IN RE: Petitioner: [Redacted]
Beneficiary: [Redacted]

PETITION: Petition for a Nonimmigrant Worker Pursuant to Section 101(a)(15)(H)(i)(b) of the
Immigration and Nationality Act, 8 U.S.C. § 1101(a)(15)(H)(i)(b)

ON BEHALF OF PETITIONER:

SELF-REPRESENTED

INSTRUCTIONS:

This is the decision of the Administrative Appeals Office in your case. All documents have been returned to the office that originally decided your case. Any further inquiry must be made to that office.

Handwritten signature of Robert P. Wiemann in black ink.

Robert P. Wiemann, Chief
Administrative Appeals Office

DISCUSSION: The service center director denied the nonimmigrant visa petition and the matter is now before the Administrative Appeals Office (AAO) on appeal. The appeal will be dismissed. The petition will be denied.

The petitioner is a software development company. It seeks to employ the beneficiary as a business analyst, and endeavors to classify him as a nonimmigrant worker in a specialty occupation pursuant to section 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act (the Act), 8 U.S.C. § 1101(a)(15)(H)(i)(b).

The director denied the petition because the beneficiary did not qualify to perform the duties of a specialty occupation. On appeal, the petitioner submits a brief stating that the beneficiary qualifies to perform the duties of a specialty occupation.

The director's determination denying the I-129 petition was based solely on the beneficiary's qualifications to perform the duties associated with that occupation. The only issue to be discussed in this proceeding is whether the beneficiary is qualified to perform the duties of a specialty occupation.

Section 101(a)(15)(H)(i)(b) of the Act, 8 U.S.C. § 1101(a)(15)(H)(i)(b), provides, in part, for the classification of qualified nonimmigrant aliens who are coming temporarily to the United States to perform services in a specialty occupation.

Section 214(i)(2) of the Act, 8 U.S.C. § 1184(i)(2), states that an alien applying for classification as an H-1B nonimmigrant worker must possess:

- (A) full state licensure to practice in the occupation, if such licensure is required to practice in the occupation,
- (B) completion of the degree described in paragraph (1)(B) for the occupation, or
- (C) (i) experience in the specialty equivalent to the completion of such degree, and
(ii) recognition of expertise in the specialty through progressively responsible positions relating to the specialty.

Pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(C), to qualify to perform services in a specialty occupation, the alien must meet one of the following criteria:

- (1) Hold a United States baccalaureate or higher degree required by the specialty occupation from an accredited college or university;
- (2) Hold a foreign degree determined to be equivalent to a United States baccalaureate or higher degree required by the specialty occupation from an accredited college or university;
- (3) Hold an unrestricted State license, registration or certification which authorizes him or her to fully practice the specialty occupation and be immediately engaged in that specialty in the state of intended employment; or
- (4) Have education, specialized training, and/or progressively responsible experience that is equivalent to completion of a United States baccalaureate or higher degree in the

specialty occupation, and have recognition of expertise in the specialty through progressively responsible positions directly related to the specialty.

Pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(D), for purposes of paragraph (h)(4)(iii)(C)(4) of this section, equivalence to completion of a United States baccalaureate or higher degree shall mean achievement of a level of knowledge, competence, and practice in the specialty occupation that has been determined to be equal to that of an individual who has a baccalaureate or higher degree in the specialty and shall be determined by one or more of the following:

- (1) An evaluation from an official who has authority to grant college-level credit for training and/or experience in the specialty at an accredited college or university which has a program for granting such credit based on an individual's training and/or work experience;
- (2) The results of recognized college-level equivalency examinations or special credit programs, such as the College Level Examination Program (CLEP), or Program on Noncollegiate Sponsored Instruction (PONSI);
- (3) An evaluation of education by a reliable credentials evaluation service which specializes in evaluating foreign educational credentials;
- (4) Evidence of certification or registration from a nationally-recognized professional association or society for the specialty that is known to grant certification or registration to persons in the occupational specialty who have achieved a certain level of competence in the specialty;
- (5) A determination by the Service that the equivalent of the degree required by the specialty occupation has been acquired through a combination of education, specialized training, and/or work experience in areas related to the specialty and that the alien has achieved recognition of expertise in the specialty occupation as a result of such training and experience.

