IN RE: Petitioner:  
Beneficiary:

PETITION: Petition for a Nonimmigrant Worker Pursuant to Section 101(a)(15)(H)(i)(b) of the  
Immigration and Nationality Act, 8 U.S.C. § 1101(a)(15)(H)(i)(b)

ON BEHALF OF PETITIONER:

INSTRUCTIONS:

This is the decision of the Administrative Appeals Office in your case. All documents have been returned to the office that originally decided your case. Any further inquiry must be made to that office.

Robert P. Wiemann, Director  
Administrative Appeals Office

**DISCUSSION:** The service center director denied the nonimmigrant visa petition and the matter is now before the Administrative Appeals Office (AAO) on appeal. The appeal will be dismissed. The petition will be denied.

The petitioner is a seller and repairer of string instruments and related products that seeks to employ the beneficiary as a violin repairer. The petitioner endeavors to classify the beneficiary as a nonimmigrant worker in a specialty occupation pursuant to section 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act (the Act), 8 U.S.C. § 1101(a)(15)(H)(i)(b).

The director denied the petition because the proffered position does not qualify as a specialty occupation. On appeal, counsel submits a brief stating that the offered position qualifies as a specialty occupation.

The issue to be discussed in this proceeding is whether the proffered position qualifies as a specialty occupation.

Section 101(a)(15)(H)(i)(b) of the Act, 8 U.S.C. § 1101(a)(15)(H)(i)(b), provides, in part, for the classification of qualified nonimmigrant aliens who are coming temporarily to the United States to perform services in a specialty occupation.

Section 214(i)(1) of the Act, 8 U.S.C. § 1184(i)(1), defines the term "specialty occupation" as an occupation that requires:

- (A) theoretical and practical application of a body of highly specialized knowledge, and
- (B) attainment of a bachelor's or higher degree in the specific specialty (or its equivalent) as a minimum for entry into the occupation in the United States.

The term "specialty occupation" is further defined at 8 C.F.R. § 214.2(h)(4)(ii) as:

[A]n occupation which requires theoretical and practical application of a body of highly specialized knowledge in fields of human endeavor including, but not limited to, architecture, engineering, mathematics, physical sciences, social sciences, medicine and health, education, business specialties, accounting, law, theology, and the arts, and which requires the attainment of a bachelor's degree or higher in a specific specialty, or its equivalent, as a minimum for entry into the occupation in the United States.

Pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(A), to qualify as a specialty occupation, the position must meet one of the following criteria:

- (1) A baccalaureate or higher degree or its equivalent is normally the minimum requirement for entry into the particular position;
- (2) The degree requirement is common to the industry in parallel positions among similar organizations or, in the alternative, an employer may show that its particular position is so complex or unique that it can be performed only by an individual with a degree;

- (3) The employer normally requires a degree or its equivalent for the position; or
- (4) The nature of the specific duties are so specialized and complex that knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

Citizenship and Immigration Services (CIS) interprets the term “degree” in the criteria at 8 C.F.R. § 214.2(h)(4)(iii)(A) to mean not just any baccalaureate or higher degree, but one in a specific specialty that is directly related to the proffered position.

The record of proceeding before the AAO contains: (1) the Form I-129 and supporting documentation; (2) the director’s request for additional evidence; (3) the petitioner’s response to the director’s request; (4) the director’s denial letter; and (5) the Form I-290B with supporting documentation. The AAO reviewed the record in its entirety before issuing its decision.

The petitioner is seeking the beneficiary’s services as a violin repairer. Evidence of the beneficiary’s duties was set forth in the Form I-129 petition and in response to the director’s request for evidence. According to this evidence the beneficiary would:

- Craft new violins, violas and cellos and make parts for these string instruments;
- Repair and restore musical instruments in the violin family as well as make acoustical adjustments as needed; and
- Teach and act as Director of Musical Instruction.

The petitioner requires a minimum of a bachelor’s degree in violin performance, violin making/restoration, string instrument technology or a related field for entry into the proffered position.

Upon review of the record, the petitioner has failed to establish that a baccalaureate or higher degree or its equivalent is normally the minimum requirement for entry into the offered position, or that a degree requirement is common to the industry in parallel positions among similar organizations, as asserted by the petitioner. Factors often considered by CIS when determining these criteria include: whether the Department of Labor’s *Occupational Outlook Handbook (Handbook)* reports that the industry requires a degree; whether an industry professional association has made a degree a minimum entry requirement; and whether letters or affidavits from firms or individuals in the industry attest that such firms “routinely employ and recruit only degreed individuals.” *See Shanti, Inc. v. Reno*, 36 F. Supp. 2d 1151, 1165 (D. Minn. 1999) (quoting *Hird/Blaker Corp. v. Sava*, 712 F. Supp. 1095, 1102 (S.D.N.Y. 1989)).

The AAO routinely consults the *Handbook* for information about the duties and educational requirements of particular occupations. The duties of the proffered position appear to fall within those noted for precision instrument and equipment repairers, with some additional duties as a music teacher. The *Handbook* notes that for musical instrument repairers and tuners, employers prefer post-high school training in music repair

technology. A few technical schools and colleges offer courses in instrument repair, and correspondence courses also are common. Graduates of these programs normally receive additional training on the job, working with an experienced repairer. A few musical instrument repairers and tuners begin learning their trade on the job as assistants or apprentices. Trainees perform a variety of tasks around the shop. Full qualification usually requires two – five years of training and practice.

That portion of the position's duties pertaining to teaching music are detailed in the *Handbook* under the heading of "musicians, singers, and related workers." The *Handbook* notes that a master's or doctoral degree is usually required to teach advanced music courses in colleges and universities, but that a bachelor's degree may be sufficient to teach basic courses. A degree in music education qualifies graduates for a State certificate to teach music in public elementary or secondary schools. Musicians who do not meet public school music education requirements may teach in private schools, conservatories, recreation associations or instruct students in private sessions. Thus, it is apparent that a minimum of a bachelor's degree is not the norm for private music instruction. The petitioner has not established that a baccalaureate or higher degree or its equivalent is normally the minimum requirement for entry into the proffered position. It is, therefore, apparent that a bachelor's degree in a specific specialty is not required for entry into the position. The petitioner has failed to establish the first criterion of 8 C.F.R. § 214.2(h)(4)(iii)(A).

The petitioner has also failed to establish that a degree requirement, in a specific specialty, is common to the industry in parallel positions among similar organizations. In support of this criterion, the petitioner presented two job advertisements. Neither advertisement, however, required a degree to perform the duties of the advertised position. The petitioner has failed to establish the referenced criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A)(2).

The petitioner does not state that it normally requires a degree for the proffered position, and offers no evidence in this regard. The petitioner has failed to establish the criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A)(3).

Finally, the duties to be performed by the beneficiary are not so specialized or complex that knowledge required to perform them is usually associated with the attainment of a baccalaureate or higher degree in a specific specialty. Nor are the duties so complex or unique that they can be performed only by an individual with a degree in a specific specialty. The duties are routine in the industry for private music teachers and violin repairers. The petitioner has failed to establish the referenced criteria at 8 C.F.R. §§ 214.2(h)(4)(iii)(A)(2) or (4).

As related in the discussion above, the petitioner has failed to establish that the proffered position is a specialty occupation. Accordingly, the AAO shall not disturb the director's denial of the petition.

The burden of proof in these proceedings rests solely with the petitioner. Section 291 of the Act, 8 U.S.C. § 1361. The petitioner has failed to sustain that burden and the appeal shall accordingly be dismissed.

**ORDER:** The appeal is dismissed. The petition is denied.
