FILE: [REDACTED] Office: TEXAS SERVICE CENTER Date: FEB 11 2011

IN RE: [REDACTED]

PETITION: Immigrant Petition for Alien Worker as Outstanding Professor or Researcher Pursuant to Section 203(b)(1)(B) of the Immigration and Nationality Act, 8 U.S.C. § 1153(b)(1)(B)

ON BEHALF OF PETITIONER:

[REDACTED]

**INSTRUCTIONS:**

Enclosed please find the decision of the Administrative Appeals Office in your case. All of the documents related to this matter have been returned to the office that originally decided your case. Please be advised that any further inquiry that you might have concerning your case must be made to that office.

Thank you,

A handwritten signature in black ink, appearing to read "Perry Rhew".

Perry Rhew  
Chief, Administrative Appeals Office

**DISCUSSION:** [REDACTED] denied the employment-based immigrant visa petition, which is now before the Administrative Appeals Office on appeal. The appeal will be sustained and the petition will be approved.

The petitioner is a pharmaceutical researcher and manufacturer. It seeks to classify the beneficiary as an outstanding researcher pursuant to section 203(b)(1)(B) of the Immigration and Nationality Act (the Act), 8 U.S.C. § 1153(b)(1)(B). The petitioner seeks to employ the beneficiary permanently in the United States as a Senior Research Biologist. The director determined that the petitioner had not established that the beneficiary had attained the outstanding level of achievement required for classification as an outstanding professor or researcher.

## I. Law

Section 203(b) of the Act states, in pertinent part, that:

(1) Priority workers. -- Visas shall first be made available . . . to qualified immigrants who are aliens described in any of the following subparagraphs (A) through (C):

\* \* \*

(B) Outstanding professors and researchers. -- An alien is described in this subparagraph if --

(i) the alien is recognized internationally as outstanding in a specific academic area,

(ii) the alien has at least 3 years of experience in teaching or research in the academic area, and

(iii) the alien seeks to enter the United States --

(I) for a tenured position (or tenure-track position) within a university or institution of higher education to teach in the academic area,

(II) for a comparable position with a university or institution of higher education to conduct research in the area, or

(III) for a comparable position to conduct research in the area with a department, division, or institute of a private employer, if the department, division, or institute employs at least 3 persons full-time in research activities and has achieved documented accomplishments in an academic field.

The regulation at 8 C.F.R. § 204.5(i)(3) states that a petition for an outstanding professor or researcher must be accompanied by:

(ii) Evidence that the alien has at least three years of experience in teaching and/or research in the academic field. Experience in teaching or research while working on an advanced degree will only be acceptable if the alien has acquired the degree, and if the teaching duties were such that he or she had full responsibility for the class taught or if the research conducted toward the degree has been recognized within the academic field as outstanding. Evidence of teaching and/or research experience shall be in the form of letter(s) from current or former employer(s) and shall include the name, address, and title of the writer, and a specific description of the duties performed by the alien.

This petition was filed on February 4, 2009 to classify the beneficiary as an outstanding researcher in the areas of apoptosis research and cancer biology. Therefore, the petitioner must establish that the beneficiary had at least three years of research experience in the field as of that date, and that the beneficiary's work has been recognized internationally within the field as outstanding.

The regulation at 8 C.F.R. § 204.5(i)(3)(i) states that a petition for an outstanding professor or researcher must be accompanied by "[e]vidence that the professor or researcher is recognized internationally as outstanding in the academic field specified in the petition." The regulation lists the following six criteria, of which the beneficiary must submit evidence qualifying under at least two:

- (A) Documentation of the alien's receipt of major prizes or awards for outstanding achievement in the academic field;
- (B) Documentation of the alien's membership in associations in the academic field which require outstanding achievements of their members;
- (C) Published material in professional publications written by others about the alien's work in the academic field. Such material shall include the title, date, and author of the material, and any necessary translation;
- (D) Evidence of the alien's participation, either individually or on a panel, as the judge of the work of others in the same or an allied academic field;
- (E) Evidence of the alien's original scientific or scholarly research contributions to the academic field; or
- (F) Evidence of the alien's authorship of scholarly books or articles (in scholarly journals with international circulation) in the academic field.

