[Redacted]

PETITION:

Petition for a Nonimmigrant Worker Pursuant to Section 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act, 8 U.S.C. § 1101(a)(15)(H)(i)(b)

ON BEHALF OF PETITIONER:

[Redacted]

INSTRUCTIONS:

Enclosed please find the decision of the Administrative Appeals Office (AAO) in your case.

This is a non-precedent decision. The AAO does not announce new constructions of law nor establish agency policy through non-precedent decisions. If you believe the AAO incorrectly applied current law or policy to your case or if you seek to present new facts for consideration, you may file a motion to reconsider or a motion to reopen, respectively. Any motion must be filed on a Notice of Appeal or Motion (Form I-290B) within 33 days of the date of this decision. **Please review the Form I-290B instructions at <http://www.uscis.gov/forms> for the latest information on fee, filing location, and other requirements. See also 8 C.F.R. § 103.5. Do not file a motion directly with the AAO.**

Thank you,

Ron Rosenberg
Chief, Administrative Appeals Office

DISCUSSION: The service center director denied the nonimmigrant visa petition. The matter is now on appeal before the Administrative Appeals Office (AAO). The appeal will be dismissed.

On the Form I-129, Petition for a Nonimmigrant Worker, the petitioner describes itself as an information technology (IT) consulting firm established in [REDACTED]. In order to employ the beneficiary in what it designates as a programmer analyst position, the petitioner seeks to classify him as a nonimmigrant worker in a specialty occupation pursuant to section 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act (the Act), 8 U.S.C. § 1101(a)(15)(H)(i)(b).

The director denied the petition, finding that the petitioner failed to establish eligibility at the time of filing. Specifically, the director stated that the "petition fails to meet the requirements of 8 CFR 103.2(b) in that the evidence does not establish the availability of specialty occupation work as a programmer analyst at the time the Form I-129 petition was filed." On appeal, counsel for the petitioner asserts that the director's basis for denial of the petition was erroneous and contends that the petitioner satisfied all evidentiary requirements.

The record of proceeding before us contains: (1) the Form I-129 and supporting documentation; (2) the director's request for evidence (RFE); (3) counsel's response to the RFE; (4) the notice of decision; and (5) the Form I-290B, Notice of Appeal or Motion. We reviewed the record in its entirety before issuing our decision.¹

For the reasons that will be discussed below, we agree with the director that the petitioner has not established eligibility for the benefit sought. Accordingly, the director's decision will not be disturbed. The appeal will be dismissed.

I. FACTUAL AND PROCEDURAL HISTORY

In the Form I-129 petition, the petitioner indicated that it wishes to employ the beneficiary as a programmer analyst on a full-time basis. In the letter of support, the petitioner described the beneficiary's duties and responsibilities in the proffered position as follows:

The beneficiary's duties and responsibilities in our organization, generally, will include developing, creating, and modifying computer applications software or specialized utility programs in (a) Linux, HTML and related tools, Erwin and MF Cobol; (b) SQL DBA, Unix Administration; (c) Oracle Tools, J2EE and related technologies; (d) BDF, CORBA, MQSeries and related tools; (e) SQL, Netview and Guantlet Firewall; (f) PeopleSoft HRMS (HR, payroll, and benefits administration); and (g) Java, C++, Solaris and related tools. The beneficiary will analyze the needs of our clients, and develop software solutions.

A breakdown of the percentage of time the beneficiary will generally spend on duties includes:

¹ We conduct appellate review on a *de novo* basis. See *Soltane v. DOJ*, 381 F.3d 143, 145 (3d Cir. 2004).

- Providing solutions for coding requirements for the project involving C++, SQL, and Java frameworks. This will include system-wide testing and debugging the programming for use in company's IT database – 30% of employees time
- Writing and reviewing technical specifications for web technologies (HTML, XML, JSP, and JavaScript) as well as modifying programming code to correct errors in the aforementioned technologies – 25%
- Development of new user specifications for IT databases, communication systems, hardware, network security, storage and ETL solutions software configuration – 25%
- Design and develop data file interfaces based on hardware analysis documents and enhance user operational feasibility of programming by providing coding documentation for both the company and end-clients – 20%

In addition, the petitioner claimed that the proffered position required a bachelor's degree in computer science, or a related field.

