U.S. Citizenship
and Immigration
Services

DATE: **SEP 22 2014** OFFICE: VERMONT SERVICE CENTER FILE: [REDACTED]

IN RE: Petitioner: [REDACTED]
Beneficiary: [REDACTED]

PETITION: Petition for a Nonimmigrant Worker Pursuant to Section 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act, 8 U.S.C. § 1101(a)(15)(H)(i)(b)

ON BEHALF OF PETITIONER:

INSTRUCTIONS:

Enclosed please find the decision of the Administrative Appeals Office (AAO) in your case.

This is a non-precedent decision. The AAO does not announce new constructions of law nor establish agency policy through non-precedent decisions. If you believe the AAO incorrectly applied current law or policy to your case or if you seek to present new facts for consideration, you may file a motion to reconsider or a motion to reopen, respectively. Any motion must be filed on a Notice of Appeal or Motion (Form I-290B) within 33 days of the date of this decision. **Please review the Form I-290B instructions at <http://www.uscis.gov/forms> for the latest information on fee, filing location, and other requirements. See also 8 C.F.R. § 103.5. Do not file a motion directly with the AAO.**

Thank you,

A handwritten signature in black ink, appearing to read "Ron Rosenberg".

Ron Rosenberg
Chief, Administrative Appeals Office

DISCUSSION: The service center director denied the nonimmigrant visa petition, and the matter is now before the Administrative Appeals Office (AAO) on appeal. The appeal will be dismissed. The petition will be denied.

On the Petition for a Nonimmigrant Worker (Form I-129), the petitioner describes itself as a two-employee retail store/enterprise established in [REDACTED]. In order to continue the employment of the beneficiary in what it designates as a full-time financial analyst position at a salary of \$24.03 per hour, the petitioner seeks to classify him as a nonimmigrant worker in a specialty occupation pursuant to section 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act (the Act), 8 U.S.C. § 1101(a)(15)(H)(i)(b).

The director denied the petition, concluding that the evidence of record does not demonstrate that the proffered position qualifies for classification as a specialty occupation.

The record of proceeding before us contains the following: (1) the Form I-129 and supporting documentation; (2) the director's request for additional evidence (RFE); (3) the petitioner's response to the RFE; (4) the director's letter denying the petition; and (5) the Form I-290B, Notice of Appeal or Motion, and supporting documentation. We reviewed the record in its entirety before issuing our decision.²

Upon review of the entire record of proceeding, we find that the evidence of record does not overcome the director's ground for denying this petition. Accordingly, the appeal will be dismissed, and the petition will be denied.

I. STANDARD OF REVIEW

In the exercise of our administrative review in this matter, as in all matters that come within our purview, we follow the preponderance of the evidence standard as specified in the controlling precedent decision, *Matter of Chawathe*, 25 I&N Dec. 369 (AAO 2010), unless the law specifically provides that a different standard applies. In pertinent part, that decision states the following:

Except where a different standard is specified by law, a petitioner or applicant in administrative immigration proceedings must prove by a preponderance of evidence that he or she is eligible for the benefit sought.

¹ In the petitioner's August 23, 2013 letter of support, the petitioner claimed it is a retail store and that it is affiliated with two other entities through the ownership interest of the controlling shareholder in each entity. The petitioner claimed further that it has a total of eight employees in the three businesses. The petitioner provided photocopies of business licenses for two additional convenience stores. The petitioner, however, did not provide further probative evidence in support of its claimed affiliation. Going on record without supporting documentary evidence is not sufficient for purposes of meeting the burden of proof in these proceedings. *Matter of Soffici*, 22 I&N Dec. 158, 165 (Comm'r 1998) (citing *Matter of Treasure Craft of California*, 14 I&N Dec. 190 (Reg. Comm'r 1972)).

² We conduct appellate review on a *de novo* basis. See *Soltane v. DOJ*, 381 F.3d 143, 145 (3d Cir. 2004).

* * *

The "preponderance of the evidence" of "truth" is made based on the factual circumstances of each individual case.

* * *

Thus, in adjudicating the application pursuant to the preponderance of the evidence standard, the director must examine each piece of evidence for relevance, probative value, and credibility, both individually and within the context of the totality of the evidence, to determine whether the fact to be proven is probably true.

Even if the director has some doubt as to the truth, if the petitioner submits relevant, probative, and credible evidence that leads the director to believe that the claim is "more likely than not" or "probably" true, the applicant or petitioner has satisfied the standard of proof. *See INS v. Cardoza-Foncesca*, 480 U.S. 421, 431 (1987) (discussing "more likely than not" as a greater than 50% chance of an occurrence taking place). If the director can articulate a material doubt, it is appropriate for the director to either request additional evidence or, if that doubt leads the director to believe that the claim is probably not true, deny the application or petition.

Id. at 375-76.

Again, we conduct our review of service center decisions on a *de novo* basis. *See Soltane v. DOJ*, 381 F.3d at 145. In doing so, we apply the preponderance of the evidence standard as outlined in *Matter of Chawathe*. Upon our review of the present matter pursuant to that standard, however, we find that the evidence in the record of proceeding does not support counsel's contentions that the evidence of record requires that the petition at issue be approved. Applying the preponderance of the evidence standard as stated in *Matter of Chawathe*, we find that the director's determination that the evidence of record does not establish that the proffered position is a specialty occupation was correct. Upon our review of the entire record of proceeding, and with close attention and due regard to all of the evidence, separately and in the aggregate, submitted in support of this petition, we find that the evidence of record does not establish that the claim of a proffer of a specialty occupation position is "more likely than not" or "probably" true. In other words, as the evidentiary analysis of this decision will reflect, the petitioner has not submitted relevant, probative, and credible evidence that leads us to believe that the petitioner's claim that the proffered position qualifies as a specialty occupation is "more likely than not" or "probably" true.

