(b)(6)

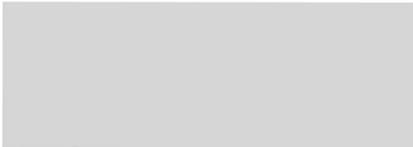

DATE: **MAR 31 2015** OFFICE: CALIFORNIA SERVICE CENTER FILE: 

IN RE: Petitioner:   
Beneficiary: 

PETITION: Petition for a Nonimmigrant Worker Pursuant to Section 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act, 8 U.S.C. § 1101(a)(15)(H)(i)(b)

ON BEHALF OF PETITIONER:

INSTRUCTIONS:

Enclosed please find the decision of the Administrative Appeals Office (AAO) in your case.

This is a non-precedent decision. The AAO does not announce new constructions of law nor establish agency policy through non-precedent decisions. If you believe the AAO incorrectly applied current law or policy to your case or if you seek to present new facts for consideration, you may file a motion to reconsider or a motion to reopen, respectively. Any motion must be filed on a Notice of Appeal or Motion (Form I-290B) within 33 days of the date of this decision. **Please review the Form I-290B instructions at <http://www.uscis.gov/forms> for the latest information on fee, filing location, and other requirements. See also 8 C.F.R. § 103.5. Do not file a motion directly with the AAO.**

Thank you

Ron Rosenberg  
Chief, Administrative Appeals Office

**DISCUSSION:** The service center director denied the nonimmigrant visa petition, and the matter is now before the Administrative Appeals Office (AAO) on appeal. The appeal will be dismissed. The petition will be denied.

## I. INTRODUCTION

On the Form I-129 visa petition, the petitioner describes itself as a 216-employee software solutions business<sup>1</sup> established in [REDACTED]. In order to employ the beneficiary in what it designates as a full-time business analyst position at a salary of \$67,080 per year<sup>2</sup> the petitioner seeks to classify her as a nonimmigrant worker in a specialty occupation pursuant to section 101(a)(15)(H)(i)(b) of the Immigration and Nationality Act (the Act), 8 U.S.C. § 1101(a)(15)(H)(i)(b).

The director denied the petition, concluding that the evidence of record does not demonstrate that the proffered position qualifies for classification as a specialty occupation.

The record of proceeding before us contains the following: (1) the Form I-129 and supporting documentation; (2) the director's request for additional evidence (RFE); (3) the petitioner's response to the RFE; (4) the director's letter denying the petition; and (5) the Form I-290B and supporting documentation.

Upon review of the entire record of proceeding, we find that the evidence of record does not overcome the director's ground for denying this petition. Accordingly, the appeal will be dismissed, and the petition will be denied.

## II. LAW

As noted, the director's sole basis for denying this petition was her determination that the proffered position is not a specialty occupation. To meet its burden of proof in establishing the proffered position as a specialty occupation, the petitioner must establish that the employment it is offering to the beneficiary meets the following statutory and regulatory requirements.

Section 214(i)(1) of the Immigration and Nationality Act (the Act), 8 U.S.C. § 1184(i)(1) defines the term "specialty occupation" as one that requires:

---

<sup>1</sup> The petitioner provided a North American Industry Classification System (NAICS) Code of 541511, "Custom Computer Programming Services." U.S. Dep't of Commerce, U.S. Census Bureau, North American Industry Classification System, 2012 NAICS Definition, "541511 Custom Computer Programming Services," <http://www.census.gov/cgi-bin/sssd/naics/naicsrch> (last visited March 26, 2015).

<sup>2</sup> The Labor Condition Application (LCA) submitted by the petitioner in support of the petition was certified for use with a job prospect within the "Management Analysts" occupational classification, SOC (O\*NET/OES) Code [REDACTED], and a Level I (entry-level) prevailing wage rate, the lowest of the four assignable wage-levels.

- (A) theoretical and practical application of a body of highly specialized knowledge, and
- (B) attainment of a bachelor's or higher degree in the specific specialty (or its equivalent) as a minimum for entry into the occupation in the United States.

The term "specialty occupation" is further defined at 8 C.F.R. § 214.2(h)(4)(ii) as:

An occupation which requires [(1)] theoretical and practical application of a body of highly specialized knowledge in fields of human endeavor including, but not limited to, architecture, engineering, mathematics, physical sciences, social sciences, medicine and health, education, business specialties, accounting, law, theology, and the arts, and which requires [(2)] the attainment of a bachelor's degree or higher in a specific specialty, or its equivalent, as a minimum for entry into the occupation in the United States.

Pursuant to 8 C.F.R. § 214.2(h)(4)(iii)(A), to qualify as a specialty occupation, the position must also meet one of the following criteria:

- (1) A baccalaureate or higher degree or its equivalent is normally the minimum requirement for entry into the particular position;
- (2) The degree requirement is common to the industry in parallel positions among similar organizations or, in the alternative, an employer may show that its particular position is so complex or unique that it can be performed only by an individual with a degree;
- (3) The employer normally requires a degree or its equivalent for the position; or
- (4) The nature of the specific duties [is] so specialized and complex that knowledge required to perform the duties is usually associated with the attainment of a baccalaureate or higher degree.

As a threshold issue, it is noted that 8 C.F.R. § 214.2(h)(4)(iii)(A) must logically be read together with section 214(i)(1) of the Act and 8 C.F.R. § 214.2(h)(4)(ii). In other words, this regulatory language must be construed in harmony with the thrust of the related provisions and with the statute as a whole. *See K Mart Corp. v. Cartier, Inc.*, 486 U.S. 281, 291 (1988) (holding that construction of language which takes into account the design of the statute as a whole is preferred); *see also COIT Independence Joint Venture v. Federal Sav. and Loan Ins. Corp.*, 489 U.S. 561 (1989); *Matter of W-F-*, 21 I&N Dec. 503 (BIA 1996). As such, the criteria stated in 8 C.F.R. § 214.2(h)(4)(iii)(A) should logically be read as being necessary but not necessarily sufficient to meet the statutory and regulatory definition of specialty occupation. To otherwise interpret this section as stating the necessary *and* sufficient conditions for meeting the definition of specialty occupation would result in particular positions meeting a condition under 8 C.F.R.

