IN RE: Petitioner:
Beneficiary:

PETITION: Immigrant petition for Alien Worker as a Skilled Worker or Professional pursuant to section 203(b)(3) of the Immigration and Nationality Act, 8 U.S.C. § 1153(b)(3)

ON BEHALF OF PETITIONER:

INSTRUCTIONS:

Enclosed please find the decision of the Administrative Appeals Office in your case. All of the documents related to this matter have been returned to the office that originally decided your case. Please be advised that any further inquiry that you might have concerning your case must be made to that office.

If you believe the law was inappropriately applied by us in reaching our decision, or you have additional information that you wish to have considered, you may file a motion to reconsider or a motion to reopen. The specific requirements for filing such a request can be found at 8 C.F.R. § 103.5. All motions must be submitted to the office that originally decided your case by filing a Form I-290B, Notice of Appeal or Motion, with a fee of \$630. Please be aware that 8 C.F.R. § 103.5(a)(1)(i) requires that any motion must be filed within 30 days of the decision that the motion seeks to reconsider or reopen.

Thank you,

Perry Rhew
Chief, Administrative Appeals Office

DISCUSSION: The Director, Texas Service Center, denied the employment-based immigrant visa petition, which is now before the Administrative Appeals Office (AAO) on appeal. The appeal will be dismissed.

The petitioner is a university-affiliated teaching hospital. It seeks to employ the beneficiary permanently in the United States as a nuclear medicine technologist III. As required by statute, a Form ETA 750,¹ Application for Alien Employment Certification approved by the Department of Labor (the DOL), accompanied the petition. Upon reviewing the petition, the director determined that the petitioner failed to demonstrate that the beneficiary satisfied the minimum level of education stated on the labor certification.

The AAO conducts appellate review on a *de novo* basis. *See Soltane v. DOJ*, 381 F.3d 143, 145 (3d Cir. 2004). The record shows that the appeal is properly filed, timely and makes a specific allegation of error in law or fact. The procedural history in this case is documented by the record and incorporated into the decision. Further elaboration of the procedural history will be made only as necessary. The AAO considers all pertinent evidence in the record, including new evidence properly submitted upon appeal.²

Section 203(b)(3)(A)(i) of the Immigration and Nationality Act (the Act), 8 U.S.C. § 1153(b)(3)(A)(i), provides for the granting of preference classification to qualified immigrants who are capable, at the time of petitioning for classification under this paragraph, of performing skilled labor (requiring at least two years training or experience), not of a temporary nature, for which qualified workers are not available in the United States. Section 203(b)(3)(A)(ii) of the Act, 8 U.S.C. § 1153(b)(3)(A)(ii), also provides for the granting of preference classification to qualified immigrants who hold baccalaureate degrees and are members of the professions.

To be eligible for approval, a beneficiary must have all the education, training, and experience specified on the labor certification as of the petition's priority date. *See Matter of Wing's Tea House*, 16 I&N 158 (Act. Reg. Comm. 1977). The priority date of the petition is December 16, 2004, which is the date the labor certification was accepted for processing by the DOL. *See* 8 C.F.R. § 204.5(d).³ The Immigrant Petition for Alien Worker (Form I-140) was filed on July 27, 2007.

¹ After March 28, 2005, the correct form to apply for labor certification is the ETA Form 9089. *See* 69 Fed. Reg. 77325, 77326 (Dec. 27, 2004).

² The submission of additional evidence on appeal is allowed by the instructions to the Form I-290B, which are incorporated into the regulations at 8 C.F.R. § 103.2(a)(1). The record in the instant case provides no reason to preclude consideration of any of the documents newly submitted on appeal. *See Matter of Soriano*, 19 I&N Dec. 764 (BIA 1988).

³ If the petition is approved, the priority date is also used in conjunction with the Visa Bulletin issued by the Department of State to determine when a beneficiary can apply for adjustment of status or for an immigrant visa abroad. Thus, the importance of reviewing the *bona fides* of a job opportunity as of the priority date is clear.

The job qualifications for the certified position of nuclear medicine technologist III are found on Form ETA 750 Part A. Item 13 describes the job duties to be performed by the beneficiary in summary as applying theoretical knowledge of radiopharmaceutical sciences, perform complex nuclear medicine procedures, and serve as a clinical resource.