II. FACTS AND PROCEDURAL HISTORY

In the petitioner's August 23, 2013 letter of support, the petitioner claimed it was in need of a financial analyst. The petitioner described the duties of the proffered position as follows:

- The Financial Analyst will be involved in financial analysis and financial management issues. The Financial Analyst will attend upon the financial affairs of our business and of our Affiliate entities.
- As a Financial Analyst [the beneficiary] will continue to develop and implement financial plan [sic] for [the petitioner] and other corporations in which the Employer[,] Mr. [REDACTED], has shares and financial interest, determine the Employer[']s assets, liabilities, cash flow and financial objectives, analyze financial information to produce forecast of business and other economic conditions by using spreadsheets, draw charts, and graphs using the computer.
- The beneficiary will continue to advise the Employer on financial options, interpret data effecting [sic] investment programs by analyzing markets stability and economic influences.
- [The beneficiary] will continue to advise the Employer, to rent, sale [sic], or buy future properties and businesses according to the current National and International economic situation.
- [The beneficiary will] [r]ecommend investments and investment timing for [the petitioner] and other corporations in which the Employer has financial and vested interest, being the aforementioned 2 affiliate entities.

[Bullet points added for clarity.]

The petitioner asserted that the beneficiary's job duties require a bachelor's degree in a financial or accounting or business administration or related discipline or equivalent in order to perform them. The petitioner also claimed:

The description of the beneficiary's duties indicates that he will be performing many duties that accountants perform. This according to the Occupational Outlook Handbook. The educational and training requirements for accountants and auditors (and by association of Financial Analysts) is described in the Occupational Outlook Handbook, as follows: Most Accountant and internal auditor positions require at least a Bachelors [sic] Degree in Accounting or a Related Field (Finance or Business Administration being clearly closely related fields).

The petitioner submitted the requisite Labor Condition Application (LCA) in support of the petition attesting that the proffered position corresponds to the occupational classification of "Financial Analysts," SOC (O*NET/OES) Code 13-2051, at a Level I (entry-level) prevailing wage rate, the lowest of the four assignable wage-levels.

Upon review of the record, the director issued an RFE requesting, among other things, evidence that the position proffered here is a specialty occupation.

In the petitioner's November 27, 2013 response to the director's RFE, the petitioner noted that the beneficiary was the first individual hired for the proffered position and that the beneficiary's type of education and experience was what the petitioner had been looking for. The petitioner stated:

It is [the beneficiary's] job to analyze monthly financial statements to determine proper charging of operating revenues and expenditures in accordance with procedures; prepare monthly income statements by consolidating accounting data and providing written interpretation of results; monitor and report on financial performance as a whole; and recommend corrective actions based on analysis.

He assists with the development of budget preparation, capital investments, pricing structures and marketing strategies. Additionally he manages the purchase of products, materials, and supplies. He has full charge of all requisitions and purchase orders with regards to buying of goods and is responsible for keeping buying costs in line with budget and profit projections.

The petitioner then provided an outline of the beneficiary's purported duties with a percentage attached as follows:

Research – 25%

- Research new market prices and other industry-wide trends;
- Reading financial statements of the organization and also taking into consideration, the sale and expenses in order to advise for investments and forecast future earnings of the organization;
- Interpret data concerning price, yield, stability and future trends in financial markets to calculate risks and economic influences pertinent to investments;
- Gather information such as industry, regulatory and economic information, company financial statements, financial periodicals and newspapers;
- Study our company's financial status to see how much the company is earning compared with others in the same industry; [and]
- Visit our affiliates to interview the management and to determine how efficiently the companies are being operated[.]

Analysis – 25%

- Analysis of financial information to forecast business, industry and economic conditions, for use in making decisions;
- Analysis of financial information detailing assets, liabilities and capital;
- Audit of contracts, orders and vouchers and preparation of reports to substantiate individual transactions prior to settlement;
- Forecast future earnings;
- Recommend economic timing and buy and sell orders to company; [and]

- Track expenses and revenues vs. budget and reforecast and analyze fluctuations[.]

Planning – 25%

- Preparation of balance sheets, profit and loss statements and other reports to summarize current and projected company financial positions;
- Develop new and effective techniques for financial planning;
- Coordinate financials questions/answers among stores; [and]
- Maintain budget and reforecast information in the accounting system.

Reporting – 25%

- Handle audits;
- Prepare, review and distribute monthly financial reports for the stores;
- Prepare monthly consolidation and executive financial package; [and]
- Prepare annual financial information binder to be provided to the external auditors[.]

The petitioner noted that the above duties require "an academically recognized course of study leading to at least a Bachelor's Degree and preferably a Master's Degree in business, economics, accounting or related."

Upon review, the director determined that the petitioner had not established that the duties of the position proffered here comprised the duties of a specialty occupation.

On appeal, counsel for the petitioner references the beneficiary's prior approval for H-1B classification by the same employer. Counsel repeats portions of the previous descriptions of the claimed job duties of the position and asserts that the duties comprise the duties of a specialty occupation.

III. MATERIAL FINDINGS

To ascertain the intent of a petitioner, U.S. Citizenship and Immigration Services (USCIS) must look to the Form I-129 and the documents filed in support of the petition. It is only in this manner that the agency can determine the exact position offered, the location of employment, the proffered wage, et cetera. Pursuant to 8 C.F.R. § 214.2(h)(9)(i), the director has the responsibility to consider all of the evidence submitted by a petitioner and such other evidence that he or she may independently require to assist his or her adjudication. Further, the regulation at 8 C.F.R. § 214.2(h)(4)(iv) provides that "[a]n H-1B petition involving a specialty occupation shall be accompanied by [d]ocumentation . . . or any other required evidence sufficient to establish . . . that the services the beneficiary is to perform are in a specialty occupation."

