Petitioner:

Beneficiary:

PETITION: Immigrant Petition for Alien Worker as an Alien of Extraordinary Ability Pursuant to Section 203(b)(1)(A) of the Immigration and Nationality Act, 8 U.S.C. § 1153(b)(1)(A)

ON BEHALF OF PETITIONER:

[REDACTED]

INSTRUCTIONS:

Enclosed please find the decision of the Administrative Appeals Office in your case. All of the documents related to this matter have been returned to the office that originally decided your case. Please be advised that any further inquiry that you might have concerning your case must be made to that office.

If you believe the law was inappropriately applied by us in reaching our decision, or you have additional information that you wish to have considered, you may file a motion to reconsider or a motion to reopen. The specific requirements for filing such a request can be found at 8 C.F.R. § 103.5. All motions must be submitted to the office that originally decided your case by filing a Form I-290B, Notice of Appeal or Motion, with a fee of \$630. Please be aware that 8 C.F.R. § 103.5(a)(1)(i) requires that any motion must be filed within 30 days of the decision that the motion seeks to reconsider or reopen.

Thank you,

  
Perry Rhew  
Chief, Administrative Appeals Office

**DISCUSSION:** The employment-based immigrant visa petition was denied by the Director, Nebraska Service Center, and is now before the Administrative Appeals Office (AAO) on appeal. The appeal will be dismissed.

The petitioner seeks classification as an employment-based immigrant pursuant to section 203(b)(1)(A) of the Immigration and Nationality Act (the Act), 8 U.S.C. § 1153(b)(1)(A), as an alien of extraordinary ability in the sciences. The director determined that the petitioner had not established the requisite extraordinary ability through extensive documentation and sustained national or international acclaim.

Congress set a very high benchmark for aliens of extraordinary ability by requiring through the statute that the petitioner demonstrate the alien's "sustained national or international acclaim" and present "extensive documentation" of the alien's achievements. *See* section 203(b)(1)(A)(i) of the Act and 8 C.F.R. § 204.5(h)(3). The implementing regulation at 8 C.F.R. § 204.5(h)(3) states that an alien can establish sustained national or international acclaim through evidence of a one-time achievement of a major, internationally recognized award. Absent the receipt of such an award, the regulation outlines ten categories of specific objective evidence. 8 C.F.R. § 204.5(h)(3)(i) through (x). The petitioner must submit qualifying evidence under at least three of the ten regulatory categories of evidence to establish the basic eligibility requirements.

On appeal, counsel argues that the petitioner meets at least three of the ten regulatory categories of evidence at 8 C.F.R. § 204.5(h)(3). For the reasons discussed below, we uphold the director's decision.

## **I. Law**

Section 203(b) of the Act states, in pertinent part, that:

(1) Priority workers. -- Visas shall first be made available . . . to qualified immigrants who are aliens described in any of the following subparagraphs (A) through (C):

(A) Aliens with extraordinary ability. -- An alien is described in this subparagraph if --

(i) the alien has extraordinary ability in the sciences, arts, education, business, or athletics which has been demonstrated by sustained national or international acclaim and whose achievements have been recognized in the field through extensive documentation,

(ii) the alien seeks to enter the United States to continue work in the area of extraordinary ability, and

(iii) the alien's entry into the United States will substantially benefit prospectively the United States.

U.S. Citizenship and Immigration Services (USCIS) and legacy Immigration and Naturalization Service (INS) have consistently recognized that Congress intended to set a very high standard for individuals seeking immigrant visas as aliens of extraordinary ability. *See* H.R. 723 101<sup>st</sup> Cong., 2d Sess. 59 (1990); 56 Fed. Reg. 60897, 60898-99 (Nov. 29, 1991). The term "extraordinary ability" refers only to those individuals in that small percentage who have risen to the very top of the field of endeavor. *Id.* and 8 C.F.R. § 204.5(h)(2).

