IN RE: Petitioner: [Redacted]
Beneficiary: [Redacted]

PETITION: Petition for a Nonimmigrant Worker Pursuant to Section 101(a)(15)(H)(i)(b) of the
Immigration and Nationality Act, 8 U.S.C. § 1101(a)(15)(H)(i)(b)

ON BEHALF OF PETITIONER:

INSTRUCTIONS:

This is the decision of the Administrative Appeals Office in your case. All documents have been returned to the office that originally decided your case. Any further inquiry must be made to that office.

Robert P. Wiemann, Director
Administrative Appeals Office

DISCUSSION: The service center director denied the nonimmigrant visa petition and the matter is now before the Administrative Appeals Office (AAO) on appeal. The appeal will be dismissed. The petition will be denied.

The petitioner is a transportation business that seeks to employ the beneficiary as a computer specialist. The petitioner endeavors to classify the beneficiary as a nonimmigrant worker in a specialty occupation pursuant to § 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act (the Act), 8 U.S.C. § 1101(a)(15)(H)(i)(b).

The director denied the petition because the proffered position is not a specialty occupation. On appeal, counsel submits a statement and indicated that a brief and/or additional evidence would be submitted to the AAO within 30 days. As of this date, however, the AAO has not received any additional evidence into the record. Therefore, the record is complete.

Section 214(i)(1) of the Act, 8 U.S.C. § 1184(i)(1), defines the term "specialty occupation" as an occupation that requires:

- (A) theoretical and practical application of a body of highly specialized knowledge, and
- (B) attainment of a bachelor's or higher degree in the specific specialty (or its equivalent) as a minimum for entry into the occupation in the United States.

Pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(A), to qualify as a specialty occupation, the position must meet one of the following criteria:

- (1) A baccalaureate or higher degree or its equivalent is normally the minimum requirement for entry into the particular position;
- (2) The degree requirement is common to the industry in parallel positions among similar organizations or, in the alternative, an employer may show that its particular position is so complex or unique that it can be performed only by an individual with a degree;
- (3) The employer normally requires a degree or its equivalent for the position; or
- (4) The nature of the specific duties is so specialized and complex that knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

Citizenship and Immigration Services (CIS) interprets the term "degree" in the criteria at 8 C.F.R. § 214.2(h)(4)(iii)(A) to mean not just any baccalaureate or higher degree, but one in a specific specialty that is directly related to the proffered position.

The record of proceeding before the AAO contains: (1) Form I-129 and supporting documentation; (2) the director's request for additional evidence; (3) the petitioner's response to the director's request; (4) the director's denial letter; and (5) Form I-290B and supporting documentation. The AAO reviewed the record in its entirety before issuing its decision.

The petitioner is seeking the beneficiary's services as a computer specialist. Evidence of the beneficiary's duties includes: the I-129 petition; the petitioner's November 4, 2003 letter in support of the petition; and the petitioner's response to the director's request for evidence. The letter of support describes the job duties and responsibilities as:

[R]esponsible for the operation, maintenance and integrity of a distributed networked Windows XP based environment; provide support of workstations, networks, peripherals, software, security, configuration management, repairs, and bug reporting; maintain the operating system and application software installation and upgrades; equipment installations and upgrades, disk backups, and resource allocation; software and hardware support; provide technical assistance in implementing and using new programs; assist in the development and maintenance of related programs such as: calculus and listing of salaries; financial accounting record program of the company's expenses; perform the company's Web page maintenance and development; install, configure, troubleshoot and customize different software modules, PC Software Support – setting PCs for network connection and loading PC software, PC Hardware Support – memory, hard drive, soundcard installations/upgrades, and administer the systems configuration, software installation, applications upgrades, error/status/log checking and reporting.

The petitioner indicated that a qualified candidate for the job would possess a bachelor's degree in computer science, electrical or computer engineering, or an equivalent thereof.

The director found that the proffered position, which is primarily that of a computer support specialist, was not a specialty occupation because the proposed duties are not so complex as to require a bachelor's degree. Citing to the Department of Labor's *Occupational Outlook Handbook (Handbook)*, the director noted that the minimum requirement for entry into the position was not a baccalaureate degree or its equivalent in a specific specialty. The director found further that the petitioner failed to establish any of the criteria found at 8 C.F.R. § 214.2(h)(4)(iii)(A).

On appeal, counsel states, in part, that the director erred in claiming that the proffered position does not qualify as a specialty occupation solely because of the salary. Counsel states further that the proffered position is professional and therefore requires a related bachelor's degree.

Upon review of the record, the petitioner has established none of the four criteria outlined in 8 C.F.R. § 214.2(h)(4)(iii)(A). Therefore, the proffered position is not a specialty occupation.

The AAO turns first to the criteria at 8 C.F.R. § 214.2(h)(4)(iii)(A)(1) and (2): a baccalaureate or higher degree or its equivalent is the normal minimum requirement for entry into the particular position; a degree requirement is common to the industry in parallel positions among similar organizations; or a particular position is so complex or unique that it can be performed only by an individual with a degree.

Factors often considered by CIS when determining these criteria include: whether the *Handbook* reports that the industry requires a degree; whether the industry's professional association has made a degree a minimum entry requirement; and whether letters or affidavits from firms or individuals in the industry attest that such firms "routinely employ and recruit only degreed individuals." *See Shanti, Inc. v. Reno*, 36 F. Supp. 2d 1151, 1165 (D. Minn. 1999)(quoting *Hird/Blaker Corp. v. Sava*, 712 F. Supp. 1095, 1102 (S.D.N.Y. 1989)).

The AAO routinely consults the *Handbook* for its information about the duties and educational requirements of particular occupations. The AAO does not concur with counsel that the proffered position is a specialty occupation. Counsel's statement that the director erred in her claim that the proffered position does not qualify as a specialty occupation solely because of the salary is noted. As discussed above, however, the director found that the proffered position, which is primarily that of a computer support specialist, was not a specialty occupation because the proposed duties are not so complex as to require a bachelor's degree. A review of the Computer Support Specialists and Systems Administrators job descriptions in the *Handbook*, 2004-2005 edition, finds that the proposed job duties parallel those responsibilities of a computer support specialist or systems administrator. No evidence in the *Handbook* indicates that a baccalaureate or higher degree, or its equivalent, is required for these positions.

As counsel did not discuss parallel positions in the petitioner's industry on appeal, this issue will not be discussed further. The record also does not include any evidence from professional associations regarding an industry standard, or documentation to support the complexity or uniqueness of the proffered position. The petitioner, therefore, has not established the criteria set forth at 8 C.F.R. § 214.2(h)(4)(iii)(A)(1) or (2).

The AAO now turns to the criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A)(3) – the employer normally requires a degree or its equivalent for the position. As counsel did not discuss this issue on appeal, it will not be discussed further.

Finally, the AAO turns to the criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A)(4) – the nature of the specific duties is so specialized and complex that knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

To the extent that they are depicted in the record, the duties do not appear so specialized and complex as to require the highly specialized knowledge associated with a baccalaureate or higher degree, or its equivalent, in a specific specialty. Therefore, the evidence does not establish that the proffered position is a specialty occupation under 8 C.F.R. § 214.2(h)(4)(iii)(A)(4).

As related in the discussion above, the petitioner has failed to establish that the proffered position is a specialty occupation. Accordingly, the AAO shall not disturb the director's denial of the petition.

The burden of proof in these proceedings rests solely with the petitioner. Section 291 of the Act, 8 U.S.C. § 1361. The petitioner has not sustained that burden.

ORDER: The appeal is dismissed. The petition is denied.
