DATE: **OCT 06 2011** OFFICE: CALIFORNIA SERVICE CENTER

FILE: [REDACTED]

IN RE: Petitioner: [REDACTED]
Beneficiary: [REDACTED]

PETITION: Petition for a Nonimmigrant Worker Pursuant to Section 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act, 8 U.S.C. § 1101(a)(15)(H)(i)(b)

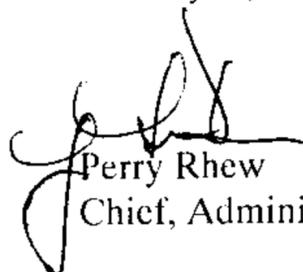

ON BEHALF OF PETITIONER:
[REDACTED]

INSTRUCTIONS:

Enclosed please find the decision of the Administrative Appeals Office in your case. All of the documents related to this matter have been returned to the office that originally decided your case. Please be advised that any further inquiry that you might have concerning your case must be made to that office.

If you believe the law was inappropriately applied by us in reaching our decision, or you have additional information that you wish to have considered, you may file a motion to reconsider or a motion to reopen. The specific requirements for filing such a request can be found at 8 C.F.R. § 103.5. All motions must be submitted to the office that originally decided your case by filing a Form I-290B, Notice of Appeal or Motion, with a fee of \$630. Please be aware that 8 C.F.R. § 103.5(a)(1)(i) requires that any motion must be filed within 30 days of the decision that the motion seeks to reconsider or reopen.

Thank you,

Perry Rhew

Chief, Administrative Appeals Office

DISCUSSION: Although the service center director initially approved the nonimmigrant visa petition, she subsequently issued a notice of intent to revoke (NOIR), and ultimately revoked approval of the petition. The matter is now before the Administrative Appeals Office (AAO) on appeal. The appeal will be dismissed. Approval of the petition will remain revoked.

The petitioner claimed on the Form I-129 to be a computer services firm with 43 employees and a gross annual income of \$5 million. It seeks to employ the beneficiary as a computer analyst pursuant to section 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act (the Act), 8 U.S.C. § 1101(a)(15)(H)(i)(b).

The director revoked approval of the petition on the basis of her determination that the petitioner had failed to demonstrate that the proposed position qualifies for classification as a specialty occupation. The record of proceeding before the AAO contains the following: (1) the Form I-129 and supporting documentation; (2) the director's NOIR; (3) the petitioner's response to the director's NOIR; (4) the director's decision revoking approval of the petition; and (5) the Form I-290B and supporting documentation. The AAO conducts appellate review on a *de novo* basis. See *Soltane v. DOJ*, 381 F.3d 143, 145 (3d Cir. 2004). Upon review of the entire record, we find that the petitioner has failed to overcome the director's ground for revoking approval of this petition. Beyond the decision of the director, we find additionally that the petitioner also failed to demonstrate that it qualifies as a U.S. employer or agent, or that the beneficiary is qualified to perform the duties of a specialty occupation.¹

The Proposed Position Does Not Qualify for Classification as a Specialty Occupation

The sole basis for the director's revocation of the petition's approval, and the first issue before us on appeal, is whether the proposed position qualifies for classification as a specialty occupation. In its March 27, 2008 letter of support, the petitioner stated that it was "engaged in the business of providing software development and consulting services." The petitioner described the proposed position as a "programmer analyst/computer engineer," and stated that the beneficiary's duties would include the following responsibilities:

- Analyzing, researching, designing, and writing specifications in order to effectively maintain, enhance, and develop applications software;
- Analyzing user requirements, procedures, and problems in order to automate processing and improve existing systems using Oracle, Informatica, UNIX, Cognos, PL/SQL, Visual Basic, ASP, .Net, SQL Server, Java, HTML, DHTML, Business Objects, and others;
- Designing new applications;
- Developing application prototypes;
- Writing detailed descriptions of user needs, program functions, and steps required to develop or modify computer programs;
- Promoting efficient user utilization of systems;

¹ Although the director stated that the petitioner had not established that the beneficiary qualifies for H-1B status, she did not elaborate and it is not clear she intended that statement as a separate basis for revocation of the petition's approval.

- Cooperating with, and providing technical support to, project teams and members and associates in order to analyze current operational procedures, identify problems, and learn to specify input and output requirements;
- Developing and maintaining proficiency in utilizing technical and analytical tools to give optimum results to the management and business;
- Performing studies to aid the development of new systems to cope with current project needs;
- Planning and preparing technical reports, memoranda, and instruction manuals; and
- Performing analysis, conversion coding, code walkthrough, and unit and integration testing.