The regulation at 8 C.F.R. § 204.5(h)(3) requires that an alien demonstrate his or her sustained acclaim and the recognition of his or her achievements in the field. Such acclaim and achievements must be established either through evidence of a one-time achievement (that is, a major, international recognized award) or through meeting at least three of the following ten categories of evidence:

- (i) Documentation of the alien's receipt of lesser nationally or internationally recognized prizes or awards for excellence in the field of endeavor;
- (ii) Documentation of the alien's membership in associations in the field for which classification is sought, which require outstanding achievements of their members, as judged by recognized national or international experts in their disciplines or fields;
- (iii) Published material about the alien in professional or major trade publications or other major media, relating to the alien's work in the field for which classification is sought. Such evidence shall include the title, date, and author of the material, and any necessary translation;
- (iv) Evidence of the alien's participation, either individually or on a panel, as a judge of the work of others in the same or an allied field of specialization for which classification is sought;
- (v) Evidence of the alien's original scientific, scholarly, artistic, athletic, or business-related contributions of major significance in the field;
- (vi) Evidence of the alien's authorship of scholarly articles in the field, in professional or major trade publications or other major media;
- (vii) Evidence of the display of the alien's work in the field at artistic exhibitions or showcases;
- (viii) Evidence that the alien has performed in a leading or critical role for organizations or establishments that have a distinguished reputation;
- (ix) Evidence that the alien has commanded a high salary or other significantly high remuneration for services, in relation to others in the field; or

(x) Evidence of commercial successes in the performing arts, as shown by box office receipts or record, cassette, compact disk, or video sales.

In 2010, the U.S. Court of Appeals for the Ninth Circuit (Ninth Circuit) reviewed the denial of a petition filed under this classification. *Kazarian v. USCIS*, 596 F.3d 1115 (9<sup>th</sup> Cir. 2010). Although the court upheld the AAO's decision to deny the petition, the court took issue with the AAO's evaluation of evidence submitted to meet a given evidentiary criterion.<sup>1</sup> With respect to the criteria at 8 C.F.R. § 204.5(h)(3)(iv) and (vi), the court concluded that while USCIS may have raised legitimate concerns about the significance of the evidence submitted to meet those two criteria, those concerns should have been raised in a subsequent "final merits determination." *Id.* at 1121-22.

The court stated that the AAO's evaluation rested on an improper understanding of the regulations. Instead of parsing the significance of evidence as part of the initial inquiry, the court stated that "the proper procedure is to count the types of evidence provided (which the AAO did)," and if the petitioner failed to submit sufficient evidence, "the proper conclusion is that the applicant has failed to satisfy the regulatory requirement of three types of evidence (as the AAO concluded)." *Id.* at 1122 (citing to 8 C.F.R. § 204.5(h)(3)). The court also explained the "final merits determination" as the corollary to this procedure:

If a petitioner has submitted the requisite evidence, USCIS determines whether the evidence demonstrates both a "level of expertise indicating that the individual is one of that small percentage who have risen to the very top of the[ir] field of endeavor." 8 C.F.R. § 204.5(h)(2), and "that the alien has sustained national or international acclaim and that his or her achievements have been recognized in the field of expertise." 8 C.F.R. § 204.5(h)(3). Only aliens whose achievements have garnered "sustained national or international acclaim" are eligible for an "extraordinary ability" visa. 8 U.S.C. § 1153(b)(1)(A)(i).

*Id.* at 1119-1120.

Thus, *Kazarian* sets forth a two-part approach where the evidence is first counted and then considered in the context of a final merits determination. In reviewing Service Center decisions, the AAO will apply the test set forth in *Kazarian*. As the AAO maintains *de novo* review, the AAO will conduct a new analysis if the director reached his or her conclusion by using a one-step analysis rather than the two-step analysis dictated by the *Kazarian* court. *See Spencer Enterprises, Inc. v. United States*, 229 F. Supp. 2d 1025, 1043 (E.D. Cal. 2001), *aff'd*, 345 F.3d 683 (9<sup>th</sup> Cir. 2003); *see also Soltane v. DOJ*, 381 F.3d 143, 145 (3d Cir. 2004) (noting that the AAO conducts appellate review on a *de novo* basis).

---

<sup>1</sup> Specifically, the court stated that the AAO had unilaterally imposed novel substantive or evidentiary requirements beyond those set forth in the regulations at 8 C.F.R. § 204.5(h)(3)(iv) and 8 C.F.R. § 204.5(h)(3)(vi).