In 2010, the U.S. Court of Appeals for the Ninth Circuit (Ninth Circuit) reviewed the denial of a petition filed under a similar classification set forth at section 203(b)(1)(A) of the Act. *Kazarian v. USCIS*, 596 F.3d 1115 (9th Cir. 2010). Although the court upheld the AAO's decision to deny the petition, the court took issue with the AAO's evaluation of evidence submitted to meet a given evidentiary criterion. With respect to the criteria at 8 C.F.R. § 204.5(h)(3)(iv) and (vi), the court

concluded that while U.S. Citizenship and Immigration Services (USCIS) may have raised legitimate concerns about the significance of the evidence submitted to meet those two criteria, those concerns should have been raised in a subsequent “final merits determination.” *Id.* at 1121-22.

The court stated that the AAO’s evaluation rested on an improper understanding of the regulations.<sup>1</sup> Instead of parsing the significance of evidence as part of the initial inquiry, the court stated that “the proper procedure is to count the types of evidence provided (which the AAO did),” and if the petitioner failed to submit sufficient evidence, “the proper conclusion is that the applicant has failed to satisfy the regulatory requirement of three types of evidence (as the AAO concluded).” *Id.* at 1122 (citing to 8 C.F.R. § 204.5(h)(3)). The court also explained the “final merits determination” as the corollary to this procedure:

If a petitioner has submitted the requisite evidence, USCIS determines whether the evidence demonstrates both a “level of expertise indicating that the individual is one of that small percentage who have risen to the very top of the[ir] field of endeavor,” 8 C.F.R. § 204.5(h)(2), and “that the alien has sustained national or international acclaim and that his or her achievements have been recognized in the field of expertise.” 8 C.F.R. § 204.5(h)(3). Only aliens whose achievements have garnered “sustained national or international acclaim” are eligible for an “extraordinary ability” visa. 8 U.S.C. § 1153(b)(1)(A)(i).

*Id.* at 1119-20.

Thus, *Kazarian* sets forth a two-part approach where the evidence is first counted and then considered in the context of a final merits determination.<sup>2</sup> While involving a different classification than the one at issue in this matter, the similarity of the two classifications makes the court’s reasoning persuasive to the classification sought in this matter. In reviewing Service Center decisions, the AAO will apply the test set forth in *Kazarian*. As the AAO maintains *de novo* review, the AAO will conduct a new analysis if the director reached his or her conclusion by using a one-step analysis rather than the two-step analysis dictated by the *Kazarian* court. *See* 8 C.F.R. 103.3(a)(1)(iv); *Soltane v. DOJ*, 381 F.3d 143, 145 (3d Cir. 2004); *Spencer Enterprises, Inc. v. United States*, 229 F. Supp. 2d 1025, 1043 (E.D. Cal. 2001), *aff’d*, 345 F.3d 683 (9<sup>th</sup> Cir. 2003) (recognizing the AAO’s *de novo* authority).

---

<sup>1</sup> Specifically, the court stated that the AAO had unilaterally imposed novel substantive or evidentiary requirements beyond those set forth in the regulations at 8 C.F.R. § 204.5(h)(3)(iv) (comparable to 8 C.F.R. § 204.5(i)(3)(i)(D)) and 8 C.F.R. § 204.5(h)(3)(vi) (comparable to 8 C.F.R. § 204.5(i)(3)(i)(F)).

<sup>2</sup> The classification at issue in *Kazarian*, section 203(b)(1)(A) of the Act, requires qualifying evidence under three criteria whereas the classification at issue in this matter, section 203(b)(1)(B) of the Act, requires qualifying evidence under only two criteria.

