IN RE:

Petitioner:

[REDACTED]

Beneficiary:

PETITION: Immigrant Petition for Alien Worker as an Alien of Extraordinary Ability Pursuant to Section 203(b)(1)(A) of the Immigration and Nationality Act, 8 U.S.C. § 1153(b)(1)(A)

ON BEHALF OF PETITIONER:

[REDACTED]

INSTRUCTIONS:

This is the decision of the Administrative Appeals Office in your case. All documents have been returned to the office that originally decided your case. Any further inquiry must be made to that office.

Thank you.

  
Perry Rhew

Chief, Administrative Appeals Office

**DISCUSSION:** The Director, Texas Service Center, denied the employment-based immigrant visa petition, which is now before the Administrative Appeals Office (AAO) on appeal. The appeal will be sustained.

The petitioner seeks classification as an “alien of extraordinary ability” in the sciences, pursuant to section 203(b)(1)(A) of the Immigration and Nationality Act (the Act), 8 U.S.C. § 1153(b)(1)(A). The director determined the petitioner had not established the sustained national or international acclaim necessary to qualify for classification as an alien of extraordinary ability. Specifically, the director concluded that the petitioner did not meet any of the ten regulatory criteria at 8 C.F.R. § 204.5(h)(3).

On appeal, counsel argues that the beneficiary meets at least three of the ten regulatory categories of evidence at 8 C.F.R. § 204.5(h)(3). For the reasons discussed below, we are satisfied that the petitioner meets the statutory and regulatory requirements for classification as an alien of extraordinary ability.

## **I. Law**

Section 203(b) of the Act states, in pertinent part, that:

(1) Priority workers. -- Visas shall first be made available . . . to qualified immigrants who are aliens described in any of the following subparagraphs (A) through (C):

(A) Aliens with extraordinary ability. -- An alien is described in this subparagraph if --

(i) the alien has extraordinary ability in the sciences, arts, education, business, or athletics which has been demonstrated by sustained national or international acclaim and whose achievements have been recognized in the field through extensive documentation,

(ii) the alien seeks to enter the United States to continue work in the area of extraordinary ability, and

(iii) the alien’s entry into the United States will substantially benefit prospectively the United States.

U.S. Citizenship and Immigration Services (USCIS) and legacy Immigration and Naturalization Service (INS) have consistently recognized that Congress intended to set a very high standard for individuals seeking immigrant visas as aliens of extraordinary ability. *See* H.R. 723 101<sup>st</sup> Cong., 2d Sess. 59 (1990); 56 Fed. Reg. 60897, 60898-99 (Nov. 29, 1991). The term “extraordinary ability” refers only to those individuals in that small percentage who have risen to the very top of the field of endeavor. *Id.* and 8 C.F.R. § 204.5(h)(2).

The regulation at 8 C.F.R. § 204.5(h)(3) requires that an alien demonstrate his or her sustained acclaim and the recognition of his or her achievements in the field. Such acclaim and achievements must be established either through evidence of a one-time achievement (that is, a major, international recognized award) or through meeting at least three of the following ten criteria.

- (i) Documentation of the alien's receipt of lesser nationally or internationally recognized prizes or awards for excellence in the field of endeavor;
- (ii) Documentation of the alien's membership in associations in the field for which classification is sought, which require outstanding achievements of their members, as judged by recognized national or international experts in their disciplines or fields;
- (iii) Published material about the alien in professional or major trade publications or other major media, relating to the alien's work in the field for which classification is sought. Such evidence shall include the title, date, and author of the material, and any necessary translation;
- (iv) Evidence of the alien's participation, either individually or on a panel, as a judge of the work of others in the same or an allied field of specialization for which classification is sought;
- (v) Evidence of the alien's original scientific, scholarly, artistic, athletic, or business-related contributions of major significance in the field;
- (vi) Evidence of the alien's authorship of scholarly articles in the field, in professional or major trade publications or other major media;
- (vii) Evidence of the display of the alien's work in the field at artistic exhibitions or showcases;
- (viii) Evidence that the alien has performed in a leading or critical role for organizations or establishments that have a distinguished reputation;
- (ix) Evidence that the alien has commanded a high salary or other significantly high remuneration for services, in relation to others in the field; or
- (x) Evidence of commercial successes in the performing arts, as shown by box office receipts or record, cassette, compact disk, or video sales.

