unless an applicant requiring access to sensitive but unclassified information has resided in the US for three of the past five years, OSI may not be able to complete a satisfactory background investigation. In such cases, USCIS retains the right to deem an applicant as ineligible due to insufficient background information.

The use of Non-U.S. citizens, including Lawful Permanent Residents (LPRs), is not permitted in the performance of this contract for any position that involves access to or development of any DHS IT system. USCIS will consider only U.S. Citizens and LPRs for employment on this contract. USCIS will not approve LPRs for employment on this contract in any position that requires the LPR to access or assist in the development, operation, management or maintenance of DHS IT systems. By signing this contract, the contractor agrees to this restriction. In those instances where other non-IT requirements contained in the contract can be met by using LPRs, those requirements shall be clearly described.

EMPLOYMENT ELIGIBILITY

The Contractor must agree that each employee working on this contract will have a Social Security Card issued and approved by the Social Security Administration. The Contractor shall be responsible to USCIS for acts and omissions of his own employees and for any Subcontractor(s) and their employees to include financial responsibility for all damage or injury to persons or property resulting from the acts or omissions of the contractor's employees.

Subject to existing law, regulations and/ or other provisions of this contract, illegal or undocumented aliens will not be employed by the Contractor, or with this contract. The Contractor will ensure that this provision is expressly incorporated into any and all Subcontracts or subordinate agreements issued in support of this contract.

CONTINUED ELIGIBILITY

If a prospective employee is found to be ineligible for access to USCIS facilities or information, the COTR will advise the Contractor that the employee shall not continue to work or to be assigned to work under the contract.

OSI may require drug screening for probable cause at any time and/ or when the contractor independently identifies, circumstances where probable cause exists.

USCIS reserves the right and prerogative to deny and/ or restrict the facility and information access of any Contractor employee whose actions are in conflict with the standards of conduct, 5 CFR 2635 and 5 CFR 3801, or whom USCIS determines to present a risk of compromising sensitive but unclassified information to which he or she would have access under this contract.

The Contractor will report any adverse information coming to their attention concerning contract employees under the contract to USCIS OSI. The subsequent termination of employment of an employee does not obviate the requirement to submit this report. The report shall include the employees' name and social security number, along with the adverse information being reported.

OSI must be notified of all terminations/ resignations within five days of occurrence. The Contractor will return any expired USCIS issued identification cards and building passes, or those of terminated employees to the COTR. If an identification card or building pass is not available to be returned, a report must be submitted to the COTR, referencing the pass or card number, name of individual to whom issued, the last known location and disposition of the pass or card.

SECURITY MANAGEMENT

The Contractor shall appoint a senior official to act as the Corporate Security Officer. The individual will interface with OSI through the COTR on all security matters, to include physical, personnel, and protection of all Government information and data accessed by the Contractor.

The COTR and OSI shall have the right to inspect the procedures, methods, and facilities utilized by the Contractor in complying with the security requirements under this contract. Should the COTR determine that the Contractor is not complying with the security requirements of this contract, the Contractor will be informed in writing by the Contracting Officer of the proper action to be taken in order to effect compliance with such requirements.

INFORMATION TECHNOLOGY SECURITY CLEARANCE

When sensitive but unclassified government information is processed on Department telecommunications and automated information systems, the Contractor agrees to provide for the administrative control of sensitive but unclassified data being processed and to adhere to the procedures governing such data as outlined in *DHS IT Security Program Publication DHS MD 4300.Pub.* Contractor personnel must have

favorably adjudicated background investigations commensurate with the defined sensitivity level.

Contractors who fail to comply with Department security policy are subject to having their access to Department IT systems and facilities terminated, whether or not the failure results in criminal prosecution. Any person who improperly discloses sensitive but unclassified information is subject to criminal and civil penalties and sanctions under a variety of laws (e.g., Privacy Act).

INFORMATION TECHNOLOGY SECURITY TRAINING AND OVERSIGHT

All contractor employees using Department automated systems or processing Department sensitive but unclassified data will be required to receive Security Awareness Training. This training will be provided by the appropriate component agency of DHS.