The petitioner also submitted a Labor Condition Application (LCA) in support of the instant H-1B petition. The LCA designation for the proffered position corresponds to the occupational classification of "Computer Programmers" - SOC (ONET/OES Code) 15-1131, at a Level I (entry level) wage.

In support of the petition, the petitioner also submitted, in part: (1) an offer of employment letter, executed on March 21, 2013; (2) a document regarding its in house project entitled "Enterprise Level Schedule Maintenance System (ELSM-S)"; and (3) its 2012 income tax return.

The director found the initial evidence insufficient to establish eligibility for the benefit sought and issued an RFE. The director outlined the specific evidence to be submitted. Counsel responded to the request and provided additional supporting evidence, including agreements between the petitioner and several companies and a document entitled "Systems Requirements Specifications for [the petitioner]."

The director reviewed the documentation and found it insufficient to establish eligibility for the benefit sought. The director denied the petition on January 28, 2014. Counsel submitted an appeal of the denial of the H-1B petition.²

II. REVIEW OF THE DIRECTOR'S DECISION

Specialty Occupation

For an H-1B petition to be granted, the petitioner must provide sufficient evidence to establish that it will employ the beneficiary in a specialty occupation position. To meet its burden of proof in this regard, the petitioner must establish that the employment it is offering to the beneficiary meets the

² We observe that on the Notice of Appeal or Motion (Form I-290B), counsel checked Box B in Part 3 of the form to indicate that she was filing an appeal and would send a brief and/or additional evidence within 30 days. However, we have not received the submission within the allotted timeframe or thereafter. Accordingly, the record of proceeding is deemed complete as currently constituted.

applicable statutory and regulatory requirements.

Section 214(i)(1) of the Act, 8 U.S.C. § 1184(i)(1), defines the term "specialty occupation" as an occupation that requires:

- (A) theoretical and practical application of a body of highly specialized knowledge, and
- (B) attainment of a bachelor's or higher degree in the specific specialty (or its equivalent) as a minimum for entry into the occupation in the United States.

The regulation at 8 C.F.R. § 214.2(h)(4)(ii) states, in pertinent part, the following:

Specialty occupation means an occupation which [(1)] requires theoretical and practical application of a body of highly specialized knowledge in fields of human endeavor including, but not limited to, architecture, engineering, mathematics, physical sciences, social sciences, medicine and health, education, business specialties, accounting, law, theology, and the arts, and which [(2)] requires the attainment of a bachelor's degree or higher in a specific specialty, or its equivalent, as a minimum for entry into the occupation in the United States.

Pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(A), to qualify as a specialty occupation, a proposed position must also meet one of the following criteria:

- (1) A baccalaureate or higher degree or its equivalent is normally the minimum requirement for entry into the particular position;
- (2) The degree requirement is common to the industry in parallel positions among similar organizations or, in the alternative, an employer may show that its particular position is so complex or unique that it can be performed only by an individual with a degree;
- (3) The employer normally requires a degree or its equivalent for the position; or
- (4) The nature of the specific duties [is] so specialized and complex that knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

As a threshold issue, it is noted that 8 C.F.R. § 214.2(h)(4)(iii)(A) must logically be read together with section 214(i)(1) of the Act and 8 C.F.R. § 214.2(h)(4)(ii). In other words, this regulatory language must be construed in harmony with the thrust of the related provisions and with the statute as a whole. *See K Mart Corp. v. Cartier, Inc.*, 486 U.S. 281, 291 (1988) (holding that construction of language which takes into account the design of the statute as a whole is preferred); *see also COIT Independence Joint Venture v. Federal Sav. and Loan Ins. Corp.*, 489 U.S. 561 (1989); *Matter of W-F-*, 21 I&N Dec. 503 (BIA 1996). As such, the criteria stated in 8 C.F.R. § 214.2(h)(4)(iii)(A) should logically be read as being necessary but not necessarily sufficient to meet the statutory and regulatory definition of

specialty occupation. To otherwise interpret this section as stating the necessary *and* sufficient conditions for meeting the definition of specialty occupation would result in particular positions meeting a condition under 8 C.F.R. § 214.2(h)(4)(iii)(A) but not the statutory or regulatory definition. *See Defensor v. Meissner*, 201 F.3d 384, 387 (5th Cir. 2000). To avoid this illogical and absurd result, 8 C.F.R. § 214.2(h)(4)(iii)(A) must therefore be read as providing supplemental criteria that must be met in accordance with, and not as alternatives to, the statutory and regulatory definitions of specialty occupation.