Thus, a crucial aspect of this matter is whether the petitioner has adequately described the duties of the proffered position, such that USCIS may discern the nature of the position and whether the position indeed requires the theoretical and practical application of a body of highly specialized knowledge, and the attainment of a baccalaureate or higher degree in the specific specialty as the minimum for entry into the occupation, as required by the Act. The petitioner has not done so here.

As mentioned, the LCA submitted by the petitioner in support of the petition was certified for use with a job prospect within the Financial Analysts occupational classification. The petitioner, however, has provided a broad and inconsistent overview of the duties the beneficiary will perform for the petitioner. For example, the petitioner claims that the beneficiary's job is to analyze monthly financial statements, assist with budget preparation, capital investments, pricing structures and marketing strategies, as well as manage the purchase of products, materials and supplies and be in charge of all requisitions and purchase orders. These duties are not reflected in the petitioner's percentage breakdown and outline of the beneficiary's purported duties.

In addition, the petitioner's outline of the beneficiary's purported duties is general. The duties are described in vague terms that fail to convey the specific tasks that the beneficiary will perform. For example, the petitioner represented that the beneficiary will spend 25% of his time on research of new market prices and industry trends, interpreting data, gathering information, comparing the company's financial status with others. However, the petitioner does not describe the beneficiary's day-to-day tasks associated with these functions. Similarly, that petitioner indicated that the beneficiary will spend 25% of his time on analysis of financial information, auditing of contracts, orders and vouchers, forecasting future earnings and recommending economic timing and buy and sell orders to the company as well as tracking expenses and revenues and analyzing fluctuations. However, the petitioner does not relate any of these generally described tasks to the petitioner's ongoing operations of a convenience store business. That is, the petitioner does not explain how recommendations regarding "economic timing and buy and sell orders to company" are functions of the petitioner's business. The petitioner in this matter has not adequately described the specific duties of the proffered position, as those duties relate to its business.

Moreover, the petitioner allocates 25% of the beneficiary's time to preparing balance sheets, profit and lost statements, developing new techniques for financial planning and maintaining budget and reforecast information in the accounting systems. First, it appears that preparing balance sheets and other reports as well as maintaining budget and reforecast information relate more to an accounting or clerical position and not to that of a financial analyst. Second, the petitioner does not describe what tasks are associated with "[d]evelop[ing] new and effective techniques for financial planning. Further, the petitioner's representation that the beneficiary will spend 25% of his time handling audits, preparing, reviewing and distributing financial reports, preparing monthly consolidation and executive financial package and preparing annual financial information for external auditors suggest he will be performing clerical or bookkeeping functions.

Thus, upon review, it is not evident that the proposed duties as described, and the position that they comprise, merit recognition of the proffered position as qualifying as a specialty occupation. That is, to the extent that they are described, the proposed duties do not provide a sufficient factual basis for

conveying the substantive matters that would engage the beneficiary in the performance of the proffered position for the entire period requested. The job descriptions do not persuasively support the claim that the position's day-to-day job responsibilities and duties would require the theoretical and practical application of a particular educational level of highly specialized knowledge in a specific specialty directly related to those duties and responsibilities. The overall responsibilities for the proffered position contain generalized functions without providing sufficient information regarding the particular work, and associated educational requirements, into which the duties would manifest themselves in their day-to-day performance within the petitioner's operations. Thus, the petitioner has failed to demonstrate how the performance of the duties of the proffered position, as described by the petitioner, would require the attainment of a bachelor's or higher degree in a specific specialty, or its equivalent.

Finally, the petitioner in this matter indicates in its initial letter in support that the duties of the proffered position require a minimum of a bachelor's degree in finance or business administration or a related field or equivalent. In response to the director's RFE, the petitioner amended the claimed requirements needed to perform the duties by indicating that a bachelor's degree in business, economics, accounting or related is necessary.³ Notably, an entry requirement of at least a bachelor's degree in "one of a variety" of majors does not denote a requirement in a specific specialty.

In addition, the petitioner's claimed requirement of a degree in a major such as "Business Administration" or "Business" for the proffered position, without specialization, is inadequate to establish that the proposed position qualifies as a specialty occupation. A petitioner must demonstrate that the proffered position requires a precise and specific course of study that relates directly and closely to the position in question. Since there must be a close correlation between the required specialized studies and the position, the requirement of a degree with a generalized title, such as business administration, without further specification, does not establish the position as a specialty occupation. *Cf. Matter of Michael Hertz Associates*, 19 I&N Dec. 558 (Comm'r 1988). Although a general-purpose bachelor's degree, such as a degree in business administration, may be a legitimate prerequisite for a particular position, requiring such a degree, without more, will not justify a finding that a particular position qualifies for classification as a specialty occupation. *See Royal Siam Corp. v. Chertoff*, 484 F.3d 139, 147 (1st Cir. 2007).

The petitioner's acknowledgment that a business or business administration degree is sufficient to perform the duties of the position proffered here is tantamount to an admission that the proffered position is not in fact a specialty occupation. As such, even if the substantive nature of the work had been established, the instant petition could not be approved for this reason.

IV. SPECIALTY OCCUPATION

³ The petitioner noted a preference for a master's degree in the fields of business, economics, accounting or a related discipline. However, preference for a degree is not synonymous with a requirement for such a degree.

Section 214(i)(1) of the Immigration and Nationality Act (the Act), 8 U.S.C. § 1184(i)(1) defines the term "specialty occupation" as one that requires:

- (A) theoretical and practical application of a body of highly specialized knowledge, and
- (B) attainment of a bachelor's or higher degree in the specific specialty (or its equivalent) as a minimum for entry into the occupation in the United States.