Contractors who are involved with management, use, or operation of any IT systems that handle sensitive but unclassified information within or under the supervision of the Department, shall receive periodic training at least annually in security awareness and accepted security practices and systems rules of behavior. Department contractors, with significant security responsibilities, shall receive specialized training specific to their security responsibilities annually. The level of training shall be commensurate with the individual's duties and responsibilities and is intended to promote a consistent understanding of the principles and concepts of telecommunications and IT systems security.

All personnel who access Department information systems will be continually evaluated while performing these duties. Supervisors should be aware of any unusual or inappropriate behavior by personnel accessing systems. Any unauthorized access, sharing of passwords, or other questionable security procedures should be reported to the local Security Office or Information System Security Officer (ISSO)

**Statement Of Work
United States Citizenship And Immigration Services
Application Support Center (ASC)
Touchprinter Live Scan System Maintenance**

1.0 Background

U.S. Citizenship and Immigration Services (USCIS) previously ordered 580 model TP 3500LC/LC-ED, and TP3000LD-ED Touchprinters from Identix Incorporated for use at Application Support Centers (ASCs). Touchprinter systems are used to digitally capture biometrics and electronically submit applicant fingerprint images to the Federal Bureau of Investigation (FBI). The fingerprints are used to conduct criminal background checks prior to the USCIS making a determination whether to grant immigration benefits to applicants. Touchprinters are used at approximately 136 USCIS Application Support Centers (ASCs) located throughout the United States and the U.S. territories of Guam, the Virgin Islands, and Puerto Rico.

2.0 Scope

This SOW requires the Contractor to provide maintenance services to the USCIS on 580 Touchprinters from Jun 1, 2008 through May 31, 2009. All maintenance coverage identified in this SOW is in accordance with Blanket Purchase Agreement (BPA) HSSCCG-05-A-0051. Covered systems are listed in Attachment 1.

3.0 Maintenance and Technical Support Services (Hotline)

3.1 Technical Support Services (Hotline)

The Contractor shall provide a system of technical support for all Live-Scan systems delivered by the Contractor. Current covered systems are listed in Attachment 1. The Contractor shall provide hotline support via a toll-free number to be available as follows:

Sunday	Closed.
Monday	9 am e.s.t – 5 pm p.s.t. (ET/PT, when applicable)
Tuesday	9 am e.s.t – 5 pm p.s.t. (ET/PT, when applicable)
Wednesday	9 am e.s.t – 5 pm p.s.t. (ET/PT, when applicable)
Thursday	9 am e.s.t. –5 pm p.s.t (ET/PT, when applicable)
Friday	9 am e.s.t – 5 pm p.s.t. (ET/PT, when applicable)
Saturday	9 am e.s.t – 5 pm p.s.t. (ET/PT, when applicable)

See Attachment 2 for specific operating times for each ASC.

The DHS Help Desk will use the hotline to report technical problems for all sites. The Contractor shall provide a telephonic response within one (1) hour, at which time a resolution or plan for resolution will be provided.

The Contractor shall provide the most effective method of providing responsive technical troubleshooting and resolution support, to include dial-in remote access support, if applicable. If the Government elects, at its sole discretion, to implement the Contractor's remote access support plan, the Government will provide dial-up connections via the use of Government issued SecureID tokens.

The Contractor shall provide a monthly utilization report to USCIS. This report shall detail the number of calls received, time to respond to messages, time of arrival if an on-site maintenance call, technician's name, time to resolve, type of problem, solution, corresponding Help Desk ticket number, location of problem, and point of contact.

3.2 Remedial and Preventive Maintenance Services

The Contractor is responsible for hardware and software maintenance support for Live-Scan systems listed in Attachment 1. The Contractor shall provide all maintenance coverage necessary to meet the requirements of this SOW. The Contractor shall coordinate warranty information and warranty services with the manufacturer of the hardware or software. Subject to security policies, regulations and procedures, the Government will permit on-site access to the equipment that is to be maintained.