The minimum education, training, experience and skills required to perform the duties of the offered position are set forth at Part A of the labor certification and reflects the following requirements:

Block 14:

Education (number of years)

Grade school	Eight years
High school	Four years
College	Four years
College Degree Required	Bachelor's or equivalent
Major Field of Study	Nuclear Medical Technology

Experience:

Job Offered	None indicated
(or)	
Related Occupation	Two years Nuclear Medical Technologist

Block 15:

Other Special Requirements Massachusetts State License in Radiologic Technology

As set forth above, the proffered position requires four years of college a bachelor's degree in nuclear medicine technology or a foreign equivalent degree, two years of experience in a related occupation, nuclear medicine technologist, and a Massachusetts radiologic technologist license.

The Form ETA 750B, signed by the beneficiary, the beneficiary listed her prior education as: two years of study (September 1973 through August 1975) at the Nova Scotia Institute of Technology,

Victoria General Hospital in Halifax, Nova Scotia earning a Diploma. The Form ETA 750B also reflects the beneficiary's experience as follows:

- General duty technologist August 1975 through September 1978
- General duty technologist July 1980 through July 1989
- Senior Technologist July 1989 through April 2002
- Nuclear Medicine Technologist III April 2002 through April 2003
- Lead Technologist May 2003 through February 2004
- Nuclear Medicine Technologist III March 2004 through the present

In support of the beneficiary's educational qualifications, the record contains a copy of the beneficiary's certificate from Victoria General Hospital School of Nuclear Medicine Technology. The certificate indicates that the beneficiary was awarded a certificate in Nuclear Medicine Technician on September 12, 1975. However, the record does not contain a copy of transcripts to substantiate the certificate or to explain the types of courses taken by the beneficiary.

The record also contains a copy of a credentials evaluation which equates the combination of the beneficiary's education and "26 years of professional experience" to a U.S. bachelor's degree in health science.

The director denied the petition on June 2, 2008. The director determined that the beneficiary's experience could not be accepted as a foreign equivalent to a four-year Bachelor's degree in nuclear medicine technology because there was no evidence in the record to demonstrate that the beneficiary has earned a bachelor's degree or a foreign equivalent degree.

On appeal, with regard to the beneficiary's qualifying academic credentials, counsel, submitted a copy of the above noted evaluation and copies of the beneficiary's certificate. Counsel argues that the beneficiary has the equivalent to a bachelor's degree through a combination of education and experience and that the term "equivalent" in the Form ETA 750 was meant to indicate that the job was open to applicants without bachelor's degrees.

The occupational classification of the offered position is not one of the occupations statutorily defined as a profession at section 101(a)(32) of the Act, which states: "The term 'profession' shall include but not be limited to architects, engineers, lawyers, physicians, surgeons, and teachers in elementary or secondary schools, colleges, academies, or seminaries."

Part A of the Form ETA 750 indicates that the DOL assigned the occupational code of 078.361-018 and title nuclear medicine technologist, to the proffered position. The DOL's occupational codes are assigned based on normalized occupational standards. The occupational classification of the offered position is determined by the DOL (or applicable State Workforce Agency) during the labor certification process, and the applicable occupational classification code is noted on the labor certification form. O*NET is the current occupational classification system used by the DOL. Located online at <http://online.onetcenter.org>, O*NET is described as "the nation's

primary source of occupational information, providing comprehensive information on key attributes and characteristics of workers and occupations." O*NET incorporates the Standard Occupational Classification (SOC) system, which is designed to cover all occupations in the United States.⁴ The O*NET online database states that this occupation falls within Job Zone Three.⁵

According to the DOL, one or two years of training involving both on-the-job experience and informal training with experienced workers are needed for Job Zone 3 occupations. The DOL assigns a standard vocational preparation (SVP) of 6 to Job Zone 3 occupations, which means "[m]ost occupations in this zone require training in vocational schools, related on-the-job experience, or an associate's degree. Some may require a bachelor's degree." See <http://online.onetcenter.org/link/summary/> (accessed July 12, 2011). Additionally, the DOL states the following concerning the training and overall experience required for Job Zone 3 occupations:

Previous work-related skill, knowledge, or experience is required for these occupations. For example, an electrician must have completed three or four years of apprenticeship or several years of vocational training, and often must have passed a licensing exam, in order to perform the job.

