IN RE: Petitioner: [Redacted]  
Beneficiary: [Redacted]

PETITION: Petition for a Nonimmigrant Worker Pursuant to Section 101(a)(15)(H)(i)(b) of the  
Immigration and Nationality Act, 8 U.S.C. § 1101(a)(15)(H)(i)(b)

ON BEHALF OF PETITIONER:

INSTRUCTIONS:

This is the decision of the Administrative Appeals Office in your case. All documents have been returned to the office that originally decided your case. Any further inquiry must be made to that office.

Robert P. Wiemann, Chief  
Administrative Appeals Office

**DISCUSSION:** The service center director denied the nonimmigrant visa petition and the matter is now before the Administrative Appeals Office (AAO) on appeal. The appeal will be sustained. The petition will be approved.

The petitioner is an international food production firm. It seeks to employ the beneficiary as an industrial production manager and endeavors to classify her as a nonimmigrant worker in a specialty occupation pursuant to section 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act (the Act), 8 U.S.C. § 1101(a)(15)(H)(i)(b).

The director denied the petition stating that the beneficiary is not qualified to perform the duties of the proffered position. On appeal, counsel submits a brief asserting that the beneficiary is qualified to perform the duties of a specialty occupation.

The issue to be discussed in this proceeding is whether the beneficiary is qualified to perform the duties of a specialty occupation.

Section 101(a)(15)(H)(i)(b) of the Act, 8 U.S.C. § 1101(a)(15)(H)(i)(b), provides, in part, for the classification of qualified nonimmigrant aliens who are coming temporarily to the United States to perform services in a specialty occupation.

Section 214(i)(1) of the Act, 8 U.S.C. § 1184(i)(1), defines the term "specialty occupation" as an occupation that requires:

- (A) theoretical and practical application of a body of highly specialized knowledge, and
- (B) attainment of a bachelor's or higher degree in the specific specialty (or its equivalent) as a minimum for entry into the occupation in the United States.

The term "specialty occupation" is further defined at 8 C.F.R. § 214.2(h)(4)(ii) as:

[A]n occupation which requires theoretical and practical application of a body of highly specialized knowledge in fields of human endeavor including, but not limited to, architecture, engineering, mathematics, physical sciences, social sciences, medicine and health, education, business specialties, accounting, law, theology, and the arts, and which requires the attainment of a bachelor's degree or higher in a specific specialty, or its equivalent, as a minimum for entry into the occupation in the United States.

Pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(A), to qualify as a specialty occupation, the position must meet one of the following criteria:

- (1) A baccalaureate or higher degree or its equivalent is normally the minimum requirement for entry into the particular position;
- (2) The degree requirement is common to the industry in parallel positions among similar organizations or, in the alternative, an employer may show that its particular position is so complex or unique that it can be performed only by an individual with a degree;

- (3) The employer normally requires a degree or its equivalent for the position; or
- (4) The nature of the specific duties are so specialized and complex that knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

Citizenship and Immigration Services (CIS) interprets the term "degree" in the criteria at 8 C.F.R. § 214.2(h)(4)(iii)(A) to mean not just any baccalaureate or higher degree, but one in a specific specialty that is directly related to the proffered position.

Section 214(i)(2) of the Act, 8 U.S.C. § 1184(i)(2), states that an alien applying for classification as an H-1B nonimmigrant worker must possess:

- (A) full state licensure to practice in the occupation, if such licensure is required to practice in the occupation,
- (B) completion of the degree described in paragraph (1)(B) for the occupation, or
- (C) (i) experience in the specialty equivalent to the completion of such degree, and  
(ii) recognition of expertise in the specialty through progressively responsible positions relating to the specialty

Pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(C), to qualify to perform services in a specialty occupation, the alien must meet one of the following criteria:

- (1) Hold a United States baccalaureate or higher degree required by the specialty occupation from an accredited college or university;
- (2) Hold a foreign degree determined to be equivalent to a United States baccalaureate or higher degree required by the specialty occupation from an accredited college or university;
- (3) Hold an unrestricted State license, registration or certification which authorizes him or her to fully practice the specialty occupation and be immediately engaged in that specialty in the state of intended employment; or
- (4) Have education, specialized training, and/or progressively responsible experience that is equivalent to completion of a United States baccalaureate or higher degree in the specialty occupation, and have recognition of expertise in the specialty through progressively responsible positions directly related to the specialty.

Pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(D), for purposes of paragraph (h)(4)(iii)(C)(4) of this section, equivalence to completion of a United States baccalaureate or higher degree shall mean achievement of a level of knowledge, competence, and practice in the specialty occupation that has been determined to be equal

to that of an individual who has a baccalaureate or higher degree in the specialty and shall be determined by one or more of the following:

- (1) An evaluation from an official who has authority to grant college-level credit for training and/or experience in the specialty at an accredited college or university which has a program for granting such credit based on an individual's training and/or work experience;
- (2) The results of recognized college-level equivalency examinations or special credit programs, such as the College Level Examination Program (CLEP), or Program on Noncollegiate Sponsored Instruction (PONSI);
- (3) An evaluation of education by a reliable credentials evaluation service which specializes in evaluating foreign educational credentials;
- (4) Evidence of certification or registration from a nationally-recognized professional association or society for the specialty that is known to grant certification or registration to persons in the occupational specialty who have achieved a certain level of competence in the specialty;
- (5) A determination by the Service that the equivalent of the degree required by the specialty occupation has been acquired through a combination of education, specialized training, and/or work experience in areas related to the specialty and that the alien has achieved recognition of expertise in the specialty occupation as a result of such training and experience.

The director noted in his decision that it appeared that the proffered position qualified as a specialty occupation. The sole grounds for denial of the petition is that the beneficiary is not qualified to perform the duties of the offered position. Thus, the only issue to be determined in this instance is whether the beneficiary is qualified to perform the duties of the offered specialty occupation.

The duties of the offered position are those of an industrial production manager. The U.S. Department of Labor's *Occupational Outlook Handbook (Handbook)* states that because of the diversity of manufacturing operation and job requirements, there is no standard preparation for this occupation. A college degree is, however, required even for managers who work their way up through the ranks. Many industrial production managers have a college degree in business administration, management, industrial technology, or industrial engineering. Others have a master's degree in industrial management or business administration. Degree requirements are determined by the nature of the industrial management position with its corresponding duties. The position offered in this instance is for an industrial production manager at an international food production company. Considering the duties of this particular position, as set forth in the record of proceedings, the position requires a baccalaureate level education in business management or a closely related field.

The beneficiary holds a bachelor's degree in business administration with concentration in human resources and management from Central Missouri State University, an accredited institution of higher learning in the United States. The degree obtained by the beneficiary includes courses in management, accounting, human

resources; statistics, business communications, production/operations management, economics, mathematics, management information systems, compensation/benefits, collective bargaining, total quality management and finance, along with management internships. The degree obtained and courses completed by the beneficiary are closely related to the duties of the proffered position. The beneficiary is, therefore, qualified to perform the duties of the offered position, and the director's decision to the contrary is withdrawn.

The burden of proof in these proceedings rests solely with the petitioner. Section 291 of the Act, 8 U.S.C. § 1361. The petitioner has sustained that burden and the appeal shall accordingly be sustained..

**ORDER:** The appeal is sustained. The petition is approved.