As such and consonant with section 214(i)(1) of the Act and the regulation at 8 C.F.R. § 214.2(h)(4)(ii), the U.S. Citizenship and Immigration Services (USCIS) consistently interprets the term "degree" in the criteria at 8 C.F.R. § 214.2(h)(4)(iii)(A) to mean not just any baccalaureate or higher degree, but one in a specific specialty that is directly related to the proffered position. *See Royal Siam Corp. v. Chertoff*, 484 F.3d 139, 147 (1st Cir. 2007) (describing "a degree requirement in a specific specialty" as "one that relates directly to the duties and responsibilities of a particular position"). Applying this standard, USCIS regularly approves H-1B petitions for qualified aliens who are to be employed as engineers, computer scientists, certified public accountants, college professors, and other such occupations. These professions, for which petitioners have regularly been able to establish a minimum entry requirement in the United States of a baccalaureate or higher degree in a specific specialty or its equivalent directly related to the duties and responsibilities of the particular position, fairly represent the types of specialty occupations that Congress contemplated when it created the H-1B visa category.

To determine whether a particular job qualifies as a specialty occupation, USCIS does not simply rely on a position's title. The specific duties of the proffered position, combined with the nature of the petitioning entity's business operations, are factors to be considered. USCIS must examine the ultimate employment of the alien, and determine whether the position qualifies as a specialty occupation. *See generally Defensor v. Meissner*, 201 F. 3d 384. The critical element is not the title of the position nor an employer's self-imposed standards, but whether the position actually requires the theoretical and practical application of a body of highly specialized knowledge, and the attainment of a baccalaureate or higher degree in the specific specialty as the minimum for entry into the occupation, as required by the Act.

As a preliminary matter, we note that with the initial petition, the petitioner claimed that the beneficiary would work on an in house project entitled "Enterprise Level Schedule Maintenance System (ELSM-S)." However, in response to the director's RFE, counsel submitted a work order that indicates that the beneficiary will work on an in house project entitled [REDACTED] for [REDACTED]. No explanation for the variance was provided by the petitioner.

The petitioner in this matter provided a list of the beneficiary's proposed duties.³ As observed above,

³ With regard to the duties, we note that the petitioner designated the proffered position on the LCA under the occupational category "Computer Programmers" as a Level I (entry) position. The "Prevailing Wage Determination Policy Guidance" issued by DOL provides a description of the wage levels. A Level I wage rate is described by DOL as follows:

Level I (entry) wage rates are assigned to job offers for beginning level employees who have

USCIS in this matter must review the actual duties the beneficiary will be expected to perform to ascertain whether those duties require at least a baccalaureate degree in a specific specialty, or its equivalent, as required for classification as a specialty occupation. To accomplish that task in this matter, USCIS must analyze the actual duties in conjunction with the specific project(s) to which the beneficiary will be assigned. To allow otherwise, results in generic descriptions of duties that, while they may appear (in some instances) to comprise the duties of a specialty occupation, are not related to any actual services the beneficiary is expected to provide.

In that regard, we have reviewed the information in the record regarding the petitioner's IT consulting business. Upon review of this information, we find that the record of proceeding lacks documentation regarding the petitioner's business activities and the actual work that the beneficiary will perform to sufficiently substantiate the claim that the petitioner has H-1B caliber work for the beneficiary for the period of employment requested in the petition. That is, the record does not include sufficient work product or other documentary evidence to confirm that the petitioner has ongoing projects to which the beneficiary will be assigned. Thus, the petitioner has not provided the underlying documentation necessary to corroborate that the beneficiary would perform the claimed duties set out in the petitioner's letter of support. Going on record without supporting documentary evidence is not sufficient for purposes of meeting the burden of proof in these proceedings. *Matter of Soffici*, 22 I&N Dec. 158, 165 (Comm'r 1998) (citing *Matter of Treasure Craft of California*, 14 I&N Dec. 190 (Reg. Comm'r 1972)).