§ 214.2(h)(4)(iii)(A) but not the statutory or regulatory definition. *See Defensor v. Meissner*, 201 F.3d 384, 387 (5th Cir. 2000). To avoid this result, 8 C.F.R. § 214.2(h)(4)(iii)(A) must therefore be read as providing supplemental criteria that must be met in accordance with, and not as alternatives to, the statutory and regulatory definitions of specialty occupation.

As such and consonant with section 214(i)(1) of the Act and the regulation at 8 C.F.R. § 214.2(h)(4)(ii), U.S. Citizenship and Immigration Services (USCIS) consistently interprets the term "degree" in the criteria at 8 C.F.R. § 214.2(h)(4)(iii)(A) to mean not just any baccalaureate or higher degree, but one in a specific specialty that is directly related to the proffered position. *See Royal Siam Corp. v. Chertoff*, 484 F.3d 139, 147 (1st Cir. 2007) (describing "a degree requirement in a specific specialty" as "one that relates directly to the duties and responsibilities of a particular position"). Applying this standard, USCIS regularly approves H-1B petitions for qualified aliens who are to be employed as engineers, computer scientists, certified public accountants, college professors, and other such occupations. These professions, for which petitioners have regularly been able to establish a minimum entry requirement in the United States of a baccalaureate or higher degree in a specific specialty or its equivalent directly related to the duties and responsibilities of the particular position, fairly represent the types of specialty occupations that Congress contemplated when it created the H-1B visa category.

To determine whether a particular job qualifies as a specialty occupation, USCIS does not simply rely on a position's title. The specific duties of the proffered position, combined with the nature of the petitioning entity's business operations, are factors to be considered. USCIS must examine the ultimate employment of the alien, and determine whether the position qualifies as a specialty occupation. *See generally Defensor v. Meissner*, 201 F. 3d 384. The critical element is not the title of the position nor an employer's self-imposed standards, but whether the position actually requires the theoretical and practical application of a body of highly specialized knowledge, and the attainment of a baccalaureate or higher degree in the specific specialty as the minimum for entry into the occupation, as required by the Act.

### III. ANALYSIS

We will now address the director's finding that the proffered position is not a specialty occupation. Based upon a complete review of the record of proceeding, we agree with the director and find that the evidence of record fails to establish that the position as described constitutes a specialty occupation.

In the petitioner's letter dated March 30, 2014, the proffered position is described as follows:

- Performing various configuration engineering and business analysis activities for [REDACTED] products when required[;]

- Providing implementation services for [REDACTED] solutions involving business analysis & testing/deploying solutions for [REDACTED] products, multiple configuration activities within Salesforce and [REDACTED]
- Executing full cycle (end-to-end) contract management software projects with varying degrees of supervision, leading requirements gathering sessions and providing high level technical documentation, work under guidance from Project Managers and Solution Architects;
- Work with offshore teams as required; [and]
- Able to manage multiple activities across multiple projects simultaneously, communication between multiple teams.

In the petitioner's May 12, 2014 response to the director's April 28, 2014 RFE, the proffered position is described as follows:

The position of Business Analyst will involve a strong understanding of the Configure Price Quote domain. The Business Analyst will engage with the client and understand the client's current Contract Management process and document the business requirements and process flows. This would entail having client interviews and requirement gathering sessions. Based on the business requirements gathered the Business Analyst would perform hands-on business analysis, requirements gathering, solution design, configuration of the Contract Management package as required.

Business Analysts drive the design and development of the [REDACTED] solution ensuring that the solution is scalable and meets overall business requirements of the Client. As a part of driving the implementation, the business analyst would act as a liaison between Technical team, Functional team, Business Functions, and System Integrators. The business analyst would be involved in configuration and testing of the solution and would work with the offshore teams as required. The business analyst would also support the User acceptance testing of the solution. Business analysis tasks will represent 40% of the activities performed by the business analyst. Configuration, testing of the solution and implementation of the Contract Management solution will represent 60% of the tasks performed by the business analyst.

....

[The beneficiary's] specific job duties will be as follows:

- Perform various business analysis activities[;]
- Perform configuration engineering activities for [REDACTED] products when required[;]

- Provide implementation services for [REDACTED] solutions involving business analysis & testing/deploying solutions for [REDACTED] products, multiple configuration activities within Salesforce and [REDACTED];]
- Execute full cycle (end-to-end) contract management software projects with varying degrees of supervision, leading requirements gathering sessions and providing high level technical documentation, work under guidance from Project Managers and Solution Architects;
- Work with offshore teams as required; [and]
- Manage multiple activities across multiple projects simultaneously, communication between multiple teams.

Before reviewing the director's decision, we will first discuss why we will accord no probative value to the letter submitted on appeal from Professor [REDACTED] School of Business and Economics, [REDACTED]

In his July 14, 2014 letter, Professor [REDACTED] (1) describes the credentials that he asserts qualify him to assess the nature of the proffered position, (2) lists the duties proposed for the beneficiary, and (3) states his belief that the performance of the duties he lists requires "a Bachelor's Degree Business Administration, or a related degree."

Upon review, we find that Professor [REDACTED] letter does not constitute probative evidence of the proffered position satisfying any criterion described at 8 C.F.R. § 214.2(h)(4)(iii)(A).

Professor [REDACTED] does not provide any information with regard to studies, treatises, statistical surveys, authoritative industry sources, or any other relevant and authoritative sources of which he may have specialized knowledge that would merit deference or special weight to the particular opinion that he offers in this case, other than his references to the U.S. Department of Labor's (DOL) *Occupational Outlook Handbook* and the DOL's Occupational Information Network (O\*NET OnLine), which we address below. Thus, we accord little to no weight to his position, degrees, academic history, or teaching duties as endowing him with specialized knowledge relevant to the particular matters upon which he here provides his opinion, namely, the educational requirements for the particular position proffered in this petition.