See id. Because of the requirements of the proffered position and the DOL's standard occupational requirements, the proffered position is for a skilled worker, but might also be considered under the professional category.

The regulation at 8 C.F.R. § 204.5(l)(3)(ii)(C) states the following:

If the petition is for a professional, the petition must be accompanied by evidence that the alien holds a United States baccalaureate degree or a foreign equivalent degree and by evidence that the alien is a member of the professions. Evidence of a baccalaureate degree shall be in the form of an official college or university record showing the date the baccalaureate degree was awarded and the area of concentration of study. To show that the alien is a member of the professions, the petitioner must submit evidence that the minimum of a baccalaureate degree is required for entry into the occupation.

⁴See <http://www.bls.gov/soc/socguide.htm>. Prior to O*NET, the DOL used the Dictionary of Occupational Titles (DOT) occupational classification system. The O*NET website contains a crosswalk that translates DOT codes into SOC codes. See <http://online.onetcenter.org/crosswalk/DOT>. Here, the DOL assigned the offered position the DOT code 078.361-018. Using the O*NET crosswalk, this translates to SOC code 29-2033.00.

⁵According to O*NET, most of the occupations in Job Zone Three requires training in a vocational school, related on-the-job experience, or an associate's degree. <http://online.onetcenter.org/help/online/zones> (accessed July 12, 2011).

The above regulation uses a singular description of foreign equivalent degree. Thus, the plain meaning of the regulatory language concerning the professional classification sets forth the requirement that a beneficiary must produce one degree that is determined to be the foreign equivalent of a U.S. baccalaureate degree in order to be qualified as a professional for third preference visa category purposes.

The regulation at 8 C.F.R. 204(5)(1)(3)(ii)(B) states the following:

If the petition is for a skilled worker, the petition must be accompanied by evidence that the alien meets the educational, training or experience, and any other requirements of the individual labor certification, meets the requirements for Schedule A designation, or meets the requirements for the Labor Market Information Pilot Program occupation designation. The minimum requirements for this classification are at least two years of training or experience.

The above regulation requires that the alien meet the requirements of the labor certification.

Because the petition's proffered position qualifies for consideration under both the professional and skilled worker categories, the AAO will apply the regulatory requirements from both provisions to the facts of the case at hand, beginning with the professional category.

Initially, however, we will provide an explanation of the general process of procuring an employment-based immigrant visa and the roles and respective authority of both agencies involved.

As noted above, the Form ETA 750 in this matter is certified by the DOL. Thus, at the outset, it is useful to discuss the DOL's role in this process. Section 212(a)(5)(A)(i) of the Act provides:

In general.-Any alien who seeks to enter the United States for the purpose of performing skilled or unskilled labor is inadmissible, unless the Secretary of Labor has determined and certified to the Secretary of State and the Attorney General that-

(I) there are not sufficient workers who are able, willing, qualified (or equally qualified in the case of an alien described in clause (ii)) and available at the time of application for a visa and admission to the United States and at the place where the alien is to perform such skilled or unskilled labor, and

(II) the employment of such alien will not adversely affect the wages and working conditions of workers in the United States similarly employed.

It is significant that none of the above inquiries assigned to the DOL, or the remaining regulations implementing these duties under 20 C.F.R. § 656, involve a determination as to whether the position and the alien are qualified for a specific immigrant classification. This fact has not gone unnoticed by Federal Circuit Courts.

There is no doubt that the authority to make preference classification decisions rests with INS. The language of section 204 cannot be read otherwise. See *Castaneda-Gonzalez v. INS*, 564 F.2d 417, 429 (D.C. Cir. 1977). In turn, DOL has the authority to make the two determinations listed in section 212(a)(14).⁶ *Id.* at 423. The necessary result of these two grants of authority is that section 212(a)(14) determinations are not subject to review by INS absent fraud or willful misrepresentation, but all matters relating to preference classification eligibility not expressly delegated to DOL remain within INS' authority.