Furthermore, we note that the petitioner must establish eligibility at the time of filing the nonimmigrant visa petition. 8 C.F.R. § 103.2(b)(1). Evidence that the petitioner creates after the issuance of an RFE is not considered independent and objective evidence for establishing eligibility for the benefit sought.

The agency made clear long ago that speculative employment is not permitted in the H-1B program. For example, a 1998 proposed rule documented this position as follows:

Historically, the Service has not granted H-1B classification on the basis of speculative, or undetermined, prospective employment. The H-1B classification is not intended as a vehicle for an alien to engage in a job search within the United States, or for employers to bring in temporary foreign workers to meet possible workforce needs arising from potential business expansions or the expectation of potential new customers or contracts. To determine whether an alien is properly classifiable as an H-1B

only a basic understanding of the occupation. These employees perform routine tasks that require limited, if any, exercise of judgment. The tasks provide experience and familiarization with the employer's methods, practices, and programs. The employees may perform higher level work for training and developmental purposes. These employees work under close supervision and receive specific instructions on required tasks and results expected. Their work is closely monitored and reviewed for accuracy. Statements that the job offer is for a research fellow, a worker in training, or an internship are indicators that a Level I wage should be considered.

See U.S. Dep't of Labor, Emp't & Training Admin., *Prevailing Wage Determination Policy Guidance*, Nonagric. Immigration Programs (rev. Nov. 2009), available at http://www.foreignlaborcert.doleta.gov/pdf/NPWHC_Guidance_Revised_11_2009.pdf.

nonimmigrant under the statute, the Service must first examine the duties of the position to be occupied to ascertain whether the duties of the position require the attainment of a specific bachelor's degree. See section 214(i) of the Immigration and Nationality Act (the "Act"). The Service must then determine whether the alien has the appropriate degree for the occupation. In the case of speculative employment, the Service is unable to perform either part of this two-prong analysis and, therefore, is unable to adjudicate properly a request for H-1B classification. Moreover, there is no assurance that the alien will engage in a specialty occupation upon arrival in this country.

63 Fed. Reg. 30419, 30419 - 30420 (June 4, 1998).

Without statements of work describing the specific duties the petitioner requires the beneficiary to perform, as those duties relate to specific projects, USCIS is unable to discern the nature of the position and whether the position indeed qualifies as a specialty occupation. Without a meaningful job description within the context of non-speculative employment, the petitioner may not establish any of the alternate criteria at 8 C.F.R. § 214.2(h)(4)(iii)(A).

We acknowledge the petitioner's claim that the position of programmer analyst qualifies for H-1B classification; however, an assertion without supporting evidence is insufficient for a petitioner to satisfy its burden of proof. The petitioner's failure to establish the substantive nature of the work to be performed by the beneficiary precludes a finding that the proffered position is a specialty occupation under any criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A), because it is the substantive nature of that work that determines (1) the normal minimum educational requirement for the particular position, which is the focus of criterion 1; (2) industry positions which are parallel to the proffered position and thus appropriate for review for a common degree requirement, under the first alternate prong of criterion 2; (3) the level of complexity or uniqueness of the proffered position, which is the focus of the second alternate prong of criterion 2; (4) the factual justification for a petitioner normally requiring a degree or its equivalent, when that is an issue under criterion 3; and (5) the degree of specialization and complexity of the specific duties, which is the focus of criterion 4.

In the instant case, the petitioner submitted several documents in support of its petition, including an offer of employment letter, a document regarding its in house project entitled "Enterprise Level Schedule Maintenance System (ELSM-S)," its 2012 income tax return, a few client agreements, and a document entitled "Systems Requirements Specifications for [the petitioner]."⁴ However, the documents do not establish the substantive nature of the work to be performed by the beneficiary and that the proffered position qualifies as a specialty occupation.