The record also contains an employment agreement executed between the petitioner and beneficiary. At page one of this agreement, in the section entitled "Scope of Duties," the petitioner and beneficiary agreed to the following:

Employee shall perform such system analysis, software design and development, computer programming, program testing and implementation, consulting, technical writing or other specialized technical work as directed to perform by [the petitioner] for [the petitioner] or its Client(s), and agrees to work at premises designated by [the petitioner].

At page two of the agreement, in the section entitled "Direction," the petitioner and beneficiary agreed to the following:

Employee agrees to follow and abide by all applicable policies and procedures of [the petitioner], even though from time to time, Employee may be required by [the petitioner] to work at the direction of [the petitioner's] Client.

Counsel submitted two letters from the petitioner in response to the director's NOIR. In his January 15, 2010 letter, the petitioner's president stated, in pertinent part, the following:

This oral agreement was communicated via the intermediary agent and is between [the petitioner] and the End User Firm on whose site the Beneficiary will render H-1B services.

* * *

The End User Firm shall advise [the petitioner] of its job requirements for the work to be performed by the Beneficiary. . . .

[The petitioner] shall ensure that the Beneficiary is qualified by education and experience to perform the job requirements of the End User Firm. . . .

[The petitioner] shall be responsible for supervising and shall control the Beneficiary's work at [the] End User Firm's site. . . .

In his August 23, 2010 letter, the petitioner's president stated, in pertinent part, the following:

The Petitioner and the [REDACTED] both require at least a Bachelor's Degree. . . .
* * *

This educational job requirement is the same educational job requirement which the End User Firm has communicated to the Petitioner via the intermediary agent.
* * *

The Petitioner and the [REDACTED] both require the H-1B position to be filled. . . .

The record also contains copies of the petitioner's U.S. corporate income tax returns, which indicate that it is in the business of computer consulting.

In its response to the director's NOIR, the petitioner stated that the beneficiary "would work on [its] internal e-learning project." However, with that very same submission the petitioner referenced work that the beneficiary would perform for its "end user firms" at their worksites. Moreover, as set forth above, the record contains substantial evidence indicating that the beneficiary would be performing work for the petitioner's clients at various worksites. This discrepancy was not explained. It is incumbent upon the petitioner to resolve any inconsistencies in the record by independent objective evidence. Any attempt to explain or reconcile such inconsistencies will not suffice unless the petitioner submits competent objective evidence pointing to where the truth lies. *Matter of Ho*, 19 I&N Dec. 582, 591-92 (BIA 1988). Doubt cast on any aspect of the petitioner's proof may, of course, lead to a reevaluation of the reliability and sufficiency of the remaining evidence offered in support of the visa petition. *Id.* Although the record indicates that the beneficiary would be providing service to the "end user firms" discussed by the petitioner, the record lacks any information regarding any such duties.

Section 214(i)(1) of the Immigration and Nationality Act (the Act), 8 U.S.C. § 1184(i)(1), defines the term "specialty occupation" as an occupation that requires:

- (A) theoretical and practical application of a body of highly specialized knowledge, and
- (B) attainment of a bachelor's or higher degree in the specific specialty (or its equivalent) as a minimum for entry into the occupation in the United States.

The regulation at 8 C.F.R. § 214.2(h)(4)(ii) states, in pertinent part, the following:

Specialty occupation means an occupation which [(1)] requires theoretical and practical application of a body of highly specialized knowledge in fields of human endeavor including, but not limited to, architecture, engineering, mathematics, physical sciences, social sciences, medicine and health, education, business specialties, accounting, law, theology, and the arts, and [(2)] which requires the attainment of a bachelor's degree or higher in a specific specialty, or its equivalent, as a minimum for entry into the occupation in the United States.

Pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(A), to qualify as a specialty occupation, a proposed position must also meet one of the following criteria:

- (1) A baccalaureate or higher degree or its equivalent is normally the minimum requirement for entry into the particular position;
- (2) The degree requirement is common to the industry in parallel positions among similar organizations or, in the alternative, an employer may show that its particular position is so complex or unique that it can be performed only by an individual with a degree;
- (3) The employer normally requires a degree or its equivalent for the position; or
- (4) The nature of the specific duties is so specialized and complex that knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