3.2.1 General Maintenance Requirements

The Contractor shall provide all necessary personnel, materials, parts, tools, diagnostic and test equipment, technical manuals/publications and other services as may be required for the hardware maintenance support.

- Maintenance support shall include technical troubleshooting, problem resolution and component repair in order to maintain and keep the equipment covered under the order in full operating condition.
- The Contractor shall provide data concerning all maintenance activities. A service incident report (SIR) shall be available to the Government for any maintenance rendered by the Contractor under this order.

3.2.1.1 Periods of Maintenance

The Principal Period of Maintenance (PPM) and Official Operation Hours for equipment covered under this order is as shown on Attachment 2, Monday through Friday or Tuesday through Saturday (five (5) days per week), excluding Federal Holidays.

3.2.1.2 Hardware Maintenance

1. Preventive Maintenance

Preventive Maintenance is defined as regularly scheduled activities to maintain hardware in full operating condition. Preventive maintenance shall be performed during remedial maintenance calls and/or during a mutually acceptable time during the specified PPM, unless otherwise agreed to by the Contractor and the Government.

2. Remedial Maintenance

Remedial maintenance is defined as identifying the source of an equipment or software malfunction and either repairing or replacing the malfunctioned component or subsystem. The Contractor shall provide the parts and equipment required for the diagnosis and repair of malfunctioning components of the Live-Scan system at the most cost effective manner available which will also minimize the downtime of the system. Remedial maintenance shall include transportation, labor, and parts required for return of a malfunctioning system or equipment to full operating condition.

Repaired and/or replaced parts and labor shall be warranted for the standard commercial warranty period from the date the service is rendered. If additional calls are required during the warranty period, for the warranted repair, they shall be made at no additional cost to the Government.

The Contractor's responsibilities for remedial maintenance shall include:

- The administration and management of all warranties associated with the Live-Scan systems.
- Tracking the status and invoking the use of all applicable warranties of the Live-Scan systems.
- Telephonic responses to the originator within 1 hour of trouble call
- Support within 48 hours for ASCs within 100 miles of maintenance support site
- Support within 72 hours for ASCs located beyond 100 miles from the maintenance support site.

Remedial maintenance shall be performed after notification that the system is inoperative (down). The Contractor shall provide the Government with a designated point of contact and make arrangements to enable its maintenance representative to receive such notification and provide continuous telephone coverage within the PPM to permit the Government to make such contact (See Section 3.1, Technical Support Services (Hotline)). Within one (1) hour of notification, the Contractor shall provide a telephonic response that assesses the situation, identifies the problem, and proposes the resolution and the time to fix the problem. Resident on-site maintenance at USCIS sites or other fingerprinting sites is not required.

Downtime is that time in which the Contractor maintained equipment is inoperable due to a hardware malfunction. If the failure of one device causes other devices to be inoperable, these other devices may, at the Government's option, be considered down also. A determination of downtime will be made solely by the Government. Downtime for each failure shall start at the time the Government notifies the Contractor of a failure and shall run until the failed equipment is returned to full operating condition.

Types of Coverage Required

The Contractor shall provide all maintenance coverage necessary to meet the requirements of this SOW, to include system performance requirements in SOW Section 4.0.

3.2.1.3 Performance Deductions

The Government has determined that the Live-Scan equipment provided under this BPA will perform functions that require assessment of payment deductions if the Contractor fails to correct technical malfunctions within the Government's timeframes specified below.

The Contractor shall provide all remedial action necessary to correct technical failures in Live-Scan equipment at sites within the 48 contiguous United States within three (3) business days of the trouble call, and within five (5) business days of the trouble call for sites overseas and in Alaska, Hawaii, and U.S. territories. The Contractor shall incur a \$100 pay deduction per day per machine for each machine that remains down beyond these required timeframes. The Contractor shall not incur deductions when Acts of God (e.g., weather), Government actions (e.g., denial of facilities access), or other events outside of Contractor control prevent the Contractor from providing remedial action within the required timeframes.