In 2010, the U.S. Court of Appeals for the Ninth Circuit (Ninth Circuit) reviewed the denial of a petition filed under this classification. *Kazarian v. USCIS*, 596 F.3d 1115 (9th Cir. March 4, 2010). Although the court upheld the AAO's decision to deny the petition, the court took issue with the

AAO's procedure for evaluating evidence submitted to meet a given evidentiary criterion.<sup>1</sup> With respect to the criteria at 8 C.F.R. § 204.5(h)(3)(iv) and (vi), the court concluded that while USCIS may have raised legitimate concerns about the significance of the evidence submitted to meet those two criteria, those concerns should have been raised in a subsequent "final merits determination." *Id.*

The court stated that the AAO's approach rested on an improper understanding of the regulations. Instead of parsing the significance of evidence as part of the initial inquiry, the court stated that "the proper procedure is to count the types of evidence provided (which the AAO did)," and if the petitioner failed to submit sufficient evidence, "the proper conclusion is that the applicant has failed to satisfy the regulatory requirement of three types of evidence (as the AAO concluded)." *Id.* at 1122 (citing to 8 C.F.R. § 204.5(h)(3)). The court also explained the "final merits determination" as the corollary to this procedure:

If a petitioner has submitted the requisite evidence, USCIS determines whether the evidence demonstrates both a "level of expertise indicating that the individual is one of that small percentage who have risen to the very top of the[ir] field of endeavor," 8 C.F.R. § 204.5(h)(2), and "that the alien has sustained national or international acclaim and that his or her achievements have been recognized in the field of expertise." 8 C.F.R. § 204.5(h)(3). Only aliens whose achievements have garnered "sustained national or international acclaim" are eligible for an "extraordinary ability" visa. 8 U.S.C. § 1153(b)(1)(A)(i).

*Id.* at 1119 - 1120.

Thus, *Kazarian* sets forth a two-part approach where the evidence is first counted and then, if qualifying under three criteria, considered in the context of a final merits determination. In reviewing Service Center decisions, the AAO will apply the test set forth in *Kazarian*. As the AAO maintains *de novo* review, the AAO will conduct a new analysis if the director reached his or her conclusion by using a one-step analysis rather than the two-step analysis dictated by the *Kazarian* court. An application or petition that fails to comply with the technical requirements of the law may be denied by the AAO even if the Service Center does not identify all of the grounds for denial in the initial decision. See *Spencer Enterprises, Inc. v. United States*, 229 F. Supp. 2d 1025, 1043 (E.D. Cal. 2001), *aff'd*, 345 F.3d 683 (9<sup>th</sup> Cir. 2003); see also *Soltane v. DOJ*, 381 F.3d 143, 145 (3d Cir. 2004) (noting that the AAO conducts appellate review on a *de novo* basis).

---

<sup>1</sup> Specifically, the court stated that the AAO had unilaterally imposed novel substantive or evidentiary requirements beyond those set forth in the regulations at 8 C.F.R. § 204.5(h)(3)(iv) and 8 C.F.R. § 204.5(h)(3)(vi).

## II. Analysis and Conclusion

This petition, filed on June 23, 2009, seeks to classify the petitioner as an alien with extraordinary ability as a research scientist.

In his decision, the director concluded that the petitioner did not meet the participation as a judge of the work of others criterion because “peer review is an integral part of the scientific publication process.” The director stated that the petitioner did not establish that he had been “invited on a regular basis to judge the work of others.” Such a determination goes beyond the plain language of the regulation. The record of proceeding contains evidence that the petitioner has reviewed 24 articles for journals in his field. There is also evidence in the record of proceeding that the petitioner has been asked to review additional articles. Further, the record contains letter from [REDACTED] and [REDACTED] stating that the petitioner was asked to review articles due to his expertise in the field, his publication record, and the frequent citation of his work. Therefore, we withdraw the findings of the director for this criterion.

Similarly, as it relates to the authorship of scholarly articles criterion, the director concluded that the petitioner did not meet this criterion because “the evidence has not established [that the citations to the petitioner’s work] are beyond the expectation of a researcher in the petitioner’s field.” Such a determination goes beyond the plain language of the regulation. The record of proceeding contains evidence that the petitioner has authored 9 articles which have been published in professional journals. Such evidence satisfies the plain language of this criterion. We, therefore, also withdraw the findings of the director for this criterion.

Finally, regarding the original contributions of major significance criterion, the petitioner has submitted detailed letters from others in his field describing his original scientific contributions to superconductivity and the field of ultra-cold physics and discussing how the contributions are of major significance in the field. The letters provide specific examples of those contributions and how they have already significantly contributed to the field.

Not all of the petitioner’s evidence carries the weight imputed to it by counsel. Nevertheless, consistent with *Matter of Price*, 20 I&N Dec. 953 (Act. Assoc. Comm’r. 1994), we find the evidence of record, including evidence not discussed above, sufficient to establish that the petitioner has demonstrated his eligibility for the classification sought. Specifically, upon careful review of the record, it is concluded that the petitioner has demonstrated by a preponderance of the evidence that he is within the small percentage of individuals who have risen to the very top of his field. The evidence submitted establishes that the petitioner has sustained national or international acclaim and that his achievements have been recognized in his field. As a result, the petitioner qualifies as an alien of extraordinary ability.

The burden of proof in visa petition proceedings remains entirely with the petitioner. Section 291 of the Act, 8 U.S.C. § 1361. The petitioner has sustained that burden.

**ORDER:** The decision of the director is withdrawn. The appeal is sustained and the petition is approved.