The letter is not accompanied by, and does not expressly state the full content of, whatever documentation and/or oral transmissions upon which it may have been based. For instance, Professor [REDACTED] does not indicate whether he visited the petitioner's business premises or communicated with anyone affiliated with the petitioner as to what the performance of the general list of duties he cites would actually require. Nor does Professor [REDACTED] articulate whatever familiarity he may have obtained regarding the particular content of the work products that the petitioner would require of the beneficiary. In short, while there is no standard formula or "bright line" rule for producing a persuasive opinion regarding the educational requirements of a particular position, a

person purporting to provide an expert evaluation of a particular position should establish greater knowledge of the particular position in question than Professor [REDACTED] has done here.

Nor does Professor [REDACTED] reference and discuss any studies, surveys, industry publications, other authoritative publications, or other sources of empirical information which he may have consulted in the course of whatever evaluative process he followed.

Furthermore, Professor [REDACTED] description of the position does not indicate that he considered, or was even aware of, the fact that the petitioner submitted an LCA certified for a wage-level that is only appropriate for a comparatively low, entry-level position relative to others within its occupation which, as discussed below, signifies that the beneficiary is only expected to possess a basic understanding of the occupation. In any event, he nowhere discusses this aspect of the proffered position. We consider this a significant omission, in that it suggests an incomplete review of the position in question and a faulty factual basis for his ultimate conclusion as to the educational requirements of the position at issue.

As noted earlier, the LCA submitted by the petitioner in support of the instant position was certified for use with a job prospect within the "Management Analysts" occupational category, SOC (O\*NET/OES) Code [REDACTED], and a Level I (entry-level) prevailing wage rate, the lowest of the four assignable wage-levels. The *Prevailing Wage Determination Policy Guidance* issued by DOL states the following with regard to Level I wage rates:

**Level I** (entry) wage rates are assigned to job offers for beginning level employees who have only a basic understanding of the occupation. These employees perform routine tasks that require limited, if any, exercise of judgment. The tasks provide experience and familiarization with the employer's methods, practices, and programs. The employees may perform higher level work for training and developmental purposes. These employees work under close supervision and receive specific instructions on required tasks and results expected. Their work is closely monitored and reviewed for accuracy. Statements that the job offer is for a research fellow, a worker in training, or an internship are indicators that a Level I wage should be considered.<sup>3</sup>

The proposed duties' level of complexity, uniqueness, and specialization, as well as the level of independent judgment and occupational understanding required to perform them, are questionable, as the petitioner submitted an LCA certified for a Level I, entry-level position. A Level I wage is only appropriate for a position requiring only "a basic understanding of the occupation" expected of a "worker in training" or an individual performing an "internship." That designation indicates further that the beneficiary will only be expected to "perform routine tasks that require limited, if any,

<sup>3</sup> U.S. Dep't of Labor, Emp't & Training Admin., *Prevailing Wage Determination Policy Guidance*, Nonagric.Immigration Programs (rev. Nov. 2009), available at [http://www.foreignlaborcert.doleta.gov/pdf/NPWHC\\_Guidance\\_Revised\\_11\\_2009.pdf](http://www.foreignlaborcert.doleta.gov/pdf/NPWHC_Guidance_Revised_11_2009.pdf)

exercise of judgment."<sup>4</sup> The LCA's wage-level, therefore, indicates that the proffered position is actually a low-level, entry position relative to others within the same occupation. In accordance with the relevant DOL explanatory information on wage levels, this wage rate indicates that the beneficiary is only required to possess a basic understanding of the occupation; that she will be expected to perform routine tasks requiring limited, if any, exercise of judgment; that she will be closely supervised and her work closely monitored and reviewed for accuracy; and that she will receive specific instructions on required tasks and expected results.

Professor [REDACTED] omission of such an important factor as the LCA wage-level significantly diminishes the evidentiary value of his assertions, particularly his assertions regarding the "complex and specialized" nature of the beneficiary's proposed job duties.

Finally, Professor [REDACTED] finds that the proffered position requires "a Bachelor's Degree Business Administration, or a related degree." However, the evidence of record must demonstrate that the proffered position requires a precise and specific course of study that relates directly and closely to the position in question. Since there must be a close correlation between the required specialized studies and the position, the requirement of a degree with a generalized title, such as business administration, without further specification, does not establish the position as a specialty occupation. *Cf. Matter of Michael Hertz Associates*, 19 I&N Dec. 558 (Comm'r 1988).

In addition to proving that a job requires the theoretical and practical application of a body of specialized knowledge as required by section 214(i)(1) of the Act, a petitioner must also establish that the position requires the attainment of a bachelor's or higher degree in a specialized field of study or its equivalent. As explained above, USCIS interprets the supplemental degree requirement at 8 C.F.R. § 214.2(h)(4)(iii)(A) as requiring a degree in a specific specialty that is directly related to the proffered position. USCIS has consistently stated that, although a general-purpose bachelor's degree, such as a degree in business administration, may be a legitimate prerequisite for a particular position, requiring such a degree, without more, will not justify a finding that a particular position qualifies for classification as a specialty occupation. *See Royal Siam Corp. v. Chertoff*, 484 F.3d at 147.

We may, in our discretion, use as advisory opinion statements submitted as expert testimony. However, where an opinion is not in accord with other information or is in any way questionable, we are not required to accept or may give less weight to that evidence. *Matter of Caron International*, 19 I&N Dec. 791 (Comm'r 1988).

For all of these reasons, we find that Professor [REDACTED] letter is not probative evidence towards satisfying any criterion set forth at 8 C.F.R. § 214.2(h)(4)(iii)(A). For the sake of economy, we hereby incorporate the above discussion and findings into its analysis of each of the criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A).

<sup>4</sup> *Id.*

We will now discuss the application of each supplemental, alternative criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A) to the evidence in this record of proceeding.

We will first discuss the criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A)(1), which is satisfied by establishing that a baccalaureate or higher degree, or its equivalent, in a specific specialty is normally the minimum requirement for entry into the particular position that is the subject of the petition.