As a threshold issue, it is noted that 8 C.F.R. § 214.2(h)(4)(iii)(A) must logically be read together with section 214(i)(1) of the Act and 8 C.F.R. § 214.2(h)(4)(ii). In other words, this regulatory language must be construed in harmony with the thrust of the related provisions and with the statute as a whole. *See K Mart Corp. v. Cartier Inc.*, 486 U.S. 281, 291 (1988) (holding that construction of language which takes into account the design of the statute as a whole is preferred); *see also COIT Independence Joint Venture v. Federal Sav. and Loan Ins. Corp.*, 489 U.S. 561 (1989); *Matter of W-F-*, 21 I&N Dec. 503 (BIA 1996). As such, the criteria stated in 8 C.F.R. § 214.2(h)(4)(iii)(A) should logically be read as being necessary but not necessarily sufficient to meet the statutory and regulatory definition of specialty occupation. To otherwise interpret this section as stating the necessary and sufficient conditions for meeting the definition of a specialty occupation would result in particular positions meeting a condition under 8 C.F.R. § 214.2(h)(4)(iii)(A) but not the statutory or regulatory definition. *See Defensor v. Meissner*, 201 F.3d at 387. To avoid this illogical and absurd result, 8 C.F.R. § 214.2(h)(4)(iii)(A) must therefore be read as stating additional requirements that a position must meet, supplementing the statutory and regulatory definitions of specialty occupation.

Consonant with section 214(i)(1) of the Act and the regulation at 8 C.F.R. § 214.2(h)(4)(ii), USCIS consistently interprets the term “degree” in the criteria at 8 C.F.R. § 214.2(h)(4)(iii)(A) to mean not just any baccalaureate or higher degree, but one in a specific specialty that is directly related to the proffered position. Applying this standard, USCIS regularly approves H-1B petitions for qualified aliens who are to be employed as engineers, computer scientists, certified public accountants, college professors, and other such occupations. These professions, for which petitioners have regularly been able to establish a minimum entry requirement in the United States of a baccalaureate or higher degree in a specific specialty, or its equivalent, fairly represent the types of specialty occupations that Congress contemplated when it created the H-1B visa category.

We note that, as recognized by the court in *Defensor v. Meissner*, 201 F.3d at 387, where the work is to be performed for entities other than the petitioner, evidence of the client companies’ job requirements is critical. The court held that the legacy Immigration and Naturalization Service had reasonably interpreted the statute and regulations as requiring the petitioner to produce evidence

that a proffered position qualifies as a specialty occupation on the basis of the requirements imposed by the entities using the beneficiary's services. *Id.* at 387-388. Such evidence must be sufficiently detailed to demonstrate the type and educational level of highly specialized knowledge in a specific discipline that is necessary to perform that particular work. Despite the assertions of counsel and the petitioner that the beneficiary would spend her time working on an internal e-learning project, the record also contains voluminous statements from the petitioner indicating that such would not actually be the case and, as discussed above, the record of proceedings lacks substantive evidence from any end-user entities that may generate work for the beneficiary and whose business needs would ultimately determine what the beneficiary would actually do on a day-to-day basis. In short, the petitioner has failed to establish the existence of H-1B caliber work for the beneficiary.

Moreover, even if the petitioner had demonstrated, which it did not, that the beneficiary would work on an internal e-learning project for the duration of the petition, it still would have failed to demonstrate that its proposed position is a specialty occupation.

We recognize the U.S. Department of Labor's *Occupational Outlook Handbook (Handbook)* as an authoritative source on the duties and educational requirements of the wide variety of occupations that it addresses. The petitioner refers to its proposed position as both a computer analyst and a programmer analyst. These two occupational categories are addressed in two chapters of the *Handbook*: (1) "Computer Software Engineers and Computer Programmers"; and (2) "Computer Systems Analysts."

The *Handbook* describes computer programmers as follows:

[C]omputer programmers write programs. After computer software engineers and systems analysts design software programs, the programmer converts that design into a logical series of instructions that the computer can follow (A section on computer systems analysts appears elsewhere in the *Handbook*). The programmer codes these instructions in any of a number of programming languages, depending on the need. The most common languages are C++ and Python.

Computer programmers also update, repair, modify, and expand existing programs. Some, especially those working on large projects that involve many programmers, use computer-assisted software engineering (CASE) tools to automate much of the coding process. These tools enable a programmer to concentrate on writing the unique parts of a program. Programmers working on smaller projects often use "programmer environments," applications that increase productivity by combining compiling, code walk-through, code generation, test data generation, and debugging functions. Programmers also use libraries of basic code that can be modified or customized for a specific application. This approach yields more reliable and consistent programs and increases programmers' productivity by eliminating some routine steps.

As software design has continued to advance, and some programming functions have become automated, programmers have begun to assume some of the responsibilities

that were once performed only by software engineers. As a result, some computer programmers now assist software engineers in identifying user needs and designing certain parts of computer programs, as well as other functions. . . .

* * *

[M]any programmers require a bachelor's degree, but a 2-year degree or certificate may be adequate for some positions. Some computer programmers hold a college degree in computer science, mathematics, or information systems, whereas others have taken special courses in computer programming to supplement their degree in a field such as accounting, finance, or another area of business. . . .