## II. Analysis

### A. Evidentiary Criteria

This petition, filed on March 6, 2009, seeks to classify the petitioner as an alien with extraordinary ability as a research scientist. The petitioner received her Ph.D. in Biology from the School of Medicine at Tsinghua University, Beijing in 2005. At the time of filing, the petitioner was working as a postdoctoral fellow at the Gladstone Institute of Neurological Disease (GIND), University of California, San Francisco (UCSF) under the supervision of [REDACTED]

The petitioner has submitted documentation pertaining to the following categories of evidence under 8 C.F.R. § 204.5(h)(3).<sup>2</sup>

*Documentation of the alien's membership in associations in the field for which classification is sought, which require outstanding achievements of their members, as judged by recognized national or international experts in their disciplines or fields.*

In order to demonstrate that membership in an association meets this criterion, a petitioner must show that the association requires outstanding achievement as an essential condition for admission to membership. Membership requirements based on employment or activity in a given field, minimum education or experience, standardized test scores, grade point average, recommendations by colleagues or current members, or payment of dues, do not satisfy this criterion as such requirements do not constitute outstanding achievements. Further, the overall prestige of a given association is not determinative; the issue here is membership requirements rather than the association's overall reputation.

The petitioner submitted evidence of her membership in the Society for Neuroscience and general information about the organization, but there is no evidence (such as bylaws or rules of admission) showing that it requires outstanding achievements of its members, as judged by recognized national or international experts in the petitioner's field.<sup>3</sup>

---

<sup>2</sup> The petitioner does not claim to meet or submit evidence relating to the categories of evidence not discussed in this decision.

<sup>3</sup> The website of the Society for Neuroscience lists the following requirements for "Regular Membership" and "Regular Postdoc Membership":

Regular Membership - \$175 - Scientists living in the United States, Canada or Mexico who have done research relating to neuroscience are eligible for regular membership. . . .

Regular Postdoc Membership - \$130 - The Regular Postdoc category is available to those who have obtained their doctoral degree and are currently working in a postdoctoral trainee program. . . .

See [http://www.sfn.org/index.aspx?pagename=membership\\_AboutMembership\\_Categories](http://www.sfn.org/index.aspx?pagename=membership_AboutMembership_Categories), accessed on April 6, 2011, copy incorporated into the record of proceedings. Neither of the preceding membership categories requires outstanding achievements, as judged by recognized national or international experts in the petitioner's field.

In response to the director's request for evidence, the petitioner submitted an August 21, 2009 e-mail informing her of the approval of her "nomination for election to associate membership in Sigma Xi, The Scientific Research Society." The petitioner's election to associate membership in Sigma Xi post-dates the petition's March 6, 2009 filing date. A petitioner, however, must establish eligibility at the time of filing. 8 C.F.R. §§ 103.2(b)(1), (12); *Matter of Katigbak*, 14 I&N Dec. 45, 49 (Regl. Commr. 1971). Accordingly, the AAO will not consider this evidence in this proceeding. Nevertheless, the submitted documentation does not establish that election to "associate" membership in Sigma Xi requires outstanding achievements, as judged by recognized national or international experts in the petitioner's field.<sup>4</sup>

In light of above, the petitioner has not established that she meets this criterion.

*Published material about the alien in professional or major trade publications or other major media, relating to the alien's work in the field for which classification is sought. Such evidence shall include the title, date, and author of the material, and any necessary translation.*

In general, in order for published material to meet this criterion, it must be primarily about the petitioner and, as stated in the regulations, be printed in professional or major trade publications or other major media. To qualify as major media, the publication should have significant national or international distribution. Some newspapers, such as the *New York Times*, nominally serve a particular locality but would qualify as major media because of significant national distribution, unlike small local community papers.<sup>5</sup>

The petitioner submitted a December 15, 2008 article entitled "Building the Nervous System" in *The Messenger*, an institutional newsletter of the [REDACTED]. The author of the article was not provided as required by the plain language of this regulatory criterion. Further, the article does not even mention the petitioner. The regulation at 8 C.F.R.

---

<sup>4</sup> Sigma Xi's website lists the following requirements for "associate" membership:

An individual who has conducted independent investigation and written a report concerning their research is eligible for election to Associate Membership. This initial research achievement can be in a field of pure or applied science. The individual is expected to later achieve the requirements for Full Membership. Nominators are attesting to the nominee's potential to be promoted to Full Membership in the future. Associate Membership is offered to encourage young investigators with promise to continue careers in research. . . .