We recognize the *Handbook* as an authoritative source on the duties and educational requirements of the wide variety of occupations it addresses.<sup>5</sup> As noted above, the LCA that the petitioner submitted in support of this petition was certified for a job offer falling within the "Management Analysts" occupational category.

The *Handbook* states the following with regard to the duties of positions falling within the "Management Analysts" occupational categories:

Management analysts, often called management consultants, propose ways to improve an organization's efficiency. They advise managers on how to make organizations more profitable through reduced costs and increased revenues.

#### **Duties**

Management analysts typically do the following:

- Gather and organize information about the problem to be solved or the procedure to be improved
- Interview personnel and conduct on-site observations to determine the methods, equipment, and personnel that will be needed
- Analyze financial and other data, including revenue, expenditure, and employment reports
- Develop solutions or alternative practices
- Recommend new systems, procedures, or organizational changes
- Make recommendations to management through presentations or written reports
- Confer with managers to ensure that the changes are working

<sup>5</sup> The *Handbook*, which is available in printed form, may also be accessed online at <http://www.stats.bls.gov/oco/>. Our references to the *Handbook* are from the 2014-15 edition available online.

Although some management analysts work for the organization that they are analyzing, most work as consultants on a contractual basis.

Whether they are self-employed or part of a large consulting company, the work of a management analyst may vary from project to project. Some projects require a team of consultants, each specializing in one area. In other projects, consultants work independently with the client organization's managers.

Management analysts often specialize in certain areas, such as inventory management or reorganizing corporate structures to eliminate duplicate and nonessential jobs. Some consultants specialize in a specific industry, such as healthcare or telecommunications. In government, management analysts usually specialize by type of agency.

Organizations hire consultants to develop strategies for entering and remaining competitive in the electronic marketplace.

Management analysts who work on contract may write proposals and bid for jobs. Typically, an organization that needs the help of a management analyst solicits proposals from a number of consultants and consulting companies that specialize in the needed work. Those who want the work must then submit a proposal by the deadline that explains how they will do the work, who will do the work, why they are the best consultants to do the work, what the schedule will be, and how much it will cost. The organization that needs the consultants then selects the proposal that best meets its needs and budget.

U.S. Dep't of Labor, Bureau of Labor Statistics, *Occupational Outlook Handbook*, 2014-15 ed., "Management Analysts," <http://www.bls.gov/ooh/business-and-financial/management-analysts.htm#tab-2> (last visited March 26, 2015).

The *Handbook* states the following with regard to the educational requirements necessary for entrance into positions within this occupational category:

Most management analysts have at least a bachelor's degree. The Certified Management Consultant (CMC) designation may improve job prospects.

### **Education**

A bachelor's degree is the typical entry-level requirement for management analysts. However, some employers prefer to hire candidates who have a master's degree in business administration (MBA).

Few colleges and universities offer formal programs in management consulting. However, many fields of study provide a suitable education because of the range of

areas that management analysts address. Common fields of study include business, management, economics, political science and government, accounting, finance, marketing, psychology, computer and information science, and English.

Analysts also routinely attend conferences to stay up to date on current developments in their field.

### **Licenses, Certifications, and Registrations**

The Institute of Management Consultants USA (IMC USA) offers the Certified Management Consultant (CMC) designation to those who meet minimum levels of education and experience, submit client reviews, and pass an interview and exam covering the IMC USA's Code of Ethics. Management consultants with a CMC designation must be recertified every 3 years. Management analysts are not required to get certification, but it may give jobseekers a competitive advantage.

### **Work Experience in Related Occupation**

Many analysts enter the occupation with several years of work experience. Organizations that specialize in certain fields typically try to hire candidates who have experience in those areas. Typical work backgrounds include management, human resources, and information technology.

### **Advancement**

As consultants gain experience, they often take on more responsibility. At the senior level, consultants may supervise teams working on more complex projects and become more involved in seeking out new business. Those with exceptional skills may eventually become partners in their consulting organization and focus on attracting new clients and bringing in revenue. Senior consultants who leave their consulting company often move to senior management positions at nonconsulting organizations.

### **Important Qualities**

**Analytical skills.** Management analysts must be able to interpret a wide range of information and use their findings to make proposals.

**Communication skills.** Management analysts must be able to communicate clearly and precisely in both writing and speaking. Successful analysts also need good listening skills to understand the organization's problems and propose appropriate solutions.

**Interpersonal skills.** Management analysts must work with managers and other employees of the organizations where they provide consulting services. They should work as a team toward achieving the organization's goals.

**Problem-solving skills.** Management analysts must be able to think creatively to solve clients' problems. Although some aspects of different clients' problems may be similar, each situation is likely to present unique challenges for the analyst to solve.

**Time-management skills.** Management analysts often work under tight deadlines and must use their time efficiently to complete projects on time.

*Id.* at <http://www.bls.gov/ooh/business-and-financial/management-analysts.htm#tab-4> (last visited March 26, 2015).

In general, provided the specialties are closely related, e.g., chemistry and biochemistry, a minimum of a bachelor's or higher degree in more than one specialty is recognized as satisfying the "degree in the specific specialty (or its equivalent)" requirement of section 214(i)(1)(B) of the Act. In such a case, the required "body of highly specialized knowledge" would essentially be the same. Since there must be a close correlation between the required "body of highly specialized knowledge" and the position, however, a minimum entry requirement of a degree in two disparate fields, such as philosophy and engineering, for example, would not meet the statutory requirement that the degree be "in *the* specific specialty (or its equivalent)," unless the petitioner establishes how each field is directly related to the duties and responsibilities of the particular position such that the required body of highly specialized knowledge is essentially an amalgamation of these different specialties.<sup>6</sup> Section 214(i)(1)(B) of the Act (emphasis added).