Handbook, 2010-11 ed., available at <http://www.bls.gov/oco/ocos303.htm> (last accessed September 21, 2011). The *Handbook's* section on computer systems analysts reads, in pertinent part:

In some organizations, programmer-analysts design and update the software that runs a computer. They also create custom applications tailored to their organization's tasks. Because they are responsible for both programming and systems analysis, these workers must be proficient in both areas. (A separate section on computer software engineers and computer programmers appears elsewhere in the *Handbook*.) As this dual proficiency becomes more common, analysts are increasingly working with databases, object-oriented programming languages, client-server applications, and multimedia and Internet technology.

* * *

[W]hen hiring computer systems analysts, employers usually prefer applicants who have at least a bachelor's degree. For more technically complex jobs, people with graduate degrees are preferred. For jobs in a technical or scientific environment, employers often seek applicants who have at least a bachelor's degree in a technical field, such as computer science, information science, applied mathematics, engineering, or the physical sciences. For jobs in a business environment, employers often seek applicants with at least a bachelor's degree in a business-related field such as management information systems (MIS). Increasingly, employers are seeking individuals who have a master's degree in business administration (MBA) with a concentration in information systems.

Despite the preference for technical degrees, however, people who have degrees in other areas may find employment as systems analysts if they also have technical skills. Courses in computer science or related subjects combined with practical experience can qualify people for some jobs in the occupation. . . .

Id. at <http://www.bls.gov/oco/ocos287.htm>. This information from the *Handbook* does not indicate that positions such as the one proposed by the petitioner normally require at least a bachelor's degree or its equivalent in a specific specialty. While the *Handbook* indicates that a bachelor's degree level of education in a specific specialty may be preferred for particular positions, the generically described position duties proposed for the beneficiary do not demonstrate a requirement for the theoretical and practical application of highly specialized computer-related knowledge.

As the *Handbook* indicates no specific degree requirement for employment in this occupational field, and as it is not self-evident that, as described in the record of proceeding, the proposed duties comprise a position for which the normal entry requirement would be at least a bachelor's degree, or its equivalent, in a specific specialty, we conclude that the performance of the proposed position's duties does not require the beneficiary to hold a baccalaureate or higher degree in a specific specialty. Accordingly, we find that the petitioner has not established its proposed position as a specialty occupation under the requirements of the first criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A).

Next, we find that the petitioner has not satisfied the first of the two alternative prongs of 8 C.F.R. § 214.2(h)(4)(iii)(A)(2). This prong alternatively requires a petitioner to establish that a bachelor's degree, in a specific specialty, is common to the petitioner's industry in positions that are both: (1) parallel to the proffered position; and (2) located in organizations that are similar to the petitioner.

In determining whether there is such a common degree requirement, factors often considered by USCIS include: whether the *Handbook* reports that the industry requires a degree; whether the industry's professional association has made a degree a minimum entry requirement; and whether letters or affidavits from firms or individuals in the industry attest that such firms "routinely employ and recruit only degreed individuals." See *Shanti, Inc. v. Reno*, 36 F. Supp. 2d 1151, 1165 (D.Minn. 1999) (quoting *Hird/Blaker Corp. v. Sava*, 712 F. Supp. 1095, 1102 (S.D.N.Y. 1989)).

As already discussed, the petitioner has not established that its proposed position is one for which the *Handbook* reports an industry-wide requirement for at least a bachelor's degree in a specific specialty. Further, the petitioner did not submit documentation to establish that similar firms routinely require at least a bachelor's degree in a specific specialty.

The petitioner also failed to satisfy the second alternative prong of 8 C.F.R. § 214.2(h)(4)(iii)(A)(2), which provides that "an employer may show that its particular position is so complex or unique that it can be performed only by an individual with a degree." The evidence of record does not refute the *Handbook's* information to the effect that a bachelor's degree is not required in a specific specialty. The record lacks sufficiently detailed information to distinguish the proffered position as unique from or more complex than similar positions that can be performed by persons without a specialty degree or its equivalent.

No evidence was provided that the petitioner has a prior history of recruiting and hiring for the proffered position only persons with at least a bachelor's degree in a specific specialty. Therefore, the petitioner has not satisfied the third criterion of 8 C.F.R. § 214.2(h)(4)(iii)(A).

The fourth criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A) requires a petitioner to establish that the nature of its position's duties is so specialized and complex that the knowledge required to perform them is usually associated with the attainment of a baccalaureate or higher degree. We find that the evidence in the record of proceeding does not support the proposition that the performance of the proposed duties requires a higher degree of IT/computer knowledge than would normally be

required of analysts not equipped with at least a bachelor's degree, or its equivalent, in a specific specialty. The AAO, therefore, concludes that the proposed position has not been established as a specialty occupation under the requirements at 8 C.F.R. § 214.2(h)(4)(iii)(A)(4).