## II. Analysis

### A. Evidentiary Criteria

*Evidence of the alien's original scientific or scholarly research contributions to the academic field.*

The petitioner submitted letters of support from independent experts discussing the significance of the beneficiary's original research contributions. The experts' statements do not merely reiterate the regulatory language of this criterion, they clearly describe how the beneficiary's scientific contributions have impacted the field. Moreover, in support of the experts' statements, the petitioner submitted documentation showing 150 independent cites to her published findings. These citations are solid evidence that other researchers have been influenced by her work and are familiar with it. This evidence corroborates the independent experts' statements that the petitioner has made scientific contributions to the academic field. The record reflects that the beneficiary's contributions are important not only to the institutions where she has worked, but throughout the greater field as well. Leading scientists in the field have acknowledged the value of the beneficiary's work and its contribution to the academic field at large. Accordingly, the petitioner has submitted qualifying evidence that meets the plain language requirements of the regulation at 8 C.F.R. § 204.5(i)(3)(i)(E).

*Evidence of the alien's authorship of scholarly books or articles (in scholarly journals with international circulation) in the academic field.*

The petitioner submitted several articles authored by the beneficiary in scholarly journals with international circulation. Thus, the petitioner has submitted evidence that qualifies under 8 C.F.R. § 204.5(i)(3)(i)(F).

In light of the above, the petitioner has submitted evidence that meets two of the criteria that must be satisfied to establish the minimum eligibility requirements for this classification. Specifically the petitioner submitted evidence to meet the criteria set forth at 8 C.F.R. §§ 204.5(i)(3)(i)(E) and (F). The next step is a final merits determination that considers whether the evidence is consistent with the statutory standard in this matter, international recognition as outstanding. Section 203(b)(1)(B)(i) of the Act.

### B. Final Merits Determination

It is important to note at the outset that the controlling purpose of the regulation is to establish international recognition, and any evidence submitted to meet these criteria must therefore be to some extent indicative of international recognition. More specifically, outstanding professors and researchers should stand apart in the academic community through eminence and distinction based on international recognition. The regulation at issue provides criteria to be used in evaluating whether a professor or researcher is deemed outstanding. *Employment-Based Immigrants*, 56 Fed. Reg. 30703, 30705 (proposed July 5, 1991) (enacted 56 Fed. Reg. 60897 (Nov. 29, 1991)).

In this case, the petitioner has submitted documentation sufficient to demonstrate that the beneficiary stands apart in the academic community through eminence and distinction based on international recognition. The petitioner submitted reference letters from independent experts in the field, detailing the beneficiary's specific contributions and explaining how those contributions have influenced the field. Moreover, the beneficiary's publication record at the time of filing not only meets the criterion at 8 C.F.R. § 204.5(h)(3)(vi), her articles are consistently well cited, with 150 independent cites to her body of work as of the petition's filing date. *See Kazarian*, 596 F.3d at 1121 (citations may be relevant to the final merits determination of whether an alien is at the very top of his field). This citation record is also consistent with a determination that her original research contributions to the field, discussed in the reference letters, are commensurate with international recognition.

In light of the above, our final merits determination reveals that the beneficiary's qualifying evidence does set the beneficiary apart in the academic community through eminence and distinction based on international recognition, the purpose of the regulatory criteria. 56 Fed. Reg. at 30705.

### **III. Conclusion**

Upon careful consideration of the evidence offered with the initial petition and later on appeal, we conclude that the petitioner has satisfactorily established that the beneficiary enjoys international recognition as an outstanding researcher. The petitioner has overcome the objections set forth in the director's notice of denial, and thereby removed every stated obstacle to the approval of the petition.

The record indicates that the beneficiary meets at least two of the six criteria listed at 8 C.F.R. 204.5(i)(3)(i) and that the petitioner has established that the beneficiary qualifies under section 203(b)(1)(B) of the Act as an outstanding researcher.

The burden of proof in these proceedings rests solely with the petitioner. Section 291 of the Act, 8 U.S.C. § 1361. The petitioner has met that burden. Accordingly, the appeal will be sustained and the petition will be approved.

**ORDER:** The appeal is sustained and the petition is approved.