Nevertheless, assuming, for the sake of argument that the proffered duties as described by the

⁴ We observe that in response to the director's RFE, counsel submitted a Master Services Agreement and work order between the petitioner and [REDACTED], however, they were executed after the director's RFE and thus do not pre-date the filing of the petition. Again, the petitioner must establish eligibility at the time of filing the nonimmigrant visa petition. 8 C.F.R. § 103.2(b)(1). A visa petition may not be approved at a future date after the petitioner or beneficiary becomes eligible under a new set of facts. *Matter of Michelin Tire Corp.*, 17 I&N Dec. 248 (Reg. Comm'r 1978).

petitioner would in fact be the duties to be performed by the beneficiary, we will analyze them and the evidence of record to determine whether the proffered position as described would qualify as a specialty occupation. To that end and to make our determination as to whether the employment described above qualifies as a specialty occupation, we turn to the criteria at 8 C.F.R. § 214.2(h)(4)(iii)(A).

We will first review the record of proceeding in relation to the criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A)(I), which requires that a baccalaureate or higher degree in a specific specialty, or its equivalent, is normally the minimum requirement for entry into the particular position.

We recognize the U.S. Department of Labor's (DOL's) *Occupational Outlook Handbook* (hereinafter the *Handbook*) as an authoritative source on the duties and educational requirements of the wide variety of occupations that it addresses.⁵ As previously discussed, the petitioner attested in the LCA that the proffered position falls under the occupational category "Computer Programmers."

We reviewed the chapter of the *Handbook* entitled "Computer Programmers," including the sections regarding the typical duties and requirements for this occupational category.⁶ However, the *Handbook* does not indicate that "Computer Programmers" comprise an occupational group for which normally the minimum requirement for entry is at least a bachelor's degree in a specific specialty, or its equivalent.

The subchapter of the *Handbook* entitled "How to Become a Computer Programmer" states the following about this occupation:

Education

Most computer programmers have a bachelor's degree; however, some employers hire workers who have an associate's degree. Most programmers get a degree in computer science or a related subject. Programmers who work in specific fields, such as healthcare or accounting, may take classes in that field to supplement their degree in computer programming. In addition, employers value experience, which many students gain through internships.

Most programmers learn only a few computer languages while in school. However, a computer science degree gives students the skills needed to learn new computer languages easily. During their classes, students receive hands-on experience writing code, debugging programs, and doing many other tasks that they will perform on the

⁵ The *Handbook*, which is available in printed form, may also be accessed on the Internet, at <http://www.stats.bls.gov/oco/>. Our references to the *Handbook* are to the 2014 – 2015 edition available online. We hereby incorporate into the record of proceeding the excerpt from the *Handbook* regarding the occupational category "Computer Programmers."

⁶ For additional information regarding the occupational category "Computer Programmers," see U.S. Dep't of Labor, Bureau of Labor Statistics, *Occupational Outlook Handbook*, 2014-15 ed., Computer Programmers, on the Internet at <http://www.bls.gov/ooh/computer-and-information-technology/computer-programmers.htm#tab-1> (last visited October 17, 2014).

job.

To keep up with changing technology, computer programmers may take continuing education and professional development seminars to learn new programming languages or about upgrades to programming languages they already know.

U.S. Dep't of Labor, Bureau of Labor Statistics, *Occupational Outlook Handbook*, 2014-15 ed., Computer Programmers, on the Internet at <http://www.bls.gov/ooh/computer-and-information-technology/computer-programmers.htm#tab-4> (last visited October 17, 2014).

When reviewing the *Handbook*, we must note again that the petitioner designated the proffered position under this occupational category at a Level I on the LCA. As previously discussed, this designation is indicative of a comparatively low, entry-level position relative to others within the occupation and signifies that the beneficiary is only expected to possess a basic understanding of the occupation and carries expectations that the beneficiary perform routine tasks that require limited, if any, exercise of judgment; that he would be closely supervised; that his work would be closely monitored and reviewed for accuracy; and that he would receive specific instructions on required tasks and expected results. Furthermore, he will receive specific instructions on required tasks and expected results. DOL guidance indicates that a Level I designation is appropriate for a research fellow, a worker in training, or an internship. This designation suggests that the beneficiary will not serve in a high-level or leadership position relative to others within the occupational category.