The proposed position does not qualify for classification as a specialty occupation under any of the criteria set forth at 8 C.F.R. §§ 214.2(h)(4)(iii)(A)(1), (2), (3), and (4), and this petition was properly denied.

The Petitioner Has Not Established That It Will Be the Beneficiary's Employer or Agent

Beyond the decision of the director, we find additionally that the petitioner has failed to establish that it will be the beneficiary's employer or agent. Under the test of *Nationwide Mutual Ins. Co. v. Darden (Darden)*, 503 U.S. 318, 322-323 (1992) (hereinafter "*Darden*"), the United States Supreme Court has determined that where federal law fails to clearly define the term "employee," courts should conclude that the term was "intended to describe the conventional master-servant relationship as understood by common-law agency doctrine." *Darden*, 503 U.S. 318 at 322-323 (quoting *Community for Creative Non-Violence v. Reid*, 490 U.S. 730 (1989)). The Supreme Court stated the following:

In determining whether a hired party is an employee under the general common law of agency, we consider the hiring party's right to control the manner and means by which the product is accomplished. Among the other factors relevant to this inquiry are the skill required; the source of the instrumentalities and tools; the location of the work; the duration of the relationship between the parties; whether the hiring party has the right to assign additional projects to the hired party; the extent of the hired party's discretion over when and how long to work; the method of payment; the hired party's role in hiring and paying assistants; whether the work is part of the regular business of the hiring party; whether the hiring party is in business; the provision of employee benefits; and the tax treatment of the hired party.

Darden, 503 U.S. at 323-324 (quoting *Community for Creative Non-Violence v. Reid*, 490 U.S. at 751-752); see also *Clackamas Gastroenterology Associates, P.C. v. Wells*, 538 U.S. at 440 (hereinafter "*Clackamas*"). As the common-law test contains "no shorthand formula or magic phrase that can be applied to find the answer, . . . all of the incidents of the relationship must be assessed and weighed with no one factor being decisive." *Darden*, 503 U.S. at 324 (quoting *NLRB v. United Ins. Co. of America*, 390 U.S. 254, 258 (1968)).²

² While the *Darden* court considered only the definition of "employee" under the Employee Retirement Income Security Act of 1974 ("ERISA"), 29 U.S.C. § 1002(6), and did not address the definition of "employer," courts have generally refused to extend the common law agency definition to ERISA's use of employer because "the definition of 'employer' in ERISA, unlike the definition of 'employee,' clearly indicates legislative intent to extend the definition beyond the traditional common law definition." See, e.g., *Bowers v. Andrew Weir Shipping, Ltd.*, 810 F. Supp. 522 (S.D.N.Y. 1992), *aff'd*, 27 F.3d 800 (2nd Cir. 1994), *cert. denied*, 513 U.S. 1000 (1994). However, in this matter, the Act does not exhibit a legislative intent to extend the definition of "employer" in section 101(a)(15)(H)(i)(b) of the Act, "employment" in section 212(n)(1)(A)(i) of the Act, or "employee" in section 212(n)(2)(C)(vii) of the Act

Therefore, in considering whether or not one is an “employee” in an “employer-employee relationship” with a “United States employer” for purposes of H-1B nonimmigrant petitions, USCIS must focus on the common-law touchstone of “control.” *Clackamas*, 538 U.S. at 450; *see also* 8 C.F.R. § 214.2(h)(4)(ii)(2) (defining a “United States employer” as one who “has an employer-employee relationship with respect to employees under this part, as indicated by the fact that it may hire, pay, fire, supervise, or otherwise *control* the work of any such employee” (emphasis added)).

Factors indicating that a worker is or will be an “employee” of an “employer” are clearly delineated in both the *Darden* and *Clackamas* decisions. 503 U.S. at 323-324; *see also* *Restatement (Second) of Agency* § 220(2) (1958). Such indicia of control include when, where, and how a worker performs the job; the continuity of the worker’s relationship with the employer; the tax treatment of the worker; the provision of employee benefits; and whether the work performed by the worker is part of the employer’s regular business. *See Clackamas*, 538 U.S. at 448-449; *cf. New Compliance Manual*, Equal Employment Opportunity Commission, § 2-III(A)(1), (EEOC 2006) (adopting a materially identical test and indicating that said test was based on the *Darden* decision).