*See* <https://www.sigmaxi.org/member/join/qualification.html>, accessed on April 6, 2011, copy incorporated into the record of proceedings. Demonstrating potential, promise, or an aptitude for research does not constitute outstanding achievements.

<sup>5</sup> Even with nationally-circulated newspapers, consideration must be given to the placement of the article. For example, an article that appears in the *Washington Post*, but in a section that is distributed only in Fairfax County, Virginia, for instance, cannot serve to spread an individual's reputation outside of that county.

§ 204.5(h)(3)(iii), however, requires that the published material be “about the alien.”<sup>6</sup> Moreover, there is no circulation evidence showing that this institutional newsletter qualifies as professional or major trade publication or some other form of major media.

The petitioner also submitted copies of research articles which cite to her work. Articles which cite to the petitioner’s work are primarily about the authors’ own work, and are not about the petitioner or even her work. As previously discussed, the plain language of the regulation at 8 C.F.R. § 204.5(h)(3)(iii) requires that the published material be “about the alien.” With regard to this criterion, a footnoted reference to the alien’s work without evaluation is of minimal probative value. The submitted articles do not discuss the merits of the petitioner’s work, her standing in the field, any significant impact that her work has had on the field, or any other information so as to be considered published material about the petitioner as required by this criterion. Moreover, we note that the submitted articles citing to the petitioner’s work similarly referenced numerous other authors. The research articles citing to the petitioner’s work are more relevant to the regulatory criterion at 8 C.F.R. § 204.5(h)(3)(v) and will be addressed there.

In response to the director’s request for evidence, the petitioner submitted an article entitled “Micromanaging Development” in *Focus* (pages 4 – 8), a publication of the [REDACTED] Institutes at UCSF. The date and author of the article were not provided as required by the plain language of this regulatory criterion. The article highlights the findings of several researchers at the Gladstone Institutes and is about MicroRNAs playing a key role in regulating the development of organ systems. The five-page article only briefly mentions the petitioner on page 8 and includes her photograph. As previously discussed, the regulation at 8 C.F.R. § 204.5(h)(3)(iii) requires that the published material be “about the alien.” Further, there is no circulation evidence showing that this publication of the petitioner’s employer qualifies as professional or major trade publication or some other form of major media.

In light of above, the petitioner has not established that he meets this criterion.

*Evidence of the alien's original scientific, scholarly, artistic, athletic, or business-related contributions of major significance in the field.*

The petitioner submitted letters of support from independent references discussing the significance of original research findings she coauthored with her superiors (such as [REDACTED]). The references’ statements do not merely reiterate the regulatory language of this criterion, they clearly describe how the petitioner and her superiors’ scientific contributions are both original and of major significance in the field. Moreover, in support of the independent experts’ statements, the petitioner submitted evidence of more than two hundred citations to her published findings. This citation evidence corroborates the scientific experts’ statements that the petitioner has made original contributions of major significance in her field. Thus, the petitioner has submitted qualifying evidence pursuant to 8 C.F.R. § 204.5(h)(3)(v).

---

<sup>6</sup> See, e.g., *Accord Negro-Plumpe v. Okin*, 2:07-CV-820-ECR-RJJ at 7 (D. Nev. Sept. 8, 2008) (upholding a finding that articles about a show are not about the actor).

*Evidence of the alien's authorship of scholarly articles in the field, in professional or major trade publications or other major media.*

The petitioner has documented her authorship of fifteen journal articles that were published as of the petition's filing date and, thus, has submitted qualifying evidence pursuant to 8 C.F.R. § 204.5(h)(3)(vi). Accordingly, the petitioner has established that she meets this criterion.

*Evidence that the alien has performed in a leading or critical role for organizations or establishments that have a distinguished reputation.*

The petitioner submitted letters of support discussing her graduate research at Tsinghua University under the direction of [REDACTED] and her postdoctoral research at the GIND under [REDACTED]. While the petitioner has performed admirably on the research projects to which she was assigned, there is no evidence showing that her subordinate roles were leading or critical for the preceding institutions. For example, there is no organizational chart or other evidence documenting how the petitioner's positions fell within the general hierarchy of her research institutions. We note that the petitioner's role at Tsinghua University was that of a student. Moreover, the petitioner's current postdoctoral appointment at the GIND is designed to provide specialized research experience and training in her field of endeavor.<sup>7</sup> The petitioner's evidence does not demonstrate how her temporary appointments differentiated her from the other research scientists employed by the preceding institutions, let alone their tenured faculty and principal investigators. The documentation submitted by the petitioner does not establish that she was responsible for the preceding institutions' success or standing to a degree consistent with the meaning of "leading or critical role." Accordingly, the petitioner has not established that she meets this criterion.