The term "specialty occupation" is further defined at 8 C.F.R. § 214.2(h)(4)(ii) as:

An occupation which requires [(1)] theoretical and practical application of a body of highly specialized knowledge in fields of human endeavor including, but not limited to, architecture, engineering, mathematics, physical sciences, social sciences, medicine and health, education, business specialties, accounting, law, theology, and the arts, and which requires [(2)] the attainment of a bachelor's degree or higher in a specific specialty, or its equivalent, as a minimum for entry into the occupation in the United States.

Pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(A), to qualify as a specialty occupation, the position must also meet one of the following criteria:

- (1) A baccalaureate or higher degree or its equivalent is normally the minimum requirement for entry into the particular position;
- (2) The degree requirement is common to the industry in parallel positions among similar organizations or, in the alternative, an employer may show that its particular position is so complex or unique that it can be performed only by an individual with a degree;
- (3) The employer normally requires a degree or its equivalent for the position; or
- (4) The nature of the specific duties [is] so specialized and complex that knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

As a threshold issue, it is noted that 8 C.F.R. § 214.2(h)(4)(iii)(A) must logically be read together with section 214(i)(1) of the Act and 8 C.F.R. § 214.2(h)(4)(ii). In other words, this regulatory language must be construed in harmony with the thrust of the related provisions and with the statute as a whole. *See K Mart Corp. v. Cartier Inc.*, 486 U.S. 281, 291 (1988) (holding that construction of language which takes into account the design of the statute as a whole is preferred); *see also COIT Independence Joint Venture v. Federal Sav. and Loan Ins. Corp.*, 489 U.S. 561 (1989); *Matter of W-F-*, 21 I&N Dec. 503 (BIA 1996). As such, the criteria stated in 8 C.F.R. § 214.2(h)(4)(iii)(A) should logically be read as being necessary but not necessarily sufficient to meet the statutory and regulatory definition of specialty occupation. To otherwise interpret this section as stating the

necessary *and* sufficient conditions for meeting the definition of specialty occupation would result in particular positions meeting a condition under 8 C.F.R. § 214.2(h)(4)(iii)(A) but not the statutory or regulatory definition. *See Defensor v. Meissner*, 201 F.3d 384, 387 (5th Cir. 2000). To avoid this result, 8 C.F.R. § 214.2(h)(4)(iii)(A) must therefore be read as providing supplemental criteria that must be met in accordance with, and not as alternatives to, the statutory and regulatory definitions of specialty occupation.

As such and consonant with section 214(i)(1) of the Act and the regulation at 8 C.F.R. § 214.2(h)(4)(ii), U.S. Citizenship and Immigration Services (USCIS) consistently interprets the term "degree" in the criteria at 8 C.F.R. § 214.2(h)(4)(iii)(A) to mean not just any baccalaureate or higher degree, but one in a specific specialty that is directly related to the proffered position. *See Royal Siam Corp. v. Chertoff*, 484 F.3d 139, 147 (1st Cir. 2007) (describing "a degree requirement in a specific specialty" as "one that relates directly to the duties and responsibilities of a particular position"). Applying this standard, USCIS regularly approves H-1B petitions for qualified aliens who are to be employed as engineers, computer scientists, certified public accountants, college professors, and other such occupations. These professions, for which petitioners have regularly been able to establish a minimum entry requirement in the United States of a baccalaureate or higher degree in a specific specialty or its equivalent directly related to the duties and responsibilities of the particular position, fairly represent the types of specialty occupations that Congress contemplated when it created the H-1B visa category.

To determine whether a particular job qualifies as a specialty occupation, USCIS does not rely simply upon a proffered position's title. The specific duties of the position, combined with the nature of the petitioning entity's business operations, are factors to be considered. USCIS must examine the ultimate employment of the beneficiary, and determine whether the position qualifies as a specialty occupation. *See generally Defensor v. Meissner*, 201 F. 3d at 384. The critical element is not the title of the position nor an employer's self-imposed standards, but whether the position actually requires the theoretical and practical application of a body of highly specialized knowledge, and the attainment of a baccalaureate or higher degree in the specific specialty as the minimum for entry into the occupation, as required by the Act.

We now turn to the criteria at 8 C.F.R. § 214.2(h)(4)(iii)(A). As explained earlier in this decision, the petitioner has not established the nature of the proffered position and in what capacity the beneficiary will actually be employed within the petitioner's business operations. The petitioner's failure to establish the substantive nature of the work to be performed by the beneficiary precludes a finding that the proffered position satisfies any criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A), because it is the substantive nature of that work that determines (1) the normal minimum educational requirement for the particular position, which is the focus of criterion 1; (2) industry positions which are parallel to the proffered position and thus appropriate for review for a common degree requirement, under the first alternate prong of criterion 2; (3) the level of complexity or uniqueness of the proffered position, which is the focus of the second alternate prong of criterion 2; (4) the factual justification for a petitioner normally requiring a degree or its equivalent, when that is an issue under criterion 3; and (5) the degree of specialization and complexity of the specific duties, which is the focus of criterion 4.

Nevertheless, assuming, for the sake of argument, that the petitioner had adequately and consistently described the duties of the proffered position, we will now discuss the proffered position in relation to the criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A)(I), which requires that a baccalaureate or higher degree in a specific specialty, or its equivalent, is normally the minimum requirement for entry into the particular position.

We recognize the U.S. Department of Labor's (DOL) *Occupational Outlook Handbook (Handbook)* as an authoritative source on the duties and educational requirements of the wide variety of occupations it addresses.⁴ As noted above, the LCA that the petitioner submitted in support of this petition was certified for a job offer falling within the "Financial Analysts" occupational category.

The *Handbook* states the following with regard to the educational requirements necessary for entrance into positions within the financial analyst occupational category:

Financial analysts typically must have a bachelor's degree, but a master's degree is often required for advanced positions.