3.2.1.4 Responsibilities of the Contractor

1. Parts Quality

The Contractor shall use only new standard parts or refurbished parts, certified as equal in performance to new parts by the Original Equipment Manufacturer, in performed repairs. Parts that have been replaced shall become the property of the Contractor. The Contractor shall maintain a replacement parts policy consistent with supporting the performance requirements as stated in this SOW.

2. Protection of Information During Equipment Maintenance

The Contractor shall prevent loss of hard drive information during all maintenance activities by taking steps to protect and, at the Government's option, restore as necessary, any information residing in the equipment being maintained. The Contractor is responsible for the erasing or wiping of information from all hard drives removed or replaced by the Contractor. Hard drives must be wiped

under the supervision of the Government Computer Systems Security Officer (CSSO). The Contractor shall be responsible for notifying the Contracting Officers Technical Representative (COTR) or designated representative if a hard drive containing information has been removed from a Government facility without erasing the data contained on the hard drive.

3. Service Incident Reports (SIRs)

The Contractor shall maintain an electronic database of all SIRs to respond to Government inquiries regarding specific problems and issues. The SIR shall contain at a minimum, the following information:

- (1) Name of person requesting service
- (2) Location, including office, city and state/country
- (3) Phone number of the person requesting service
- (4) Type of equipment
- (5) Serial number and Government property control number (PCN) of component being serviced
- (6) Date and time of request for service
- (7) Type of service
- (8) Date and time of arrival of maintenance personnel (if applicable)
- (9) Date and time replacement part shipped (if applicable)
- (10) Description of problem
- (11) Parts replaced
- (12) Date and time problem was resolved
- (13) Reason problem not resolved within required timeframe (if applicable)
- (14) Any required follow-up actions
- (15) Help Desk ticket number; and
- (16) Name of individual at affected site certifying the repair was completed

3.2.1.5. Report Deliverables

The contractor shall provide report deliverables as specified in BPA calls. The contractor shall provide the deliverables in electronic format to the extent possible. All documentation developed by the contractor shall become the property of the government and shall not contain proprietary markings.

DELIVERABLE SCHEDULE

Deliverable	Due Date	Task
Utilization Report	Monthly (5 th of each following month)	Para. 3.1
Service Incident Report (SIR)	As required	Para. 3.2.1.4

3.2.1.6 Invoices

The Contractor shall submit a monthly invoice directly to the COTR by the 10th working day following the end of each monthly reporting period. An electronic copy is acceptable.

4.0 System Performance

The Contractor shall ensure that the Live-Scan systems meet the following availability and reliability requirements:

Live-Scan Systems

- 95% availability per machine
- Mean Time Between Failures of 4,000 hours per machine

Availability is defined as a system that is technically operational and supporting the mission of fingerprinting applicants. The Live-Scan system is "unavailable" if it is engaged in an activity that is not in direct support of the fingerprinting mission (e.g., remedial or preventive maintenance).

At the Government's request, the Contractor shall replace systems that do not meet the stated requirements, above, at no cost to the Government.

5.0 Facility Access Control

The Contractor shall observe all internal building security regulations that apply to any and all buildings concerned with this contract. The Contractor shall only enter the facility or building with continuous escort service. When entering and departing the facility or building each Contractor must sign in and out as required at the site.

Equipment and Materials Dismantling, Handling, and/or Hauling: The Contractor shall coordinate the moving of equipment and materials within the facility before dismantling, handling and/or hauling same with the COTR or authorized Government representative. The Contractor shall notify the COTR or authorized Government representative to reach a mutually acceptable time and date corrective action will be completed for work required in response to an emergency or urgent service call within the response times specified herein. The Government reserves the right to inspect the equipment before, during and after any work performed.

Temporary Outages: The Contractor shall coordinate all temporary outages of any equipment with the COTR/authorized representative not less than 72 hours in advance of such outages.

6.0 SECURITY REQUIREMENTS

6.1 GENERAL

U.S. Citizenship & Immigration Services (USCIS) has determined that performance of this contract requires that the Contractor, subcontractor(s), vendor(s), etc. (herein known as Contractor), requires access to sensitive but unclassified information, and that the Contractor will adhere to the following.