*Summary*

In this case, we concur with the director's determination that the petitioner has failed to demonstrate her receipt of a major, internationally recognized award, or that she meets at least three of the ten categories of evidence that must be satisfied to establish the minimum eligibility requirements necessary to qualify as an alien of extraordinary ability. 8 C.F.R. § 204.5(h)(3). A final merits determination that considers all of the evidence follows.

***B. Final Merits Determination***

In accordance with the *Kazarian* opinion, we will next conduct a final merits determination that considers all of the evidence in the context of whether or not the petitioner has demonstrated: (1) a "level of expertise indicating that the individual is one of that small percentage who have risen to the very top of the[ir] field of endeavor," 8 C.F.R. § 204.5(h)(2); and (2) "that the alien has

---

<sup>7</sup> "Biological scientists with a Ph.D. often take temporary postdoctoral research positions that provide specialized research experience." See <http://www.bls.gov/oco/pdf/ocos047.pdf>, accessed on April 6, 2011, copy incorporated into the record of proceedings.

sustained national or international acclaim and that his or her achievements have been recognized in the field of expertise." Section 203(b)(1)(A) of the Act; 8 C.F.R. § 204.5(h)(3). *See also Kazarian*, 596 F.3d at 1119-1120. In the present matter, many of the deficiencies in the documentation submitted by the petitioner have already been addressed in our preceding discussion of the regulatory criteria at 8 C.F.R. §§ 204.5(h)(3)(ii), (iii), and (viii).

Regarding the documentation submitted for 8 C.F.R. § 204.5(h)(vi), we acknowledge that the petitioner has documented her co-authorship of fifteen journal articles that were published as of the petition's filing date. The petitioner, however, has not established that her publication record sets her apart through a "career of acclaimed work." H.R. Rep. No. 101-723, 59 (Sept. 19, 1990). That page (59) also says that "an alien must (1) demonstrate sustained national or international acclaim in the sciences, arts, education, business or athletics (as shown through extensive documentation)..." Further, the Department of Labor's Occupational Outlook Handbook, 2010-11 Edition (accessed at [www.bls.gov/oco](http://www.bls.gov/oco) on April 6, 2011 and incorporated into the record of proceedings), provides information about the nature of employment as a biological scientist and the requirements for such a position. The handbook expressly states that a "solid record of published research is essential in obtaining a permanent position involving basic research."<sup>8</sup> This information reveals that published research does not necessarily set an individual apart from other biological scientists employed in that researcher's field.

That said, we acknowledge the positive response in the field to the petitioner's research articles that she coauthored with [REDACTED]. We are not persuaded, however, that the petitioner's contributions, presented in her well-received publications, rise to the level of sustained national or international acclaim in the context of her field. Ultimately, the evidence in the aggregate does not distinguish the petitioner as one of the small percentage who has risen to the very top of the field of endeavor. At the time of filing, the petitioner was working at the GIND as a postdoctoral fellow. The petitioner relies primarily on research articles she coauthored with her superiors at the GIND and Tsinghua University, her publication citation record, the praise of members of her field, and the affirmation of her colleagues that her work is important to the GIND where she works in an inherently temporary position.

Many of the petitioner's references' credentials are far more impressive than those of the petitioner. For example, [REDACTED]

[REDACTED] states:

I am currently a tenured full Professor, leading a research group in tumor progression and metastasis research at the Dept. of Pharmacology and Cancer Biology, Duke University Medical Center. . . . My early original work on TGF- $\beta$  receptors established the platform for studying cancer and immune disorders thereafter. I have published more than 90 scientific research papers in peer-reviewed journals, including the most influential ones such as *Science*, *Nature* and *Cell*. I am also an Associate Editor of the *Journal of Biological Chemistry* . . . .

<sup>8</sup> See <http://www.bls.gov/oco/pdf/ocos047.pdf>, accessed on April 6, 2011, copy incorporated into the record of proceedings.