Here, the *Handbook* reports that "...many fields of study provide a suitable education because of the range of areas that management analysts address. Common fields of study include business, management, economics, political science and government, accounting, finance, marketing, psychology, computer and information science, and English." Here and as indicated above, the petitioner, who bears the burden of proof in this proceeding, fails to establish that business, management, economics, political science and government, accounting, finance, marketing, psychology, computer and information science, and English are closely related fields. Absent this evidence, it cannot be found that the particular position proffered in this matter has a normal minimum entry requirement of a bachelor's or higher degree in a specific specialty or its equivalent under the petitioner's own standards. Accordingly, as the evidence of record fails to establish a standard, minimum requirement of at least a bachelor's degree *in a specific specialty* or its

<sup>6</sup> Whether read with the statutory "the" or the regulatory "a," both readings denote a singular "specialty." Section 214(i)(1)(B) of the Act; 8 C.F.R. § 214.2(h)(4)(ii). Still, we do not so narrowly interpret these provisions to exclude positions from qualifying as specialty occupations if they permit, as a minimum entry requirement, degrees in more than one closely related specialty. As just stated, this also includes even seemingly disparate specialties provided the evidence of record establishes how each acceptable, specific field of study is directly related to the duties and responsibilities of the particular position.

equivalent for entry into the particular position, it does not support the proffered position as being a specialty occupation and, in fact, supports the opposite conclusion.

Therefore, absent evidence of a direct relationship between the claimed degrees required and the duties and responsibilities of the position, it cannot be found that the proffered position requires anything more than a general bachelor's degree. As explained above, USCIS interprets the degree requirement at 8 C.F.R. § 214.2(h)(4)(iii)(A) to require a degree in a specific specialty that is directly related to the proposed position. Again, USCIS has consistently stated that, although a general-purpose bachelor's degree, such as a degree in business administration, may be a legitimate prerequisite for a particular position, requiring such a degree, without more, will not justify a finding that a particular position qualifies for classification as a specialty occupation. See *Royal Siam Corp. v. Chertoff*, 484 F.3d at 147.

Furthermore, we note that the *Handbook* states only that "most" management analysts have at least a bachelor's degree. The first definition of "most" in *Webster's New College Dictionary* 731 (Third Edition, Hough Mifflin Harcourt 2008) is "[g]reatest in number, quantity, size, or degree." As such, if merely 51% of management analyst positions require at least a bachelor's degree in one of the fields mentioned or a closely related field, it could be said that "most" management analyst positions require such a degree. It cannot be found, therefore, that a particular degree requirement for "most" positions in a given occupation equates to a normal minimum entry requirement for that occupation, much less for the particular position proffered by the petitioner. Instead, a normal minimum entry requirement is one that denotes a standard entry requirement but recognizes that certain, limited exceptions to that standard may exist. To interpret this provision otherwise would run directly contrary to the plain language of the Act, which requires in part "attainment of a bachelor's or higher degree in the specific specialty (or its equivalent) as a minimum for entry into the occupation in the United States." § 214(i)(1) of the Act.

When reviewing the *Handbook*, it also must be noted that the petitioner designated the proffered position as a Level I (entry level) position on the LCA.<sup>7</sup> The wage levels are defined in DOL's "Prevailing Wage Determination Policy Guidance."<sup>8</sup> A Level I wage rate is described as follows:

<sup>7</sup> Wage levels are determined only after selecting the most relevant O\*NET code classification. Then, a prevailing wage determination is made by selecting one of four wage levels for an occupation based on a comparison of the employer's job requirements to the occupational requirements, including tasks, knowledge, skills, and specific vocational preparation (education, training and experience) generally required for acceptable performance in that occupation.

<sup>8</sup> Prevailing wage determinations start with a Level I (entry) and progress to a wage that is commensurate with that of a Level II (qualified), Level III (experienced), or Level IV (fully competent) after considering the job requirements, experience, education, special skills/other requirements and supervisory duties. Factors to be considered when determining the prevailing wage level for a position include the complexity of the job duties, the level of judgment, the amount and level of supervision, and the level of understanding required to perform the job duties. DOL emphasizes that these guidelines should not be implemented in a mechanical fashion and that the wage level should be commensurate with the complexity of the tasks, independent judgment required, and amount of close supervision received.

**Level I** (entry) wage rates are assigned to job offers for beginning level employees who have only a basic understanding of the occupation. These employees perform routine tasks that require limited, if any, exercise of judgment. The tasks provide experience and familiarization with the employer's methods, practices, and programs. The employees may perform higher level work for training and developmental purposes. These employees work under close supervision and receive specific instructions on required tasks and results expected. Their work is closely monitored and reviewed for accuracy. Statements that the job offer is for a research fellow, a worker in training, or an internship are indicators that a Level I wage should be considered.

See U.S. Dep't of Labor, Emp't & Training Admin., *Prevailing Wage Determination Policy Guidance*, Nonagric. Immigration Programs (rev. Nov. 2009), available at [http://www.foreignlaborcert.doleta.gov/pdf/NPWHC\\_Guidance\\_Revised\\_11\\_2009.pdf](http://www.foreignlaborcert.doleta.gov/pdf/NPWHC_Guidance_Revised_11_2009.pdf).

Thus, in designating the proffered position at a Level I wage, the petitioner has indicated that the proffered position is a comparatively low, entry-level position relative to others within the occupation. That is, in accordance with the relevant DOL explanatory information on wage levels, this wage rate indicates that the beneficiary is only required to have a basic understanding of the occupation and carries expectations that the beneficiary perform routine tasks that require limited, if any, exercise of judgment; that she would be closely supervised; that her work would be closely monitored and reviewed for accuracy; and that she would receive specific instructions on required tasks and expected results. Based upon the petitioner's designation of the proffered position as a Level I (entry) position, it does not appear that the beneficiary will be expected to serve in a senior or leadership role. As noted above, according to DOL guidance, a statement that the job offer is for a research fellow, worker in training or an internship is indicative that a Level I wage should be considered.

For all of these reasons, the *Handbook* does not support the assertion that at least a bachelor's degree in a specific specialty, or its equivalent, is normally the minimum requirement for this position, and thus does not support the proffered position as being a specialty occupation.