* * *

Given the language of the Act, the totality of the legislative history, and the agencies' own interpretations of their duties under the Act, we must conclude that Congress did not intend DOL to have primary authority to make any determinations other than the two stated in section 212(a)(14). If DOL is to analyze alien qualifications, it is for the purpose of "matching" them with those of corresponding United States workers so that it will then be "in a position to meet the requirement of the law," namely the section 212(a)(14) determinations.

Madany v. Smith, 696 F.2d 1008, 1012-1013 (D.C. Cir. 1983).

Relying in part on *Madany*, 696 F.2d at 1008, the Ninth circuit stated:

[I]t appears that the DOL is responsible only for determining the availability of suitable American workers for a job and the impact of alien employment upon the domestic labor market. It does not appear that the DOL's role extends to determining if the alien is qualified for the job for which he seeks sixth preference status. That determination appears to be delegated to the INS under section 204(b), 8 U.S.C. § 1154(b), as one of the determinations incident to the INS's decision whether the alien is entitled to sixth preference status.

K.R.K. Irvine, Inc. v. Landon, 699 F.2d 1006, 1008 (9th Cir. 1983). The court relied on an amicus brief from the DOL that stated the following:

The labor certification made by the Secretary of Labor ... pursuant to section 212(a)(14) of the ... [Act] ... is binding as to the findings of whether there are able, willing, qualified, and available United States workers for the job offered to the alien, and whether employment of the alien under the terms set by the employer would adversely affect the wages and working conditions of similarly employed United States workers. *The labor certification in no way indicates that the alien offered the certified job opportunity is qualified (or not qualified) to perform the duties of that job.*

⁶ Based on revisions to the Act, the current citation is section 212(a)(5)(A) as set forth above.

(Emphasis added.) *Id.* at 1009. The Ninth Circuit, citing *K.R.K. Irvine, Inc.*, 699 F.2d at 1006, revisited this issue, stating:

The Department of Labor (“DOL”) must certify that insufficient domestic workers are available to perform the job and that the alien’s performance of the job will not adversely affect the wages and working conditions of similarly employed domestic workers. *Id.* § 212(a)(14), 8 U.S.C. § 1182(a)(14). The INS then makes its own determination of the alien’s entitlement to sixth preference status. *Id.* § 204(b), 8 U.S.C. § 1154(b). See generally *K.R.K. Irvine, Inc. v. Landon*, 699 F.2d 1006, 1008 9th Cir.1983).

The INS, therefore, may make a de novo determination of whether the alien is in fact qualified to fill the certified job offer.

Tongatapu Woodcraft Hawaii, Ltd. v. Feldman, 736 F. 2d 1305, 1309 (9th Cir. 1984).

Therefore, it is the DOL’s responsibility to certify the terms of the labor certification, but it is the responsibility of United States Citizenship and Immigration Services (USCIS) to determine if the petition and the alien beneficiary are eligible for the classification sought. For classification as a member of the professions, the regulation at 8 C.F.R. § 204.5(l)(3)(ii)(C) requires that the alien had a U.S. baccalaureate degree or a foreign equivalent degree and be a member of the professions. Additionally, the regulation requires the submission of “an official *college or university* record showing the date the baccalaureate degree was awarded and the area of concentration of study.” (Emphasis added.)

In 1991, when the final rule for 8 C.F.R. § 204.5 was published in the Federal Register, the Immigration and Naturalization Service (the Service), responded to criticism that the regulation required an alien to have a bachelor’s degree as a minimum and that the regulation did not allow for the substitution of experience for education. After reviewing section 121 of the Immigration Act of 1990, Pub. L. 101-649 (1990), and the Joint Explanatory Statement of the Committee of Conference, the Service specifically noted that both the Act and the legislative history indicate that an alien must have at least a bachelor’s degree: “[B]oth the Act and its legislative history make clear that, in order to qualify as a professional under the third classification or to have experience equating to an advanced degree under the second, *an alien must have at least a bachelor’s degree.*” 56 Fed. Reg. 60897, 60900 (November 29, 1991)(emphasis added).