It is important to note that the factors listed in *Darden* and *Clackamas* are not exhaustive and must be evaluated on a case-by-case basis. Other aspects of the relationship between the parties may affect the determination of whether an employer-employee relationship exists. Furthermore, not all or even a majority of the listed criteria need be met; however, the fact finder must weigh and compare a combination of the factors in analyzing the facts of each individual case. The

beyond the traditional common law definitions. Instead, in the context of the H-1B visa classification, the term “United States employer” was defined in the regulations to be even more restrictive than the common law agency definition. A federal agency’s interpretation of a statute whose administration is entrusted to it is to be accepted unless Congress has spoken directly on the issue. *See Chevron, U.S.A., Inc. v. Natural Resources Defense Council, Inc.*, 467 U.S. 837, 844-845 (1984).

The regulatory definition of “United States employer” requires H-1B employers to have a tax identification number, to employ persons in the United States, *and* to have an “employer-employee relationship” with the H-1B “employee.” 8 C.F.R. § 214.2(h)(4)(ii). Accordingly, the term “United States employer” not only requires H-1B employers and employees to have an “employer-employee relationship” as understood by common-law agency doctrine, it imposes additional requirements of having a tax identification number and to employ persons in the United States. The lack of an express expansion of the definition regarding the terms “employee,” “employed,” “employment” or “employer-employee relationship” indicates that the regulations do not intend to extend the definition beyond “the traditional common law definition.” Therefore, in the absence of an intent to impose broader definitions by either Congress or USCIS, the “conventional master-servant relationship as understood by common-law agency doctrine,” and the *Darden* construction test, apply to the terms “employee,” “employer-employee relationship,” “employed,” and “employment” as used in section 101(a)(15)(H)(i)(b) of the Act, section 212(n) of the Act, and 8 C.F.R. § 214.2(h). That being said, there are instances in the Act where Congress may have intended a broader application of the term “employer” than what is encompassed in the conventional master-servant relationship. *See, e.g.*, section 214(c)(2)(F) of the Act, 8 U.S.C. § 1184(c)(2)(F) (referring to “unaffiliated employers” supervising and controlling L-1B intracompany transferees having specialized knowledge); section 274A of the Act, 8 U.S.C. § 1324a (referring to the employment of unauthorized aliens).

determination must be based on all of the circumstances in the relationship between the parties, regardless of whether the parties refer to it as an employee or as an independent contractor relationship. *See Clackamas*, 538 U.S. at 448-449; *New Compliance Manual* at § 2-III(A)(1).³

Applying the *Darden* test to this matter, the petitioner has not established that it will be a “United States employer” having an “employer-employee relationship” with the beneficiary as an H-1B temporary “employee.” Under *Defensor*, it was determined that hospitals, as the recipients of beneficiaries’ services, are the “true employers” of H-1B nurses under 8 C.F.R. § 214.2(h), even though a medical contract service agency is the actual petitioner, because the hospitals ultimately hire, pay, fire, supervise, or otherwise control the work of the beneficiaries. *See Defensor v. Meissner*, 201 F.3d at 388.

The evidence of record is insufficient to establish that a credible offer of employment existed between the petitioner and the beneficiary at the time the petition was filed. We note that the petitioner is engaged in an industry that typically outsources its personnel to client sites to work on particular projects. Although the materials submitted at the time the petition was filed and in response to the director’s NOIR do set forth certain duties proposed for the beneficiary, there is no information from any of the end-user clients of the petitioner, for whom the beneficiary would actually be providing services, describing the duties that she would perform for them. Although the petitioner’s president stated in his August 23, 2010 letter that the beneficiary would work on the internal e-learning project, his March 27, 2008 letter, his January 15, 2010 letter, and the August 8, 2009 employment agreement, as well as portions of his August 23, 2010 letter, all indicate that the beneficiary would actually be performing services for “end user firms” as arranged by an “intermediary agent.” It has not been established that the beneficiary will be “controlled” by the petitioner. Going on record without supporting documentary evidence is not sufficient for purposes of meeting the burden of proof in these proceedings. *Matter of Soffici*, 22 I&N Dec. 158, 165 (Comm. 1998) (citing *Matter of Treasure Craft of California*, 14 I&N Dec. 190 (Reg. Comm. 1972)).

Furthermore, absent documentation such as purchase orders, statements of work, or contracts between the ultimate end-user clients and the beneficiary, the petitioner cannot alternatively be considered an agent in this matter. The definition of agent at 8 C.F.R. § 214.2(h)(2)(i)(F) provides for two types of agents: (1) “an agent performing the function of an employer”; and (2) “a company in the business as an agent involving multiple employers as the representative of both the employers and the beneficiary.” Again, absent such documentation, the petitioner cannot be considered an agent.