The materials from O\*NET OnLine also fail to establish that the proffered position satisfies the first criterion described at 8 C.F.R. § 214.2(h)(4)(iii)(A). O\*NET OnLine does not state a requirement for a bachelor's degree. Rather, it assigns this occupation a Job Zone "Four" rating, which groups it among occupations of which "most," but not all, "require a four-year bachelor's degree." Further, O\*NET OnLine does not indicate that four-year bachelor's degrees required by Job Zone Four occupations must be in a specific specialty directly related to the occupation. Therefore, O\*NET OnLine information is not probative of the proffered position being a specialty occupation.

Nor does the record of proceeding contain any persuasive documentary evidence from any other relevant authoritative source establishing that the proffered position's inclusion within any of these occupational categories is sufficient in and of itself to establish the proffered position as, in the

words of this criterion, a "particular position" for which "[a] baccalaureate or higher degree or its equivalent is normally the minimum requirement for entry."

Finally, the petitioner states in its March 30, 2014 letter that the proffered position requires a bachelor's degree in business, management, economics or a related field. However, a petitioner must demonstrate that the proffered position requires a precise and specific course of study that relates directly and closely to the position in question. Since there must be a close correlation between the required specialized studies and the position, the requirement of a degree with a generalized title, such as business, without further specification, does not establish the position as a specialty occupation. *Cf. Matter of Michael Hertz Associates*, 19 I&N Dec. 558 (Comm'r 1988). The petitioner's assertion that duties of the proffered position can be performed by an individual with a bachelor's degree in business administration, with no further specialization, does not establish the position as a specialty occupation.

As the evidence in the record of proceeding does not establish that at least a baccalaureate degree in a specific specialty, or its equivalent, is normally the minimum requirement for entry into the particular position that is the subject of this petition, the petitioner has not satisfied the criterion described at 8 C.F.R. § 214.2(h)(4)(iii)(A)(1).

Next, we find that the evidence of record does not satisfy the first of the two alternative prongs of 8 C.F.R. § 214.2(h)(4)(iii)(A)(2). This prong alternatively calls for a petitioner to establish that a requirement of a bachelor's or higher degree in a specific specialty, or its equivalent, is common (1) to the petitioner's industry; and (2) for positions within that industry that are both: (a) parallel to the proffered position, and (b) located in organizations that are similar to the petitioner.

In determining whether there is such a common degree requirement, factors often considered by USCIS include: whether the *Handbook* reports that the industry requires a degree; whether the industry's professional association has made a degree a minimum entry requirement; and whether letters or affidavits from firms or individuals in the industry attest that such firms "routinely employ and recruit only degreed individuals." *See Shanti, Inc. v. Reno*, 36 F. Supp. 2d at 1165 (D.Minn. 1999) (quoting *Hird/Blaker Corp. v. Sava*, 712 F. Supp. 1095, 1102 (S.D.N.Y. 1989)).

Here and as already discussed, the petitioner has not established that its proffered position falls within an occupational category for which the *Handbook* reports an industry-wide requirement for at least a bachelor's degree in a specific specialty or its equivalent.

The petitioner has submitted job advertisements from a financial services business, a biotechnology/pharmaceutical business, an internet services/advertising/public relations services business and an engineering solutions business. These job listings are not from organizations that are similar to the petitioner. The advertisements submitted by the petitioner do not establish that these employers are "similar" to the petitioner in size, scope, and scale of operations, business efforts, expenditures, or in any other relevant extent. Furthermore, most of the advertisements require experience, ranging from three to ten years. However, as noted above the petitioner submitted an LCA certified for a Level I, entry-level position, therefore indicating that the positions are not

parallel. The advertisements do not establish that the positions are the same or similar to the proffered position, and do not satisfy this prong of 8 C.F.R. § 214.2(h)(4)(iii)(A)(2).<sup>9</sup>

More importantly, most of these advertisements fail to state a requirement for a bachelor's degree in a specific specialty, or the equivalent.

Nor does the record contain any submissions from professional associations in the petitioner's industry attesting that individuals employed in positions parallel to the proffered position are routinely required to have a minimum of a bachelor's degree in a specific specialty or its equivalent for entry into those positions.

Therefore, the evidence of record does not satisfy the first of the two alternative prongs described at 8 C.F.R. § 214.2(h)(4)(iii)(A)(2), as it does not establish a requirement for at least a bachelor's degree in a specific specialty or its equivalent that is common (1) to the petitioner's industry and (2) for positions in that industry that are both (a) parallel to the proffered position and (b) located in organizations that are similar to the petitioner.

Next, we find that the evidence of record does not satisfy the second alternative prong of 8 C.F.R. § 214.2(h)(4)(iii)(A)(2), which provides that "an employer may show that its particular position is so complex or unique that it can be performed only by an individual with a degree."

In this particular case, the evidence of record does not credibly demonstrate that the duties the beneficiary will perform on a day-to-day basis constitute a position so complex or unique that it can only be performed by a person with at least a bachelor's degree in a specific specialty or its equivalent.

The record of proceeding does not contain evidence establishing relative complexity or uniqueness as aspects of the proffered position, let alone that the position is so complex or unique as to require the theoretical and practical application of a body of highly specialized knowledge such that a person with a bachelor's or higher degree in a specific specialty or its equivalent is required to perform the duties of that position. Rather, we find, that, as reflected in this decision's earlier quotation of duty descriptions from the record of proceeding, the evidence of record does not distinguish the proffered position from other positions falling within the "Management Analysts" occupational category, which, the *Handbook* indicates, do not necessarily require a person with at least a bachelor's degree in a specific specialty or its equivalent to enter those positions.

---

<sup>9</sup> USCIS "must examine each piece of evidence for relevance, probative value, and credibility, both individually and within the context of the totality of the evidence, to determine whether the fact to be proven is probably true." *Matter of Chawathe*, 25 I&N Dec. 369, 376 (AAO 2010). As just discussed, the petitioner has failed to establish the relevance of the job advertisements submitted to the position proffered in this case. Even if their relevance had been established, the petitioner still fails to demonstrate what inferences, if any, can be drawn from these few job postings with regard to determining the common educational requirements for entry into parallel positions in similar organizations in the same industry. See generally Earl Babbie, *The Practice of Social Research* 186-228 (1995).