6.2 SUITABILITY DETERMINATION

USCIS shall have and exercise full control over granting, denying, withholding or terminating access of unescorted Contractor employees to government facilities and/or access of Contractor employees to sensitive but unclassified information, based upon the results of a background investigation. USCIS may, as it deems appropriate, authorize and make a favorable entry on duty (EOD) decision based on preliminary security checks. The favorable EOD decision would allow the employees to commence work temporarily prior to the completion of the full investigation. The granting of a favorable EOD decision shall not be considered as assurance that a full employment suitability authorization will follow as a result thereof. The granting of a favorable EOD decision or a full employment suitability determination shall in no way prevent, preclude, or bar the withdrawal or termination of any such access by USCIS, at any time during the term of the contract. No employee of the Contractor shall be allowed unescorted access to a USCIS facility without a favorable EOD decision or suitability determination by the Office of Security & Investigations (OSI).

6.3 BACKGROUND INVESTIGATIONS

Contract employees (to include applicants, temporaries, part-time and replacement employees) under the contract, needing access to sensitive but unclassified information, shall undergo a position sensitivity analysis based on the duties, outlined in the Position Designation Determination (PDD) for Contractor Personnel, each individual will perform on the contract. The results of the position sensitivity analysis shall identify the appropriate background investigation to be conducted. All background investigations will be processed through OSI. Prospective Contractor employees shall submit the following completed forms to OSI through the COTR no less than 30 days before the starting date of the contract or 30 days prior to entry on duty of any employees, whether a replacement, addition, subcontractor employee, or vendor:

1. Standard Form 85P, "Questionnaire for Public Trust Positions"
2. DHS Form 11000-6, "Conditional Access to Sensitive But Unclassified Information Non-Disclosure Agreement"
3. FD Form 258, "Fingerprint Card" (2 copies)
4. Form DHS-11000-9, "Disclosure and Authorization Pertaining to Consumer Reports Pursuant to the Fair Credit Reporting Act"
5. Position Designation Determination for Contract Personnel Form

6. Foreign National Relatives or Associates Statement

Required forms will be provided by USCIS at the time of award of the contract. Only complete packages will be accepted by OSI. Specific instructions on submission of packages will be provided upon award of the contract.

National Security Clearances (NSC) granted by DSS will be accepted by USCIS for access to sensitive but unclassified information. In lieu of security paperwork OSI will accept a Visit Authorization Request (VAR) for a contract employee with an active NSC granted within the last five years and an adequate background investigation completed within the last five years. In addition to the VAR a Personal Data Form (PDF) and cover sheet must be submitted to the COTR.

Be advised that unless an applicant requiring access to sensitive but unclassified information has resided in the US for three of the past five years, OSI may not be able to complete a satisfactory background investigation. In such cases, USCIS retains the right to deem an applicant as ineligible due to insufficient background information.

The use of Non-U.S. citizens, including Lawful Permanent Residents (LPRs), is not permitted in the performance of this contract for any position that involves access to or development of any DHS IT system. USCIS will consider only U.S. Citizens for employment on this contract. USCIS will not approve LPRs for employment on this contract in any position that requires the LPR to access or assist in the development, operation, management or maintenance of DHS IT systems. By signing this contract, the contractor agrees to this restriction. In those instances where other non-IT requirements contained in the contract can be met by using LPRs, those requirements shall be clearly described.

6.4 EMPLOYMENT ELIGIBILITY

The Contractor must agree that each employee working on this contract will have a Social Security Card issued and approved by the Social Security Administration. The Contractor shall be responsible to USCIS for acts and omissions of his own employees and for any Subcontractor(s) and their employees to include financial responsibility for all damage or injury to persons or property resulting from the acts or omissions of the contractor's employees.

Subject to existing law, regulations and/ or other provisions of this contract, illegal or undocumented aliens will not be employed by the Contractor, or with this contract. The Contractor will ensure that this provision is expressly incorporated into any and all Subcontracts or subordinate agreements issued in support of this contract.