Moreover, it is significant that both the statute, section 203(b)(3)(A)(ii) of the Act, and relevant regulations use the word “degree” in relation to professionals. A statute should be construed under the assumption that Congress intended it to have purpose and meaningful effect. *Mountain States Tel. & Tel. v. Pueblo of Santa Ana*, 472 U.S. 237, 249 (1985); *Sutton v. United States*, 819 F.2d. 1289m 1295 (5th Cir. 1987). It can be presumed that Congress’ narrow requirement in of a “degree” for members of the professions is deliberate. Significantly, in another context, Congress has broadly referenced “the possession of a degree, diploma, certificate, or similar award from a college, university, school, or other institution of learning.” Section 203(b)(2)(C) (relating to aliens of exceptional ability). Thus, the requirement at section

203(b)(3)(A)(ii) that an eligible alien both have a baccalaureate “degree” and be a member of the professions reveals that a member of the professions must have a *degree* and that a diploma or certificate from an institution of learning other than a college or university is a potentially similar but distinct type of credential. Thus, even if we did not require “a” degree that is the foreign equivalent of a U.S. baccalaureate degree, we would not consider education earned at an institution other than a college or university.

The petitioner in this matter relies on the beneficiary’s combined education and work experience to reach the “equivalent” of a degree, which is not a bachelor’s degree based on a single degree in the required field listed on the certified labor certification.

There is no provision in the statute or the regulations that would allow a beneficiary to qualify under section 203(b)(3)(A)(ii) of the Act with anything less than a full baccalaureate degree. More specifically, a three-year bachelor’s degree will not be considered to be the “foreign equivalent degree” to a United States baccalaureate degree. A United States baccalaureate degree is generally found to require four years of education. *Matter of Shah*, 17 I&N Dec. 244 (Reg. Comm. 1977). Where the analysis of the beneficiary’s credentials relies on work experience alone or a combination of multiple lesser degrees, the result is the “equivalent” of a bachelor’s degree rather than a single-source “foreign equivalent degree.” In order to have experience and education equating to a bachelor’s degree under section 203(b)(3)(A)(ii) of the Act, the beneficiary must have a single degree that is the “foreign equivalent degree” to a United States baccalaureate degree.

Because the beneficiary does not have a “United States baccalaureate degree or a foreign equivalent degree,” from a college or university in the required field of study listed on the certified labor certification, the beneficiary does not qualify for preference visa classification under section 203(b)(3)(A)(ii) of the Act as she does not have the minimum level of education required for the equivalent of a bachelor’s degree.

We are cognizant of the recent decision in *Grace Korean United Methodist Church v. Michael Chertoff*, 437 F. Supp. 2d 1174 (D. Or. 2005), which finds that USCIS “does not have the authority or expertise to impose its strained definition of ‘B.A. or equivalent’ on that term as set forth in the labor certification.” Although the reasoning underlying a district judge’s decision will be given due consideration when it is properly before the AAO, the analysis does not have to be followed as a matter of law. *See Matter of K-S-*, 20 I&N Dec. 715, 719 (BIA 1993). The court in *Grace Korean* makes no attempt to distinguish its holding from the Circuit Court decisions cited above. Instead, as legal support for its determination, the court cited to a case holding that the United States Postal Service has no expertise or special competence in immigration matters. *Grace Korean United Methodist Church*, 437 F. Supp. 2d at 1179 (citing *Tovar v. U.S. Postal Service*, 3 F.3d 1271, 1276 (9th Cir. 1993)). On its face, *Tovar* is easily distinguishable from the present matter since USCIS, through the authority delegated by the Secretary of Homeland Security, is charged by statute with the enforcement of the United States immigration laws and not with the delivery of mail. *See* section 103(a) of the Act, 8 U.S.C. § 1103(a).