Education

Most positions require a bachelor's degree. A number of fields of study provide appropriate preparation, including accounting, economics, finance, statistics, mathematics, and engineering. For advanced positions, employers often require a master's in business administration (MBA) or a master's degree in finance. Knowledge of options pricing, bond valuation, and risk management are important.

Licenses, Certifications, and Registrations

The Financial Industry Regulatory Authority (FINRA) is the main licensing organization for the securities industry. It requires licenses for many financial analyst positions. Most of the licenses require sponsorship by an employer, so companies do not expect individuals to have these licenses before starting a job.

Certification is often recommended by employers and can improve the chances for advancement. An example is the Chartered Financial Analyst (CFA) certification from the CFA Institute, which financial analysts can get if they have a bachelor's degree, 4 years of experience, and pass three exams. Financial analysts can also become certified in their field of specialty.

Advancement

⁴ The *Handbook*, which is available in printed form, may also be accessed online at <http://www.stats.bls.gov/oco/>. Our references to the *Handbook* are from the 2014-15 edition available online.

Financial analysts typically start by specializing in a specific investment field. As they gain experience, they can become portfolio managers, who supervise a team of analysts and select the mix of investments for the company's portfolio. They can also become fund managers, who manage large investment portfolios for individual investors. A master's degree in finance or business administration can improve an analyst's chances of advancing to one of these positions.

U.S. Dep't of Labor, Bureau of Labor Statistics, *Occupational Outlook Handbook, 2014-15 ed.*, Financial Analysts, available on the Internet at <http://www.bls.gov/ooh/business-and-financial/financial-analysts.htm#tab-4> (last visited September 19, 2014).

In general, provided the specialties are closely related, e.g., chemistry and biochemistry, a minimum of a bachelor's or higher degree in more than one specialty is recognized as satisfying the "degree in the specific specialty (or its equivalent)" requirement of section 214(i)(1)(B) of the Act. In such a case, the required "body of highly specialized knowledge" would essentially be the same. Since there must be a close correlation between the required "body of highly specialized knowledge" and the position, however, a minimum entry requirement of a degree in two disparate fields, such as philosophy and engineering, for example, would not meet the statutory requirement that the degree be "in *the* specific specialty (or its equivalent)," unless the petitioner establishes how each field is directly related to the duties and responsibilities of the particular position such that the required body of highly specialized knowledge is essentially an amalgamation of these different specialties.⁵ Section 214(i)(1)(B) of the Act (emphasis added).

Here, the *Handbook* reports that "[a] number of fields of study provide appropriate preparation, including accounting, economics, finance, statistics, mathematics, and engineering" to perform the duties of a financial analyst. Here and as indicated above, the petitioner, who bears the burden of proof in this proceeding, fails to establish that accounting, economics, finance, statistics, mathematics, and engineering in general are closely related fields. Absent this evidence, it cannot be found that the particular position proffered in this matter has a normal minimum entry requirement of a bachelor's or higher degree in a specific specialty or its equivalent under the petitioner's own standards. Accordingly, as the evidence of record fails to establish a standard, minimum requirement of at least a bachelor's degree *in a specific specialty* or its equivalent for entry into the particular position, it does not support the proffered position as being a specialty occupation and, in fact, supports the opposite conclusion.

Therefore, absent evidence of a direct relationship between the claimed degrees required and the duties and responsibilities of the position, it cannot be found that the proffered position requires anything more than a general bachelor's degree. As explained above, USCIS interprets the degree

⁵ Whether read with the statutory "the" or the regulatory "a," both readings denote a singular "specialty." Section 214(i)(1)(B) of the Act; 8 C.F.R. § 214.2(h)(4)(ii). Still, we do not so narrowly interpret these provisions to exclude positions from qualifying as specialty occupations if they permit, as a minimum entry requirement, degrees in more than one closely related specialty. As just stated, this also includes even seemingly disparate specialties provided the evidence of record establishes how each acceptable, specific field of study is directly related to the duties and responsibilities of the particular position.

requirement at 8 C.F.R. § 214.2(h)(4)(iii)(A) to require a degree in a specific specialty that is directly related to the proposed position. Again, USCIS has consistently stated that, although a general-purpose bachelor's degree, such as a degree in business administration, may be a legitimate prerequisite for a particular position, requiring such a degree, without more, will not justify a finding that a particular position qualifies for classification as a specialty occupation. *See Royal Siam Corp. v. Chertoff*, 484 F.3d at 147.

When reviewing the *Handbook*, it also must be noted that the petitioner designated the proffered position as a Level I (entry level) position on the LCA.⁶ The wage levels are defined in DOL's "Prevailing Wage Determination Policy Guidance."⁷ A Level I wage rate is described as follows:

Level I (entry) wage rates are assigned to job offers for beginning level employees who have only a basic understanding of the occupation. These employees perform routine tasks that require limited, if any, exercise of judgment. The tasks provide experience and familiarization with the employer's methods, practices, and programs. The employees may perform higher level work for training and developmental purposes. These employees work under close supervision and receive specific instructions on required tasks and results expected. Their work is closely monitored and reviewed for accuracy. Statements that the job offer is for a research fellow, a worker in training, or an internship are indicators that a Level I wage should be considered.

See U.S. Dep't of Labor, Emp't & Training Admin., *Prevailing Wage Determination Policy Guidance*, Nonagric. Immigration Programs (rev. Nov. 2009), available at http://www.foreignlaborcert.doleta.gov/pdf/NPWHC_Guidance_Revised_11_2009.pdf.

Thus, in designating the proffered position at a Level I wage, the petitioner has indicated that the proffered position is a comparatively low, entry-level position relative to others within the occupation. That is, in accordance with the relevant DOL explanatory information on wage levels, this wage rate indicates that the beneficiary is only required to have a basic understanding of the

⁶ Wage levels should be determined only after selecting the most relevant O*NET code classification. Then, a prevailing wage determination is made by selecting one of four wage levels for an occupation based on a comparison of the employer's job requirements to the occupational requirements, including tasks, knowledge, skills, and specific vocational preparation (education, training and experience) generally required for acceptable performance in that occupation.