6.5 CONTINUED ELIGIBILITY

If a prospective employee is found to be ineligible for access to USCIS facilities or information, the COTR will advise the Contractor that the employee shall not continue to work or to be assigned to work under the contract.

OSI may require drug screening for probable cause at any time and/ or when the contractor independently identifies, circumstances where probable cause exists.

USCIS reserves the right and prerogative to deny and/ or restrict the facility and information access of any Contractor employee whose actions are in conflict with the standards of conduct, 5 CFR 2635 and 5 CFR 3801, or whom USCIS determines to present a risk of compromising sensitive but unclassified information to which he or she would have access under this contract.

The Contractor will report any adverse information coming to their attention concerning contract employees under the contract to USCIS OSI. The subsequent termination of employment of an employee does not obviate the requirement to submit this report. The report shall include the employees' name and social security number, along with the adverse information being reported.

OSI must be notified of all terminations/ resignations within five days of occurrence. The Contractor will return any expired USCIS issued identification cards and building passes, or those of terminated employees to the COTR. If an identification card or building pass is not available to be returned, a report must be submitted to the COTR, referencing the pass or card number, name of individual to whom issued, the last known location and disposition of the pass or card.

6.6 SECURITY MANAGEMENT

The Contractor shall appoint a senior official to act as the Corporate Security Officer. The individual will interface with OSI through the COTR on all security matters, to include physical, personnel, and protection of all Government information and data accessed by the Contractor.

The COTR and OSI shall have the right to inspect the procedures, methods, and facilities utilized by the Contractor in complying with the security requirements under this contract. Should the COTR determine that the Contractor is not complying with the security requirements of this contract, the Contractor will be informed in writing by the Contracting Officer of the proper action to be taken in order to effect compliance with such requirements.

6.7 COMPUTER AND TELECOMMUNICATIONS SECURITY REQUIREMENTS

1.1 Security Program Background

The DHS has established a department wide IT security program based on the following Executive Orders (EO), public laws, and national policy:

- Public Law 107-296, Homeland Security Act of 2002.
- Federal Information Security Management Act (FISMA) of 2002, November 25, 2002.
- Public Law 104-106, Clinger-Cohen Act of 1996 [formerly, Information Technology Management Reform Act (ITMRA)], February 10, 1996.
- Privacy Act of 1974, As Amended. 5 United States Code (U.S.C.) 552a, Public Law 93-579, Washington, D.C., July 14, 1987.

- Executive Order 12829, *National Industrial Security Program*, January 6, 1993.
- Executive Order 12958, *Classified National Security Information*, as amended.
- Executive Order 12968, *Access to Classified Information*, August 2, 1995.
- Executive Order 13231, *Critical Infrastructure Protection in the Information Age*, October 16, 2001.
- National Industrial Security Program Operating Manual (NISPOM), February 2001.
- DHS *Sensitive Systems Policy Publication 4300A* v2.1, July 26, 2004
- DHS *National Security Systems Policy Publication 4300B* v2.1, July 26, 2004
- Homeland Security Presidential Directive 7, *Critical Infrastructure Identification, Prioritization, and Protection*, December 17, 2003.
- Office of Management and Budget (OMB) Circular A-130, *Management of Federal Information Resources*.
- National Security Directive (NSD) 42, *National Policy for the Security of National Security Telecommunications and Information Systems* (U), July 5, 1990, CONFIDENTIAL.
- 5 Code of Federal Regulations (CFR) §2635, Office of Government Ethics, *Standards of Ethical Conduct for Employees of the Executive Branch*.
- DHS SCG OS-002 (IT), National Security IT Systems Certification & Accreditation, March 2004.
- Department of State 12 Foreign Affairs Manual (FAM) 600, *Information Security Technology*, June 22, 2000.
- Department of State 12 FAM 500, *Information Security*, October 1, 1999.
- Executive Order 12472, *Assignment of National Security and Emergency Preparedness Telecommunications Functions*, dated April 3, 1984.
- Presidential Decision Directive 67, *Enduring Constitutional Government and Continuity of Government Operations*, dated October 21, 1998.
- FEMA Federal Preparedness Circular 65, *Federal Executive Branch Continuity of Operations (COOP)*, dated July 26, 1999.
- FEMA Federal Preparedness Circular 66, *Test, Training and Exercise (TT&E) for Continuity of Operations (COOP)*, dated April 30, 2001.
- FEMA Federal Preparedness Circular 67, *Acquisition of Alternate Facilities for Continuity of Operations*, dated April 30, 2001.
- Title 36 Code of Federal Regulations 1236, *Management of Vital Records*, revised as of July 1, 2000.
- National Institute of Standards and Technology (NIST) Special Publications for computer security and FISMA compliance.