The statements of counsel, the petitioner, and Professor [REDACTED] with regard to the claimed complex and unique nature of the proffered position are acknowledged. However, those assertions are undermined by the fact that the petitioner submitted an LCA certified for a job prospect with a wage-level that is only appropriate for a comparatively low, entry-level position relative to others within its occupation. We incorporate here by reference and reiterate our earlier discussion regarding the LCA and its indication that the petitioner would be paying a wage-rate that is only appropriate for a low-level, entry position relative to others within the occupation, as this factor is inconsistent with the relative complexity and uniqueness required to satisfy this criterion. Based upon the wage rate selected by the petitioner, the beneficiary is only required to have a basic understanding of the occupation. Moreover, that wage rate indicates that the beneficiary will perform routine tasks requiring limited, if any, exercise of independent judgment; that the beneficiary's work will be closely supervised and monitored; that she will receive specific instructions on required tasks and expected results; and that her work will be reviewed for accuracy.

Accordingly, given the *Handbook's* indication that typical positions located within the "Management Analysts" occupational category do not require at least a bachelor's degree in a specific specialty, or the equivalent, for entry, it is not credible that a position involving limited, if any, exercise of independent judgment, close supervision and monitoring, receipt of specific instructions on required tasks and expected results, and close review *would* contain such a requirement.

The evidence of record therefore fails to establish how the beneficiary's responsibilities and day-to-day duties comprise a position so complex or unique that the position can be performed only by an individual with at least a bachelor's degree in a specific specialty or its equivalent.

Consequently, as it has not been shown that the particular position for which this petition was filed is so complex or unique that it can only be performed by a person with at least a bachelor's degree in a specific specialty or its equivalent, the evidence of record does not satisfy the second alternative prong of 8 C.F.R. § 214.2(h)(4)(iii)(A)(2).

We turn next to the criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A)(3), which entails an employer demonstrating that it normally requires a bachelor's degree in a specific specialty or its equivalent for the position.

Our review of the record of proceeding under this criterion necessarily includes whatever evidence the petitioner has submitted with regard to its past recruiting and hiring practices and employees who previously held the position in question.

To satisfy this criterion, the record must contain documentary evidence demonstrating that the petitioner has a history of requiring the degree or degree equivalency, in a specific specialty, in its prior recruiting and hiring for the position. Additionally, the record must establish that a petitioner's

imposition of a degree requirement is not merely a matter of preference for high-caliber candidates but is necessitated by the performance requirements of the proffered position.<sup>10</sup>

Were USCIS limited solely to reviewing a petitioner's claimed self-imposed requirements, then any individual with a bachelor's degree could be brought to the United States to perform any occupation as long as the employer artificially created a token degree requirement, whereby all individuals employed in a particular position possessed a baccalaureate or higher degree in the specific specialty or its equivalent. *See Defensor v. Meissner*, 201 F. 3d at 387. In other words, if a petitioner's assertion of a particular degree requirement is not necessitated by the actual performance requirements of the proffered position, the position would not meet the statutory or regulatory definition of a specialty occupation. *See* section 214(i)(1) of the Act; 8 C.F.R. § 214.2(h)(4)(ii) (defining the term "specialty occupation").

The director's April 28, 2014 RFE specifically requested the petitioner to document its past recruiting and hiring history with regard to the proffered position. The third section of the RFE includes the following specific requests for such documentation:

- **Position Announcement:** To support the petitioner's contention that the position is a "specialty occupation," provide copies of the petitioner's present and past job vacancy announcements. The petitioner may also provide classified advertisements soliciting for the current position, showing that the petitioner requires its applicants to have a minimum of a baccalaureate or higher degree or its equivalent in a specific specialty.
- **Past Employment Practices:** Provide evidence to establish that the petitioner has a past practice of hiring persons with a baccalaureate degree, or higher[,] in a specific specialty, to perform the duties of the proffered position. Indicate the number of persons employed in similar positions. Further, submit documentation to establish how many of those persons have a baccalaureate degree or higher and the particular field of study in which the degree was attained. Documentation should include copies of transcripts and pay records or Quarterly Wage Reports for the employees claimed to hold a baccalaureate degree in the specific field of study.

The record does not include the type of evidence mentioned in the RFE. While a first-time hiring for a position is certainly not a basis for precluding a position from recognition as a specialty occupation, it is unclear how an employer that has never recruited and hired for the position would be able to satisfy the criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A)(3), which requires a demonstration that it normally requires at least a bachelor's degree in a specific specialty or its equivalent for the

<sup>10</sup> Any such assertion would be undermined in this particular case by the fact that the petitioner indicated in the LCA that its proffered position is a comparatively low, entry-level position relative to others within the same occupation.

position.<sup>11</sup>

As the record of proceeding does not demonstrate that the petitioner normally requires at least a bachelor's degree in a specific specialty or its equivalent for the proffered position, it does not satisfy 8 C.F.R. § 214.2(h)(4)(iii)(A)(3).

Next, we find that the evidence of record does not satisfy the criterion at 8 C.F.R. § 214.2(h)(4)(iii)(A)(4), which requires the petitioner to establish that the nature of the proffered position's duties is so specialized and complex that the knowledge required to perform them is usually associated with the attainment of a baccalaureate or higher degree in the specific specialty or its equivalent.

In reviewing the record of proceeding under this criterion, we reiterate our earlier discussion regarding the *Handbook's* entries for positions falling within the "Management Analysts" occupational category. Again, the *Handbook* does not indicate that a bachelor's degree in a specific specialty, or the equivalent, is a standard, minimum requirement to perform the duties of such positions (to the contrary, it indicates precisely the opposite). With regard to the specific duties of the position proffered here, we find that the record of proceeding lacks sufficient, credible evidence establishing that they are so specialized and complex that the knowledge required to perform them is usually associated with the attainment of a bachelor's degree in a specific specialty, or the equivalent.