³ When examining the factors relevant to determining control, USCIS must assess and weigh each actual factor itself as it exists or will exist and not the claimed employer’s right to influence or change that factor, unless specifically provided for by the common-law test. *See Darden*, 503 U.S. at 323-324. For example, while the assignment of additional projects is dependent on who has the *right to* assign them, it is the *actual* source of the instrumentalities and tools that must be examined, not who has the *right to* provide the tools required to complete an assigned project. *See id.* at 323.

In view of the above, it appears that the beneficiary will not be an "employee" having an "employer-employee relationship" with the petitioner or even with a "United States employer" represented by the petitioner in a documented agent relationship. It has not been established that the beneficiary will be "controlled" by the petitioner or that the termination of the beneficiary's employment is the ultimate decision of the petitioner. Therefore, based on the tests outlined above, the petitioner has not established that it will be a "United States employer" having an "employer-employee relationship" with the beneficiary as an H-1B temporary "employee." 8 C.F.R. § 214.2(h)(4)(ii). For this additional reason, the petition may not be approved.

The Beneficiary Does Not Qualify to Perform the Duties of a Specialty Occupation

Beyond the decision of the director we find additionally that the petition may not be approved because the petitioner has failed to demonstrate that the beneficiary is qualified to perform the duties of a specialty occupation. Pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(C), in order to qualify to perform services in a specialty occupation, an alien must meet one of the following criteria:

- (1) Hold a United States baccalaureate or higher degree required by the specialty occupation from an accredited college or university;
- (2) Hold a foreign degree determined to be equivalent to a United States baccalaureate or higher degree required by the specialty occupation from an accredited college or university;
- (3) Hold an unrestricted state license, registration or certification which authorizes him or her to fully practice the specialty occupation and be immediately engaged in that specialty in the state of intended employment; or
- (4) Have education, specialized training, and/or progressively responsible experience that is equivalent to completion of a United States baccalaureate or higher degree in the specialty occupation, and have recognition of expertise in the specialty through progressively responsible positions directly related to the specialty.

As the beneficiary did not earn a baccalaureate or higher degree from an accredited college or university in the United States, she does not qualify to perform the duties of a specialty occupation under 8 C.F.R. § 214.2(h)(4)(iii)(C)(1). As she does not possess a foreign degree that has been determined to be equivalent to a baccalaureate or higher degree from an accredited college or university in the United States, she does not qualify to perform the duties of a specialty occupation under 8 C.F.R. § 214.2(h)(4)(iii)(C)(2). As the petitioner has not demonstrated that the beneficiary holds an unrestricted state license, registration or certification to perform the duties of a specialty occupation, she does not qualify to perform the duties of a specialty occupation under 8 C.F.R. § 214.2(h)(4)(iii)(C)(3).

Nor has the petitioner established that the beneficiary qualifies to perform the duties of a specialty occupation under 8 C.F.R. § 214.2(h)(4)(iii)(C)(4), which requires a demonstration that the

beneficiary's education, specialized training, and/or progressively responsible experience is equivalent to the completion of a United States baccalaureate or higher degree in the specialty occupation, and that the beneficiary also has recognition of that expertise in the specialty through progressively responsible positions directly related to the specialty. Pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(D), equating a beneficiary's credentials to a United States baccalaureate or higher degree under 8 C.F.R. § 214.2(h)(4)(iii)(C)(4) is determined by at least one of the following:

- (1) An evaluation from an official who has authority to grant college-level credit for training and/or experience in the specialty at an accredited college or university which has a program for granting such credit based on an individual's training and/or work experience;
- (2) The results of recognized college-level equivalency examinations or special credit programs, such as the College Level Examination Program (CLEP), or Program on Noncollegiate Sponsored Instruction (PONSI);
- (3) An evaluation of education by a reliable credentials evaluation service which specializes in evaluating foreign educational credentials;
- (4) Evidence of certification or registration from a nationally-recognized professional association or society for the specialty that is known to grant certification or registration to persons in the occupational specialty who have achieved a certain level of competence in the specialty;
- (5) A determination by the Service that the equivalent of the degree required by the specialty occupation has been acquired through a combination of education, specialized training, and/or work experience in areas related to the specialty and that the alien has achieved recognition of expertise in the specialty occupation as a result of such training and experience.

No evidence has been submitted to establish that the beneficiary qualifies under 8 C.F.R. § 214.2(h)(4)(iii)(D)(1), which requires that the petitioner submit an evaluation of the beneficiary's work experience from an individual with the authority to grant college-level credit for training and/or experience in the specialty at an accredited college or university which has a program for granting such credit based on an individual's training and/or work experience.

No evidence has been submitted to establish, nor does the petitioner assert, that the beneficiary satisfies 8 C.F.R. § 214.2(h)(4)(iii)(D)(2), which requires that the beneficiary submit the results of recognized college-level equivalency examinations or special credit programs, such as the College Level Examination Program (CLEP), or Program on Noncollegiate Sponsored Instruction (PONSI).

