FILE: WAC 05 163 52817 Office: CALIFORNIA SERVICE CENTER Date: **NOV 28 2005**

IN RE: Petitioner:   
Beneficiary:

PETITION: Petition for a Nonimmigrant Worker Pursuant to Section 101(a)(15)(H)(i)(b) of the  
Immigration and Nationality Act, 8 U.S.C. § 1101(a)(15)(H)(i)(b)

ON BEHALF OF PETITIONER:

SELF-REPRESENTED

**PUBLIC COPY**

INSTRUCTIONS:

This is the decision of the Administrative Appeals Office in your case. All documents have been returned to the office that originally decided your case. Any further inquiry must be made to that office.

Robert P. Wiemann, Director  
Administrative Appeals Office

**DISCUSSION:** The director of the service center denied the nonimmigrant visa petition and the matter is now before the Administrative Appeals Office (AAO) on appeal. The appeal will be dismissed. The petition will be denied.

The petitioner indicates that it is a consulting and advertising agency and has seven employees. It seeks to employ the beneficiary as a full-time accountant. The petitioner, therefore, endeavors to classify the beneficiary as a nonimmigrant worker in a specialty occupation pursuant to section 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act (the Act), 8 U.S.C. § 1101(a)(15)(H)(i)(b).

The director denied the petition because the proffered position is not a specialty occupation. On appeal, the petitioner submits a brief.

Section 214(i)(1) of the Act, 8 U.S.C. § 1184(i)(1), defines the term "specialty occupation" as an occupation that requires:

- (A) theoretical and practical application of a body of highly specialized knowledge, and
- (B) attainment of a bachelor's or higher degree in the specific specialty (or its equivalent) as a minimum for entry into the occupation in the United States.

Pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(A), to qualify as a specialty occupation, the position must meet one of the following criteria:

- (1) A baccalaureate or higher degree or its equivalent is normally the minimum requirement for entry into the particular position;
- (2) The degree requirement is common to the industry in parallel positions among similar organizations or, in the alternative, an employer may show that its particular position is so complex or unique that it can be performed only by an individual with a degree;
- (3) The employer normally requires a degree or its equivalent for the position; or
- (4) The nature of the specific duties is so specialized and complex that knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

Citizenship and Immigration Services (CIS) interprets the term "degree" in the criteria at 8 C.F.R. § 214.2(h)(4)(iii)(A) to mean not just any baccalaureate or higher degree, but one in a specific specialty that is directly related to the proffered position.

The record of proceeding before the AAO contains: (1) Form I-129 and supporting documentation; (2) the director's request for additional evidence; (3) the petitioner's response to the director's request; (4) the director's denial letter; and (5) Form I-290B and supporting documentation. The AAO reviewed the record in its entirety before issuing its decision.

The petitioner is seeking the beneficiary's services as a full-time accountant. Evidence of the beneficiary's duties includes: the Form I-129; the attachments accompanying the Form I-129; the company support letter; and the petitioner's response to the director's request for evidence. According to this evidence, the beneficiary would perform duties that entail compiling and analyzing financial information to prepare entries to accounts, such as general ledger accounts; documenting business transactions; analyzing financial information detailing assets, liabilities, and capital; and preparing balance sheets, profit and loss statements and other reports to summarize current and projected company financial position; auditing contracts, orders and vouchers, and preparing reports to substantiate individual transactions prior to settlement; examining a variety of financial statements for completeness, internal accuracy and conformance with uniform accounting classifications. The petitioner indicated that the proffered position requires a minimum of a bachelor's degree or its equivalent in an accounting field.

The director issued a request for evidence, specifically: a more detailed description of the work done including specific job duties, the percentage of time to be spent on each duty, and level of responsibility. The director requested evidence to support the petitioner's contention that the position is a specialty occupation. The director requested evidence that the petitioner has a past practice of hiring persons with a baccalaureate degree or higher to perform the duties of the proffered position. Additionally, the director requested federal income tax returns, quarterly wage reports, and a copy of the petitioner's organizational chart (if the beneficiary supervises anyone).

The petitioner provided tax returns for tax year 2004 indicating gross receipts or sales of \$319,550 and salaries and wages of \$51,800. The petitioner stated that the accounting job description is very specialized and includes: handling and recording of daily accounts, receipts, payables, invoices, expenses and reimbursements; preparing balance statements and projections charts; managing finances of all divisions of the company; performing duties in English and Japanese.