⁷ Prevailing wage determinations start with a Level I (entry) and progress to a wage that is commensurate with that of a Level II (qualified), Level III (experienced), or Level IV (fully competent) after considering the job requirements, experience, education, special skills/other requirements and supervisory duties. Factors to be considered when determining the prevailing wage level for a position include the complexity of the job duties, the level of judgment, the amount and level of supervision, and the level of understanding required to perform the job duties. DOL emphasizes that these guidelines should not be implemented in a mechanical fashion and that the wage level should be commensurate with the complexity of the tasks, independent judgment required, and amount of close supervision received.

occupation and carries expectations that the beneficiary perform routine tasks that require limited, if any, exercise of judgment; that he would be closely supervised; that his work would be closely monitored and reviewed for accuracy; and that he would receive specific instructions on required tasks and expected results. Based upon the petitioner's designation of the proffered position as a Level I (entry) position, it does not appear that the beneficiary will be expected to serve in a senior or leadership role. As noted above, according to DOL guidance, a statement that the job offer is for a research fellow, worker in training or an internship is indicative that a Level I wage should be considered.

Accordingly, the *Handbook* does not support the assertion that at least a bachelor's degree in a specific specialty, or its equivalent, is normally the minimum requirement for this position, and thus does not support the proffered position as being a specialty occupation.

The materials from DOL's Occupational Information Network (O*NET OnLine) also fail to establish that the proffered position satisfies the first criterion described at 8 C.F.R. § 214.2(h)(4)(iii)(A). O*NET OnLine does not state a requirement for a bachelor's degree. Rather, it assigns this occupation a Job Zone "Four" rating, which groups it among occupations of which "most," but not all, "require a four-year bachelor's degree." Further, O*NET OnLine does not indicate that four-year bachelor's degrees required by Job Zone Four occupations must be in a specific specialty directly related to the occupation. Therefore, O*NET OnLine information is not probative of the proffered position being a specialty occupation.

Nor does the record of proceeding contain any persuasive documentary evidence from any other relevant authoritative source establishing that the proffered position's inclusion within any of these occupational categories is sufficient in and of itself to establish the proffered position as, in the words of this criterion, a "particular position" for which "[a] baccalaureate or higher degree or its equivalent is normally the minimum requirement for entry."

As the evidence in the record of proceeding does not establish that at least a baccalaureate degree in a specific specialty, or its equivalent, is normally the minimum requirement for entry into the particular position that is the subject of this petition, the petitioner has not satisfied the criterion described at 8 C.F.R. § 214.2(h)(4)(iii)(A)(1).

Next, we find that the petitioner has not satisfied the first of the two alternative prongs of 8 C.F.R. § 214.2(h)(4)(iii)(A)(2). This prong alternatively calls for a petitioner to establish that a requirement of a bachelor's or higher degree in a specific specialty, or its equivalent, is common (1) to the petitioner's industry; and (2) for positions within that industry that are both: (a) parallel to the proffered position, and (b) located in organizations that are similar to the petitioner.

In determining whether there is such a common degree requirement, factors often considered by USCIS include: whether the *Handbook* reports that the industry requires a degree; whether the industry's professional association has made a degree a minimum entry requirement; and whether letters or affidavits from firms or individuals in the industry attest that such firms "routinely employ and recruit only degreed individuals." See *Shanti, Inc. v. Reno*, 36 F. Supp. 2d at 1165

(D.Minn. 1999) (quoting *Hird/Blaker Corp. v. Sava*, 712 F. Supp. 1095, 1102 (S.D.N.Y. 1989)).

Here and as already discussed, the petitioner has not established that its proffered position is one for which the *Handbook* reports an industry-wide requirement for at least a bachelor's degree in a specific specialty or its equivalent. Also, there are no submissions from professional associations, individuals, or similar firms in the petitioner's industry attesting that individuals employed in positions parallel to the proffered position are routinely required to have a minimum of a bachelor's degree in a specific specialty or its equivalent for entry into those positions.

In the Form I-129, the petitioner stated that it is a two-person "Retail Store/Enterprise" with six additional employees in two other affiliated stores and that it was established in [REDACTED]. Although the petitioner's gross annual income is handwritten on the Form I-129, the handwriting is indecipherable. The petitioner failed to report its net annual income. The petitioner designated its business operations under the North American Industry Classification System (NAICS) code as 447110. According to the U.S. Census Bureau, NAICS is used to classify business establishments according to type of economic activity and each establishment is classified to an industry according to the primary business activity taking place there. See <http://www.census.gov/eos/www/naics/> (last visited September 19, 2014).

The NAICS code specified by the petitioner is designated for "Gasoline Stations with Convenience Stores" and is defined by the U.S. Department of Commerce, Census Bureau as follows:

This industry comprises establishments engaged in retailing automotive fuels (e.g., diesel fuel, gasohol, gasoline) in combination with convenience store or food mart items. These establishments can either be in a convenience store (i.e., food mart) setting or a gasoline station setting. These establishments may also provide automotive repair services.

U.S. Dep't of Commerce, U.S. Census Bureau, North American Industry Classification System, 2012 NAICS Definition, "447110 Gasoline Stations with Convenience Stores," <http://www.census.gov/cgi-bin/sssd/naics/naicsrch> (last visited September 19, 2014).

In response to the RFE, the petitioner provided printouts of four online job announcements. However, this documentation does not establish that the proffered position qualifies as specialty occupation. As a preliminary matter, we note that the petitioner did not provide any independent evidence of how representative these job advertisements are of the particular advertising employers' recruiting history for the type of jobs advertised. Further, as they are only solicitations for hire, they are not evidence of the employers' actual hiring practices.