Nor does the beneficiary qualify under 8 C.F.R. § 214.2(h)(4)(iii)(D)(3). As was the case under 8 C.F.R. §§ 214.2(h)(4)(iii)(C)(1) and (2), the beneficiary is unqualified under this criterion because she did not earn a baccalaureate or higher degree from an accredited college or university in the

United States and does not possess a foreign degree that has been determined to be equivalent to a baccalaureate or higher degree from an accredited college or university in the United States.

No evidence has been submitted to establish, nor does the petitioner assert, that the beneficiary satisfies 8 C.F.R. § 214.2(h)(4)(iii)(D)(4), which requires that the beneficiary submit evidence of certification or registration from a nationally-recognized professional association or society for the specialty that is known to grant certification or registration to persons in the occupational specialty who have achieved a certain level of competence in the specialty.

The regulation at 8 C.F.R. § 214.2(h)(4)(iii)(D)(5) states the following with regard to analyzing an alien's qualifications:

For purposes of determining equivalency to a baccalaureate degree in the specialty, three years of specialized training and/or work experience must be demonstrated for each year of college-level training the alien lacks. . . . It must be clearly demonstrated that the alien's training and/or work experience included the theoretical and practical application of specialized knowledge required by the specialty occupation; that the alien's experience was gained while working with peers, supervisors, or subordinates who have a degree or its equivalent in the specialty occupation; and that the alien has recognition of expertise in the specialty evidenced by at least one type of documentation such as:

- (i) Recognition of expertise in the specialty occupation by at least two recognized authorities in the same specialty occupation;⁴
- (ii) Membership in a recognized foreign or United States association or society in the specialty occupation;
- (iii) Published material by or about the alien in professional publications, trade journals, books, or major newspapers;
- (iv) Licensure or registration to practice the specialty occupation in a foreign country; or
- (v) Achievements which a recognized authority has determined to be significant contributions to the field of the specialty occupation.

⁴ *Recognized authority* means a person or organization with expertise in a particular field, special skills or knowledge in that field, and the expertise to render the type of opinion requested. A recognized authority's opinion must state: (1) the writer's qualifications as an expert; (2) the writer's experience giving such opinions, citing specific instances where past opinions have been accepted as authoritative and by whom; (3) how the conclusions were reached; and (4) the basis for the conclusions supported by copies or citations of any research material used. See 8 C.F.R. § 214.2(h)(4)(ii).

Although the record contains some evidence regarding the beneficiary's work history, it does not establish that this work experience included the theoretical and practical application of specialized knowledge required by the proposed position; that it was gained while working with peers, supervisors, or subordinates who held a bachelor's degree or its equivalent in the field; and that the beneficiary achieved recognition of expertise in the field as evidenced by at least one of the five types of documentation delineated in 8 C.F.R. §§ 214.2(h)(4)(iii)(D)(5)(i)-(v).

Accordingly, the beneficiary does not qualify under any of the criteria set forth at 8 C.F.R. §§ 214.2(h)(4)(iii)(D)(5)(i)-(v) and therefore does not qualify to perform the duties of a specialty occupation under 8 C.F.R. § 214.2(h)(4)(iii)(C)(4). As such, the petitioner has failed to establish that the beneficiary qualifies to perform the duties of a specialty occupation. For this additional reason, the petition may not be approved.

Conclusion

The petitioner has failed to demonstrate that the proposed position qualifies for classification as a specialty occupation. Beyond the decision of the director, the petitioner has also failed to demonstrate that it qualifies as a U.S. employer or agent or that the beneficiary is qualified to perform the duties of a specialty occupation.⁵ Accordingly, the beneficiary is ineligible for nonimmigrant classification under section 101(a)(15)(H)(i)(b) of the Act and approval of this petition must remain revoked.

Approval of the petition will remain revoked and the appeal dismissed for the above stated reasons, with each considered as an independent and alternative basis for the decision. In visa petition proceedings, the burden of proving eligibility for the benefit sought remains entirely with the petitioner. Section 291 of the Act, 8 U.S.C. § 1361. Here, that burden has not been met and the appeal will be dismissed.

ORDER: The appeal is dismissed.

⁵ An application or petition that fails to comply with the technical requirements of the law may be denied by the AAO even if the Service Center does not identify all of the grounds for denial in the initial decision. See *Spencer Enterprises, Inc. v. United States*, 229 F. Supp. 2d 1025, 1043 (E.D. Cal. 2001), *aff'd*, 345 F.3d 683 (9th Cir. 2003); see also *Soltane v. DOJ, Supra* (noting that the AAO conducts appellate review on a *de novo* basis).