The *Handbook* does not support the assertion that at least a bachelor's degree in a specific specialty, or its equivalent, is normally the minimum requirement for entry into this occupation. Rather, the occupation accommodates a wide spectrum of educational credentials, including less than a bachelor's degree in a specific specialty. The *Handbook* states that some employers hire workers who have an associate's degree. Furthermore, while the *Handbook's* narrative indicates that most computer programmers obtain a degree (either a bachelor's degree or an associate's degree) in computer science or a related field, the *Handbook* does not report that at least a bachelor's degree in a specific specialty, or its equivalent, is normally the minimum requirement for entry into the occupation. The *Handbook* also reports that employers value computer programmers who possess experience, which can be obtained through internships.

The *Handbook* states that most computer programmers have a bachelor's degree, but the *Handbook* does not report that it is an occupational, entry requirement.⁷ The text suggests that a baccalaureate

⁷ It must be noted that "most" is not indicative that a particular position within the wide spectrum of computer programming jobs normally requires at least a bachelor's degree in a specific specialty, or its equivalent. For instance, the first definition of "most" in *Webster's New Collegiate College Dictionary* 731 (Third Edition, Hough Mifflin Harcourt 2008) is "[g]reatest in number, quantity, size, or degree." As such, if merely 51% of the positions require at least a bachelor's degree in specific specialty, it could be said that "most" of the positions require such a degree. It cannot be found, therefore, that a particular degree requirement for "most" positions in a given occupation equates to a normal minimum entry requirement for that occupation, much less for the particular position proffered by the petitioner. As previously mentioned, the proffered position has been designated by the petitioner in the LCA as a relatively low-level position relative to others within the occupation. Instead, a normal minimum entry requirement is one that denotes a standard entry requirement but

degree may be a preference among employers of computer programmers in some environments, but that some employers hire candidates with less than a bachelor's degree, including candidates that possess an associate's degree. The *Handbook* does not support the petitioner's claim that the proffered position falls under an occupational category for which normally the minimum requirement for entry is at a baccalaureate (or higher degree) in a specific specialty, or its equivalent.

In the instant case, the petitioner has not established that the proffered position falls under an occupational category for which the *Handbook* (or other objective, authoritative source) indicates that at least a bachelor's degree in a specific specialty, or its equivalent, is normally the minimum requirement for entry into the occupation. Furthermore, the duties and requirements of the proffered position as described in the record of proceeding by the petitioner do not indicate that the position is one for which a baccalaureate or higher degree in a specific specialty, or its equivalent, is normally the minimum requirement for entry. Thus, the petitioner failed to satisfy the first criterion of 8 C.F.R. § 214.2(h)(4)(iii)(A)(1).

Next, we will review the record regarding the first of the two alternative prongs of 8 C.F.R. § 214.2(h)(4)(iii)(A)(2). This prong alternatively calls for a petitioner to establish that a requirement of a bachelor's or higher degree in a specific specialty, or its equivalent, is common to the petitioner's industry in positions that are both: (1) parallel to the proffered position; and (2) located in organizations that are similar to the petitioner.

In determining whether there is such a common degree requirement, factors often considered by USCIS include: whether the *Handbook* reports that the industry requires a degree; whether the industry's professional association has made a degree a minimum entry requirement; and whether letters or affidavits from firms or individuals in the industry attest that such firms "routinely employ and recruit only degreed individuals." See *Shanti, Inc. v. Reno*, 36 F. Supp. 2d 1151, 1165 (D.Minn. 1999) (quoting *Hird/Blaker Corp. v. Sava*, 712 F. Supp. 1095, 1102 (S.D.N.Y. 1989)).

As previously discussed, the petitioner has not established that its proffered position is one for which the *Handbook* (or other objective, authoritative source), reports a standard, industry-wide requirement for at least a bachelor's degree in a specific specialty, or its equivalent. Thus, we incorporate by reference the previous discussion on the matter. Also, there are no submissions from the industry's professional association indicating that it has made a degree a minimum entry requirement. Furthermore, the petitioner did not submit any letters or affidavits from similar firms or individuals in the petitioner's industry attesting that such firms "routinely employ and recruit only degreed individuals." Thus, based upon a complete review of the record of proceeding, we find that the petitioner has not satisfied the first alternative prong of 8 C.F.R. § 214.2(h)(4)(iii)(A)(2).