[REDACTED] and a Professor of Pathology and Medicine at UCSF. His curriculum vitae states that he is a Fellow of the American Association for the Advancement of Science, an elected member of the National Academy of Sciences, a Fellow of the American Heart Association, and a member of the American Academy of Arts & Sciences. He has also served on the Editorial Boards of *Journal of Lipid Research*; *Journal of Clinical Investigation*; *Journal of Biological Chemistry*; *Lipid Review*; *Arteriosclerosis, Thrombosis, and Vascular Biology*; *Journal of Atherosclerosis and Thrombosis*; *Journal of Lipid Research*; *Current Opinion in Lipidology*; and *Nutrition, Metabolism and Cardiovascular Diseases*. Further, [REDACTED] has authored 293 research publications.

[REDACTED]  
College of Medicine, states:

I have published over 180 peer-reviewed papers in prestigious scientific journals, among which are some sixty review articles. I have served as an NIH [National Institutes of Health] Study Section ad hoc reviewer, member of NIH Special Emphasis Panels, Secretary of American Society of Human Genetics. I am also the recipient of many awards and honors including Huntington Disease Society of America-Leadership Award and National Fragile-X Foundation – William Rosen Award. . . . I am currently leading a world-renowned laboratory focusing on human genetic disorders, including Fragile X syndrome, myotonic dystrophy and Huntington's disease.

[REDACTED] of  
Neuroscience, UCSF, states:

I am the director of the Gladstone Institute of Neurological Disease at the University of California, San Francisco (UCSF), where [the petitioner] is conducting her postdoctoral research. . . . I have published more than 80 scientific research papers in peer reviewed journals, including the most influential ones such as *Science* and *Nature*. I have also served as an ad hoc reviewer on the editorial board of several peer-reviewed journals and chaired the Neuroscience of Aging review panel of the National Institute on Aging. Most recently, I was appointed to the National Advisory Council on Aging.

[REDACTED] states:

I am a professor of School of Medicine, Tsinghua University which is considered as top 1 university in China by most national and international university rankings. I have . . . published more than 50 papers in peer-reviewed journals. . . . I was also the recipient of several awards from Chinese government. I was also invited reviewer of the international academic journals including *Gene Therapy*, *Journal of Infectious Diseases*, *Nuclear Acids Research*. I was invited to review a grant from Wellcome Trust. I'm now an editor in the Journal of *FEBS Letters*.

Finally, [REDACTED] states:

I was a Sloan Fellow in Neuroscience, a Klingenstein Fellow in Neuroscience, and a recipient of the McKnight Neuroscience of Brain disorders Award and the Pfizer/Pfizer/AFAR Innovations in Aging Research Award. I am currently the Principle Investigator of three grants from the National Institutes of Health (NIH) and two grants from California Institute for Regenerative Medicine. I have served many times to review grants for the National Institutes of Health and National Science Foundation. I am currently a regular member of the SYN study section at NIH (my term will end in 2011).

While the petitioner need not demonstrate that there is no one more accomplished than herself to qualify for the classification sought, it appears that the very top of her field of endeavor is far above the level she has attained. In this case, the petitioner has not established that her achievements at the time of filing were commensurate with sustained national or international acclaim as a research scientist, or being among that small percentage at the very top of the field of endeavor.

### **III. Conclusion**

Review of the record does not establish that the petitioner has distinguished herself to such an extent that she may be said to have achieved sustained national or international acclaim and to be within the small percentage at the very top of her field. The evidence is not persuasive that the petitioner's achievements set her significantly above almost all others in her field at a national or international level. Therefore, the petitioner has not established eligibility pursuant to section 203(b)(1)(A) of the Act and the petition may not be approved.

An application or petition that fails to comply with the technical requirements of the law may be denied by the AAO even if the Service Center does not identify all of the grounds for denial in the initial decision. *See Spencer Enterprises, Inc. v. United States*, 229 F. Supp. 2d at 1043, *aff'd*, 345 F.3d at 683; *see also Soltane v. DOJ*, 381 F.3d at 145 (noting that the AAO conducts appellate review on a *de novo* basis).

The petition will be denied for the above stated reasons, with each considered as an independent and alternative basis for denial. In visa petition proceedings, the burden of proving eligibility for the benefit sought remains entirely with the petitioner. Section 291 of the Act, 8 U.S.C. § 1361. Here, that burden has not been met.

**ORDER:** The appeal is dismissed.