The petitioner asserts, and the director implicitly found, that the proffered position is a specialty occupation. The U.S. Department of Labor's *Occupational Outlook Handbook (Handbook)* notes that although there are many training paths available for programmers due to varied employer needs, the level of education and experience employers seek has been rising due to the growing number of qualified applicants and the specialization involved with most programming tasks. Bachelor's degrees are commonly required, although some programmers may qualify for certain jobs with 2-year degrees or certificates. The associate degree is a widely used entry-level credential for prospective computer programmers. In the absence of a degree, substantial specialized experience or expertise may be needed, and employers appear to place more emphasis on previous experience even when hiring programmers with a degree. Some computer programmers hold a college degree in computer science, mathematics, or information systems, while others have taken special courses in computer programming to supplement degrees in other fields. Thus, it is evident that while some programmer positions justify the hiring of an individual with a baccalaureate level education, others require only an associate's degree or some other form of certification.

The petitioner seeks to qualify the beneficiary by establishing that the beneficiary meets the requirements of 8 C.F.R. § 214.2(h)(4)(iii)(C)(4). In support of this assertion, the petitioner submitted an evaluation of the beneficiary's education and work experience from [REDACTED] a credentials evaluator with

Multinational Education and Information Services, Inc. [REDACTED] states that the beneficiary's past education and experience are equivalent to a bachelor's degree in business administration and computer science from an accredited college or university in the United States. The submitted evaluation does not, however, establish that the beneficiary has the equivalent of a bachelor's degree. Credentials evaluators are permitted to evaluate only an individual's foreign education for degree equivalence purposes, not past work experience. Work experience may be evaluated, for degree equivalence purposes, by an official who has authority to grant college-level credit for training and/or experience in the specialty at an accredited college or university which has a program for granting such credit based on an individual's training and/or work experience. 8 C.F.R. § 214.2(h)(4)(iii)(D)(1). While [REDACTED] asserts that he has such authority, the record does not support that assertion. The record does not contain a statement from any college or university administrator verifying that [REDACTED] is employed at a university which has a program for granting college-level credit for past work experience, and that [REDACTED] has authority at that college or university to grant such credit. Simply going on the record without supporting documentary evidence is not sufficient for purposes of meeting the burden of proof in these proceedings. *Matter of Soffici*, 22 I&N Dec. 158, 165 (Comm. 1998) (citing *Matter of Treasure Craft of California*, 14 I&N 190 (Reg. Comm. 1972)). The experiential evaluation is, therefore, of little evidentiary value.

Citizenship and Immigration Services (CIS) may itself determine whether the beneficiary is qualified to perform the duties of the specialty occupation. That determination may be made pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(D)(5), which provides:

For purposes of determining equivalency to a baccalaureate degree in the specialty, three years of specialized training and/or work experience must be demonstrated for each year of college-level training the alien lacks. For equivalence to an advanced (or Masters) degree, the alien must have a baccalaureate degree followed by at least five years of experience in the specialty. . . . It must be clearly demonstrated that the alien's training and/or work experience included the theoretical and practical application of specialized knowledge required by the specialty occupation; that the alien's experience was gained while working with peers, supervisors, or subordinates who have a degree or its equivalent in the specialty occupation; and that the alien has recognition of expertise in the specialty evidenced by at least one type of documentation such as:

- (i) Recognition of expertise in the specialty occupation by at least two recognized authorities in the same specialty occupation;
- (ii) Membership in a recognized foreign or United States association or society in the specialty occupation;
- (iii) Published material by or about the alien in professional publications, trade journals, books or major newspapers;
- (iv) Licensure or registration to practice the specialty occupation in a foreign country;
or
- (v) Achievements which a recognized authority has determined to be significant contributions to the field of the specialty occupation.

The documentation recounting the beneficiary's work experience is insufficient in detail to determine that: the work experience included the theoretical and practical application of specialized knowledge required by the proffered position; the beneficiary's experience was gained while working with peers, supervisors, or subordinates who have a degree or its equivalent in the specialty occupation; and that the beneficiary has recognition of expertise in the specialty. CIS cannot, therefore, determine that the beneficiary is qualified to perform the duties of the specialty occupation.

The burden of proof in these proceedings rests solely with the petitioner. Section 291 of the Act, 8 U.S.C. § 1361. The petitioner has failed to sustain that burden and the appeal shall accordingly be dismissed.

ORDER: The appeal is dismissed. The petition is denied.