Additionally, we also note the recent decision in *Snapnames.com, Inc. v. Michael Chertoff*, 2006 WL 3491005 (D. Or. Nov. 30, 2006). In that case, the labor certification application specified an educational requirement of four years of college and a ‘B.S. or foreign equivalent.’ The district court determined that ‘B.S. or foreign equivalent’ relates solely to the alien’s educational background, precluding consideration of the alien’s combined education and work experience. *Snapnames.com, Inc.* at 11-13. Additionally, the court determined that the word ‘equivalent’ in the employer’s educational requirements was ambiguous and that in the context of skilled worker petitions (where there is no statutory educational requirement), deference must be given to the employer’s intent. *Snapnames.com, Inc.* at 14. However, in professional and advanced degree professional cases, where the beneficiary is statutorily required to hold a baccalaureate degree, the USCIS properly concluded that a single foreign degree or its equivalent is required. *Snapnames.com, Inc.* at 17, 19.

In the instant case, unlike the labor certification in *Snapnames.com, Inc.*, the petitioner’s intent regarding educational equivalence is clearly stated on the Form ETA 750 and does not include a specific alternative to a bachelor’s degree in nuclear medicine technology from an accredited institution. The court in *Snapnames.com, Inc.* recognized that even though the labor certification may be prepared with the alien in mind, USCIS has an independent role in determining whether the alien meets the labor certification requirements. *Id.* at 7. Thus, the court concluded that where the plain language of those requirements does not support the petitioner’s asserted intent, USCIS “does not err in applying the requirements as written.” *Id.* See also *Maramjaya v. USCIS*, Civ. Act No. 06-2158 (RCL) (D.C. Cir. March 26, 2008) (upholding an interpretation that a “bachelor’s or equivalent” requirement necessitated a single four-year degree). In this matter, the Form ETA 750 does not specify an equivalency to the requirement of four years of college in nuclear medicine technology from an accredited institution. Furthermore, the certificate issued by Victoria General Hospital does not specify the courses taken by the beneficiary or the length of time it took for the beneficiary to obtain such a credential. There is no evidence in the record to demonstrate that the hospital’s school of nuclear medicine technology is a recognized university or college.

Where the job requirements in a labor certification are not otherwise unambiguously prescribed, e.g., by professional regulation, USCIS must examine “the language of the labor certification job requirements” in order to determine what the petitioner must demonstrate about the beneficiary’s qualifications. *Madany*, 696 F.2d at 1015. The only rational manner by which USCIS can be expected to interpret the meaning of terms used to describe the requirements of a job in a labor certification is to “examine the certified job offer *exactly* as it is completed by the prospective employer.” *Rosedale Linden Park Company v. Smith*, 595 F. Supp. 829, 833 (D.D.C. 1984)(emphasis added). USCIS’s interpretation of the job’s requirements, as stated on the labor certification must involve “reading and applying *the plain language* of the [labor certification application form].” *Id.* at 834 (emphasis added). USCIS cannot and should not reasonably be expected to look beyond the plain language of the labor certification that the DOL has formally issued or otherwise attempt to divine the employer’s intentions through some sort of reverse engineering of the labor certification.

Further, the employer’s subjective intent may not be dispositive of the meaning of the actual minimum requirements of the proffered position. *Maramjaya v. USCIS*, Civ. Act. No. 06-2158, 14

n. 7. Thus, USCIS agrees that the best evidence of the petitioner's intent concerning the actual minimum educational requirements of the proffered position is evidence of how it expressed those requirements to the DOL during the labor certification process and not afterwards to USCIS. The timing of such evidence is needed to ensure inflation of those requirements is not occurring in an effort to fit the beneficiary's credentials into requirements that do not seem on their face to include what the beneficiary has.

To determine whether a beneficiary is eligible for a preference immigrant visa, USCIS must ascertain whether the alien is, in fact, qualified for the certified job. USCIS will not accept a degree equivalency or an unrelated degree when a labor certification plainly and expressly requires a candidate with a specific degree. In evaluating the beneficiary's qualifications, USCIS must look to the job offer portion of the labor certification to determine the required qualifications for the position. USCIS may not ignore a term of the labor certification, nor may it impose additional requirements. *See Matter of Silver Dragon Chinese Restaurant*, 19 I&N Dec. 401, 406 (Comm. 1986). *See also, Madany*, 696 F.2d at 1008; *K.R.K. Irvine, Inc.*, 699 F.2d at 1006; *Stewart Infra-Red Commissary of Massachusetts, Inc. v. Coomey*, 661 F.2d 1 (1st Cir. 1981).