We will next consider the second alternative prong of 8 C.F.R. § 214.2(h)(4)(iii)(A)(2), which is satisfied if the petitioner shows that its particular position is so complex or unique that it can be

recognizes that certain, limited exceptions to that standard may exist. To interpret this provision otherwise would run directly contrary to the plain language of the Act, which requires in part "attainment of a bachelor's or higher degree in the specific specialty (or its equivalent) as a minimum for entry into the occupation in the United States." Section 214(i)(1) of the Act.

performed only by an individual with at least a bachelor's degree in a specific specialty, or its equivalent.

In support of its assertion that the proffered position qualifies as a specialty occupation, the petitioner submitted a letter of support, along with the documents previously outlined. Upon review, we find that the petitioner has not sufficiently developed relative complexity or uniqueness as an aspect of the proffered position. For instance, the petitioner did not submit information relevant to a detailed course of study leading to a specialty degree and did not establish how such a curriculum is necessary to perform the duties it may believe are so complex and unique. While a few related courses may be beneficial, or even required, in performing certain duties of the position, the petitioner has failed to demonstrate how an established curriculum of such courses leading to a baccalaureate or higher degree in a specific specialty, or its equivalent, is required to perform the duties of the proffered position. The description of the duties does not specifically identify any tasks that are so complex or unique that only a specifically degreed individual could perform them.⁸

The petitioner has indicated that the beneficiary's educational background and practical experience will assist him in carrying out the duties of the proffered position. However, the test to establish a position as a specialty occupation is not the skill set or education of a proposed beneficiary, but whether the position itself qualifies as a specialty occupation. In the instant case, the petitioner has not established which of the duties, if any, of the proffered position would be so complex or unique as to be distinguishable from those of similar but non-degreed or non-specialty degreed employment. The petitioner has not satisfied the second alternative prong of 8 C.F.R. § 214.2(h)(4)(iii)(A)(2).

The third criterion of 8 C.F.R. § 214.2(h)(4)(iii)(A) entails an employer demonstrating that it normally requires a bachelor's degree in a specific specialty, or its equivalent, for the position. To this end, we review the petitioner's past recruiting and hiring practices, as well as information regarding employees who previously held the position, and any other documentation submitted by a petitioner in support of this criterion of the regulations.

To merit approval of the petition under this criterion, the record must establish that a petitioner's imposition of a degree requirement is not merely a matter of preference for high-caliber candidates but is necessitated by performance requirements of the position. While a petitioner may assert that a proffered position requires a specific degree, that statement alone without corroborating evidence cannot establish the position as a specialty occupation. Were USCIS limited solely to reviewing a petitioner's claimed self-imposed requirements, then any individual with a bachelor's degree could be brought to the United States to perform any occupation as long as the petitioner artificially created a token degree requirement, whereby all individuals employed in a particular position possessed a baccalaureate or higher degree in the specific specialty, or its equivalent. *See Defensor v. Meissner*, 201 F.3d at 388. In other words, if a petitioner's stated degree requirement is only designed to artificially meet the standards for an H-1B visa and/or to underemploy an individual in a position for which he or she is overqualified and if the proffered position does not in fact require such a specialty degree or its equivalent, to perform its duties, the occupation would not meet the statutory or

⁸ Again, we note that the petitioner designated the proffered position on the LCA at a Level I wage level. This designation indicates that the proffered position is a low-level, entry position relative to others within the occupational category "Computer Programmers."

regulatory definition of a specialty occupation. See section 214(i)(1) of the Act; 8 C.F.R. § 214.2(h)(4)(ii) (defining the term "specialty occupation").

To satisfy this criterion, the evidence of record must show that the specific performance requirements of the position generated the recruiting and hiring history. A petitioner's perfunctory declaration of a particular educational requirement will not mask the fact that the position is not a specialty occupation. USCIS must examine the actual employment requirements, and, on the basis of that examination, determine whether the position qualifies as a specialty occupation. See generally *Defensor v. Meissner*, 201 F. 3d 384. In this pursuit, the critical element is not the title of the position, or the fact that an employer has routinely insisted on certain educational standards, but whether performance of the position actually requires the theoretical and practical application of a body of highly specialized knowledge, and the attainment of a baccalaureate or higher degree in the specific specialty as the minimum for entry into the occupation as required by the Act. To interpret the regulations any other way would lead to absurd results: if USCIS were constrained to recognize a specialty occupation merely because the petitioner has an established practice of demanding certain educational requirements for the proffered position - and without consideration of how a beneficiary is to be specifically employed - then any alien with a bachelor's degree in a specific specialty could be brought into the United States to perform non-specialty occupations, so long as the employer required all such employees to have baccalaureate or higher degrees. See *id.* at 388.