The director determined that the proffered position was not a specialty occupation. The director concluded that the position described by the petitioner is more similar to that of a bookkeeper and not an accountant. The director determined that the petitioner failed to establish that the proffered position requires a baccalaureate or higher degree or its equivalent.

On appeal, the petitioner explains that they have over 100 clients and a projected total of 420 transactions in 2006 for graphic design jobs, printing jobs and advertisers. The petitioner notes that roughly one-third of their clients are Japanese firms, for whom they send their invoices, past due notices and cover letters in Japanese. The petitioner explains they need an accountant who can write Japanese and handle this "projected tremendous volume of transactions and follow through invoicing and late payment pursuits."

Upon review of the record, the petitioner has established none of the four criteria outlined in 8 C.F.R. § 214.2(h)(4)(iii)(A). Therefore, the proffered position is not a specialty occupation.

The AAO first considers the criteria at 8 C.F.R. §§ 214.2(h)(4)(iii)(A)(1) and (2): a baccalaureate or higher degree or its equivalent is the normal minimum requirement for entry into the particular position; a degree requirement is common to the industry in parallel positions among similar organizations; or a particular position is so complex or unique that it can be performed only by an individual with a degree. Factors often considered by CIS when determining these criteria include: whether the Department of Labor's *Occupational*

*Outlook Handbook (Handbook)* reports that the industry requires a degree; whether the industry's professional association has made a degree a minimum entry requirement; and whether letters or affidavits from firms or individuals in the industry attest that such firms "routinely employ and recruit only degreed individuals." See *Shanti, Inc. v. Reno*, 36 F. Supp. 2d 1151, 1165 (D.Minn. 1999)(quoting *Hird/Blaker Corp. v. Sava*, 712 F. Supp. 1095, 1102 (S.D.N.Y. 1989)).

In determining whether a position qualifies as a specialty occupation, CIS looks beyond the title of the position and determines, from a review of the duties of the position and any supporting evidence, whether the position actually requires the theoretical and practical application of a body of highly specialized knowledge, and the attainment of a baccalaureate degree in a specific specialty as the minimum for entry into the occupation as required by the Act. The AAO routinely consults the *Handbook* for its information about the duties and educational requirements of particular occupations.

A review of the *Handbook* reveals that specific job duties vary widely among the four major fields of accounting: public, management, government, and internal. The closest category to the proffered position is the management accountant. In the *Handbook*, management accountants — also called cost, managerial, industrial, corporate, or private accountants — record and analyze the financial information of the companies for which they work. Other responsibilities include budgeting, performance evaluation, cost management, and asset management. Usually, management accountants are part of executive teams involved in strategic planning or new-product development. They analyze and interpret the financial information that corporate executives need to make sound business decisions. They also prepare financial reports for nonmanagement groups, including stockholders, creditors, regulatory agencies, and tax authorities. Within accounting departments, they may work in various areas, including financial analysis, planning and budgeting, and cost accounting.

While it is true that not all accountants are part of an executive team, the *Handbook's* delineation of a management accountant as part of an executive team involved in strategic planning or new-product development illustrates the scope and complexity of a management accountant's responsibilities. Likewise, the role of the accountant to prepare financial reports for nonmanagement groups, including stockholders, creditors, regulatory agencies, and tax authorities also illustrates the level of a management accountant's responsibilities. Because the beneficiary will not be part of an executive team and will not prepare financial reports for nonmanagement groups, including stockholders, creditors, regulatory agencies, and tax authorities, this indicates that the beneficiary's duties do not rise to the same level as a management accountant.

The *Handbook* states:

Accountants and auditors held about 1.1 million jobs in 2002. They worked throughout private industry and government, but 1 out of 5 wage and salary accountants worked for accounting, tax preparation, bookkeeping, and payroll services firms. Approximately 1 out of 10 accountants or auditors were self-employed.

Many accountants and auditors are unlicensed management accountants, internal auditors, or government accountants and auditors; however, a large number are licensed Certified Public Accountants. Most accountants and auditors work in urban areas, where public accounting firms and central or regional offices of businesses are concentrated.

The petitioner indicated that it had 7 employees and grossed \$319,550 in receipts or sales. The petitioner's level of income, number of employees, and volume of transactions have a direct and substantial bearing on the scope and depth of the beneficiary's proposed duties. The petitioner has not provided evidence that supports its contention that due to the size and complexity of its business the proffered duties are so complex and specialized that it is an accounting position requiring a baccalaureate level of education in a specialty occupation.