6.7.1 GENERAL

Due to the sensitive nature of USCIS information, the contractor is required to develop and maintain a comprehensive Computer and Telecommunications Security Program to address the integrity, confidentiality, and availability of sensitive but unclassified (SBU) information during collection, storage, transmission, and disposal. The contractor's security program shall adhere to the requirements set forth in the DHS Management Directive 4300 IT Systems Security Pub Volume 1 Part A and DHS Management Directive 4300 IT Systems Security Pub Volume I Part B. This shall include conformance with the DHS Sensitive Systems Handbook, DHS Management Directive 11042 Safeguarding Sensitive but Unclassified (For Official Use Only)

Information and other DHS or USCIS guidelines and directives regarding information security requirements. The contractor shall establish a working relationship with the USCIS IT Security Office, headed by the Information Systems Security Program Manager (ISSM).

6.7.2 IT SECURITY IN THE SYSTEMS DEVELOPMENT LIFE CYCLE (SDLC)

The USCIS SDLC Manual documents all system activities required for the development, operation, and disposition of IT security systems. Required systems analysis, deliverables, and security activities are identified in the SDLC manual by lifecycle phase. The contractor shall assist the appropriate USCIS ISSO with development and completion of all SDLC activities and deliverables contained in the SDLC. The SDLC is supplemented with information from DHS and USCIS Policies and procedures as well as the National Institute of Standards Special Procedures related to computer security and FISMA compliance. These activities include development of the following documents:

- *Sensitive System Security Plan (SSSP)*: This is the primary reference that describes system sensitivity, criticality, security controls, policies, and procedures. The SSSP shall be based upon the completion of the DHS FIPS 199 workbook to categorize the system of application and completion of the RMS Questionnaire. The SSSP shall be completed as part of the System or Release Definition Process in the SDLC and shall not be waived or tailored.
- *Privacy Impact Assessment (PIA) and System of Records Notification (SORN)*. For each new development activity, each incremental system update, or system recertification, a PIA and SORN shall be evaluated. If the system (or modification) triggers a PIA the contractor shall support the development of PIA and SORN as required. The Privacy Act of 1974 requires the PIA and shall be part of the SDLC process performed at either System or Release Definition.
- *Contingency Plan (CP)*: This plan describes the steps to be taken to ensure that an automated system or facility can be recovered from service disruptions in the event of emergencies and/or disasters. The Contractor shall support annual contingency plan testing and shall provide a Contingency Plan Test Results Report.
- *Security Test and Evaluation (ST&E)*: This document evaluates each security control and countermeasure to verify operation in the manner intended. Test parameters are established based on results of the RA. An ST&E shall be conducted for each Major Application and each General Support System as part of the certification process. The Contractor shall support this process.
- *Risk Assessment (RA)*: This document identifies threats and vulnerabilities, assesses the impacts of the threats, evaluates in-place countermeasures, and identifies additional countermeasures necessary to ensure an acceptable level of security. The RA shall be completed after completing the NIST 800-53 evaluation, Contingency Plan Testing, and the ST&E. Identified weakness shall be documented in a Plan of Action and Milestone (POA&M) in the USCIS Trusted Agent FISMA (TAF) tool. Each POA&M entry shall identify the cost of mitigating the weakness and the schedule for mitigating the weakness, as well as a POC for the mitigation efforts.