The Form ETA 750 does not provide that the minimum academic requirements of a four-year college degree might be met through some other formula other than that explicitly stated on the Form ETA 750. The copies of the notice(s) of Internet and newspaper advertisements and recruitment also fail to advise the DOL or any otherwise qualified U.S. workers that the educational requirements for the job may be met through a quantitatively lesser degree or defined equivalency. The advertisements state simply "Bach or equiv in Nuclear Medicine Technology."⁷ Thus, the alien does not qualify as a skilled worker as she does not meet the

⁷ The DOL has provided the following field guidance for interpreting labor certification requirements: when the labor certification indicates, for example, that a "bachelor's degree in computer science" is required, and the beneficiary has a four-year bachelor's degree in computer science from the University of Florence, "there is no requirement that the employer include 'or equivalent' after the degree requirement" on the Form ETA 750 or in its advertisement and recruitment efforts. *See* Memo. from Anna C. Hall, Acting Regl. Adminstr., U.S. Dep't. of Labor's Empl. & Training Administration, to SESA and JTPA Adminstrs., U.S. Dep't. of Labor's Empl. & Training Administration, Interpretation of "Equivalent Degree," 2 (June 13, 1994). Further, where the Form ETA 750 indicates that a "U.S. bachelor's degree or the equivalent" may qualify an applicant for a position, where no specific terms are set out on the Form ETA 750 or in the employer's recruitment efforts to define the term "equivalent," **"we understand [equivalent] to mean the employer is willing to accept an equivalent foreign degree."**

Where the Form ETA 750 indicates, for example, that work experience or a certain combination of lesser diplomas or degrees may be substituted for a bachelor's degree, "the employer must specifically state on the ETA 750, Part A as well as throughout all phases of recruitment exactly what will be considered equivalent or alternative [to the degree] in order to qualify for the job."

terms of the labor certification as explicitly expressed or as extrapolated from the evidence of its intent about those requirements during the labor certification process.

Finally, it is noted that the record does not contain any evidence establishing that the beneficiary holds a current Massachusetts State License in Radiologic Technology. Going on record without supporting documentary evidence is not sufficient for purposes of meeting the burden of proof in these proceedings. *Matter of Soffici*, 22 I&N Dec. 158, 165 (Comm'r 1998) (citing *Matter of Treasure Craft of California*, 14 I&N Dec. 190 (Reg'l Comm'r 1972)). Furthermore, according to the publicly available license database of the Massachusetts Department of Health and Human Services, the beneficiary's radiologic technology license expired on February 28, 2011. Therefore, it has not been established that the beneficiary is qualified for the proffered position for this additional reason. An application or petition that fails to comply with the technical requirements of the law may be denied by the AAO even if the Service Center does not identify all of the grounds for denial in the initial decision. *See Spencer Enterprises, Inc. v. United States*, 229 F. Supp. 2d 1025, 1043 (E.D. Cal. 2001), *aff'd*, 345 F.3d 683 (9th Cir. 2003); *see also Soltane v. DOJ*, 381 F.3d 143, 145 (3d Cir. 2004) (noting that the AAO conducts appellate review on a *de novo* basis).

The beneficiary does not have a United States baccalaureate degree or a foreign equivalent degree, and fails to meet the requirements of the labor certification, and, thus, does not qualify for preference visa classification under section 203(b)(3) of the Act.

The burden of proof in these proceedings rests solely with the petitioner. Section 291 of the Act, 8 U.S.C. § 1361. The petitioner has not met that burden.

ORDER: The appeal is dismissed.

Training Administration, to SESA and JTPA Adminstrs., U.S. Dep't. of Labor's Empl. & Training Administration, Interpretation of "Equivalent Degree," 2 (June 13, 1994). State Employment Security Agencies (SESAs) should "request the employer provide the specifics of what is meant when the word 'equivalent' is used." [REDACTED]

[REDACTED] Finally, the DOL's certification of job requirements stating that "a certain amount and kind of experience is the equivalent of a college degree does in no way bind [USCIS] to accept the employer's definition." *Id.* To our knowledge, the field guidance memoranda referred to here have not been rescinded.