The *Handbook* reveals that many of the beneficiary's duties are performed by bookkeeping, accounting, auditing and financial clerks:

Bookkeeping, accounting, and auditing clerks are an organization's financial record keepers. They update and maintain one or more accounting records, including those that tabulate expenditures, receipts, accounts payable and receivable, and profit and loss. . . . post debits and credits, produce financial statements, and prepare reports and summaries for supervisors and managers. . . . handle the payroll, make purchases, prepare invoices, and keep track of overdue accounts.

More advanced accounting clerks may total, balance, and reconcile billing vouchers; ensure completeness and accuracy of data on account. . . . They may also review invoices and statements to ensure that all information is accurate and complete. . . . Auditing clerks verify records of transactions posted by other workers.

Auditing clerks verify records of transactions posted by other workers. They check figures, postings, and documents to ensure that they are correct, mathematically accurate, and properly coded.

The petitioner stated that the beneficiary would handle and record daily accounts, receipts, payables, invoices, expenses and reimbursements. On appeal, the petitioner stresses that the beneficiary would perform "follow through invoicing and late payment pursuits."

As shown in the *Handbook*, bookkeeping, accounting, and auditing clerks produce financial statements and prepare reports and summaries for supervisors and managers, which would be used by them to make sound business decisions. Further, the *Handbook* reports that employers require most financial clerks to have at least a high school diploma, and for bookkeepers and accounting clerks, they often require an associate's degree in business or accounting.<sup>11</sup> The *Handbook* also states that many graduates of junior colleges and

---

<sup>11</sup> According to the website for Skyline College, a community college located in San Mateo, California, ([www.skylinecollege.net](http://www.skylinecollege.net)), an associate's degree in business or accounting would involve learning the fundamentals about financial accounting principles and concepts, balance sheets, income statements, cash flow statements, the GAAP, forecasting, budgeting, cost accounting, break even analysis, developing and operating a computerized accounting system using tools such as QuickBooks, QuickBooks Pro, or Peachtree, an integrated commercial accounting software package that is used to review, differentiate, and interpret accounting concepts and data in a multitude of business situations. Thus, an associate's degree would provide knowledge about the GAAP and accounting techniques which serve the needs of management and facilitate decision-making.

business and correspondence schools, as well as some bookkeepers and accounting clerks, obtain positions as junior accountants.

Based on the above discussion regarding the *Handbook's* information about management accountants and bookkeeping, accounting, auditing and financial clerks, the evidence in the record is insufficient to establish the regulation at 8 C.F.R. § 214.2(h)(4)(iii)(A)(1): that a baccalaureate or higher degree or its equivalent is the normal minimum requirement for entry into the particular position.

The AAO notes that to the extent the job requires the beneficiary to be fluent in both English and Japanese, the *Handbook* does not indicate that the job would take on the complexity of a specialty occupation. The *Handbook* indicates that the minimum educational requirement for a translator is a baccalaureate degree in a wide range of specializations. As a baccalaureate degree in a specific field is not required to perform the work of a translator, the duties of the position that include translations do not meet the first criterion.

No evidence in the record establishes the regulation at 8 C.F.R. § 214.2(h)(4)(iii)(A)(2) which requires the petitioner to establish that a specific degree requirement is common to the industry in parallel positions among similar organizations. Nor can the petitioner establish that the particular position is so complex or unique that it can be performed only by an individual with a degree. As already discussed above, the *Handbook* reveals that many of the beneficiary's duties are performed by bookkeeping, accounting, and auditing clerks, occupations that do not require a bachelor's degree.

Nor is there evidence in the record to establish the third criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A): that the petitioner normally requires a degree or its equivalent for the position.

The regulation at 8 C.F.R. § 214.2(h)(4)(iii)(A)(4) requires that the petitioner establish that the nature of the specific duties is so specialized and complex that the knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree. Many of the beneficiary's duties are performed by bookkeeping, accounting, auditing and financial clerks, occupations that do not require a bachelor's degree. The petitioner therefore fails to establish 8 C.F.R. § 214.2(h)(4)(iii)(A)(4).

As related in the discussion above, the petitioner has failed to establish that the proffered position is a specialty occupation. Accordingly, the AAO shall not disturb the director's denial of the petition.

Beyond the decision of the director, the AAO notes that the petitioner did not provide evidence that the beneficiary's work experience is equivalent to a U.S. degree as required by the regulations. As the proffered position is not a specialty occupation, the beneficiary's qualifications need not be discussed further.

The burden of proof in these proceedings rests solely with the petitioner. Section 291 of the Act, 8 U.S.C. § 1361. The petitioner has not sustained that burden.

**ORDER:** The appeal is dismissed. The petition is denied.