Finally, we find that both on its own terms and also in comparison with the three higher wage-levels that can be designated in an LCA, by the submission of an LCA certified for a Level I wage-level, the petitioner effectively attests that the proposed duties are of relatively low complexity as compared to others within the same occupational category. This fact is materially inconsistent with the level of complexity required by this criterion.

As earlier noted, the *Prevailing Wage Determination Policy Guidance* issued by the U.S. Department of Labor (DOL) states the following with regard to Level I wage rates:

**Level I** (entry) wage rates are assigned to job offers for beginning level employees who have only a basic understanding of the occupation. These employees perform routine tasks that require limited, if any, exercise of judgment. The tasks provide experience and familiarization with the employer's methods, practices, and programs. The employees may perform higher level work for training and developmental purposes. These employees work under close supervision and receive specific instructions on required tasks and results expected. Their work is closely monitored and reviewed for accuracy. Statements that the job offer is for a research fellow, a worker in training, or an internship are indicators that a Level I wage should be considered [emphasis in original].

<sup>11</sup> See also *Caremax Inc. v. Holder*, \_\_\_ F.Supp. 2d \_\_\_, 2014 WL 1493621 (N.D. Cal. 2014) ("If this is [the petitioner's] first-ever public relations specialist position, then the company cannot claim that it typically requires a bachelor's degree in English.")

U.S. Dep't of Labor, Emp't & Training Admin., *Prevailing Wage Determination Policy Guidance*, Nonagric. Immigration Programs (rev. Nov. 2009), available at [http://www.foreignlaborcert.doleta.gov/pdf/NPWHC\\_Guidance\\_Revised\\_11\\_2009.pdf](http://www.foreignlaborcert.doleta.gov/pdf/NPWHC_Guidance_Revised_11_2009.pdf).

The pertinent guidance from DOL, at page 7 of its *Prevailing Wage Determination Policy Guidance* describes the next higher wage-level as follows:

**Level II** (qualified) wage rates are assigned to job offers for qualified employees who have attained, either through education or experience, a good understanding of the occupation. They perform moderately complex tasks that require limited judgment. An indicator that the job request warrants a wage determination at Level II would be a requirement for years of education and/or experience that are generally required as described in the O\*NET Job Zones.

*Id.*

The above descriptive summary indicates that even this higher-than-designated wage level is appropriate for only "moderately complex tasks that require limited judgment." The fact that this higher-than-here-assigned, Level II wage-rate itself indicates performance of only "moderately complex tasks that require limited judgment," is very telling with regard to the relatively low level of complexity imputed to the proffered position by virtue of the petitioner's Level I wage-rate designation.

Further, we note the relatively low level of complexity that even this Level II wage-level reflects when compared with the two still-higher LCA wage levels, neither of which was designated on the LCA submitted to support this petition.

The aforementioned *Prevailing Wage Determination Policy Guidance* describes the Level III wage designation as follows:

**Level III** (experienced) wage rates are assigned to job offers for experienced employees who have a sound understanding of the occupation and have attained, either through education or experience, special skills or knowledge. They perform tasks that require exercising judgment and may coordinate the activities of other staff. They may have supervisory authority over those staff. A requirement for years of experience or educational degrees that are at the higher ranges indicated in the O\*NET Job Zones would be indicators that a Level III wage should be considered.

Frequently, key words in the job title can be used as indicators that an employer's job offer is for an experienced worker. . . .

*Id.*

The *Prevailing Wage Determination Policy Guidance* describes the Level IV wage designation as follows:

**Level IV** (fully competent) wage rates are assigned to job offers for competent employees who have sufficient experience in the occupation to plan and conduct work requiring judgment and the independent evaluation, selection, modification, and application of standard procedures and techniques. Such employees use advanced skills and diversified knowledge to solve unusual and complex problems. These employees receive only technical guidance and their work is reviewed only for application of sound judgment and effectiveness in meeting the establishment's procedures and expectations. They generally have management and/or supervisory responsibilities.

*Id.*

Here we again incorporate our earlier discussion and analysis regarding the implications of the petitioner's submission of an LCA certified for the lowest assignable wage-level. As already noted, by virtue of this submission, the petitioner effectively attested to DOL that the proffered position is a low-level, entry position relative to others within the same occupation, and that, as clear by comparison with DOL's instructive comments about the next higher level (Level II), the proffered position did not even involve "moderately complex tasks that require limited judgment" (the level of complexity noted for the next higher wage-level, Level II).

For all of these reasons, the evidence in the record of proceeding fails to establish that the proposed duties meet the specialization and complexity threshold at 8 C.F.R. § 214.2(h)(4)(iii)(A)(4).

As the evidence of record does not satisfy at least one of the criteria at 8 C.F.R. § 214.2(h)(4)(iii)(A), it cannot be found that the proffered position is a specialty occupation.

#### IV. CONCLUSION AND ORDER

As set forth above, we agree with the director's findings that the evidence of record fails to demonstrate that the proffered position qualifies for classification as a specialty occupation.<sup>12</sup> Accordingly, the director's decision will not be disturbed.

<sup>12</sup> Because this issue precludes approval of the petition, we will not discuss any of the additional deficiencies we have observed in our *de novo* review of this matter, except to note that in the event the issues discussed in this decision are overcome, the following issues must also be explored and resolved before the petition can be approved: (1) whether the LCA submitted in support of this petition actually corresponds to it; and (2) whether the beneficiary will be an "employee" in an "employer-employee relationship" with a "United States employer."

(b)(6)

*NON-PRECEDENT DECISION*

Page 22

In visa petition proceedings, it is the petitioner's burden to establish eligibility for the immigration benefit sought. Section 291 of the Act, 8 U.S.C. § 1361; *Matter of Otiende*, 26 I&N Dec. 127, 128 (BIA 2013). Here, that burden has not been met.

**ORDER:** The appeal is dismissed. The petition is denied.