The petitioner stated in the Form I-129 petition that it has 21 employees and was established in [REDACTED] (approximately eight years prior to the filing of the H-1B petition). However, upon review of the record, the petitioner did not provide any documentary evidence regarding current or past recruitment efforts for this position. Furthermore, the petitioner did not submit any information regarding employees who currently or previously held the position. The record does not establish a prior history of recruiting and hiring for the proffered position only persons with at least a bachelor's degree in a specific specialty, or its equivalent.

Upon review of the record, the petitioner has not provided probative evidence to establish that it normally requires at least a bachelor's degree in a specific specialty, or its equivalent, for the proffered position. Thus, the petitioner has not satisfied the third criterion of 8 C.F.R. § 214.2(h)(4)(iii)(A).

The fourth criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A) requires a petitioner to establish that the nature of the specific duties is so specialized and complex that the knowledge required to perform them is usually associated with the attainment of a baccalaureate or higher degree in a specific specialty, or its equivalent.

Upon review of the record of the proceeding, we note that the petitioner has not provided probative evidence to satisfy this criterion of the regulations. In the instant case, relative specialization and complexity have not been sufficiently developed by the petitioner as an aspect of the proffered position. That is, the proposed duties have not been described with sufficient specificity to establish that they are more specialized and complex than positions that are not usually associated with at least a bachelor's degree in a specific specialty, or its equivalent.

Furthermore, we reiterate our earlier comments and findings with regard to the implication of the petitioner's designation of the proffered position in the LCA as a Level I (the lowest of four assignable

levels). That is, the Level I wage designation is indicative of a low, entry-level position relative to others within the occupational category, and hence one not likely distinguishable by relatively specialized and complex duties. As noted earlier, DOL indicates that a Level I designation is appropriate for "beginning level employees who have only a basic understanding of the occupation." Without further evidence, it is not credible that the petitioner's proffered position is one with specialized and complex duties as such a position would likely be classified at a higher-level, such as a Level III (experienced) or Level IV (fully competent) position, requiring a significantly higher prevailing wage. For instance, a Level IV (fully competent) position is designated by DOL for employees who "use advanced skills and diversified knowledge to solve unusual and complex problems." The petitioner has submitted inadequate probative evidence to satisfy the criterion of the regulations at 8 C.F.R. § 214.2(h)(4)(iii)(A)(4).

For the reasons related in the preceding discussion, the petitioner has not established that it has satisfied any of the criteria at 8 C.F.R. § 214.2(h)(4)(iii)(A) and, therefore, it cannot be found that the proffered position qualifies as a specialty occupation. The appeal will be dismissed and the petition denied.

III. CONCLUSION AND ORDER

An application or petition that fails to comply with the technical requirements of the law may be denied by us even if the service center does not identify all of the grounds for denial in the initial decision. *See Spencer Enterprises, Inc. v. United States*, 229 F. Supp. 2d 1025, 1043 (E.D. Cal. 2001), *aff'd*, 345 F.3d 683 (9th Cir. 2003); *see also Soltane v. DOJ*, 381 F.3d at 145 (noting that the AAO conducts appellate review on a *de novo* basis).

Moreover, when we deny a petition on multiple alternative grounds, a plaintiff can succeed on a challenge only if it shows that we abused our discretion with respect to all of our enumerated grounds. *See Spencer Enterprises, Inc. v. United States*, 229 F. Supp. 2d at 1043, *aff'd*. 345 F.3d 683.

The petition will be denied and the appeal dismissed for the above stated reasons, with each considered as an independent and alternative basis for the decision. In visa petition proceedings, it is the petitioner's burden to establish eligibility for the immigration benefit sought. Section 291 of the Act, 8 U.S.C. § 1361; *Matter of Otiende*, 26 I&N Dec. 127, 128 (BIA 2013). Here, that burden has not been met.

ORDER: The appeal is dismissed.