For the petitioner to establish that an organization is similar, it must demonstrate that it shares the same general characteristics with the advertising organization. Without such evidence, documentation submitted by a petitioner is generally outside the scope of consideration for this criterion, which encompasses only organizations that are similar to the petitioner. When determining whether the petitioner and the advertising organization share the same general

characteristics, such factors may include information regarding the nature or type of organization, and, when pertinent, the particular scope of operations, as well as the level of revenue and staffing (to list just a few elements that may be considered). It is not sufficient for the petitioner to claim that an organization is similar and in the same industry without providing a legitimate basis for such an assertion.

The petitioner has provided job listings from an engraving shop, a fabric and crafts store, a wine retailer and a clothing store. None of the advertisements provide sufficient information regarding the advertising organizations to establish that the advertising organizations are similar to the petitioner. The advertisements also require experience for the advertised positions ranging from one to eight years. The petitioner has not established that the advertised positions are "parallel" to the proffered position.⁸ Nor does the petitioner submit any evidence regarding how representative these advertisements are of its industry's usual recruiting and hiring practices with regard to the positions advertised.⁹

Therefore, the petitioner has not satisfied the first of the two alternative prongs described at 8 C.F.R. § 214.2(h)(4)(iii)(A)(2), as the evidence of record does not establish a requirement for at least a bachelor's degree in a specific specialty or its equivalent that is common (1) to the petitioner's industry and (2) for positions in that industry that are both (a) parallel to the proffered position and (b) located in organizations that are similar to the petitioner.

Next, we find that the evidence of record does not satisfy the second alternative prong of 8 C.F.R. § 214.2(h)(4)(iii)(A)(2), which provides that "an employer may show that its particular position is so complex or unique that it can be performed only by an individual with a degree."

In this particular case, the evidence of record does not credibly demonstrate that the duties the beneficiary will perform on a day-to-day basis constitute a position so complex or unique that it can

⁸ As noted above, by the wage-level in the LCA that it submitted, the petitioner presented the proffered position as a comparatively low, entry-level position relative to others within its occupation and signified that the beneficiary is only expected to possess a basic understanding of the occupation. It is therefore difficult to envision how these attributes assigned to the proffered position by the petitioner by virtue of its wage-level designation on the LCA would be parallel to the positions described in these job vacancy announcements. Nor is it clear that all of the advertisers require a bachelor's degree in a specific specialty or the equivalent.

⁹ USCIS "must examine each piece of evidence for relevance, probative value, and credibility, both individually and within the context of the totality of the evidence, to determine whether the fact to be proven is probably true." *Matter of Chawathe*, 25 I&N Dec. at 376. As just discussed, the petitioner has failed to establish the relevance of the job advertisements submitted to the position proffered in this case. Even if their relevance had been established, the petitioner still fails to demonstrate what inferences, if any, can be drawn from these few job postings with regard to determining the common educational requirements for entry into parallel positions in similar organizations in the same industry. See generally Earl Babbie, *The Practice of Social Research* 186-228 (1995).

only be performed by a person with at least a bachelor's degree in a specific specialty or its equivalent.

The record of proceeding does not contain evidence establishing relative complexity or uniqueness as aspects of the proffered position, let alone that the position is so complex or unique as to require the theoretical and practical application of a body of highly specialized knowledge such that a person with a bachelor's or higher degree in a specific specialty or its equivalent is required to perform the duties of that position. Rather, we find, that, as reflected in this decision's earlier quotation of duty descriptions from the record of proceeding, the evidence of record does not distinguish the proffered position from other positions falling within the "Financial Analysts" occupational category, which, the *Handbook* indicates, do not necessarily require a person with at least a bachelor's degree in a specific specialty or its equivalent to enter those positions.

The statements of counsel and the petitioner with regard to the claimed complex and unique nature of the proffered position are acknowledged. However, those assertions are undermined by the fact that the petitioner submitted an LCA certified for a job prospect with a wage-level that is only appropriate for a comparatively low, entry-level position relative to others within its occupation. We incorporate here by reference and reiterate our earlier discussion regarding the LCA and its indication that the petitioner would pay a wage-rate that is only appropriate for a low-level, entry position relative to others within the occupation, as this factor is inconsistent with the analysis of the relative complexity and uniqueness required to satisfy this criterion. Based upon the wage rate selected by the petitioner, the beneficiary is only required to have a basic understanding of the occupation. Moreover, that wage rate indicates that the beneficiary will perform routine tasks requiring limited, if any, exercise of independent judgment; that the beneficiary's work will be closely supervised and monitored; that he will receive specific instructions on required tasks and expected results; and that his work will be reviewed for accuracy.

Accordingly, given the *Handbook's* indication that typical positions located within the "Financial Analysts" occupational category do not require at least a bachelor's degree in a specific specialty, or the equivalent, for entry, it is not credible that a position involving limited, if any, exercise of independent judgment, close supervision and monitoring, receipt of specific instructions on required tasks and expected results, and close review *would* contain such a requirement.

The evidence of record therefore fails to establish how the beneficiary's responsibilities and day-to-day duties comprise a position so complex or unique that the position can be performed only by an individual with at least a bachelor's degree in a specific specialty or its equivalent.

Consequently, as it has not been shown that the particular position for which this petition was filed is so complex or unique that it can only be performed by a person with at least a bachelor's degree in a specific specialty or its equivalent, the evidence of record does not satisfy the second alternative prong of 8 C.F.R. § 214.2(h)(4)(iii)(A)(2).

We turn next to the criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A)(3), which entails an employer demonstrating that it normally requires a bachelor's degree in a specific specialty or its equivalent for the position.