- **Certification and Accreditation (C&A):** This program establishes the extent to which a particular design and implementation of an automated system and the facilities housing that system meet a specified set of security requirements, based on the RA of security features and other technical requirements (certification), and the management authorization and approval of a system to process sensitive but unclassified information (accreditation). As appropriate the Contractor shall be granted access to the USCIS TAF and Risk Management System (RMS) tools to support C&A and its annual assessment requirements. Annual assessment activities shall include completion of the NIST 800-26 Self Assessment in TAF, annual review of user accounts, and annual review of the FIPS categorization. C&A status shall be reviewed for each incremental system update and a new full C&A process completed when a major system revision is anticipated.

6.7.3 SECURITY ASSURANCES

DHS Management Directives 4300 requires compliance with standards set forth by NIST, for evaluating computer systems used for processing SBU information. The Contractor shall ensure that requirements are allocated in the functional requirements and system design documents to security requirements are based on the DHS policy, NIST standards and applicable legislation and regulatory requirements. Systems shall offer the following visible security features:

- **User Identification and Authentication (I&A)** – I&A is the process of telling a system the identity of a subject (for example, a user) (*I*) and providing that the subject is who it claims to be (*A*). Systems shall be designed so that the identity of each user shall be established prior to authorizing system access, each system user shall have his/her own user ID and password, and each user is authenticated before access is permitted. All system and database administrative users shall have strong authentication, with passwords that shall conform to established DHS standards. All USCIS Identification and Authentication shall be done using the Password Issuance Control System (PICS) or its successor. Under no circumstances will Identification and Authentication be performed by other than the USCIS standard system in use at the time of a systems development.
- **Discretionary Access Control (DAC)** – DAC is a DHS access policy that restricts access to system objects (for example, files, directories, devices) based on the identity of the users and/or groups to which they belong. All system files shall be protected by a secondary access control measure.
- **Object Reuse** – Object Reuse is the reassignment to a subject (for example, user) of a medium that previously contained an object (for example, file). Systems that use memory to temporarily store user I&A information and any other SBU information shall be cleared before reallocation.
- **Audit** – DHS systems shall provide facilities for transaction auditing, which is the examination of a set of chronological records that provide evidence of system and user activity. Evidence of active review of audit logs shall be provided to the USCIS IT Security Office on a monthly basis, identifying all security findings including failed log in attempts, attempts to access restricted information, and password change activity.
- **Banner Pages** – DHS systems shall provide appropriate security banners at start up identifying the system or application as being a Government asset and subject to

government laws and regulations. This requirement does not apply to public facing internet pages, but shall apply to intranet applications.

6.7.4 DATA SECURITY

SBU systems shall be protected from unauthorized access, modification, and denial of service. The Contractor shall ensure that all aspects of data security requirements (i.e., confidentiality, integrity, and availability) are included in the functional requirements and system design, and ensure that they meet the minimum requirements as set forth in the DHS Sensitive Systems Handbook and USCIS policies and procedures. These requirements include:

- *Integrity* – The computer systems used for processing SBU shall have data integrity controls to ensure that data is not modified (intentionally or unintentionally) or repudiated by either the sender or the receiver of the information. A risk analysis and vulnerability assessment shall be performed to determine what type of data integrity controls (e.g., cyclical redundancy checks, message authentication codes, security hash functions, and digital signatures, etc.) shall be used.
- *Confidentiality* – Controls shall be included to ensure that SBU information collected, stored, and transmitted by the system is protected against compromise. A risk analysis and vulnerability assessment shall be performed to determine if threats to the SBU exist. If it exists, data encryption shall be used to mitigate such threats.
- *Availability* – Controls shall be included to ensure that the system is continuously working and all services are fully available within a timeframe commensurate with the availability needs of the user community and the criticality of the information processed.
- *Data Labeling*. – The contractor shall ensure that documents and media are labeled consistent with the *DHS Sensitive Systems Handbook*.