Our review of the record of proceeding under this criterion necessarily includes the evidence the petitioner has submitted with regard to its past recruiting and hiring practices and employees who previously held the position in question.

To satisfy this criterion, the record must contain documentary evidence demonstrating that the petitioner has a history of requiring the degree or degree equivalency, in a specific specialty, in its prior recruiting and hiring for the position. Additionally, the record must establish that a petitioner's imposition of a degree requirement is not merely a matter of preference for high-caliber candidates but is necessitated by the performance requirements of the proffered position.¹⁰

Were USCIS limited solely to reviewing a petitioner's claimed self-imposed requirements, then any individual with a bachelor's degree could be brought to the United States to perform any occupation as long as the employer artificially created a token degree requirement, whereby all individuals employed in a particular position possessed a baccalaureate or higher degree in the specific specialty or its equivalent. *See Defensor v. Meissner*, 201 F. 3d at 387. In other words, if a petitioner's assertion of a particular degree requirement is not necessitated by the actual performance requirements of the proffered position, the position would not meet the statutory or regulatory definition of a specialty occupation. *See* section 214(i)(1) of the Act; 8 C.F.R. § 214.2(h)(4)(ii) (defining the term "specialty occupation").

The petitioner in this matter indicated that the beneficiary was the first individual employed to fill the proffered position. In that regard, the petitioner requests that we take note that the beneficiary was previously approved for H-1B classification. Upon review of the record of proceeding in this matter, the petitioner has not established eligibility for H-1B classification. We find that if the previous nonimmigrant petition was approved based on the same unsupported assertions and inconsistent evidence that are contained in the current record, the approval would constitute material and gross error on the part of the director. We are not required to approve applications or petitions where eligibility has not been demonstrated, merely because of prior approvals that may have been erroneous. *See, e.g., Matter of Church Scientology International*, 19 I&N Dec. 593, 597 (Comm'r 1988). It would be absurd to suggest that USCIS or any agency must treat acknowledged errors as binding precedent. *Sussex Engg. Ltd. v. Montgomery*, 825 F.2d 1084, 1090 (6th Cir. 1987), *cert. denied*, 485 U.S. 1008 (1988). A prior approval does not compel the approval of a subsequent petition or relieve the petitioner of its burden to provide sufficient documentation to establish current eligibility for the benefit sought. 55 Fed. Reg. 2606, 2612 (Jan. 26, 1990). A prior approval also does not preclude USCIS from denying an extension of an original visa petition based on a reassessment of eligibility for the benefit sought. *See Texas A&M Univ. v. Upchurch*, 99 Fed. Appx.

¹⁰ Any such assertion would be undermined in this particular case by the fact that the petitioner indicated in the LCA that its proffered position is a comparatively low, entry-level position relative to others within the same occupation.

556, 2004 WL 1240482 (5th Cir. 2004). Furthermore, our authority over the service centers is comparable to the relationship between a court of appeals and a district court. Even if a service center director had approved nonimmigrant petitions on behalf of a beneficiary, we would not be bound to follow the contradictory decision of a service center. *Louisiana Philharmonic Orchestra v. INS*, 2000 WL 282785 (E.D. La.), *aff'd*, 248 F.3d 1139 (5th Cir. 2001), *cert. denied*, 122 S.Ct. 51 (2001).

As the record of proceeding does not include sufficient evidence demonstrating that the petitioner normally requires at least a bachelor's degree in a specific specialty or its equivalent for the proffered position, the petitioner has not satisfied the criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A)(3).

Next, we find that the evidence of record does not satisfy the criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A)(4), which requires the petitioner to establish that the nature of the proffered position's duties is so specialized and complex that the knowledge required to perform them is usually associated with the attainment of a baccalaureate or higher degree in the specific specialty or its equivalent.

In reviewing the record of proceeding under this criterion, and with regard to the described duties of the position proffered here, we find that the record of proceeding lacks sufficient, credible evidence establishing that the duties are so specialized and complex that the knowledge required to perform them is usually associated with the attainment of a bachelor's degree in a specific specialty, or the equivalent.

Finally, we find that both on its own terms and also in comparison with the three higher wage-levels that can be designated in an LCA, by the submission of an LCA certified for a wage-level I, the petitioner effectively attests that the proposed duties are of relatively low complexity as compared to others within the same occupational category. This fact is materially inconsistent with the level of complexity required by this criterion. That is it is not credible that the position is one with specialized and complex duties, as such a higher-level position would be classified as a Level IV position, requiring a significantly higher prevailing wage. It is incumbent upon the petitioner to resolve any inconsistencies in the record by independent objective evidence. Any attempt to explain or reconcile such inconsistencies will not suffice unless the petitioner submits competent objective evidence pointing to where the truth lies. *Matter of Ho*, 19 I&N Dec. 582, 591-92 (BIA 1988).

For all of these reasons, the evidence in the record of proceeding fails to establish that the proposed duties meet the specialization and complexity threshold at 8 C.F.R. § 214.2(h)(4)(iii)(A)(4).

As the evidence of record does not satisfy at least one of the criteria at 8 C.F.R. § 214.2(h)(4)(iii)(A), it cannot be found that the proffered position is a specialty occupation. Accordingly, the appeal will be dismissed and the petition will be denied on this basis.

V. CONCLUSION AND ORDER

As set forth above, we agree with the director's findings that the petitioner failed to demonstrate that the proffered position qualifies for classification as a specialty occupation. Accordingly, the director's decision will not be disturbed.

In visa petition proceedings, it is the petitioner's burden to establish eligibility for the immigration benefit sought. Section 291 of the Act, 8 U.S.C. § 1361; *Matter of Otiende*, 26 I&N Dec. 127, 128 (BIA 2013). Here, that burden has not been met.

ORDER: The appeal is dismissed. The petition is denied.
